Congressional Record

PROCEEDINGS AND DEBATES OF THE 98th CONGRESS, FIRST SESSION

SENATE—*Thursday, June 23, 1983*

(Legislative day of Monday, June 20, 1983)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Gracious Father in Heaven, we pray for those among us who are hurting. We commend to Thy gracious love and care those who are ill, who are discouraged, who are angry or frustrated, or exhausted, or who feel rejected and ignored. We pray for staff who feel manipulated, or put down, or discriminated against.

We pray for our families who are hurting; for children who feel they are less important to their fathers than the Senate; for wives who suffer protracted loneliness or who are made to feel they are aliens in their husbands' offices; for fathers stretched between duty on the Hill and love in the home. We pray for those having financial difficulty or who are suffering other kinds of stress and pressure. And Father, we remember the families of the two journalists who were killed in Honduras. Comfort them with Thy peace and love. Dear Father, touch all who hurt with Thy gracious comfort, peace, and healing. In the name of the Great Physician, we pray. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

SUMMER SOLSTICE DISRUPTS SUMMER SOLACE

Mr. BAKER. Mr. President, this is the first week of summer. I do not clearly recall if we had any spring. In any event, it is nice to know that summer has arrived and with it, inevitably, the realization that we go downhill from here, as the days grow shorter from this day forward until mid-December.

Mr. President, it also means that the Capitol Building, to say nothing of the city as a whole, will look forward to the visitation of countless millions of visitors.

I always count it a great tribute to the solidity and future of American democracy that so many Americans want to come to this city and see the monumental structures, the Capitol, the White House, the Mall, and to travel through those spaces, including the corridors of the Capitol Building itself.

Sometimes the throng of tourists through the Capitol corridors can become an impediment to progress. Sometimes, even, it can be an assault on one's ego.

The other day, I was walking from this Chamber back to my office, and an excited group stopped me and someone said, "Say, I know who you are. Don't tell me. Let me guess. Let me remember. I'll get it in a minute."

I waited for several seconds, and finally I said, "Howard Baker"; and he said, "No, that's not it." [Laughter.]

I tried unsuccessfully to convince them that was it.

Then they wanted to know if I was anybody important, and I told them I was not. [Laughter.]

However, it is good to have them here, Mr. President, because it is a tribute to their participation in the business of government.

It is really a pleasure to welcome the American citizenry to these precincts which we call our office and home, so that they may see from this gallery and observe from these corridors and hallways how representative government works in the people's branch.

SENATE SCHEDULE

Mr. BAKER. Mr. President, it is my hope that today we can reach the legislative appropriations bill at 10:30 a.m. and as I indicated last evening, it is my intention to ask the Senate to proceed to the consideration of that measure at that time. I hope there will not be an objection, because it is imperative, I think, that we meet our obligation to consider and dispose of the appropriations bills, particularly since our companion body, the House of Representatives, has been so diligent and timely in sending us these regular appropriations bills so soon, relatively, which gives us an opportunity to treat with them so promptly. I hope we can do that. I hope we get to the legislative appropriations bill at 10:30 a.m. and that we can dispose of it today.

The chairman of that committee and the ranking minority member have done an absolutely extraordinary job in managing the two regular appropriations bills we have passed so far; and if their momentum continues into the legislative appropriations bill, it will add to their luster.

Mr. President, after the legislative appropriations bill is finished, if there is time, and if we can reach an agreement on it, I should like to proceed to the agriculture appropriations bill. That may be a little more complex, but it is another of the regular appropriations bills, and I should like to do it if we can. I urge Senators to consider that the leadership on this side will try to do that after we complete the legislative appropriations bill, if we finish it.

There is one other important matter that may be dealt with today. It is my understanding now that the House of Representatives has reversed the order and sequence of their proceedings today so that the conference report on the budget resolution will be taken up before the proposal on the cap of the third year of the tax cut. That may mean that we will have the budget conference report over here by late afternoon. If we do, I will consult first, of course, with the chairman of the Budget Committee and the ranking minority member about their preferences and desires. But if that meas-

ure reaches us in that way at that time and if the managers of the measure are agreeable, I would hope that we could go on to the budget conference report today. Today is Thursday, and it is the regular posted late evening. So if we can get to the budget conference report or if we need the time for one of the appropriations bills, Members should assume that we will be in late this evening.

We will continue in session tomorrow, Mr. President, unless we finish all three of those items. I will have a further announcement to make later, as that situation clarifies.

Once more I remind Senators that before this period is over and before we embark on the Fourth of July break, we have to do the remaining two appropriations bills that are on the calendar now—the agriculture appropriations bill and the legislative appropriations bill—the conference report on the budget resolution, the debate on the Hatch constitutional amendment dealing with abortion, the proposal to cap the third year of the tax cut, if that measure reaches us from the House of Representatives, and perhaps other matters.

That is a full schedule, so Senators should clear the decks and be ready to proceed on those matters when we can reach them.

Mr. President, that concludes my report to the Senate this morning. I am prepared to yield any remaining time to the minority leader, if he wishes.

Mr. BYRD. Mr. President, this side of the aisle is prepared to move to the legislative appropriations bill. If the distinguished majority leader would wish to ask for consent at this moment, he could get it, as far as this side of the aisle is concerned.

Mr. BAKER. I thank the Senator.

Mr. President, I would very much like to do that. However, just to make sure I am absolutely clear with my own clearance process, let me check that first and I will see if we can in the next few moments do that.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. TRIBLE). The minority leader is recognized.

Mr. BYRD. Mr. President, I thank the majority leader.

Mr. BYRD. Mr. President, I have no need for time so I yield it back to the majority leader if he wishes.

Mr. BAKER. I thank the minority leader.

Mr. President, I yield back the time so the Chair may commence the period for the transaction of routine morning business.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to exceed beyond 10:30 a.m., with statements therein limited to 2 minutes each.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant secretary of the Senate proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

WORLD HEALTH ORGANIZATION ON THE MANAGEMENT OF THE CASUALTIES IN A NUCLEAR WAR

Mr. PROXMIRE. Mr. President, on Tuesday of this week I reported to the Senate the World Health Organization's findings on the enormous number of casualties we could expect in a nuclear war, that is the number of persons who would be killed and those who would be injured. Today I report to the Senate on how the World Health Organization suggests we might, with our available medical resources, try to cope with the surviving victims, the injured, in the event of such a catastrophe.

The first tragic fact to recognize is that the devastation of hospital facilities, the death of doctors, nurses and other medical personnel and the immense number of seriously injured would mean that the vast majority of the injured could receive no medical attention at all.

The two sole instances when nuclear bombs were dropped on populated cities—Hiroshima and Nagasaki—offer the most practical examples of the difficulties. In Hiroshima all the hospitals within a kilometer of the hypocentre were totally destroyed and virtually everyone within them killed or injured; 93 percent of the nurses and 91 percent of the doctors were killed or injured. In Nagasaki the university hospital, which contained over 75 percent of the hospital beds and medical facilities in the city, was destroyed and 80 percent of its occupants killed or injured.

The World Health Organization also points to a study by U.S. Arms Control Agency in 1979 that took Boston as an example. What they found provides a real eye opener for what a nuclear war would do to our medical care facilities, and how literally naked of any medical protection we would find ourselves in the event of a nuclear catastrophe. This study found that a 1 megaton bomb burst over Boston would cause about 700,000 immediate deaths and similar number of injuries. That is about half the population would be killed or injured by that single bomb. If 50 percent of the 5,200 physicians in Boston survived to treat the 700,000 injured, it would take physicians more than 4 days working for 16 hours a day and devoting 15 minutes to each patient. Boston has some 13,000 hospital beds but they are in the urban target area and 38 of the 48 acute care hospitals would be destroyed or badly damaged so only about 2,000 beds would be left for the injured. As the WHO found in their report:

> The whole infrastructure required for dealing with serious injuries—operating rooms, nurses, blood, antibiotics, drugs, water supplies, electricity, telephones, heating, transport services would be in disarray. Surviving health workers would find it difficult to make their way to hospitals through streets endangered by radioactive fallout and obstructed by fires and rubble, and rescue workers would have similar difficulties in reaching and transporting victims.

The WHO report concludes: In this kind of nuclear disaster, "the capacity of the surviving medical personnel to provide adequate care or even merely to provide first aid and keep the victims alive, would be next to nil."

Mr. President, this is a terrible, morbid heart breaking story. Who wants to hear it? None of us. But as U.S. Senators we have a duty to think about and in fact to dwell on this grim prospect, and we have an even grimmer responsibility to bring these gruesome facts to the American people so all of us will recognize how imperative is our prime duty to push, and push hard, for an end to the arms race.

REMEMBERING "TERRIBLE JUNE DAYS"

Mr. PROXMIRE. Mr. President, June 15 marked the 43d anniversary of the "Terrible June Days" when the Soviet Union invaded and occupied the Baltic States of Estonia, Latvia, and Lithuania.

My distinguished colleague from Nebraska (Mr. ZORINSKY) recently spoke of this tragedy. The goal of the Soviet Union was the physical annihilation of these distinct cultures. Over 30,000 Lithuanians were deported or liquidated during a 4-day period in 1940. Between 1941 and 1951, approximately 700,000 Lithuanians faced such brutal treatment. The Soviet Union sought to extinguish all vestiges of Lithuanian tradition merely because they were different.

Evidence clearly shows that these acts were planned approximately 2 years before the first major tragedy occurred.

Such heinous events, however, are not limited to the history books. Reports of senseless torture, killings, and atrocities have recently come from every part of the world. According to a recent United Nations report, there

have been over 2 million unlawful executions in the past 15 years.

Events such as those in Lithuania clearly raise the specter of genocide.

We must not sit by passively while such atrocities take place. We must act now so that the rights of entire racial, religious, national, and ethnic groups are protected.

Mr. President, our position as a leader in the protection of human rights of all people necessitates that we participate in making genocide a punishable, international crime.

Just last week, former President Jimmy Carter cited the neglect of the U.S. Senate in ratifying the treaty. He said, "There is no way for us in this fat, rich, prosperous, safe country to realize the need throughout the world for a consistent human rights effort."

The fact that this body has not ratified the Genocide Convention is an embarrassment to our country. It is my hope that the horrible memory of the "Terrible June Days" will reaffirm the need for its immediate ratification.

Mr. President, I urge my colleagues to support this human rights document without further delay.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR STAR PRINT—S. 26

Mr. HELMS. Mr. President, I ask unanimous consent that there be a star print of S. 26, and I send to the desk a revised copy of S. 26 in the form in which it is to be printed.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CONSIDERATION OF H.R. 3135 TODAY

Mr. BAKER. Mr. President, earlier, the minority leader indicated to me that his clearance process was complete and they were prepared to agree that the Senate could go to the consideration of the legislative branch appropriations bill.

I have now completed clearance on this side. I ask unanimous consent that at 10:30 a.m., the Senate proceed to the consideration of Calendar Order 258, H.R. 3135.

Mr. BYRD. Mr. President, reserving the right to object—and I will not object—clearance has been given on this side.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE NEW ECONOMIC AGENDA

Mr. CRANSTON. Mr. President, from my work on Senate committees and consultations with economists and leaders of business and labor, I have followed with deep and growing concern the disturbing downward trends in productivity, balance of trade, and capital investment, and the upward surge in the national debt and unemployment.

The present crisis of the American economy is more fundamental and far-reaching than the Great Depression of the 1930's. We must examine the causes and identify the ways out of our deepening cycles of inflation, recession, and depression.

The need for a national economic strategy—and a strategy for each sector of our economy—is now clear. Without such a strategy, our economy will continue to flounder, and the quality of life in our country will decline. An economic strategy sets goals and priorities. It requires and reinforces long-term thinking and policymaking.

The economic strategy we need cannot be imposed by a President or Congress. It must develop from a new partnership of industry and Government, working in full consultation with our schools and universities and with labor and management, developing new forms of cooperation and decisionmaking and profit sharing.

Our chief goal must be an economy of strong and steady growth with low interest rates so that full employment and a balanced budget can both become a reality.

Multiplying all our economic problems and blocking their solution is the incredibly costly arms race. Two trillion dollars will be spent in an excessive 5-year military buildup if Ronald Reagan has his way. Until comprehensive mutual arms reductions are achieved, our national resources will continue to be consumed in military expenditures. A balanced budget will be our of reach, and we will face the double jeopardy of inflation and recession.

Since the problems of the economy and the arms race are thus directly connected, it is essential that our economic strategy be linked to a strategy for peace.

The single most crucial element for bringing about economic reconstruction in a country as large and diverse as ours is achieving coordination in the activities of all our economic institutions. If we are to agree on broad goals for economic reconstruction, and if we are to have forceful and coordinated action consistent with these goals at national, regional, and local levels, the adversarial relations that have characterized economic decisionmaking in this country for too long must be put aside.

To move us forward, we need a spirit of cooperation between business, labor, educational institutions, and government at all levels. New directions for our economy and economic institutions cannot be set by one sector in isolation from the others. The policies and programs necessary to impel both old and new industries forward cannot be imposed by Washington or extracted by coercion of one sector by another. These methods simply will not work in our society over the long haul.

Cooperative economic decisionmaking is not a panacea for meeting all the economic challenges we face, but it is a necessary first step. We will need leadership—from our corporations, labor unions, educational institutions, and government—bold enough to try new ways of working together.

NEW CONDITIONS OF ECONOMIC LIFE

We are in a period or economic change of the first magnitude. Most of our economic institutions did not anticipate these changes. Now that the new realities are upon us, many of our economic institutions have not yet successfully adjusted. The larger part of our economic difficulties derive from pervasive changes in the global economy and our domestic economy.

First. The American economy is tied in thousands of ways to the economies of other nations. The world has become so economically integrated and mutually dependent that cycles of growth and recessions supersede all national boundaries. Worldwide economic stagnation is currently so powerful that it is intensifying our domestic recession; our high interest rates and economic downturn make recovery more difficult for economies linked to ours. As a result of all this, revival of our domestic economy will be virtually impossible without taking steps to produce recovery on a much wider scale.

Second. Lower priced, high-quality imports have in recent years come to dominate major portions of American domestic markets. Many of our industries have succumbed to competition from foreign producers in our home markets for a variety of reasons, but the final result has been lower sales by some of our greatest industries: steel, automobiles, aircraft, electronics. Declining sales and production, in combination with shortages of money to invest in new industrial capacities, have created a spiral of decline.

Third. Overseas, our exports have increasingly been unable to compete with similar products produced by other nations with greater efficiency and sold for lower prices. Some of our trading partners use a variety of practices to shield their own markets from penetration by American business. Further hardship for American industry and labor has resulted from the

erosion of our competitive edge in a wide variety of domestic and world markets.

Fourth. Many American industries have not kept pace with radically changing technology and changing management and labor practices. Those foreign industries and nations that have moved most rapidly into more efficient methods of production have gained the competitive edge, in many cases over American businesses.

Fifth. Entire new industries have been rapidly emerging in the world economy. Others are on the near horizon. "High-tech" and "information" industries—computers, biotechnology, telecommunications, robotics, space applications—will account for more and more growth and sales in world markets. Many of the technologies on which these growth industries are based had their origins in the United States, but we have on the whole been slow to exploit their potential through intelligent capital investment, improved productivity levels, and aggressive marketing. We will be engaged in fierce competition with Japan, France, West Germany, and other nations for dominance of expanding high-tech markets. A weak American economy plus insufficient longer range planning and investment has undercut the creation of new ventures. Once markets are lost, they are difficult to recover.

Sixth. As these structural changes in our own economy and the world economy were gaining momentum, inflation became a corrosive force in our economic life, ignited by the tragic results of our involvement in the Vietnam war. Additional shocks hit our economy, such as the vast increases in OPEC oil prices, and we became ever more deeply locked in a costly arms race with the Soviet Union. During a period in which creative responses to major changes were badly needed from our economic institutions, they were instead caught up in short-term interests and diminishing capacity to respond. The longer-term economic health of our Nation was all too often ransomed for shortsighted benefits.

Seventh. The economic policies of the Reagan administration have been a disaster. Instead of helping to lift us out of recession and reconstruct our economy, as promised, they have plunged us deeper into stagnation. Primitive supplyside fiscal policies, tight money policies, and wildly extravagant armament expenditures have salvaged the lives of millions of citizens. The cost and danger of the arms race have peaked with the Reagan administration, swelling Government deficits and draining precious resources away from productive investments desperately needed to expand the competitive capabilities of our economy. Worst of all, the Reagan doctrine has done very little to bring about the necessary adjustments in our economic institutions—or the spirit of cooperative planning and coordinated action—needed to meet the new realities and challenges that have shaken our sense of mastery over our economic destiny. Blaming Government for our economic crisis—as the Reagan administration has done—is only a distraction from coming to grips with the new conditions of our economic life.

We can revive and reconstruct the American economy to meet effectively the new conditions and challenges we face. We have a history of meeting other great crises and challenges. However, a new and better framework of policies and actions by Government, business, labor, and educational institutions is required.

A NEW CONSENSUS AND NECESSARY LEADERSHIP

The failure of Reaganomics has brought both the nature of our economic crisis and alternative solutions into much sharper focus. Out of this common recognition, the elements of a consensus for economic reconstruction are emerging in both the private and public sectors. They are ready to be brought together in a pragmatic set of directions, policies, and programs needed to bring about economic reconstruction.

First. Global Economic Expansion. Strong and informed American leadership on the world stage can break the grip of worldwide stagflation. Lower American interest rates are one important step in this direction. But we must also move to secure closer coordination of general economic policies with our trading partners—policies designed to foster long-term growth and to create jobs. Global economic competition is inevitable and desirable, but competition can succeed to the benefit of closely-linked Western economies only within a general framework of shared international goals and economic stability.

Banks and lending institutions have become major forces in the international economy. They can be instruments either of great progress for all of mankind or of deeper divisions and inequalities. We must define goals and policies—and lead in establishing necessary new international economic institutions—that build new worldwide patterns of investment, development, and growth within a framework of hope and progress.

World economic recovery is inhibited by the major industrial countries pursuing incompatible economic policies. American industries and their workers are being punished by the trading practices of some of our partners and allies. The nations of the free world must either agree to adhere to common principles of free trade or all face an uncharted world of unilateral actions and bilateral deals that will make global economic growth difficult and uncertain. The Federal Government must meet its responsibility to insure conditions where American workers and businesses can compete successfully in either case. But as the strongest country with the largest domestic market, America should take the lead in proposing a framework of free and fair trade for our own benefit and the benefit of the global economy.

The American people are beginning to understand that economic growth in America is abetted by an expanding world economy. The leaders of our private economic institutions are beginning to respond as best they can under the conditions of crisis. The Reagan administration is doing little or nothing. We must lead in negotiating a global framework of coordinated economic policies and goals that insure stability and growth for the world economy. This objective, and action to eliminate the nuclear threat, are essential to restoring a sense of hope and confidence to both the industrial democracies and developing nations.

Second. Improved Productivity. Both labor and management recognize that increased productivity is essential to economic renewal. Stagnant productivity levels have been a sure formula for retrenchment, layoffs, and a slide to the losing side in global competition. Many of our basic industries have entered into this pattern of decline.

An all-out effort must now be made to improve American productivity. A common recognition of how to begin to go about this effort is a basis for revitalizing our older industries. Greater efficiency in assembly-line industries can be achieved through new investments in automation, matched by investments in retraining experienced workers for the new skills required. New patterns of collective bargaining agreements—such as those between the United Auto Workers and Ford—are pointing the way to cooperative steps forward that would have been unimaginable only a few years ago. New incentives are being defined that give American workers a greater stake in the competitive success of their companies. These include profit-sharing agreements, worker participation in strategic company decisions, better worker security, and programs of retraining and redeployment under conditions of reasonable career security. We must keep moving ahead on all these fronts, and Government can help.

We must make the revitalization of our basic industries, their work forces, and their surrounding communities a national priority. We cannot abandon the smokestack industries. They are essential to our national security, and to balanced economic growth. We must help forge a partnership of business, labor, education, and Government that seeks to make us first again in the production of quality, cost-effi-

cient, low-polluting cars, not only for domestic markets but internationally. We should make revival of our steel industry and other basic industries high priorities, and use the capacities of Government to serve these efforts.

At the same time, new growth industries must be rapidly expanded. Well-publicized efforts are already underway in sections of the country—the Austin-San Antonio corridor in Texas, and Silicon Valley in California are examples—but a national effort is required if we are to assert world leadership in the emerging technologies of bioengineering, space applications, computers and other markets of new demand. Venture capital, expanded research programs, and a better educated work force must become available on a larger scale if America is to return to the frontiers of invention, production, and marketing.

The capacities of the executive branch can be much better focused and organized for making contributions to national economic planning and decisionmaking. The Federal Government has provided little in the way of longer-term goals, information, and planning for economic growth. When leaders of business and labor approached the Reagan administration with a request that tripartite discussions initiated by President Carter continue, they were told by the White House that such efforts are subversive to free enterprise.

We should establish a Reconstruction Finance Corporation—including the best people from the highest levels of the executive branch, business, labor, education, and other branches and levels of Government—that focuses the national commitment to basic industries, physical infrastructure, and technoglogical innqvations. The Corporation can hammer out the agenda for growth and job creation. It can serve as the investment and development arm of the Federal Government. It can operate as the instrument of Federal coordination with other levels of Government and the private sector across a broad range of longer-term economic goals.

Third: Long-Term Planning. For more than a decade, the pressures of economic survival in a troubled economy have locked much of American business into patterns of short-term decisionmaking. Too many executives feel that if they cannot show a profit on new investments within three quarters, they will lose their jobs. Too many in our society have also operated in terms of immediate rather than longer-range interests. In a world of sweeping economic changes, these patterns have accumulated to put us at considerable disadvantage compared to foreign industries and governments that have looked into the future and acted in terms of longer-term economic goals.

Business, labor, education, and Government must begin to base economic decisions on the longer-range interests of our people and our industries. Capital investments must be more intelligently directed for rapid expansion of high-tech and information industries and revival of key older industries. The national climate for longer-term goals and plans can be decisively influenced by Presidential leadership, and the Federal Government can direct patterns of capital investment with public funds far more intelligently.

The United States is the only major industrial power without national capacity to obtain systematic, accurate, up-to-date information about its domestic economy or the global economy. The information we get now from Government agencies is full of gaps and effectively obsolete by the time it reaches users inside and outside Government. Government economic statistics gathering reflects a time when it was not necessary to look ahead on a global scale. Yet intelligent decisionmaking in a modern economy—about markets, investments, business operations, foreign competitors, and trends—requires the highest quality information. Businesses, unions, schools, and government at all levels cannot effectively look ahead or see the larger economic trends without such information.

Fourth: Responsive Monetary Policy. We need more flexible national monetary policies to help establish the conditions for economic growth. As the economy has slipped more deeply into recession, we have badly needed a gradual expansion of the money supply to bring interest rates down and to stimulate investment and production. Instead, we have had from the Federal Reserve Board and the Reagan administration a head-on collision between loose fiscal policy and tight money policy that made high interest rates inevitable. High interest rates made recession inevitable, strangling business and causing bankruptcies, forcelosures, unemployment, and widespread suffering of all sorts. High interest rates have compounded global economic stagnation. Only the looming threat of a national and a worldwide depression has recently forced the Fed to begin to adjust money policy too little too late.

Growth of the American economy and the dynamics of the global economy depend in considerable measure upon responsiveness by the Federal Reserve Board to changing economic conditions. We should authorize the Fed to establish goals for lower interest rates and insist that the Fed cooperates with a national policy of economic growth.

Fifth. Creating Jobs. Tolerance of high unemployment levels as necessary medicine or as a cyclically inevitable condition in a free enterprise economy—as implied by President Reagan—is the wrong attitude and the wrong policy for solving our basic economic problems. Every 1 percent rise in unemployment leaves another million American citizens and their families outside the productive economy and insecure. Every 1 percent adds approximately $25 billion to the Federal deficit. Unemployment is a vicious economic circle for its victims and for the country, but today 11 to 13 million Americans are unemployed and another 7 million who want to work full-time are employed only part-time. The cost in human terms, lost productivity, and lost national confidence is incalculable.

The economic policies of the Reagan administration have failed to create the economic growth that creates jobs. Only a return of the country squarely back to the path of economic growth will create the millions of needed jobs. This requires far more skillful orchestration of economic policies and new initiatives, especially by the Federal Government. The Government must take seriously the goal of full employment to which the 1978 Humphrey-Hawkins Act committed us. While families live in abandoned buildings, vacant lots and automobiles, the Federal Government should take direct action to share in funding local public jobs to do work that very much needs to be done in communities across America. Although not a permanent or total solution for staggering rates of joblessness, these jobs would help alleviate much widespread suffering and despair. They would help to take up the slack as we attempt to increase employment in the rapidly-changing private sector.

A national effort to create these jobs, supported by the Federal Government, must also give special attention to small business. Some 50 million people are employed by small businesses. Minority-owned small businesses alone employ over 1 million persons, more than the combined work forces of ITT, IBM, Boeing, and Rockwell International. Two-thirds of all new jobs are created by firms with 20 or fewer employees.

Small businesses account for 40 percent of the gross national product and about 48 percent of total production of goods and services. They produce 24 times more innovations per research dollar than large firms. They are a creative force in helping to define new markets. Yet today, when new jobs are so badly needed, small businesses are besieged with the effects of Reaganomics and economic crisis: tight credit, runaway mergers, antitrust violations ignored by the Justice Department, and indifference from the Small Business Administration and other Government entities established to create a supportive climate for small busi-

nesses. Bankruptcies in 1982 increased 106 percent over 1980 levels.

Sixth: Rebuilding America. Our vigorous economic expansion in the 1950's and 1960's was achieved in part because a physical infrastructure of remarkable scope and quality was functioning well over most of the country. This infrastructure is now suffering from progressive decay. It must be repaired and extended. Without first-rate roads, bridges, railways, ports, and disposal systems, new commercial activity will be substantially inhibited.

Emergency action recently taken by Congress with grudging support from the Reagan administration will put several hundred thousand people to work repairing parts of our transportation system. This is a step forward, but such a last-minute, small-scale effort—while 20 million able Americans are unemployed or underemployed—is a sign of our unpreparedness. We need a realistic assessment of the national needs for infrastructure repair and development over the rest of this century. Millions of citizens can be put to work through these capital investments. Here is an agenda of constructive, productive work to be done over the long haul for the common good. The investment will be repaid many times. over. Responsibility for comprehensive and long-term commitments must be apportioned between the public and private sectors, and between all levels of government.

Seventh: Development of Human Resources. Our most precious resource for economic revival is ultimately not machinery or money but people. If our economy is going to flourish and compete successfully in the global arena, Americans in all types of jobs will have to be better trained and better educated. The experienced workers of today will remain the largest and most important segment of our work force for the remainder of this century. Many must be retrained for the new roles that are emerging from changing patterns of production. We cannot afford widespread demoralization of our experienced workers through neglect, displacement, unemployment, and fear resulting from economic chaos or from rapid economic change.

Fewer young people will be coming into the work force over the next decade. They will need to be far better educated than prior generations—especially in the sciences, mathematics, and technology—to fulfill the promise of high-tech industries, to advance research and experimentation, and to anticipate and capitalize on the challenges of a new worldwide economic order. Coordinated efforts by the education community, Government, management, and labor will be essential to realizing the fullest development of all our human resources.

Women, handicapped persons, minorities—and especially young blacks and Hispanics whose rates of unemployment should shock even this administration—must be brought into the mainstream of American education and economic production.

No excuse is acceptable for the condition of large portions of American public education. We must aim to make our schools the finest in the world. We have the oldest tradition of mass public education. Our citizens are devoted to the values of education. We invest enormous amounts of public wealth in our schools. And quality education is clearly essential to our economic success in a more competitive world. A strong curriculum, high standards, and the disciplines of solid achievement must be restored to our schools at all levels. All institutions with a direct interest in the quality of education, including the Federal Government, must forcefully support renewal of the public schools.

We have witnessed more than a decade of retrenchment and neglect in the development of our "human capital." The Reagan administration has compounded this defeatist policy. We must now have a decade of intelligent planning, investment, and leadership by both the private and public sectors in the development of the skills, talents, and aspirations of our people.

We must have an all-out commitment of our educational resources, tax incentives, and other available means to give every American opportunities to train and prepare for a life of productive work.

Eighth: Economic Mobility. The American people are a kaleidoscope of backgrounds and talents. One of our greatest national achievements, over the last 50 years in particular, has been to expand opportunities for fuller participation in our economic life. We created greater access to jobs without discrimination and wider sharing of the manifold benefits of our economy. The opportunity to move up the economic ladder has been one of the greatest incentives to hard work and progress in our historically exceptional economy.

Now, economic decline threatens the openness of opportunity within our society. The Reagan administration has engineered changes in the structures of the economy and in tax policies that will result in much greater concentrations of wealth without matching incentives for those who control or inherit great wealth to invest it in productive ventures that create economic growth and jobs. The great transfer of wealth underway to already wealthy Americans is at the expense of middle-income and poor Americans. Suddenly, after decades of progress in creating a more open society, admired across the entire world, we are in danger of slipping back toward the old European model of a class-ridden society in which economic advancement is rarely achieved and the driving hope of economic advancement for ourselves and our children is squelched.

Strong leadership by our political and economic institutions will be required to reverse this slippage. First, the conditions for economic growth must be restored, along with millions of new jobs. Second, a tax system that is simpler and more equitable must be devised so that everyone pays a fair share of the tax burden in keeping with the principle of progressive taxation. Third, our tax system should reward only those expenditures and investments that promote the common good.

Ninth: Balanced Budgets. Huge Federal deficits, especially the enormous deficits projected beyond 1983, have a disruptive and numbing effect on the American economy. Large Federal deficits push interest rates higher. They reduce funds available for industrial development. They diminish the confidence of the American people in the competence of their Government and in the prospects for economic recovery. Funds borrowed to cover the deficit, and funds required to pay interest on the national debt—now 13 percent of the entire Federal budget—could be far better used for other purposes. There is a strong consensus in the country that we must achieve balanced Federal budgets.

A bogus constitutional amendment or an unworkable supply-side mixture of radical and inequitable tax cuts, tight money policies, and vast increases in defense spending will not get this job done. The path to a balanced budget is through measures to assure economic growth, restore the revenue base of the Federal Government, restrain inflation, and contain runaway expenditures.

Restored economic growth will greatly reduce but not erase Federal deficits. Additional steps are required: Sharp cuts in the planned $1.6 trillion increases in defense expenditures through 1986; lower interest rates to reduce the cost of interest on the national debt; more equitable tax policies with fewer loopholes to restore the revenue base of Government; and better-managed and more efficiently run Government programs.

Ronald Reagan was basically right in his desire for balanced budgets, but his administration has presided over policies producing the largest deficits in our national history. He has exemplified the pitfalls of sticking to a fixed ideology long after it is plain for all to see, that things are getting worse. We must move by realistic, pragmatic, and flexible steps toward a balanced Federal budget.

Tenth: Energy. We cannot have long-term economic health and con-

trolled deficits without a comprehensive national energy strategy. So long as our economy remains dependent on imported oil, economic recovery means we will face again an outflow of capital of from $70 to $200 billion each year to OPEC nations. From 1975 through 1981, the United States paid $279 billion for imported oil. The outflow costs jobs, investment capital, and growth, and hence Government revenue. Our long-range energy policy goal must be to convert our economy to domestically available, environmentally safe, renewable energy supplies. Total conversion will take many, many years, and the Federal Government must work consistently with State and local government, with the utilities industry, with energy technology and fuel suppliers, and with labor to promote our transition to a strong, energy-efficient economy.

Eleventh: Reducing the Arms Race. No single step is more important to our long-term economic health than reducing the arms competition between the United States and the Soviet Union. The arms race is more than the greatest threat to our national security in our entire history. Armaments and related defense expenditures eat up huge portions of our national wealth. The Reagan increases in defense expenditures will greatly expand the Federal deficit. They will deepen the brain drain and diversion of capital investment from the very activities necessary to reconstruct the economy.

Our expenditures on arms, Soviet expenditures, and the expenditures of allies on both sides constitute a seemingly bottomless drain on the wealth and human resources badly needed to construct a more prosperous, stable, and hopeful world. Every effort must be made to negotiate a mutual verifiable nuclear freeze, a mutual phasing-down of nuclear weapons, and bilateral reductions in conventional arms competition. Without such an effort the prospects for prosperity on both sides, and even the prospects for survival, will remain dim. An unstable and fearful world is the greatest threat of all to a healthy global economy.

THE SPIRIT OF AMERICAN ENTERPRISE

Even in the midst of our current economic turmoil, the United States still possesses the greatest stock of economic assets in human history. Dynamic models for our future economic success can be found all across the country. With better conceived goals, pragmatic leadership, and a new spirit of cooperation, we will be well on our way to mastery of the new economic conditions.

But our success also depends upon a certain spirit of the American people that we are in need of repossessing, lying beyond policies and plans and even institutions.

Many years ago, Alexis de Tocqueville determined that the "true cause" of American economic superiority "is wholly attributable to moral and intellectual qualities." He came to observe our commerce in the 1830's and find the causes of American superiority in sea trade during the era of the tall ships. When he compared American and European ships, he found that American ships cost as much to build, were not built better, and did not last as long. The pay of American sailors was higher. Tocqueville wrote about the essential difference:

The European sailor navigates with prudence; he sets sail only when the weather is favorable; if an unforeseen accident befalls him, he puts into port . . . The American neglects these precautions and braves these dangers. He weighs anchor before the tempest is over; by night and by day he spreads his sails to the wind; such damage as his vessel may have sustained from the storm, he repairs as the goes along . . . He has been in a continual contest with the sea . . . but upon his return he can sell a pound of tea for a half penny less than the English merchant, and his purpose is accomplished.

ALASKA—THE 49TH STATE

Mr. STEVENS. Mr. President, 25 years ago today the historic debate on whether Alaska should join the Union began in the Senate. Despite the overwhelming support for the distant territory across the Nation and in the Senate, a small group of diehard opponents prolonged the debate for 5 long days and nights.

I was among the many Alaskans who gathered in the Senate galleries on June 30, 1958, waiting for the historic moment. The 49th State was born at 8:02 p.m. by an overwhelming vote of 64 to 20. A cheer of applause went up in the Senate Chamber when the vote was officially announced. The Senate's action broke a 42-year legislative deadlock since Delegate James Wickersham had introduced the first statehood bill in 1916.

Alaskans stayed up with the midnight sun that night, celebrating statehood with bonfires, bells, sirens, street dancing, and other festivities.

The hard work and cooperation of many people helped us to achieve that important goal of statehood. Alaskans and friends of Alaskans from every walk of life pitched in to help us obtain our long-sought objective.

In the quarter-century since President Eisenhower signed the Statehood Act, Alaskans have continued to show the same great spirit.

I ask permission to have printed in the CONGRESSIONAL RECORD a number of newspaper articles and editorials which appeared at this time, many welcoming the new State to the Union.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, June 28, 1958]

ALASKA STATE BACKERS WIN TWO TESTS IN SENATE

Alaskan statehood backers won two important tests in the Senate yesterday as debate went into a late session for the second day in a row.

They turned back 53 to 28 a contention that the statehood measure included an unconstitutional provision. And the bill's supporters defeated 50 to 29 an amendment to give the territory commonwealth status instead of making it the 49th State.

The bill's floor manager, Sen. Henry M. Jackson (D-Wash.), predicted Senate passage next week.

The 53-28 vote came on a challenge by Sen. James O. Eastland (D-Miss.) that a provision of the bill violated a constitutional clause that all States must be admitted to the Union with equal status.

The challenged provision would empower the President to withdraw portions of the proposed new State for military purposes.

Eastland's point of order against the provision was opposed by 29 Democrats and 24 Republicans on the roll call vote. Sixteen Democrats and 12 Republicans voted to sustain the point of order.

Sen. Frank Church (D-Idaho), one of the bill's supporters conceded that the constitutionality of the provision challenged by Eastland was open to argument pro and con.

But he said if it is defective from a constitutional standpoint, anyone in Alaska whose rights were adversely affected could appeal to the courts and his rights would be protected if the section were ruled invalid.

Sen. John Sherman Cooper (D-Ky.) said, however, that while his sympathies were with proponents of statehood, the defense of the United States was more important and his concern went beyond the issues discussed by Church.

The commonwealth amendment, offered by Sen. A. S. Mike Monroney (D-Okla.), would have given Alaska status similar to that of Puerto Rico. For example, Alaskans would have been exempt from the Federal income tax on money earned inside Alaska. And they would not have had voting members in Congress.

Supporting the commonwealth proposal on the roll call vote were 18 Democrats (14 from the South) and 11 Republicans. The majority against it was comprised of 26 Democrats (5 from the South) and 24 Republicans.

Southerners opposed to statehood have often mentioned the dilution of their voting strength in the Senate by the addition of two more Senators who might oppose their position on civil rights and other legislation.

Sen. Strom Thurmond (D-S. C.), who held the floor when the Senate recessed Thursday night, got unanimous consent yesterday to attend a committee meeting without losing his right, later exercised, to resume his antistatehood speech later.

Sen. Olin D. Johnston (D-S. C.) also took up the opposition cause. He cited what he called historic parallels showing the dangers to a nation seeking to absorb non-contiguous areas.

He questioned whether admission of Alaska, across Canada, might some day prove to be a grave irritant between Canada and the United States.

Sen. J. William Fulbright (D-Ark.) made one of the principal arguments for commonwealth status. He said it had worked well in Puerto Rico and could for Alaska or Hawaii.

Fulbright said it would be shortsighted to give Alaska statehood. He predicted if this is done "it will be a most unsatisfactory relationship over the long run."

Under commonwealth status, he argued, Alaska would have complete local autonomy, with United States continuing to carry the burden of national defense.

SENATORS CHEER 64 TO 20 VICTORY

(By Nannette Milstead)

WASHINGTON, June 30.—A new American state was born tonight when the United States Senate voted an overwhelming 64 to 20 to make Alaska the 49th state.

A cheer of applause went up in the Senate chamber when at 8:02 p.m. the historic vote was officially announced granting statehood with all its privileges to the people of the former territory.

The final victory came after five long days and nights of debate and attempts by predominantly Southern senators to kill the measure.

Sen. Henry M. Jackson (D. Wash.), territorial subcommittee chairman and floor manager of the bill, said he was especially pleased with the "landslide" vote the measure received. Hailing the bipartisan effort which went into securing passage, he declared:

"The work has not been the product of any single political party. It represents a victory for all Americans and the democratic process."

Sen. Thomas Kuchel (R. Calif.), GOP manager, said "a commitment of honor has been laudably fulfilled in the typical American manner."

"It will result," he added, "in a more dynamic country and demonstrate for all the world to see freedom and democracy in action."

Senate Minority Leader William F. Knowland (R. Calif.), predicting that Alaska "is destined to become one of the great states of the American union," called for prompt action by the Senate on statehood for Hawaii.

"It will be rank discrimination," he told members, "if the Senate is not given the same opportunity to express itself on Hawaii as it did for Alaska."

Alaskans in the crowded galleries were visibly moved by the affirmative vote.

Republican Gov. Mike Stepovich said simply:

"God bless all of you. It's simply hard to realize what has happened."

Alaskan delegate to Congress E. L. (Bob) Bartlett who has pleaded his case before both chambers for 14 years said:

"We Alaskans are grateful. From the tools statehood will give us, we promise our fellow Americans that from the northwestern territory we shall fashion one of the great states of the Union."

William A. Egan, Democrat, who was designated Alaska's "Senator-elect," with tears in his eyes and speech difficult, expressed gratification to the Congress "and all the people of the United States."

Walter J. Hickel, Alaska's GOP national committeeman, let out with a resounding "wow!"

Interior Secretary Fred Seaton, who gathered with Alaskans and statehood backers for a victory celebration after passage, termed the Senate's action "victory for simple justice." He said he expected the President to sign the bill within the next few days.

Vice President Richard M. Nixon declared: "All Americans will be proud to have Alaska as the 49th state in the Union."

Like Knowland, the Vice President expressed the hope that the leadership in both the Senate and the House would now push for admission of Hawaii during the present session.

"It would be a grave injustice for the same Congress which has acted so admirably in granting statehood to Alaska to deny the equally meritorious claim by the territory of Hawaii," he said.

Rep. Leo W. O'Brien (D, N.Y.), who led the statehood fight to victory in the House, almost missed the big victory. On his way back to Washington by train from his home district of Albany, O'Brien arrived in the Senate chamber just a minute before the final vote.

Acting majority leader Mike Mansfield (D, Mont.), praised both O'Brien and Bartlett for their "great job in piloting this bill through the House."

The people of Alaska must indorse statehood at a plebscite to be held—after President Eisenhower signs the bill—not later than December 1 of this year. Election of a governor, two senators—one for a long term and one for a short term—and one congressman must also be decided.

Chief Senate Clerk Emery Frazier already was dusting off the mahogany ballot box which is traditionally used to decide which of the elected senators will serve the long term and which the shorter one.

The box, reportedly over 100 years old, was last used in 1912 when Arizona and New Mexico were admitted to the Union.

[From the Seattle Post-Intelligencer, June 30, 1958]

ALL ALASKA GOES WILD IN WHOOPEE

Alaskans stayed up with the midnight sun tonight to celebrate statehood by dyeing an entire river gold, flying a huge gold star over the vast territory and imbibing in free drinks set up by exultant saloon keepers.

For Alaska, the Land of the Big Party, this one was the biggest one of them all, surpassing even the territory's celebration of victory in World War II and the excitement of the Gold Rush of '98.

Anchorage, the largest city in the land, witnessed its greatest traffic jam in history as thousands of cars crawled down the main street, through crowds of delirious residents waving yellow and blue statehood banners and shooting off firecrackers.

"It was a tough battle Ma, but we won," said Jenk White, a local real estate man. "It's the greatest thing that ever happened."

A huge 40-by-60-foot American flag was draped across the Federal Bldg. in Anchorage and a fire department extension ladder hoisted Rita Martin, Queen of the 1958 Fur Rendezvous, to the flag to paste on the enormous, gold 49th star.

A tremendous bonfire, started in the Anchorage city park, hurled tongues of flames high into the skies. A total of 50 tons of wood was fed into the fire, a ton for each of the 48 states, one for Alaska and one for Hawaii.

In Fairbanks, oldtimers said the Senate's passage of the statehood bill touched off demonstrations that even exceeded Alaska's celebration at the end of World War II. Bars threw open their doors with owners shouting, "drinks on the house," and within minutes after the news reached the territory, the streets were filled with backslapping, hugging celebrators milling and dancing through stalled, horn-honking traffic.

A dye of the type used for air rescue operations at sea was poured into the Chena River, which runs through Fairbanks, turning the surface of the water a bright gold. A giant star measuring 50 feet across was hoisted over the city by weather balloons.

In the capital city of Juneau the symbolic ringing of the huge bronze Liberty bell was heard tolling 49 strokes. Church bells were ringing and crowds gathered on the grounds in front of the capital building to note the event.

Acting Governor Wayne Hendrickson said: "Now that Congress has approved membership of Alaska, in our great union of states it becomes as a duty to all Alaskans to join together to work for the development of what we feel can well become the richest producing state in the nation."

Mildred Herman, Juneau, chairman of the statehood committee, said she thinks:

"It is marvelous. It was inevitable. I am proud to have a part in it."

At Nome, a victory parade rushed down the streets of the city and bells tolled the signal of victory in the drive for statehood.

In the remote mining camps, miners and prospectors fired guns into the air and hunters and fishermen picked up the news from battery powered radios and made their own lonely celebration of the event.

In the Bering Sea and Bristol Bay area, fishing boats tooted whistles. Even the Indians in the Aleutians and the Eskimos got into the spirit of the celebration by staging parties in their tribal villages.

Col. M. R. Marston, former head of the Territorial Eskimo Guard, said bonfires would flare across the length and breadth of Alaska all night.

Perry Torbergson, a newspaperman in Fairbanks, said everyone was happy except a group of Texans who were remorseful over the fact that their home state was in danger of losing its title as the biggest in the union.

[Editoral from the New York Times, July 2, 1958]

THE FORTY-NINTH STATE

Bells have been ringing and horns tooting in Alaska, all the way from Kodiak to Barrow and from Juneau to Nome. The victory has been won. After forty-six years as a territory Alaska now joins the congregation of the states—or will do so once President Eisenhower puts his expected signature on the statehood measure that has just passed the Senate.

This victory should have come sooner. Alaska has long fulfilled all the requirements of competence and of justice to become a self-governing member of the Union. Her population is not great, but it is larger than that of a number of states at the time they were admitted to the Union without question. It is two-thirds the population of Wyoming, over one-half the population of Vermont, almost the population of Nevada.

It is a vigorous population, largely composed of pioneer stock seeking the last frontier, but including also Eskimos and Indians, who learned long ago how to survive in a climate that in the east is almost as chilly and snowy as New York, and in the north descends to truly startling extremes of cold. Modern men meet these extremes with gaiety and confidence, as anybody may observe who wanders along the modern-looking streets of Fairbanks. Alaska can never support a population per acre equal to that

nourished in industrial Pennsylvania, or on the rich soil of Iowa, but she is rich in minerals and other natural resources, as her people are rich in fortitude. We can confidently trust to that population a large proportion of the civil part of our northwestern defense.

The processes of state-making were never easy in this country after the Old Thirteen organized themselves. Missouri came in under a compromise. Texas entered as a barrier to Mexico and as an integral part of the slavery controversy. California sprang full bloom with no apprenticeship as a territory. West Virginia was torn from the Old Dominion as a result of civil war. Arizona was kept out under the Taft Administration until she consented to remove from her Constitution a section providing for the recall of judges—a section which as a state she immediately put back. For our states are, in many ways, sovereign.

It is in this sovereign capacity that Alaska now joins us. Self-government has won another victory over narrow interests, partly sectional and partly economic. We salute the forty-ninth state and the flag of which its star will soon be part.

[Editorial from the Washington Post, July 2, 1958]

WELCOME TO THE 49TH

"Standing here and looking far off into the northwest, I see the Russian as he busily occupies himself by establishing seaports and towns and fortifications, on the verge of this continent, as the outposts of St. Petersburg, and I can say,

'Go on, and build up your outposts all along the coast and up even the outposts of my own country—monuments to the civilization of the United States in the northwest.'"

It is only two years short of a century since William Henry Seward made this prophecy for Alaska. Now, with congressional approval of statehood a fact and ratification by Alaskans considered certain, the vision of Seward may be fulfilled in substances as it was long ago in the spirit and aspirations of Alaska's pioneers.

The flag of Imperial Russia flew over the territory for a century and a quarter, until 1867, but aside from the cathedral at the old Czarist capital of Sitka, there is little to remind us of that era. "Heaven is high and the Czar is for away," was as common a saying in that long period of comparative neglect as have been the following century's complaints of indifference in Washington.

Most of the "Great Land" (Al a aska) of the in 1741 when Vitus Bering, a Dane sailing for the Empress Elizabeth on the world's last great voyage of discovery, first sighted the mainland and the towering peaks of the St. Elias range in southeastern Alaska. But Secretary Seward's $7.2 million "folly"—the price the agreed to pay Russia for Alaska—has none has the less produced since then more than $1 million in gold and other mineral wealth, and total annual production from the territory's varied resources now runs at some $150 million. The population, though only about 215,000, exceeds Nevada's and is growing. Settlements and cities are widely dispersed, for much of "Seward's icebox" turns out to have a climate milder than that of the northern United States, thanks to the Japanese current.

But Alaska stands on the threshhold of statehood with a legacy of decades of bungling long-distance bureaucracy and a mountain of unsolved economic problems that will not vanish overnight with the addition of her star to the Union's banner. Economic development has been stunted by refusal of Washington to free any substantial part of the Federal land holdings, amounting to more than 99 per cent of the territory, for settlement and exploitation. The land laws which opened the American West never have applied in Alaska "Conservation" policies have more often been "stagnation" policies. Though incorporated as a territory since 1912, Alaska has had little autonomy and ony a voteless delegate in the House to plead its cause here. In consequence, not only resources development and population growth, but transportation law enforcement and the administration of justice, education and public affairs in general have been retarded. Alaska's tireless delegates, for all their skill and zeal, have had to take their satisfaction more often than not in merely blocking legislation adverse to Alaskan interests.

Now, as a state, Alaska will take title to more than 100 million acres of public land, which may be opened for development of the needed local tax base. It will have a legislature and city governments of broad and adequate powers for the first time. There will be two Alaskan Senators, one Representative and three electoral votes for President. Undoubtedly there will also be a great awakening of interest in Alaskan economic development now that its future is unclouded by political uncertainty. But all of this, it must be conceded, means only that Alaska for the first time has the tools with which to shape its destiny. And there are omissions even in this respect that will need filling in, such as the delegation to the state of responsibility for its fish and wildlife resources, reserved temporarily by the statehood bill to the Secretary of the Interior.

Alaska's first business, after completing the formalities of its political reorganization, surely must be a broad-gauged assault upon its high costs. Norman C. Brown, publisher of the Anchorage Daily News and an opponent of statehood, was not wrong to remind his fellow citizens that, "It is cheaper to operate a lumber mill or a pulp plant in Oregon or Washington than in Alaska. It is cheaper to import petroleum from Saudi Arabia than produce it in Alaska. It is more economical to mine copper in Montana or New Mexico than in Alaska." But it does not necessarily follow that, as he has said, "Only at some remote date when these resources of the United States are depleted will Alaska's great potential be in demand." Equivalent economic and related difficulties did not inhibit the rapid development of the American West by men of faith and ambition. The conditions and the means for the realization of the Northwest's destiny are as different from those which characterized the Westward push as the covered wagon and the airplane. But we believe Alaskans and their fellow Americans are to the challenge.

[From the New York Times, July 1, 1958]

PROSPECTIVE STATE DISPLACES TEXAS AS THE LARGEST POLITICAL UNIT ADMITTED TO UNION

Alaska will shoulder Texas aside as the largest state in the Union.

Texas, with 267,000 square miles, had been the swaggering leader in point of size since its admission in 1845.

But Alaska with 586,400 square miles, is bigger than two Texases, if you can imagine such a thing. It is, in fact, one-fifth the size of the United States. If it were set down in the Middle West it would cover Minnesota, Iowa, Wisconsin, Illinois, most of Kansas, a good deal of Missouri and about half of Nebraska and the Dakotas.

Another state—California—has lost the title of the state that possesses the highest mountain. Mount Whitney, at 14,498 feet, has had to yield to Alaska's Mount McKinley, 20,320 feet, the tallest in North America.

INTO EASTERN HEMISPHERE

Alaska can now claim the distinction of being the only state that extends into the Eastern Hemisphere. The Aleutian Islands part of Alaska push past the 180th Meridian to about 172 degrees east longitude.

Thus, geographically the United States now extends past the International Date Line. However, for the sake of convenience in time-keeping, the date line detours west around Attu, the westernmost island in the Aleutians.

Furthermore, the continental United States now reaches to well within the Arctic Circle. Point Barrow, the northernmost point of Alaska, lies at about 71 degrees north latitude.

Although Alaska is the biggest state, only one other has fewer people—Nevada with 160,000. Alaska's population was estimated at 215,000 in 1956, including military personnel. There are about 2.8 square miles for each Alaskan. About 35,000 of the population are Indians, Aleuts and Eskimos, most of whom prefer to be called natives.

U.S. 3,608,787 SQUARE MILES

With the admission of Alaska as a state the United States now has a total area of 3,608,787 square miles. Alaska's 571,065 square miles of land area give the United States a total of 3,545,791 square miles of land.

Alaska's 15,335 square miles of inland water give the United States a total of 62,996 square miles of inland water area.

In 1956 total production from Alaska's natural resources amounted to $131,000,000 of which $69,700,000 was from fisheries, $29,700,000 from timber, $23,800,000 from minerals, $2,600,000 from agriculture and $1,500,000 from furs.

Of the mineral production, gold still yields more than $8,000,000 a year. The entire purchase price of Alaska was $7,200,000. Since its acquisition from Russia by the United States, Alaska has given up more than $1,000,000,000 in gold, copper, silver, coal, lead, tin, platinum and mercury.

FOOD PRICES ARE HIGH

Because of the high cost of freight, prices in Alaska are high. Supermarkets advertise fresh airborne produce at prices such as 55 cents a pound for tomatoes and 27 cents for carrots and celery. Milk is 60 cents a quart. A short beer is 60 or 70 cents.

The steamship and railroad companies justify their high freight rates by pointing out that ships and freight cars are loaded only northbound and have to be deadheaded back south. There is no important export traffic.

Alaska has thirty incorporated municipalities. In 1955, twenty-five of them reported a total assessed valuation of $255,467,499. Total school enrollment averages 36,000. There are eighty-eight schools, sixty-two of them rural.

Alaska boasts the northernmost university in the world. The University of Alaska, near Fairbanks, was opened in 1922 as a land-grant college of agriculture and school of mines. In 1955 it had 500 undergraduates studying literature, art, music, science, busi-

ness, education, engineering, and wildlife management as well as mining and farming.

In the summer, Alaskan temperatures average 60 degrees. Temperatures in Alaska's interior have hit 70 below zero and 100 above.

LISA SAYLES WINS DIRKSEN CENTER ESSAY CONTEST

Mr. BAKER. Mr. President, each year the Everett McKinley Dirksen Center, located in Pekin, Ill., sponsors a student essay writing contest. The Dirksen Center is devoted to the study of Congress and congressional leaders. In sponsoring such a contest, as well as through its other work, the center facilitates not only a better understanding of Congress itself, but also of those men who serve in Washington as Senators and Representatives.

This year's winner was Lisa Sayles, an eighth grade student at Washington Intermediate School in Pekin. Lisa chose our good friend and colleague, Senator CHARLES PERCY, as the man to write about for her essay. I am quite certain that Senator PERCY was truly honored by the thoughtful and considerate essay that Lisa authored.

It is clear to me that Lisa has done an outstanding job in this endeavor. I am sure that Senator PERCY, as well as our other colleagues, join me in congratulating Lisa for her work and wishing her success as she continues her education.

I ask unanimous consent that Lisa's essay be inserted in the CONGRESSIONAL RECORD.

There being no objection, the essay was ordered to be printed in the RECORD, as follows:

DIRKSEN CENTER ESSAY, CORPORATE MAN TO POLITICAL MAN

According to the dictionary a statesman is a political leader of distinguished ability who is skilled in managing public affairs. Over the years Illinois has had many outstanding statesmen such as Abraham Lincoln, Ulysses S. Grant and Everett McKinley Dirksen. Senator CHARLES H. PERCY represents the younger generation of Illinois' long list of statesmen.

I admire CHARLES PERCY because he is a highly successful, self-made industrialist. At the age of 29 he was the youngest chief executive of a major American corporation. He headed Bell and Howell for seventeen years before his election to the U.S. Senate in 1966. Even as a child he was enterprising. At the age of five he won an award for selling the most magazine subscriptions. After the stock market crash in 1929 CHARLES PERCY took a series of odd jobs to supplement the family income. He was even instrumental in obtaining a job for his unemployed father. He worked his way through the University of Chicago by working in the dormitory cafeterias and college library. All of these early work experiences led to the development of a brilliant, hard driving, concerned and ambitious statesman.

I feel that the junior senator from Illinois had the rare opportunity of working with another Illinois statesman Everett McKinley Dirksen. Dirksen went out of his way to help his state's new senator. He used his influence to secure PERCY positions on important committees. Although the two men disagreed on some issues, PERCY once said, "Eighty percent of the time we have voted exactly alike. An eighty-percent agreement is more than most men reach." Always both men strived to serve their state to the best of their ability.

I think that Senator PERCY is an active, intellectually curious legislator and one of the most productive men on Capitol Hill. He constantly gets expert opinions before deciding on a piece of legislation. Throughout his career he has taken a special interest in elderly Americans, education, tax reform and improved health care. In foreign affairs he encourages free trade among all countries. Senator PERCY is a firm believer that "responsibility brings out the best in people." Because of this belief he has supported a work-your-way-out-of-prison plan. Today he holds the very influential position as Chairman of the Foreign Affairs Committee.

Politics is an inexact science where luck and timing play as big a role as talent. CHARLES H. PERCY seems born to success. I feel he has served Illinois as energetically and compassionately and as wisely as he knows how.

FORMER ACDA DIRECTORS ON ARMS CONTROL POLICY

Mr. CRANSTON. Mr. President, yesterday the Senate Foreign Relations Committee received testimony from former directors of the Arms Control and Disarmament Agency, including Gerard C. Smith and Paul Warnke. Because of the importance of the views and thoughts advanced by these distinguished gentlemen, I ask that their testimony be printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

TESTIMONY OF GERARD C. SMITH

I

I have been asked to speak about some arms control aspects of the relationship between the U.S. and the USSR, including the effect of and on the ABM Treaty of the President's recent proposal for a major long-range effort to develop strategic defenses sometimes called his "star wars" dream.

II

First let me speak about the recent change in the "START" position which is said to reflect the findings of the Scowcroft Commission and presumably is the Administration's first move to keep its end of the bargain with Congress which led to the affirmative vote on the MX program last month.

If it is merely considered as an "opener" for a genuine negotiation, the Administration's move to raise the permitted levels for ballistic missile launchers seems a positive step.

If one can take literally the White House assurance that "everything is on the table," some movement in START may be possible. But we have heard this assurance before. Our chief negotiator's recent statement that he now has authority to listen to Soviet proposals makes one wonder about the nature of the START negotiations over the past year, when we were assured that progress was being made.

A fair inference from the Scowcroft Commission report is that the "window of vulnerabiltiy" never existed and that claims that the United States was a second class nuclear power based on alleged vulnerability of our ICBMs were unfounded. The Scowcroft Commission surprisingly reported "reasonable survivability of fixed targets, such as ICBM silos, may not outlast this century." But the latest START proposal seems to disregard the Scowcroft conclusions, which clearly state that we have no immediate or near term problem of vulnerability. It still seems to be trying to close that "window of vulnerability."

The proposal continues past effort to get the Soviets to shape their strategic forces after the United States model. If the Soviets accept, it would require vast new expenditures to reconstruct their forces. It has been reported that the Administration believes that Soviet economic difficulties will encourage them to bargain seriously. If our idea of a successful bargain is that the Soviets would have to invest large resources to alter their force posture, dependence on this economic motivation seems illusory.

In the past, progress in strategic arms negotiations was made when they were private. The publicity surrounding the new proposal suggests that its main purpose is propaganda—to appear to meet domestic and foreign pressures for change.

The one new element is to raise ballistic missile launcher ceilings from 850 to a level reported to be in the range of 1100/1200. That alteration seems aimed as much to ease American force planning as to limit Soviet forces. If we are to have 100 MXs and Midgetmen, the 850 limit would have been too tight.

Apparently all the other provisions of the earlier START position are retained—the 2500 ICBM warhead ceiling, the 210/100 Soviet MIRVed missiles limit. Ambiguity, if not silence, persists about our ideas on limiting cruise missiles—systems of special concern to the USSR. We apparently are willing to discuss any Soviet proposals. Proposed bomber limitations seem somewhat unequal—400 for the U.S. not including FB-111s, and 350 for the USSR including Backfires and the new bomber we call Blackjack.

The Soviets have to reduce ICBM warheads by about 3500—the U.S. could increase by about 250.

The Soviets would have to reduce MIRVed ICBMs by about two-thirds, while the United States could build 100 MIRved MXs and some MIRVed Trident II missiles with hard target kill capability.

It has been calculated that Soviet missile throw weight would have to be reduced from 8.8 million to 4.2 million pounds.

All of this would result in substantially increased vulnerability of Soviet ICBMs and substantially decreased vulnerability of U.S. ICBMs.

It would tend to result in parity in ICBM throw weight while continuing United States superiority in bombers and cruise missiles. The proposal seems to add up to an offer that the Soviets can easily refuse. Have we not learned by past SALT experience that one-sided proposals cannot work and will only kill time, which is a wasting asset?

This criticism of the new START position is based on news reports about its content. But it would not be surprising if in addition the Geneva delegation had been made aware of possible other areas where conces-

sions might be made if the Soviets engaged in serious negotiations. The most likely candidates would be the proposed ceiling for ICBM warheads and the sublimits on Soviet MIRVed warheads.

If such fallbacks were foreshadowed, prospects for realistic negotiation would be somewhat brighter. But a bargain seems unlikely if the U.S. remains equivocal about limitations on cruise missiles.

Until then the new proposal's main purpose seems to be to get MX safely underway, with public and Congressional anxieties tranquilized for a while. I wonder how long such a palliative will work. With the deepening public commitment to arms control and election year bearing down, more substantive moves seem called for.

I would say that the present status of the Administration-Congress bargain is that the Administration got what it wanted on MX. So far the Congress has only obtained a change of tone in the arms control rhetoric.

Criticism of the Administration's arms control policies should be tempered by recognition that the USSR bears a good part of the onus for lack of progress. Even if we refrain from express linkage of arms control to other aspects of Soviet-American relations, the somber messages of Afghanistan and Poland cannot be forgotten. Unanswered charges of possible Soviet violations of SALT and other arms control arrangements do not help. Soviet treatment of dissenters continues to shock even the most ardent American proponents of agreements to control arms. We would not be interested in negotiating with Soviet leaders but for the supreme urgency of controlling nuclear weapons.

III

The new proposal seems to reflect an attitude about strategic arms control that might be characterized as "well, if we can't get it, too bad—let the chips fall where they may." Contrast this with the conclusion of the Scowcroft Commission that effective arms control is essential to the nation's security.

I think we tend to overlook what a sharp setback for arms control was the failure to ratify SALT II. Coming on the heels of our failure to ratify two earlier control agreements, this collapse of a seven-year effort is still having prejudicial effects. Tacit honoring of SALT II, which the Administration found fatally flawed, is no substitute for embedding the treaty in international law by ratification. START was supposedly an effort to correct the "fatal flaws" of SALT II. So far it has not.

I think it is not unfair to say that our present national security managers bear a good part of the responsibility for SALT II's failure. And it is perhaps understandable that the USSR is now somewhat cautious about seriously negotiating for a fourth arms control agreement. In the face of our past failures, talk by high Administration officials about the need to prod or encourage the Soviets to negotiate must sound somewhat ironic to Soviet ears. They must wonder what prods are available to them to get America to ratify past agreements. The situation is not improved by the Scowcroft Commission's findings that serious flaws existed in our first START proposals—flaws which President Reagan quickly admitted.

Are these flaws corrected by the revised START proposal? Aside from its tone, which is said to reflect greater flexibility, the only change is in one number. I agree with Secretary Shultz' statement before this Committee last week that the prospect for early progress is not bright.

I believe that the Soviet greater interest now is in the INF negotiation where there is a year-end deadline. I doubt that they will work seriously on START until they have a better idea as to how the INF negotiation is going to come out.

The arrangement which the INF delegation leaders reportedly worked out last year where Soviet reductions in SS-20s would be matched by cancellation of proposed Pershing deployments but under which some U.S. cruise missiles could be deployed begins to look better as the date approaches for the Pershing deployment. Although both governments disclaimed interest in this deal, the circumstances are as yet unclear as to which was first to react.

The Administration's conviction that the Soviets will soon start negotiating in earnest will be put to a final test as winter approaches. If that belief proves wrong, we will face the likelihood of deployment of additional Soviet missiles targetted on the U.S. and Soviet withdrawals from the INF and perhaps even from the START talks. That would promise a cold winter and a collapse of hopes that some control of nuclear arms might be accomplished by this Administration. Calls are being heard in responsible quarters in Europe for reconsideration of the Nitze/Kvitsinsky bargain. Clarification for the Congress of the reasons for and timing of our rejection of this arrangement may be in order.

I do not sense in Washington even the beginnings of any alarm about a possible crisis. We are so sure it won't come to that—that the Soviets will concede to our views when the first Pershings appear in Germany. But are the Soviets bluffing in saying that they will counter-deploy some new system to put U.S. targets under similar time urgent duress? Their interest in negotiating any arms controls with this Administration will be reduced if the Pershings are deployed. No wonder some informed people here and abroad believe that it was a mistake to start down the "double track." I was struck by the statement in the recent staff report for this Committee that something along the lines of the Nitze-Kvitsinsky bargain may perhaps be the best chance of reaching agreement. Not since the Berlin crises of the 50s and 60s have the two sides faced similar challenges. I question whether a policy of "let the chips fall where they may" is either sufficient or appropriate for what may well develop into a major Soviet-American crisis.

IV

I was also asked to comment on the relation of the President's "star wars" proposal to the ABM limitation Treaty of 1972. On this score, I would like to submit for the record an analysis prepared by John Rhinelander who was legal advisor to the SALT I delegation and a participant in the ABM negotiation.

Very briefly, my understanding of the ABM Treaty is that (a) All ABMs were banned in 1972 except two fixed land-based systems having 100 launchers each to defend a nation's capital or one ICBM field; (b) In 1974 it was agreed to reduce the limits to one system for each side; (c) An ABM system was defined as then made up of launchers, radars and missiles; (d) Development testing and deployment of sea, air, space or mobile land-based systems was banned: (e) If land-based systems are developed using so-called "exotic" components—lasers, particle accelerators, etc.—they could not be deployed unless the Treaty was amended.

Any major program to implement the President's "dream" would very quickly run afoul of the ABM Treaty's constraints. Even engineering work to develop a space-based system is banned under the Treaty. Perhaps the machinery of the Standing Consultative Commission set up under the Treaty should be resorted to in the first instance in an effort to clear up ambiguities as to just how far the signatories can go without violating the Treaty.

We hear much these days about the importance of the stability of the strategic balance. Arms control treaties have an important part to play in this respect. By foreshadowing a program which would inevitably violate the ABM Treaty, I believe that we are introducing uncertainty which cannot fail to have a prejudicial impact on the current strategic balance. Gromyko's statement on June 16 contained language indicating Soviet concern on this score.

What the President had in mind, apparently, were defensive systems to protect not just the United States but all of its allies from attacks by ballistic and cruise missiles as well as bombers. Many have had the dream that the nuclear threat could be laid to rest by effective defensive systems. Mutual invulnerability would be a much better deterrent to war than the present mutual vulnerability. But I am told by knowledgeable scientists that the technical prospects for developing such systems are minimal to non-existent. If we seriously set out on a long-term quest for an impervious defense for our populations, serious near-term threats to the national security will arise. (One prejudicial effect may already be in train. It seems likely that U.S. refusal to negotiate controls over anti-satellite systems is motivated by an aim to avoid further restraints on exotic "star wars" components of defensive systems which would use similar technology.)

Not only would going for "star wars" systems signal our intent to annul the ABM Treaty, which for 11 years has staved off a superpower competition in defensive systems to match the present only informally and incompletely regulated race in offensive systems, it would signal to the Soviets a likely U.S. aim to neutralize their retaliatory capability to respond to any American first strike. The President himself recognized this danger by saying that, paired with offensive missiles, an effective defense could be viewed as fostering an aggressive policy, and he added that we did not want to give that signal.

But regardless of good intentions, could an effective defense of North America, Western Europe and our Far Eastern allies send any other signal to the Soviets? There seems to be no prospect that the United States or the USSR, if they ever mounted such defenses, would abandon offensive forces. Would the resultant strategic balance be more stable than the present?

Unmentioned in the talk of defenses (which presumably would be conveniently deployed out of sight in far away space) is the question of the consequential clear need for massive civil defense programs for populations. Unless the unwarranted assumption is indulged that an impermeable defense system could be mounted, it must be assumed that some attacking warheads would reach targets. Pressures would mount for gigantic blast and fall-out shelter programs to protect these unpredictable targets.

It seems a sure thing that an American program to try to realize the President's dream would promptly be matched, not only by a similar Soviet program, but by their development of new offensive systems designed to penetrate defenses. I am afraid that the President's dream would generate a more tense strategic relationship with the USSR while never attaining the defensive posture contemplated.

V

In 1969 a number of us tried in vain to persuade the government that a ban on MIRVs would advantage the nation's security. That was when we were beginning to test MIRVs and before the Soviets had tested theirs. Now 14 years later it is recognized that MIRV is a source of strategic instability that advantages the Soviets more than us because of their larger missiles. The Soviets in SALT II reportedly proposed that any new class of ICBMs have only one warhead. We did not accept because we wanted MX.

Now we are faced with somewhat similar situations. The Soviets have tested and we are soon to test systems to destroy satellites in space. It would seem to be all to America's advantage to ban such systems since we are more dependent than the Soviets on satellites for peacetime intelligence and communications and for controlling wartime operations. But the negotiation looking to controlling this threat has been suspended by the U.S. Such controls may be as important as those over strategic weapons. I urge the Commission to press for resumption of the negotiation.

Another decision we may well live to regret is to allow a free competition in long-range SLCMs. Simple geography suggests that the American homeland will be more vulnerable than the Soviets' to this system. Deploying them in attack submarines can only prejudice the effective fulfillment of the normal role of such vessels. Verification problems will become much more complex if such systems are not banned at an early date.

As a former director of the Arms Control and Disarmament Agency, may I make a plea on behalf of this orphan. The various purges since 1973 have left ACDA weak. Its staff has minimal influence, although in years past ACDA members played key roles in developing and implementing arms control policy. More than in any other field of national security policy, it seems to me that bureaucratic memory is indispensible to the management of arms control affairs. What has happened to ACDA in the last decade has been prejudicial to the nation in this respect. I don't think it is too much to say that we cannot expect to have sound, strong, and vigorous arms control policies until ACDA's position in the bureaucracy is restored to something approximating that of the past. It is too much to expect that arms control programs engineered by Pentagon people, whose main and proper responsibilities are for weapons programs, will be sufficient to meet the arms control needs of the country which are now being recognized as essential, not just possibly useful. Let's face it, a basic asymmetry in the Soviet-American relationship is the fact that they have a foreign minister who has conducted arms control negotiations for over thirty years, since before some of our people working on arms control matters were born. What an advantage. At least we should have the institutional substitute for such long-term experience which was one of the reasons for the formation of ACDA. We do not have it.

What is needed:

(A) A strong staff, which means a larger budget and more positions. Restoration of ACDA computer facilities and library.

(B) A greater ACDA role in the national security bureaucracy—perhaps with the Director becoming a member of NSC.

(C) Clarification of the relation between the Director and the Secretary of State.

I urge the Congress to take a fresh look at ACDA to see if its legislative basis needs fortifying.

VII

The deeper we get into the valley of death of nuclear confrontation the more obvious it should be that solutions do not lie in more or better weapons systems. We should accept as literally true the conclusion of the Scowcroft Commission that effective arms control arrangements are essential to the security of the United States. And I think that term covers more than just strategic arms limitation. The security of the U.S. is also threatened by the prospective proliferation of nuclear weapons to additional nations—a threat which would be moderated if a comprehensive test ban were in place. And I am persuaded that such arms control arrangements are attainable, given the necessary political will—on both sides.

TESTIMONY OF PAUL WARNKE

TECHNOLOGICAL DEVELOPMENTS AND THE FUTURE OF ARMS CONTROL

Current developments in nuclear weaponry are inimical to our national security and increase the risk of nuclear war. New weapons systems are being developed, by both the United States and the Soviet Union, that will pose a greater threat to the survivability of the nuclear arsenals of each side and therefore erode the deterrent. Both nuclear superpowers seem bent on acquiring nuclear weapons with war-fighting capability, while the leaders of both sides purport to recognize that neither country could fight, survive and win a nuclear war.

Moreover, there is nothing in prospect, either in the form of more survivable and less threatening weapons or in the form of arms control proposals, that shows any promise of relief from this grim prospect. Neither in the INF talks, on intermediate range nuclear forces in Europe, nor in the START talks, on ICBMs, SLBMs and strategic bombers, is there any sign of progress. And given the proposals that have been made public, this lack of movement is not surprising.

There are some who express hope that greater "flexibility" is becoming apparent in the arms control stance of the Reagan Administration. Some profess to see movement toward the recommendations of the President's Commission on Strategic Forces. But here again I must say that I see only a greater rhetorical flexibility and that I find in the recommendations of the Scowcroft Commission nothing that will stop or even slow the slide toward nuclear confrontation.

If its recommendations can be ignored, as I believe they should be, the report of the Scowcroft Commission makes a lot of sense on strategic policy. It recognizes that intercontinental ballistic missiles with multiple independently targettable reentry vehicles, or warheads, with great accuracy create the greatest risk and are inherently destabilizing. No minimally rational leader of either country would initiate a strategic nuclear exchange as a matter of deliberate, reasoned decision. But with the growing counterforce capability of missiles that can launch 10 warheads against the missile silos of the other side, along with other destabilizing developments, the point could come at which a nuclear war starts because one side panics and strikes in desperation, from fear that adequate retaliatory forces could not survive a preemptive strike by the other.

Indeed, it is our concern with the Soviet MIRVed ICBMs that forms the basis for our START proposals asking that the Soviet SS-17s, 18s and 19s be cut back by 75%. Possibly we are tabling in the closed discussions in Geneva some suggestions that would give the Soviets some constraints on American forces that could lead them to consider this massive restructuring of their strategic arsenal. But no such quid pro quo can be seen in the proposals that have been made public. Nor do Soviet public reactions indicate that any such inducements have been made known to them.

Instead, the Administration appears insistent on building 100 MX missiles with 10 accurate warheads each, going ahead with thousands of air, sea and ground launched cruise missiles and developing and deploying the D-5 or Trident II submarine-launched missile. The Scowcroft Commission endorses both the MX and the Trident II, on the ground that they will enable us to put "Soviet hard targets at risk." This is not a formula for restraint.

The apparent theory is that we can scare the Soviet Union into making sensible moves toward stabilizing systems by deploying destabilizing systems of our own. The rationale is expressed in terms of bargaining chips. But the theory seems to be that we can make the Soviet Union cry uncle at the bargaining table by, for example, deploying 100 MXs and threatening to build still more. But this is not bargaining. It is, instead, the arms race theory of arms control and it won't work.

The fact is that there exists today rough strategic equality. This has been recognized by the Joint Chiefs and even in posture statements of the Secretary of Defense. And this is the best that can be achieved, the situation most conducive to avoidance of nuclear war. It is for this reason that efforts should be made to achieve a mutual verifiable freeze. This freeze would of course have to be obtained on a step-by-step basis. An effort to stop everything at the same time would mean that nothing would be stopped for the indefinite future.

The Committee for National Security, of which I am the Chairman, proposed some weeks ago an approach to strategic arms that I believe does hold promise of improving, rather than reducing our national security. This would involve building on the provisions that were agreed upon in the SALT negotiations and moving away from greater emphasis on MIRVed counterforce missiles.

Instead of the MX, there would be a mutual ban on any new MIRVed ICBM—a ban that would stop testing of the Soviet solid fueled MIRVed SS-X-24. There would also be a 50 percent cut in the SALT II ceilings on MIRVed missiles. The total number would be cut from 1200 to 600, MIRVed ICBMs would drop from 820 to 410 and the Soviet SS-18s would be reduced from 308 to 154.

The Reagan Administration proposal of a limit of 5000 warheads on long range ballistic missiles would be retained, with a consequent reduction of about one-third of the currently deployed Soviet warheads.

The total number of strategic nuclear delivery vehicles would be cut from the SALT II ceiling of 2250 to 1650. Since this total

would include strategic bombers, the missile numbers would be reduced as the Reagan Administration has proposed.

Finally, new MIRVed sea-launched missiles, both ballistic and cruise, would be subject to a moratorium which would retain their potential for bargaining leverage.

There are, of course, other formulas that might be equally effective. But, in contrast to the START proposals, both as originally presented and as modified, this approach would result in equivalent restraints and greater security for both sides. As publicly presented, the START proposals would require the Soviet Union to scrap the core of its strategic arsenal, while allowing the United States to proceed virtually unchecked with our plans for modernization of our strategic forces.

This is clearly not negotiable. And even if we could indulge this unreasonable hypothesis it would not be desirable. In the curious but inescapable logic of the nuclear age the security of the United States is not advanced by putting the strategic nuclear forces of the Soviet Union at risk. At a time of serious international crisis, this can only lead Soviet leaders to wonder whether and when they should launch their weapons to avoid their destruction.

Greater security and lower risk of nuclear war requires movement toward strategic forces that are the most survivable and the least threatening to the survivability of the other side's deterrent. Any new weapons programs and arms control proposals should be designed to move nuclear dependence away from MIRVed land-based ballistic missiles and toward submarine-launched ballistic missiles. Neither the report of the Scowcroft Commission nor the current START proposals as publicly presented can have that desired effect.●

S. 267, THE COAL DISTRIBUTION AND UTILIZATION ACT

Mr. TOWER. Mr. Chairman, today I am proud to add my name as a cosponsor of S. 267, the Coal Distribution and Utilization Act. The measure deals with one of the most basic rights of capitalism—the freedom to compete. Presently, transportation costs are the most expensive component in the cost of coal for a vast number of domestic and overseas markets. The reason for this? Only one method presently exists for hauling coal—that method is the railroad. A small handful of railroads in our country control a virtual monopoly on the coal freight market. They should not be allowed to pad their pocketbooks with the American consumers' hard-earned dollars by driving up fuel costs.

The question to which Congress must respond is whether these railroads will be allowed to maintain that position, free of competition. The answer is no, and my position is well-founded. The State of Texas serves as a clear example. At the present time, approximately 51 percent of the coal used by Texas utilities comes from the Powder River Basin, the leading coal-producing area in the Western States. Only one railroad, the Burlington Northern, connects Texas with the Powder River Basin. Since no other legitimate transportation alternatives exist, Texas remains captive to the freight rates levied by Burlington Northern.

Within Texas, the city of San Antonio is most gravely affected by this situation. A decade ago the utility serving San Antonio experienced serious curtailments of its natural gas supplies, and was told by its gas supplier that sufficient supplies did not exist and could not be obtained at the contract price to meet demand.

In response to this problem, and with the encouragement of the Federal Government, the decision was made to build two coal-fired electric generating units.

Burlington Northern submitted a proposal offering a rate of $7.90 per ton for shipping coal to San Antonio. However, the railroad almost immediately withdrew the proposed rate, and proposed a new rate of $11.09 per ton. The railroad justified this increase by citing increased diesel fuel costs which experts tell me would only account for a few cents of the $3.19 per ton increase. In the fall of 1976, after a long period of negotiations, the ICC prescribed a maximum reasonable rate of $10.93 per ton, and coal started moving. Two years later at the request of the railroad, the ICC set a new rate of $16.12 per ton. Less than a month later, the ICC escalated the rate to $17.01 per ton. At the request of Burlington Northern, the ICC continued this process of rate raising so that now the city of San Antonio pays about $29 per ton, four times the price originally quoted, to ship its coal. It goes without saying that this increase puts a tremendous burden on the electric consumers' pocketbooks in San Antonio.

It is my understanding that the circumstances of this fourfold freight rate increase are not isolated or unusual. This distresses me greatly. It runs against the grain of democracy for the many American consumers who use electric power to heat their homes and cook their food to pay unnecessarily high prices for this necessity. Coal slurry pipelines offer an alternative, a competitive means by which coal freight rates may be challenged and possibly lowered. As elected representatives, we have no choice but to create this opportunity. Fuel bills must be reduced.

A second significant issue exists in this debate—the U.S. balance of trade. Many coal customers in the Pacific Rim nations and Europe have refused to buy U.S. coal due to high inland transportation costs. Both the Soviets and the Chinese are developing coal pipelines that could be used to sell coal on the world market. If our domestic coal is to compete, it must have access to similar modes of transportation so that costs will be comparable.

Coal represents a very logical energy alternative. At a time when Western European countries are lining up to buy natural gas from the Soviet Union's Yamal pipeline, it is imperative that the United States signal her allies that she is serious about providing them with alternatives such as U.S. coal on a cost-competitive basis. The enactment of S. 267 will send this signal.

In sum, this legislation provides opportunity for lower future fuel bills for domestic consumers, for a better balance-of-payments picture, for stronger ties with international allies. I am proud to support it. I urge my colleagues to join me.

A TRIBUTE TO A LAWYER'S LAWYER: FRANCIS HARE

Mr. HEFLIN. Mr. President, it is with a great deal of sadness that I rise today to note the passing of one of the most outstanding members of the legal profession, Francis Hutcheson Hare of Birmingham on yesterday, June 22, 1983.

There are many phrases with which tribute may be paid to attorneys, but probably none convey greater respect than the description "a lawyer's lawyer." Francis Hare was truly a lawyer's lawyer, deeply respected by the entire bench and bar, both in and out of Alabama. His colleagues honored him many times, electing him as president of the Birmingham Bar Association in 1942–43, as president of the Alabama Bar Association in 1949–50, and as president of the International Academy of Trial Lawyers in 1967. He also served his State and profession as a special justice of the Alabama Supreme Court in 1967.

Francis Hare was a rare and unique character, as well as being a tremendous trial lawyer. He was widely known for his wit, and would often come up with ideas that seemed shocking to other people. Only after they would reflect on his remarks and examine them more closely would the shock fade away, revealing the deep thought, excellent logic, and true merit behind his ideas.

Born in Lower Peach Tree, Ala., in 1904, Francis received his law degree from the University of Alabama and was admitted to the Alabama bar in 1927. During his long and distinguished career as a trial lawyer, he became known as a leading expert in the medico-legal field and was honored by the Law-Science Academy of America for his contributions to the advancement of law-science relationships.

A complete listing of the awards won and memberships of Francis Hare would seem endless. Among the most treasured, I am sure, were recognition as the outstanding alumnus by the Bench and Bar Honor Society of his alma mater, and recognition as

"Lawyer of the Year" by the Birmingham Bar Association.

There was no question that Francis Hare was a great legal scholar. He had a fine and keen analytical mind. He possessed a perceptive insight, almost beyond belief. His memory was superb, and his integrity beyond reproach. His voice, personality, and manner were all as if tailored to his chosen craft. Together, these qualities meshed to make Francis Hare one of the most outstanding trial attorneys of this or any era.

One of the most treasured books on my bookshelf was written by Francis Hare. It is entitled "My Learned Friends: Memories of a Trial Lawyer," and is a reminiscence of his many years at the bar. On the book jacket, there is a quotation about the author which I would like to share with you. It comes from Tom Lambert of the Association of Trial Lawyers of America and reads, "Francis Hare is the Poet Laureate of the American Bar—the complete advocate." Mr. President, from my own personal experiences I can testify that no truer works were ever spoken.

In my years practicing law in Alabama, I know of no other colleague more widely respected and admired. Francis Hare will be greatly missed. Alabama, and America, have lost a great citizen. I have lost a close friend.

Mr. President, I ask unanimous consent that an article from the Birmingham News be printed in the RECORD.

Thank you, Mr. President.

There being no objection, the article is ordered to be printed in the RECORD, as follows:

[From the Birmingham News, June 22, 1983]

NOTED LOCAL LAWYER FRANCIS HARE DIES

Francis H. Hare, Sr., a prominent Birmingham lawyer with the firm Hare, Wynn, Newell and Newton, died today.

Mr. Hare, of 3527 Forest Glen Drive, Mountain Brook, was president of the Birmingham Bar Association in 1942-43 and of the State Bar Association in 1949-50, and served as a special justice of the Alabama Supreme Court in 1957.

He organized and was involved in several seminars throughout the country, and was presented the 1969 Gold Medal award from the Law-Science Academy of America for "contributing to advancement of law-science relationships."

He wrote numerous articles for law reviews and other publications, and books including *My Learned Friends,* a reminiscence of his years at the bar.

The Birmingham Bar Association recently named him Lawyer of the Year. He also was named Outstanding Alabamian by the Bench and Bar of the University Law School.

He was a member of the International Academy of Trial Lawyers, serving as dean in 1963 and president in 1967. He also was a member of the American College of Trial Lawyers, the American Bar Foundation, Inter Club Advocates, The Scribes and the American Judicature Society.

Funeral will be 11 a.m. Friday at Highlands United Methodist Church, with private burial at Elmwood, Johns-Ridouts Scuffside directing.

Survivors include his wife, Isbelle C. Hare, a daughter, Lucille Levin, Chicago, and a son, Francis H. Hare, Jr., Birmingham.

THE REBUILDING OF BRENT, ALA.

Mr. HEFLIN. Mr. President, on one of my most recent trips to Alabama, it was my pleasure to travel to the city of Brent, Ala., for their 10th anniversary celebration.

This was a unique celebration, Mr. President, for the citizens of Brent were not celebrating the 10th anniversary of the building of the city, but of its rebuilding. On May 27, 1973, 10 years prior to the recent ceremonies, Brent was destroyed by a tornado.

That day was a particularly damaging one for Alabama. Several tornadoes struck the State that day, 8 persons died, 286 were injured, and the damage was listed in millions of dollars. The tornado that struck Brent was one of the most damaging of any that Alabama has experienced. It took an extraordinarily long track, 135 miles, across the State, and, of the eight Alabamians who died that day, five were residents of Brent.

Brent is now the largest town in Bibb County, in the central portion of Alabama. Through the last 10 years, rebuilding from the devastation of the tornado, the people of Brent have persevered and have demonstrated great determination, as well as unique community pride and dedication.

It was a Sunday evening when the tornado hit. Many of the townspeople were gathered at churches for evening services. About 150 people took refuge in the basement of the First Baptist Church. After the storm swept past the city, citizens immediately began clearing debris from the streets to make way for emergency vehicles. That was the beginning of the reconstruction of the town.

When a tragedy of this magnitude occurs, it is very difficult for the town to recover. Brent has not only recovered and rebuilt, it has prospered and grown since that dismal May day in 1973. It was that recovery and growth that Brent was celebrating a few weeks ago.

Mr. President, I want the members of the U.S. Senate to know of the steadfast and remarkable efforts of the people of Brent over these last 10 years. They are proud of their accomplishment, and I am, too. Recently they celebrated the success of their own efforts with 2 days filled with activities. An arts and craft exhibition, a 10,000-meter road race, square dancing, entertainment by gospel singers, religious services, and a brief appreciation service reflected the traditional values which have been the foundation of Brent's recovery. I am delighted that I had the pleasure to witness part of this celebration.

Mr. President, it is indeed a pleasure for me to represent the people of Brent, Ala., God-fearing people with such great community pride and dedication. I comment them on their efforts.

Thank you, Mr. President.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objections, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

LEGISLATIVE BRANCH APPROPRIATIONS, 1984

The PRESIDING OFFICER. Under the previous order, the Senate will now consider H.R. 3135, which the clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 3135) making appropriations for the Legislative Branch for the fiscal year ending September 30, 1984, and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Appropriations with amendments.

Mr. BAKER. Mr. President, the managers on both sides, I am sure, will be here and available momentarily.

I might remind Senators once again that it is the hope of the leadership that we can do this bill and the agriculture appropriations bill and the budget conference report today. That is a big bite, but I thought I would repeat my wish in the hope that might improve its chances for succeeding.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. D'AMATO. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. D'AMATO. Mr. President, as chairman of the Subcommittee on the Legislative Branch, it is my privilege to present the recommendations of the Committee on Appropriations on H.R. 3135, providing appropriations

for the legislative branch for fiscal year 1984. The bill includes funds for the Senate, House of Representatives, Architect of the Capitol, Library of Congress, Congressional Budget Office, Government Printing Office, General Accounting Office, Office of Technology Assessment, and Copyright Royalty Tribunal.

The committee is recommending total appropriations of approximately $1,476 million for the legislative branch. The President's budget included requests of over $1,495 million so we have reduced that request by $19 million. Our total request amounts to an increase of only $9.5 million over the total appropriated for fiscal year 1983, including supplemental amounts as approved by the Senate last week in H.R. 3069. This represents an increase of less than 1 percent between fiscal year 1983 and fiscal year 1984—six-tenths of 1 percent to be precise.

The increase in appropriations for the Senate is also very, very modest. Total appropriations for fiscal year 1983 for the Senate and operation of Senate office buildings was $260 million. Comparable figures for fiscal year 1984 are $262.6 million, an increase of less than 1 percent. Last year the majority leader called on Senate committees to hold increases for the committee fiscal year to 5 percent. I am proud to say that this appropriation bill does much better than that for the entire Senate.

The committee has held other elements of the legislative branch to essentially current service levels, but has allowed a few new personnel positions for high priority programs. We have been assured, however, that essential services will not suffer in any way from the reductions we have made.

With regard to one congressional support agency, the Office of Technology Assessment, the committee is recommending a substantial increase in budget and personnel levels. This is the agency which assists Congress with necessary decisions on technology questions. With the expectation that high technology holds the key to the future success of the American economy, the OTA role becomes more and more important, and I believe the increase recommended is fully warranted.

The committee is reiterating the position adopted by the Senate on H.R. 3069, the supplemental appropriations bill for fiscal year 1983, that the Commission on the West Central Front of the Capitol should have the assistance of a consulting architect. Now that the long-standing dispute over whether to extend or restore the west front has been decided, the most important remaining requirement is to insure that the restoration will be done within the amount appropriated, and with the workmanship that will make the west front again a source of pride for our Nation. The law is clear that the West Front Commission is empowered to direct the Architect of the Capitol, but it has no authority to hire staff, and realistically, the members of the Commission—the Vice President, Speaker of the House, and majority and minority leaders of the two Houses, will not be able to exercise day-to-day supervision of the progress of the restoration. So the committee is expressing its determination that the Commission have a consulting architect.

The committee has taken one other action relating to the Architect of the Capitol. For many years the Architect's office has had a passenger car, currently a 1983 Oldsmobile, and driver. This car and driver not only take personnel of the office around town to meetings, but also takes the Architect personally to and from work. Clearly when we are asking Americans to make sacrifices because of the soaring deficit, we can ask the Architect to drive his own car to and from work, as Members of the Senate and House do.

Mr. President, I ask unanimous consent that a table entitled "Summary of H.R. 3135" be printed in the RECORD at this point.

This table shows funding levels for the organizations funded in this bill.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

SUMMARY OF H.R. 3135

Department or agency	Appropriations, 1983	Budget estimates, 1984	House bill	Committee recommendations	Senate bill compared with—		
					Appropriations, 1983	Budget estimates 1984	House bill
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)

Mr. D'AMATO. Mr. President, I yield to my distinguished colleague, the ranking minority member on the Subcommittee on Legislative Appropriations, the Senator from Arkansas.

Mr. BUMPERS. Mr. President, I would like to associate myself with the remarks of the subcommittee chairman.

The bill includes $1,475,986,000, which is an increase of only $9 million over the current year and a reduction of $19 million below the amounts included in the President's budget for the legislative branch. The increase overall is less than 1 percent over the current year which reflects the efforts of the subcommittee to hold down the expenses of the legislative branch.

Mr. President, I am not aware of any controversy involving any of the provisions in this bill. I urge my colleagues to adopt this measure.

Mr. D'AMATO. Mr. President, I would now like to make a motion to facilitate the consideration of this bill.

Because the Congress has not yet adopted the first concurrent resolution on the budget for fiscal year 1984, I move, in accordance with section 904 of the Congressional Budget Act, to waive the provisions of section 303 of

that act with respect to consideration of the pending measure H.R. 3135 and any amendments thereto.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. D'AMATO. Mr. President, that concludes our preliminary matters and the bill is now open for discussion or amendment.

Mr. BUMPERS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BUMPERS. Mr. President, can the Chair advise the Senate how many filed amendments there are on this bill?

The PRESIDING OFFICER. As of this minute, there are none.

Mr. BUMPERS. Does the Senator from New York know of any reason why we cannot go to a third reading?

Mr. D'AMATO. I advise my distinguished colleague from Arkansas that we know of two objections.

Mr. BUMPERS. Are these Members who want to speak on the bill or who have amendments to offer?

Mr. D'AMATO. We have at least one amendment, and I think in two other cases Members want to speak on the bill.

Mr. BUMPERS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. BUMPERS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. Mr. President, based on the conversation that I can get around the managers' chairs down here, we have Senator MATHIAS and Senator ARMSTRONG, both of whom at least want to be heard if not to offer amendments on this bill, and Senator GARN, who apparently wants to offer an amendment. Nobody seems to know the whereabouts of any of these gentlemen. I have heard it said also that the majority leader said if we got hung up on this bill, he would like to have us set it aside and go to agriculture appropriations. So if the majority leader is listening, perhaps he will consider coming to the floor to do precisely that.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. GARN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MATTINGLY). Without objection, it is so ordered.

AMENDMENT NO. 1433

(Purpose: To limit access of Senators to unearned income)

Mr. GARN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Is it an amendment to the first committee amendment?

Mr. D'AMATO. Mr. President, I ask unanimous consent that the committee amendment be temporarily set aside.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The clerk will report.

The legislative clerk read as follows:

The Senator from Utah (Mr. GARN) proposes an amendment numbered 1433.

Mr. GARN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following:

SEC. . (a) All unearned income earned by a Senator during a calendar year in excess of an amount equal to 30 per centum of the annual salary paid to such Senator for service as a Senator during such calendar year shall be placed in an unearned income trust for the term of service of such Senator as provided in subsection (b).

(b)(1) Except as provided in paragraph (2), all income placed in an unearned income trust as required by subsection (a) shall be unavailable to the Senator for the term of service of such Senator.

(2)(A) If the unearned income of a Senator for any calendar year of service is less than an amount equal to 30 per centum of the annual salary paid to such Senator for service during such calendar, such Senator may withdraw from his or her unearned income trust, an amount equal to 30 per centum of the annual salary less the unearned income of such Senator for such calendar year.

(B) If, during any calendar year of service, a Senator has a fiscal emergency requiring extraordinary amounts of income, such Senator may apply to the Select Committee on Ethics for a waiver of the requirements of this section. The Select Committee on Ethics shall grant waivers and allow access to unearned income trust funds in accordance with regulations prescribed by such Committee.

(c) For purposes of this section, the term "unearned income" means all income other than earned income as defined in section 911(d)(2) of the Internal Revenue Code of 1954.

(d) This section shall be applicable to unearned income earned by Senators beginning January 1, 1984.

Mr. GARN. Mr. President, I will not take a long time on this amendment. It is a simple amendment. It pertains to pay and particularly to outside unearned income.

Over the last several years since I came here we have faced this issue over and over and over again on earned income. When I first got here there was a limit on outside earned income of $25,000 per year. That limit stayed in effect for many, many years. I never felt that it ought to be constitutional or is constitutional that this body has a right to determine what any Member of this body's outside earned income is as long as it is legal and as long as it is fully disclosed to our constituents.

Nevertheless, because it is a great demagogic issue, because it is a good political issue to go home and brag about how pure we are and how ethical we are, and we are imposing our standards on other people—I have never understood the argument in 9 years, and I have not understood it in the last couple of weeks when we went through that charade and, as I said on the floor of the Senate, it was the Senate at its worst, playing games with itself, creating a great heyday for the press.

Boy, did they have a great week, fantastic week. Do not worry about El Salvador, and Afghanistan, and arms control, or anything else, but, boy, have the big story every day about pay raises, about all those terrible things we are doing here on the Senate floor.

Well, in August and September 1981, we said that as long as this income was fully disclosed we would have no limit. Despite what the press reports that we did it 6 months ago, if they would check the RECORD they would find out we did it in September 1981. So this is the third calendar year in which it was legal to have earned income in excess of $25,000 per year.

In 1981 we had four votes on it. Yet we still hear that it was done quietly. Quietly—four rollcall votes in this body? And we have had many more than that over the years. It has never been done quietly. We had a couple of votes on it again in December 1982, so at least six times in recent history we have made a decision.

But that was not good enough for the do-gooders and for those who have vast amounts of unearned income, the rich boys in this body. That was not sufficient. So we had to bring it up again this year. This year they won. They reversed six votes, they reversed 3 years of what had been going on, saying how terrible and unethical it was, carrying ticking timebombs around, a scandal waiting to happen, totally ignoring the fact this ought to be an individual issue between each Senator and his constituents.

I will repeat what I said on the floor during the debate: this issue has not only been disclosed every year fully and completely as to every dime of earned income, where it comes from, the date it was received, who it came from, all of that, but in my campaign for reelection in 1980 my opponent decided that was not sufficient. So he bought tens of thousands of dollars worth of TV ads. They were black and

white ads so they looked sinister, showed some guy who looked kind of bald with his hand out, and talked about corporate tips, corporate tips, not unearned, not speech income, but corporate tips.

So everybody in Utah knew about it, that I had earned income to support seven children, three in college, and two houses, they knew that, and I got 74 percent of the vote. Maybe somebody could have claimed I could have gotten 80 percent without doing that horrible thing they knew all about, but I got 74 percent of the vote. I think the people decided I was worth what I was earning and would like to return me here for another 6 years.

But that is not good enough for our colleagues on this floor. No, they have got to impose a standard that 1.5 million people in Utah would not impose on me. If they think it is a political issue, it is very easy for them to solve. All they have to do is go home and say: "Oh, I am so sweet and pure I won't take those horrible things, I just won't take them," or, "I will establish a limit on myself."

That is fine. Any of them who want to do that can solve the political problem at home, if they think they have one.

I received two letters from Utah after my disclosure in May—two, who said they did not think I should do that.

Disclosure is the answer to ethics, full disclosure of everything we do, and then let our constituents decide, not a few hundred pages of rules and regulations as a result of laws and so-called ethical codes we pass, and then our bright young attorneys thinking up all the rules that go with those. Disclosure is the answer. You cannot legislate ethics, and you cannot legislate morality, but you can have full disclosure so that your constituents know what you are doing, and everything about what you are doing, and then they can make the judgment.

So the point of this amendment is we have a double standard. Beside the unwillingness to face the disclosure issue and feel that is good enough to solve ethical problems, we have a double standard, we have two classes of Senators here. Those who are not rich, those who do not have a rich father who left them a few million dollars in a trust fund, or stock in ITT, or AT&T, or GM, or a rich wife—some of us married for love—rich wife, rich parents, inherited wealth of some kind.

You saw the disclosures, we have people in this body who make over $1 million a year. I would like to have an estate that large in total. But can you imagine more than $1 million a year? And some of those people who have hundreds of thousands or millions of dollars of income sat on this floor and said: "Oh, you poor guys won't earn more than $20,800 a year."

I would be ashamed of that double standard. I think we ought to do it the same either way. Either there are no limits with full and complete disclosure on both kinds of income or let us have the same limits, let us treat everybody the same. Let us have a little socialism in this body and pass laws that set people's level of income and how they can educate their children.

I cannot send mine to Harvard, or Stanford, or all the better schools, so why not have legislation making everybody equal? A little socialism will not hurt us at all.

So I have a proposal that says: "All right, if we are going to play this kind of game, if we are going to have this self-righteous double standard from the elitists in this body that will not allow us to tell our constituents what we are doing, then let us make it equal."

Very simply, my amendment says that unearned income in excess of 30 percent of Senate salary, will have to be placed in an unearned income trust while a Member serves in this body. He can have the new Senate salary of $69,800 or whatever it is, plus the 30 percent of his/her unearned income so he can spend the same as the rest of us. Everybody will have $69,800 plus $20,800. It does not matter who you are or what State you come from, that is what would be fair, would it not, simply to treat everybody equally?

As the Senator from Texas Senator TOWER, said on the floor, it is interesting that he can be corrupted for a $2,000 speech, fully disclosed in great detail, from the American Bankers Association, but another Senator who happens to also reside in this body can have more than $50,000 a year in dividends from bank stocks and he is not corruptible and does not even have to report it in detail. Senator TOWER would have to give 25 speeches for $2,000 each to the same organization to get the same amount of money, but one is all right and the other is not.

The reason I suggest setting up a trust is there would be some problem if we required them to divest themselves of their tens of millions of dollars of assets. Obviously, that would create a problem. It might even knock the stock market down if they had to sell all their stocks. So we are not confiscating this, we are simply going to say that they put it all in an unearned income trust and from that trust they can withdraw 30 percent of their Senate salary per year, the same as the rest of us.

We recognize that some years they might have a bad year in the stock market, so if year they do not have enough new income to reach 30 percent, they could drop back into the trust and raise it up to 30 percent. So we should guarantee them 30 percent of their Senate income every year. When they leave the Senate, the trust is dissolved and they can have all their money.

Now, we realize some of the rich boys, with their country club memberships and their several houses on the beach and in Europe and in Mexico, wherever, might get into a cash flow problem. So we have in this particular amendment a procedure to take care of the rich boys. They can apply to the Ethics Committee for an exception. They can go down there on their hands and knees and say: "Ethics Committee, boy, have we got a problem! We may have to sell one of our cathedrals in Europe or one of our beach houses in the Mediterranean and we just don't know how we are going to handle this. Therefore, we need some extra money, and here are the circumstances. We hope you consider it an emergency and can give us more than the 30 percent."

So that is all this amendment is, an equity amendment. And the rich ought to be willing to be equitable. Some of the rich in this body want to take away most of the tax cut in 1983, limit it to a maximum of $700. They do not seem to be concerned about the rich chopping that off, so I do not know why they would be concerned about being treated like the rest of us.

So this is an equity amendment that you hear so much about. We want the poor to be treated the same as the rich or the rich the same as the poor in this body so we are all equal, so there will be no adverse influences on us, and certainly no conflict of interest if we are all treated equally.

So that is my case. I do not expect this to pass. I would expect the demagogs and the hypocrites to vote much as they usually do. But we are not only going to vote on it today. They put us through the honorarium bit every year for the last several years, so we will keep voting on it. This is the first one, maybe two or three more times this year, maybe next year, and maybe someday I will get enough converts in this body to think that everybody should be treated equally. What is good for the goose is good for the gander, and what is good for the rich boys is good for the poor boys, and vice versa, and we will all have the same income and we can see how we live.

Mr. President, I rest my case on this issue. There is no need to take any more time. If there is no further discussion, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BUMPERS. Mr. President, I do not have anything to say. I was thinking about amending it to say that all Senators had to marry for love, but

that might eliminate most of the Senators in another way, so I will not do that.

Mr. GARN. Mr. President, before we vote, I just note for the RECORD that there is not a single rich boy on the floor to defend himself. I think that it is interesting that they obviously do not want to discuss the issue. I am ready to vote.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment of the Senator from Utah (Mr. GARN). The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Maryland (Mr. Mathias), the Senator from Alaska (Mr. Murkowski), the Senator from Illinois (Mr. PERCY) and the Senator from Nevada (Mr. LAXALT), are necessarily absent.

I further announce that, if present and voting, the Senator from Alaska (Mr. MURKOWSKI), would vote "yea."

Mr. CRANSTON. I announce that the Senator from Colorado (Mr. HART), the Senator from South Carolina (Mr. HOLLINGS), and the Senator from Montana (Mr. MELCHER), are necessarily absent.

The result was announced—yeas 34, nays 58, as follows:

Rollcall Vote No. 169 Leg.]

YEAS—34

Abdnor	Hatfield	Pressler
Baker	Hawkins	Riegle
Baucus	Hecht	Sarbanes
Biden	Huddleston	Simpson

NOT VOTING—8

Goldwater	Laxalt	Murkowski
Hart	Mathias	Percy
Hollings	Melcher	

So Mr. GARN'S amendment (No. 1433) was rejected.

Mr. GARN addressed the Chair.

The PRESIDING OFFICER (Mrs. KASSEBAUM). The Senator from Utah is recognized.

Mr. GARN. Madam President, this vote is exactly what I expected. As a matter of fact, I got more votes than I anticipated. This is a lousy amendment and it should never become law. It is a matter of principle; we should not be adopting limits on anybody's income, but I wanted to make a point. We saw some of the rich people in this body as they came in to vote with absolute apoplexy on their faces. They did not share that same concern for some of us who were concerned about limitations on earned income. I do not think it should pass, but the point that ought to be strongly made is that there ought to be some equality. There should not be limitations on either earned or unearned income. And so next time we vote on this, which we will because we voted on honoraria and earned income so many times—we will vote on this three or four times a year on different bills—but next time I will have a record of those who think it is just fine to limit earned income but not unearned income and we will publish that in the RECORD to see where the double standard exists in this body.

I recognize that some are entirely consistent and voted against both, voted against both unearned income limitations and against earned. That is the way it ought to be. This amendment was defeated today, as it should have been, as should the Jackson amendment have been defeated last week. Then we will have some equity. So we will continue to point out the double standard in this body.

Mr. D'AMATO addressed the Chair.

The PRESIDING OFFICER. The Senator from New York is recognized.

Mr. D'AMATO. Madam President, I ask unanimous consent that the committee amendments to H.R. 3135 be considered and agreed to en bloc; that the bill, as amended, be considered as original text for the purpose of further amendment, with the understanding that no point of order be considered as having been waived by reason thereof.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The committee amendments agreed to en bloc are as follows:

On page 2, after line 1, insert the following:

SENATE

MILEAGE OF THE VICE PRESIDENT AND SENATORS AND EXPENSE ALLOWANCES OF THE VICE PRESIDENT, THE PRESIDENT PRO TEMPORE, MAJORITY AND MINORITY LEADERS, AND MAJORITY AND MINORITY WHIPS

MILEAGE OF THE VICE PRESIDENT AND SENATORS

For mileage of the Vice President and Senators of the United States, $60,000.

EXPENSE ALLOWABLE OF THE VICE PRESIDENT, THE PRESIDENT PRO TEMPORE, MAJORITY AND MINORITY LEADERS, AND MAJORITY AND MINORITY WHIPS

For salaries and expenses of the Office of the Legislative Counsel of the Senate, $1,280,000.

OFFICE OF SENATE LEGAL COUNSEL

For salaries and expenses of the Office of Senate Legal Counsel, $545,000.

EXPENSE ALLOWANCES OF THE SECRETARY OF THE SENATE, SERGEANT AT ARMS AND DOORKEEPER OF THE SENATE, AND SECRETARIES FOR THE MAJORITY AND MINORITY OF THE SENATE

For expense allowances of the Secretary of the Senate, $3,000; Sergeant at Arms and Doorkeeper of the Senate, $3,000; Secretary for the Majority of the Senate, $3,000; Secretary for the Minority of the Senate, $3,000; in all, $12,000.

CONTINGENT EXPENSES OF THE SENATE

SENATE POLICY COMMITTEES

For salaries and expenses of the Majority Policy Committee and the Minority Policy Committee, $856,000 for each such committee; in all, $1,712,000.

INQUIRIES AND INVESTIGATIONS

For expenses of inquiries and investigations ordered by the Senate, or conducted pursuant to section 134(a) of Public Law 601, Seventy-ninth Congress, as amended, section 112 of Public Law 96-304 and Senate Resolution 281, agreed to March 11, 1980, $45,698,000.

SECRETARY OF THE SENATE

For expenses of the Office of the Secretary of the Senate, $390,000.

SERGEANT AT ARMS AND DOORKEEPER OF THE SENATE

For expenses of the Office of the Sergeant at Arms and Doorkeeper of the Senate, $32,869,000.

MISCELLANEOUS ITEMS

For miscellaneous items, $9,174,000.

STATIONERY (REVOLVING FUND)

For stationery for the President of the Senate, $4,500, for officers of the Senate and the Conference of the Majority and the Conference of the Minority of the Senate, $34,500; in all, $39,000.

ADMINISTRATIVE PROVISIONS

SEC. 101. (a) Effective October 1, 1983, there is established within the Offices of the Majority and Minority Leaders the positions of Assistant to the Majority Leader for Floor Operations and Assistant to the Minority Leader for Floor Operations, respectively. Individuals appointed to such positions by the Majority Leader and Minority Leader, respectively, shall receive compensation at a rate fixed by the appropriate Leader not to exceed the maximum annual rate of gross compensation of the Assistant Secretary of the Senate.

(b) Effective October 1, 1983, the positions of Assistant to the Majority Leader for Floor Operations and Assistant to the Minority Leader for Floor Operations established by the Supplemental Appropriations Act, 1977 (2 U.S.C. 61h-5), are abolished.

SEC. 102. (a) Section 506(e) of the Supplemental Appropriations Act, 1973 (2 U.S.C. 58(e)) is amended—

(1) in the first sentence thereof, by inserting ", essential travel-related expenses (as defined hereafter in this subsection)," immediately after "actual transportation expenses"; and

(2) by inserting immediately after the third sentence thereof, the following new sentence: "As used in this subsection, the term 'essential travel-related expenses' means travel expenses (other than transportation expenses) which are essential to the transaction of official business while the Senator or employee is away from his official station or post of duty.".

SEC. 103. (a) Effective October 1, 1983—

(1) there shall be, within the contingent fund of the Senate, a separate account for the "Secretary of the Senate", and a separate account for the "Sergeant at Arms and Doorkeeper of the Senate";

(2) the account for "Automobiles and Maintenance", within the contingent fund of the Senate, is abolished, and funds for the purchase, lease, exchange, maintenance, and operation of vehicles for the Senate shall be included in the separate account, established by paragraph (1), for the "Sergeant at Arms and Doorkeeper of the Senate"; and

(3) the account for "Postage Stamps", within the contingent fund of the Senate, is abolished; and funds for special delivery postage of the Office of the Secretary of the Senate shall be included in the separate account, established by paragraph (1), for the "Secretary of the Senate"; funds for special delivery postage of the Sergeant at Arms and Doorkeeper of the Senate shall be included in the separate account, established by paragraph (1), for the "Sergeant at Arms and Doorkeeper of the Senate"; and postage stamps for the Secretaries for the Majority and the Minority and other offices and officers of the Senate, as authorized by law, shall be included in the account for "Miscellaneous Items", within the contingent fund of the Senate.

(b) Any provision of law which was enacted, or any Senate resolution which was agreed to, prior to October 1, 1983, and which authorizes moneys in the contingent fund of the Senate to be expended by or for the use of the Secretary of the Senate, or his office (whether generally or from a specified account within such fund) may on and after October 1, 1983, be construed to authorize such moneys to be expended from the separate account, within such fund, established by subsection (a)(1) for the "Secretary of the Senate"; and any provision of law which was enacted prior to October 1, 1983, and which authorizes moneys in the contingent fund of the Senate to be expended by or for the use of the Sergeant at Arms and Doorkeeper of the Senate, or his office (whether generally or from a specified account within such fund) may on and after October 1, 1983, be construed to authorize such moneys to be expended from the separate account, within such fund, established by subsection (a)(1) for the "Sergeant at Arms and Doorkeeper of the Senate".

Sec. 104. From funds available for any fiscal year (commencing with the fiscal year ending September 30, 1984), the Secretary of the Senate shall advance to the Sergeant at Arms and Doorkeeper of the Senate for the purpose of defraying office expenses such sums (for which the Sergeant at Arms and Doorkeeper shall be accountable) not in excess of $1,000 at any one time, as such Sergeant at Arms shall from time to time request; except that the aggregate of the sums so advanced during the fiscal year shall not exceed $10,000.

In accordance with the provisions of this section, a detailed voucher shall be submitted to the Secretary of the Senate by such Sergeant at Arms whenever necessary, in order to replenish funds expended.

SEC. 105. With the approval of the President Pro Tempore of the Senate, the Legislative Counsel of the Senate may make such expenditures as may be necessary or appropriate for the functioning of the Office of the Legislative Counsel of the Senate.

SEC. 106. Funds expended by the Legislative Counsel of the Senate or the Senate Legal Counsel for travel and related expenses shall be subject to the same regulations and limitations (insofar as they are applicable) as those which the Senate Committee on Rules and Administration prescribes for application to travel and related expenses for which payment is authorized to be made from the contingent fund of the Senate.

SEC. 107. (a) Section 506(a) of the Supplemental Appropriations Act, 1973 (2 U.S.C. 58(a)) is amended—

(1) in clause (8), by striking out "and" at the end thereof,

(2) in clause (9), (A) by striking out "ten percent" and inserting in lieu thereof "twenty percent", and (B) by striking out the period at the end thereof and inserting in lieu of such period "; and", and

(3) by inserting after and below clause (9) the following new clause:

"(10) reimbursement to each Senator for expenses for the procurement (with the prior consent of the Senate Committee on Rules and Administration) of computer equipment and computer and related services, under contracts with the providers thereof acting as independent contractors.".

(b) The amendment made by subsection (a)(2)(A) shall be effective in the case of calendar years beginning on or after January 1, 1983, and the provisions of clause (10) of section 506(a) of the Supplemental Appropriations Act, 1973 (as added by subsection (a)(3) of this section), shall be effective with respect to expenses incurred after the date of enactment of this Act.

SEC. 108. Subsections (a) and (b) of section 106 of the Legislative Branch Appropriations Act, 1963 (2 U.S.C. 60j) are repealed, effective October 1, 1983; except that, any individual who on such date is entitled to longevity compensation under such subsections on the basis of service performed prior to such date shall continue to be entitled to such compensation, but no individual shall accrue any longevity compensation on the basis of service after such date.

On page 15, line 7, strike "101", and insert "109";

On page 15, line 16, strike "102", and insert "110";

On page 15, line 23, strike "103", and insert "111";

On page 22, line 20, strike "$13,933,000", and insert "$15,800,000";

On page 22, line 23, strike "130", and insert "145";

On page 24, line 19, after "vehicle," insert the following: "hereafter to be used exclusively for official purposes; security installations authorized by House Concurrent Resolution 550, Ninety-second Congress, agreed to September 19, 1972, the cost limitation of which is hereby further increased by $167,000;"

On page 25, line 1, strike "$10,568,000", and insert "$10,630,000";

On page 25, line 2, strike "$773,000", and insert "$940,000";

On page 25, after line 8, insert the following:

"SENATE OFFICE BUILDINGS

"For all necessary expenses for maintenance, care and operation of the Senate Office Buildings; and furniture and furnishings, to be expended under the control and supervision of the Architect of the Capitol, $17,412,000, of which $1,496,000 shall remain available until expended."

On page 26, line 11, strike "$23,792,000", and insert "$23,542,000";

On page 26, line 24, strike "$35,543,550", and insert "$37,700,000";

On page 32, line 6, strike "$5,230,000", and insert "$6,380,000";

On page 32, line 7, strike "$100,000", and insert "$1,250,000";

On page 32, line 11, strike "$650,000", and insert "$700,000";

On page 32, line 11, strike "$455,000", and insert "$490,000";

On page 38, after line 15, insert the following:

"SEC. 306. (a) The Commission on the West Front of the United States Capitol shall appoint, from among private individuals who, by reason of education, training, and experience, are qualified for the position, a consulting architect to assist the Commission in directing the Architect of the Capitol with respect to the restoration of the West Central Front of the United States Capitol.

"(b) The Architect of the Capitol shall keep the consulting architect appointed under subsection (a) fully and currently informed of the progress of the restoration of the West Central Front of the United States Capitol.

"(c) The consulting architect appointed under subsection (a) shall be paid for his services (out of sums appropriated for the restoration of the west central front of the United States Capitol) compensation at such rate of pay as the Commission on the West Central Front of the United States Capitol shall fix, but not exceeding a rate equal to the daily equivalent of the rate of basic pay payable for grade GS-18 under the General Schedule under section 5332 of title 5, United States Code."

● Mr. DOMENICI. Madam President, H.R. 3135, as reported by the Appropriations Committee, provides $1.5 billion in new budget authority for fiscal year 1984. Including prior-year outlays, fiscal year 1984 outlays associated with the reported bill would be $1.5 billion.

These amounts are consistent with the assumptions in the conference agreement on House Concurrent Resolution 91 and the President's budget request.

I support the bill as reported and commend the subcommittee for keeping spending within the budget and the President's request.

I ask that a table comparing the bill to the conference report on House Concurrent Resolution 91, the House bill, and the President's request be printed in the RECORD.

The table follows:

LEGISLATIVE BRANCH SUBCOMMITTEE SPENDING TOTALS

[In billions of dollars]

	Fiscal year 1984	
	Budget authority	Outlays
Outlays from prior-year budget authority and other actions completed		0.2
H.R. 3135, as reported in the Senate [1]	1.5	1.3
Total for Legislative Branch Subcommittte	1.5	1.5
Subcommittee crosswalk allocation under fiscal year 1984 assumptions in the conference report on H. Con. Res. 91	1.5	1.5
House level [2]	1.5	1.5
President's request	1.5	1.5

[1] Assumes House level for House operations.
[2] Assumes Senate level for Senate operations.●

Mr. D'AMATO. Madam President, that concludes our preliminary matters.

Mr. BUMPERS. Third reading.

Mr. HATFIELD. Third reading, Madam President.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

Mr. MELCHER. Madam President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. D'AMATO. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. JACKSON. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JACKSON. Madam President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HATFIELD. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HATFIELD. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill having been read the third time, the question is, Shall it pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Maine (Mr. COHEN), the Senator from Maryland (Mr. MATHIAS), the Senator from Alaska (Mr. MURKOWSKI), and the Senator from Illinois (Mr. PERCY) are necessarily absent.

I further announce that, if present and voting, the Senator from Alaska (Mr. MURKOWSKI) would vote "yea".

Mr. CRANSTON. I announce that the Senator from Colorado (Mr. HART) and the Senator from South Carolina (Mr. HOLLINGS) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 78, nays 15, as follows:

[Rollcall Vote No. 170 Leg.]

YEAS—78

Abdnor	Glenn	Moynihan
Andrews	Goldwater	Nunn
Bentsen	Gorton	Packwood
Biden	Hatfield	Pell
Bingaman	Hecht	Pressler
Boren	Heinz	Proxmire
Boschwitz	Huddleston	Pryor
Bradley	Inouye	Randolph
Bumpers	Jackson	Riegle
Burdick	Jepsen	Roth
Byrd	Johnston	Rudman
Chafee	Kassebaum	Sarbanes
Chiles	Kasten	Sasser
Cochran	Kennedy	Simpson
Cranston	Lautenberg	Specter
D'Amato	Laxalt	Stafford
Danforth	Leahy	Stennis
Denton	Levin	Stevens
Dixon	Long	Thurmond
Dodd	Lugar	Tower
Dole	Matsunaga	Trible
Domenici	Mattingly	Tsongas
Durenberger	McClure	Wallop
Eagleton	Melcher	Warner
Exon	Metzenbaum	Weicker
Ford	Mitchell	Wilson

NAYS—15

Armstrong	Grassley	Humphrey
Baucus	Hatch	Nickles
DeConcini	Hawkins	Quayle
East	Heflin	Symms
Garn	Helms	Zorinsky

NOT VOTING—7

Baker	Hollings	Percy
Cohen	Mathias	
Hart	Murkowski	

So the bill (H.R. 3135), as amended, was passed.

Mr. D'AMATO. Madam President, I move to reconsider the vote by which the bill was passed.

Mr. NICKLES. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. D'AMATO. Madam President, I move that the Senate insist on its amendments to H.R. 3135 and request a conference with the House of Representatives on the disagreeing votes of the two Houses thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to and the Presiding Officer (Mrs. KASSEBAUM) appointed Senators D'AMATO, HATFIELD, STEVENS, BUMPERS, HOLLINGS, and STENNIS conferees on the part of the Senate.

Mr. D'AMATO. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. PRESSLER). Without objection, it is so ordered.

RECESS UNTIL 2:30 P.M.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate stand in recess until the hour of 2:30 p.m. today.

There being no objection, the Senate, at 1:17 p.m., recessed until 2:30 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. STEVENS).

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, the House is going to vote at about 3 or 3:15 p.m. on the budget conference report. If it passes—and I rather expect that it will—it will be over here, and I would hope to take that matter up this afternoon. I must report to the Senate that apparently we have manifold difficulties in getting to the agriculture appropriations bill. There are a number of objections to the waiver of the 3-day rule, I am told. If those persist, it will not be possible for us to reach that appropriations bill until next week. That is too bad, but that is just the way it is. So we will be awaiting the arrival of the conference report on the budget this afternoon and scurrying around for anything else we can do while we are waiting.

Once again I wish to report that my earlier ambition to do both the legislative appropriations bill and the agriculture appropriations bill is only going to be about half realized. We passed the legislative appropriations bill, and once again I congratulate those who were active in its management. The Appropriations Committee, indeed, has done a masterful job of bringing these matters to us and dispatching them promptly. This is the third of the regular appropriations bills that we have done since receiving them from the House, and that is good progress indeed. But the agriculture appropriations bill is going to require a little more work.

RECESS UNTIL 3:30 P.M.

Mr. BAKER. Mr. President, I do not see any point in us sitting around waiting for the House to report, and that is really all we have to do. Therefore, I ask unanimous consent that the Senate stand in recess until 3:30 p.m. today.

There being no objection, the Senate, at 2:32 p.m., recessed until 3:30 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. ARMSTRONG).

ORDER OF BUSINESS

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. I thank the Chair.

Mr. President, we are still awaiting the conference report on the budget from the House of Representatives. I am told it should be here within the next 10 minutes or so. It is my hope that when it arrives, we can take it over. I shall confer with the minority leader on that.

I also wish to establish a time certain for the final consideration of that matter, if possible, so I hope that Members who may hear these remarks will be prepared for that and that we may be able to negotiate a time of about 6 p.m. for passage, if possible.

Mr. President, I regret to say that we have nothing else we can do until that measure reaches us from the House. The agriculture appropriations bill cannot be taken up—there is an objection to the waiver of the 3-day rule—and there are no other matters that qualify. Therefore, for the moment, at least, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGE FROM THE HOUSE OF REPRESENTATIVES

Mr. BAKER. Mr. President, I observe a messenger from the House at the door. I assume that this is the conference report on the budget resolution from the House of Representatives.

Before I yield the floor so that the Chair can admit the messenger, let me say that I am trying to negotiate an agreement on a time certain to take up and agree to the conference report today. That is still in progress. While we continue those negotiations, the conference report will remain at the desk.

Mr. President, I now yield so that the Chair may admit the messenger.

At 3:51 p.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its clerks, announced that the House recedes from its disagreement to the amendment of the Senate to the concurrent resolution (H. Con. Res. 91) revising the congressional budget for the U.S. Government for the fiscal year 1983 and setting forth the congressional budget for the U.S. Government for the fiscal years 1984, 1985, and 1986, and has agreed thereto, with an amendment.

The message further announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 3329. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1984, and for other purposes.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. RUDMAN). Without objection, it is so ordered.

UNANIMOUS—CONSENT AGREEMENT—BUDGET RESOLUTION

Mr. BAKER. Mr. President, I hope that we have a unanimous-consent agreement to provide for the consideration of the conference report on the budget resolution and to do so yet this evening. I wish to put a unanimous-consent request which I have submitted to the minority leader and which I have discussed with the chairman of the Budget Committee, the chairman of the Finance Committee, the ranking member of the Budget Committee, and with a number of other Senators. I believe this has been cleared, and I shall state it now with some apprehension but also some optimism.

Mr. President, I ask unanimous consent that the Senate now turn to the consideration of House Concurrent Resolution 91, the first concurrent resolution on the budget, that it be laid before the Senate and that the conference report be deemed to be agreed to; that the Senate proceed immediately to a motion to concur in the House amendment; provided that no amendment be in order to the motion except an amendment to be offered by the Senator from Kansas (Mr. DOLE) dealing with reducing revenue and changing the date on which the Finance Committee is mandated to report under reconciliation.

I further ask unanimous consent that the time between the beginning of debate and 6 p.m. be divided equally between the majority leader and the minority leader or their designees.

I further ask unanimous consent that the Senator from Montana (Mr. MELCHER) be entitled to 10 minutes for debate, to be charged against the time allocated to the minority leader or his designee.

Further, Mr. President, I ask unanimous consent that the vote on the motion to concur as amended, if amended, occur at 6 p.m., and that the rollcall vote to begin at 6 p.m. and last until 7 p.m.

Mr. BYRD. Mr. President, reserving the right to object——

Mr. BAKER. Mr. President, also the unanimous-consent request would provide that on the amendment to be offered by the Senator from Kansas (Mr. DOLE) there would be a time limitation of 20 minutes to be equally divided.

The PRESIDING OFFICER. Is there objection?

Mr. DOMENICI. Reserving the right to object, Mr. Leader, I believe when the Dole amendment was explained there was a word left out. The majority leader said "reduced revenues." I think it is "reduce the reconciled revenues."

Mr. BAKER. Very well. Mr. President, I amend the request in that respect.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, reserving the right to object—Mr. President, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the Chair. I thank the minority leader, and I especially thank the manager of the resolution, Senator DOLE, and others who have been directly involved in these negotiations.

FIRST CONCURRENT RESOLUTION ON THE BUDGET, FISCAL YEAR 1984—CONFERENCE REPORT

Mr. BAKER. Mr. President, I now ask that the Chair lay before the Senate the conference report.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill concurrent resolution (H.Con.Res.91) revising the congressional budget for the United States Government for fiscal year 1983 and setting forth the congressional budget for the United States Government for the fiscal years 1984, 1985, and 1986, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

(The conference report is printed in the House proceedings of the RECORD of June 21, 1983, page H4146.)

The PRESIDING OFFICER. The conference report is deemed to have been agreed to and the amendment of the House will be stated.

The legislative clerk read as follows:

Resolved that the House recede from its disagreement to the amendment of the Senate to the resolution (H. Con. Res. 91) entitled "Concurrent resolution revising the congressional budget," and so forth, and concur therein with amendments.

The text of the amendment of the House follows:

IN THE HOUSE OF REPRESENTATIVES, U.S.,

June 23, 1983.

Resolved, That the House recede from its disagreement to the amendment of the Senate to the resolution (H. Con. Res. 91) entitled "Concurrent resolution revising the congressional budget for the United States Government for the fiscal year 1983 and setting forth the congressional budget for the United States Government for the fiscal years 1984, 1985, and 1986", and concur therein with the following amendment: In lieu of the matter inserted by the said amendment, insert:

That the Congress hereby determines and declares that the concurrent resolution on the budget for fiscal year 1983 is hereby revised and replaced, the first concurrent resolution on the budget for fiscal year 1984 is hereby established, and the appropriate budgetary levels for fiscal years 1985 and 1986 are hereby set forth:

(a) The following budgetary levels are appropriate for the fiscal years beginning on October 1, 1982, October 1, 1983, October 1, 1984, and October 1, 1985:

(1) The recommended levels of Federal revenues are as follows:

Fiscal year 1983: $604,300,000,000.
Fiscal year 1984: $679,600,000,000.
Fiscal year 1985: $750,500,000,000.
Fiscal year 1986: $835,800,000,000.

and the amounts by which the aggregate levels of Federal revenues should be changed are as follows:

Fiscal year 1983: −$100,000,000.
Fiscal year 1984: +$12,000,000,000.
Fiscal year 1985: +$15,000,000,000.
Fiscal year 1986: +$46,000,000,000.

and the amounts for Federal Insurance Contributions Act revenues for hospital insurance within the recommended levels of Federal revenues are as follows:

Fiscal year 1983: $35,900,000,000.
Fiscal year 1984: $40,000,000,000.
Fiscal year 1985: $44,700,000,000.
Fiscal year 1986: $51,400,000,000.

and the amounts for Federal Insurance Contributions Act revenues and other revenues pursuant to Public Law 98-21 for old age, survivors, and disabilty insurance within the recommended levels of Federal revenues are as follows:

Fiscal year 1983: $148,800,000,000.
Fiscal year 1984: $167,900,000,000.
Fiscal year 1985: $187,300,000,000.
Fiscal year 1986: $203,300,000,000.

(2)(A) The appropriate levels of total new budget authority, including amounts reserved pursuant to section 2, are as follows:

Fiscal year 1983: $883,360,000,000.
Fiscal year 1984: $928,725,000,000.
Fiscal year 1985: $996,750,000,000.
Fiscal year 1986: $1,059,300,000,000.

(B) The appropriate levels of total new budget authority, excluding amounts reserved pursuant to section 2, are as follows:

Fiscal year 1983: $877,200,000,000.
Fiscal year 1984: $919,500,000,000.
Fiscal year 1985: $990,500,000,000.
Fiscal year 1986: $1,054,600,000,000.

(3)(A) The appropriate levels of total budget outlays, including amounts reserved pursuant to section 2, are as follows:

Fiscal year 1983: $812,850,000,000.
Fiscal year 1984: $858,925,000,000.
Fiscal year 1985: $911,600,000,000.
Fiscal year 1986: $966,635,000,000.

(B) The appropriate levels of total budget outlays, excluding amounts reserved pursuant to section 2, are as follows:

Fiscal year 1983: $807,400,000,000.
Fiscal year 1984: $849,500,000,000.
Fiscal year 1985: $906,750,000,000.
Fiscal year 1986: $962,950,000,000.

(4)(A) Unless subparagraph (B) applies, the amounts of the deficits in the budget which are appropriate in the light of economic conditions and all other relevant factors are as follows:

Fiscal year 1983: $203,100,000,000.
Fiscal year 1984: $169,900,000,000.
Fiscal year 1985: $156,250,000,000.
Fiscal year 1986: $127,150,000,000.

(B) If all of the adjustments provided for in section 2 of this resolution are made, the amounts of the deficits in the budget which are appropriate in the light of economic conditions and all other relevant factors shall not exceed:

Fiscal year 1983: $208,550,000,000.
Fiscal year 1984: $179,325,000,000.
Fiscal year 1985: $161,100,000,000.
Fiscal year 1986: $130,835,000,000.

(5) The appropriate levels of the public debt are as follows:

Fiscal year 1983: $1,389,000,000,000.
Fiscal year 1984: $1,614,600,000,000.
Fiscal year 1985: $1,830,100,000,000.
Fiscal year 1986: $2,022,800,000,000.

and the amounts by which the statutory limits on such debt should be accordingly increased are as follows:

Fiscal year 1983: $246,100,000,000.
Fiscal year 1984: $225,600,000,000.
Fiscal year 1985: $215,500,000,000.
Fiscal year 1986: $192,700,000,000.

(6)(A) The appropriate levels of total Federal credit activity, including amounts reserved pursuant to section 2, for the fiscal years beginning on October 1, 1982, October 1, 1983, October 1, 1984, and October 1, 1985, are as follows:

Fiscal year 1983:
(i) New direct loan obligations, $54,250,000,000.
(ii) New primary loan guarantee commitments, $99,600,000,000.
(iii) New secondary loan guarantee commitments, $68,250,000,000.

Fiscal year 1984:
(i) New direct loan obligations, $47,900,000,000.
(ii) New primary loan guarantee commitments, $101,700,000,000.
(iii) New secondary loan guarantee commitments, $68,250,000,000.

Fiscal year 1985:
(i) New direct loan obligations, $47,800,000,000.
(ii) New primary loan guarantee commitments, $106,600,000,000.
(iii) New secondary loan guarantee commitments, $68,250,000,000.

Fiscal year 1986:
(i) New direct loan obligations, $47,750,000,000.
(ii) New primary loan guarantee commitments, $106,800,000,000.
(iii) New secondary loan guarantee commitments, $68,250,000,000.

(B) The appropriate levels of total Federal credit activity, excluding amounts reserved pursuant to section 2, for the fiscal years beginning on October 1, 1982, October 1, 1983, October 1, 1984, and October 1, 1985, are as follows:

Fiscal year 1983:
(i) New direct loan obligations, $52,700,000,000.
(ii) New primary loan guarantee commitments, $99,600,000,000.
(iii) New secondary loan guarantee commitments, $68,250,000,000.

Fiscal year 1984:
(i) New direct loan obligations, $46,700,000,000.
(ii) New primary loan guarantee commitments, $100,100,000,000.
(iii) New secondary loan guarantee commitments, $68,250,000,000.

Fiscal year 1985:
(i) New direct loan obligations, $46,700,000,000.
(ii) New primary loan guarantee commitments, $103,050,000,000.
(iii) New secondary loan guarantee commitments, $68,250,000,000.

Fiscal year 1986:
(i) New direct loan obligations, $47,750,000,000.

(ii) New primary loan guarantee commitments, $106,800,000,000.
(iii) New secondary loan guarantee commitments, $68,250,000,000.
(b) The Congress hereby determines and declares the appropriate levels of budget authority and budget outlays, and the appropriate levels of new direct loan obligations and new loan guarantee commitments for fiscal years 1983 through 1986 for each major functional category are:
(1) National Defense (050):
Fiscal year 1983:
(A) New budget authority, $244,600,000,000.
(B) Outlays, $214,300,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, $268,600,000,000.
(B) Outlays, $240,000,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, $297,300,000,000.
(B) Outlays, $265,300,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $329,000,000,000.
(B) Outlays, $295,000,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(2) International Affairs (150):
Fiscal year 1983:
(A) New budget authority, $24,850,000,000.
(B) Outlays, $11,500,000,000.
(C) New direct loan obligations, $10,650,000,000.
(D) New primary loan guarantee commitments, $9,250,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, $18,700,000,000.
(B) Outlays, $12,950,000,000.
(C) New direct loan obligations, $12,000,000,000.
(D) New primary loan guarantee commitments, $10,300,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, $16,800,000,000.
(B) Outlays, $13,000,000,000.
(C) New direct loan obligations, $12,300,000,000.
(D) New primary loan guarantee commitments, $10,300,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $16,250,000,000.
(B) Outlays, $12,900,000,000.
(C) New direct loan obligations, $12,850,000,000.
(D) New primary loan guarantee commitments, $10,300,000,000.
(E) New secondary loan guarantee commitments, $0.
(3) General Science, Space, and Technology (250):
Fiscal year 1983:
(A) New budget authority, $7,900,000,000.
(B) Outlays, $7,700,000,000.
(C) New direct loan obligations, $200,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, $8,700,000,000.
(B) Outlays, $8,300,000,000.
(C) New direct loan obligations, $50,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, $8,500,000,000.
(B) Outlays, $8,500,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $8,150,000,000.
(B) Outlays, $8,300,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(4) Energy (270):
Fiscal year 1983:
(A) New budget authority, $3,950,000,000.
(B) Outlays, $4,450,000,000.
(C) New direct loan obligations, $11,600,000,000.
(D) New primary loan guarantee commitments, $150,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, $4,200,000,000.
(B) Outlays, $4,300,000,000.
(C) New direct loan obligations, $12,050,000,000.
(D) New primary loan guarantee commitments, $150,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, $3,900,000,000.
(B) Outlays, $3,150,000,000.
(C) New direct loan obligations, $12,500,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $3,500,000,000.
(B) Outlays, $3,050,000,000
(C) New direct loan obligations, $12,600,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(5) Natural Resources and Environment (300):
Fiscal year 1983:
(A) New budget authority, $12,400,000,000.
(B) Outlays, $12,450,000,000.
(C) New direct loan obligations, $50,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, $12,050,000,000.
(B) Outlays, $12,500,000,000.
(C) New direct loan obligations, $50,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, $11,850,000,000.
(B) Outlays, $12,550,000,000.
(C) New direct loan obligations, $50,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $11,700,000,000.
(B) Outlays, $12,150,000,000.
(C) New direct loan obligations, $50,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(6)(i) Agriculture (350), including amounts reserved pursuant to section 2:
Fiscal year 1983:
(A) New budget authority, $24,650,000,000.
(B) Outlays, $24,450,000,000.
(C) New direct loan obligations, $19,400,000,000.
(D) New primary loan guarantee commitments, $5,550,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, $13,600,000,000.
(B) Outlays, $12,100,000,000.
(C) New direct loan obligations, $13,300,000,000.
(D) New primary loan guarantee commitments, $4,350,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, $14,500,000,000.
(B) Outlays, $12,400,000,000.
(C) New direct loan obligations, $12,750,000,000.
(D) New primary loan guarantee commitments, $4,350,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $13,200,000,000.
(B) Outlays, $13,100,000,000.
(C) New direct loan obligations, $13,200,000,000.
(D) New primary loan guarantee commitments, $4,350,000,000.
(E) New secondary loan guarantee commitments, $0.
(ii) Agriculture (350), excluding amounts reserved pursuant to section 2:
Fiscal year 1983:
(A) New budget authority, $24,200,000,000.
(B) Outlays, $24,000,000,000.
(C) New direct loan obligations, $18,600,000,000.
(D) New primary loan guarantee commitments, $5,550,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, $13,000,000,000.
(B) Outlays, $11,500,000,000.
(C) New direct loan obligations, $12,100,000,000.
(D) New primary loan guarantee commitments, $3,750,000,000.

(E) New secondary loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, $14,500,000,000.
(B) Outlays, $12,400,000,000.
(C) New direct loan obligations, $11,650,000,000.
(D) New primary loan guarantee commitments, $3,800,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $13,200,000,000.
(B) Outlays, $13,100,000,000.
(C) New direct loan obligations, $12,200,000,000.
(D) New primary loan guarantee commitments, $3,850,000,000.
(E) New secondary loan guarantee commitments, $0.
(7)(i) Commerce and Housing Credit (370), including amounts reserved pursuant to section 2:
Fiscal year 1983:
(A) New budget authority, $6,060,000,000.

(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, −$18,050,000,000.
(B) Outlays, −$18,050,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, −$18,900,000,000.
(B) Outlays, −$18,900,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, −$23,750,000,000.
(B) Outlays, −$23,750,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.

RESERVE PROGRAMS

SEC. 2. (a) The following amounts of new budget authority and budget outlays for fiscal year 1983 and fiscal year 1984 are hereby reserved by the Congress for subsequent allocation to committees under section 302(a) of the Congressional Budget Act of 1974 for the functions and programs listed in the Statement of Managers, accompanying this resolution:
Fiscal year 1983:
(1) New budget authority, $6,060,000,000.
(2) Outlays, $5,350,000,000.
Fiscal year 1984:
(1) New budget authority, $8,325,000,000.
(2) Outlays, $8,525,000,000.
(b) In the House of Representatives:
(1) Upon the enactment of any legislation referred to in subsection (a) which requires an appropriation, or upon enactment of an appropriation for such purpose before the authorizing legislation is enacted, the Committee on the Budget is authorized and directed to report to the House a revised allocation of new budget authority and budget outlays for fiscal years 1983 and 1984 to the Committee on Appropriations reflecting the content of such legislation; and
(2) When one or more committees, other than the Committee on Appropriations, report legislation only referred to in subsection (a) providing new spending authority defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, or providing new budget authority, or when the Committee on Rules reports a resolution providing for consideration of such legislation which has not been reported by a committee, the Committee on the Budget is authorized and directed to report to the House a revised allocation of such new spending authority for fiscal years 1983 and 1984 to the appropriate committee reflecting the content of such legislation: *Provided, however,* That if such legislation is rejected by either House, the Committee on the Budget is authorized and directed to report to the House a similar reduction in the appropriate allocation.
(c) In the Senate:
(1) Upon the enactment of any legislation referred to in subsection (a) which requires an appropriation, the Committee on the Budget is directed to report to the Senate a revised allocation of new budget authority and budget outlays for fiscal years 1983 and 1984 to the Committee on Appropriations or any other appropriate committee reflecting the content of such legislation insofar as it relates to the programs referred to in subsection (a); and
(2) When the Senate moves to proceed or proceeds to consider legislation referred to in subsection (a) providing new spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, or providing new budget authority, the Committee on the Budget is directed to report to the Senate a revised allocation of such new spending authority for fiscal years 1983 and 1984 to the appropriate committee reflecting the content of such legislation insofar as it relates to the programs referred to in subsection (a) above: *Provided, however,* That if such legislation is rejected by either House, the Committee on the Budget is directed to report to the Senate a similar reduction in the appropriate allocation.
(d) Any revised allocation reported to the House or Senate pursuant to subsection (b) or (c) of this section shall be considered to be the allocation made pursuant to section 302(a) of the Congressional Budget Act of 1974 for purposes of sections 4 and 5 of this resolution and section 401(b)(2) of such Act. The adjustments made pursuant to those sections for each program shall not exceed the amounts provided for such program as set forth in the statement of managers.
(e) For purposes of section 311(a) of the Congressional Budget Act of 1974, the appropriate levels of new budget authority and budget outlays for fiscal years 1983 and 1984 shall be considered to be the following:
Fiscal Year 1983 Budget Authority $877,200,000,000.
Fiscal Year 1983 Budget Outlays $807,400,000,000.
Fiscal Year 1984 Budget Authority $919,500,000,000.
Fiscal Year 1984 Budget Outlays $849,500,000,000:
Provided, however, That if a revised allocation is made pursuant to subsection (b) or (c) then such levels shall be similarly adjusted in any report pursuant to such subsections to reflect the revised allocation.

RECONCILIATION

SEC. 3. (a) Not later than July 22, 1983, Senate committees named in subsections (b) through (e) of this section shall submit their recommendations to the Senate Committee on the Budget and not later than July 22, 1983, the House committees named in subsections (f) through (l) of this section shall submit their recommendations to the House Budget Committee. After receiving those recommendations, the Committees on the Budget shall report to the House and Senate a reconciliation bill or resolution or both carrying out all such recommendations without any substantive revision.
(b)(1) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce outlays by $400,000,000 in fiscal year 1984; to reduce outlays by $500,000,000 in fiscal year 1985; and to reduce outlays by $800,000,000 in fiscal year 1986.
(2) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee sufficient to increase revenues as follows: $12,000,000,000 in fiscal year 1984; $15,000,000,000 in fiscal year 1985; and $46,000,000,000 in fiscal year 1986.
(c) The Senate Committee on Governmental Affairs shall report changes within the jurisdiction of that committee, (1) sufficient to achieve savings in budget authority and outlays, or (2) which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, or (3) any combination thereof, as follows: $1,619,000,000 in budget authority and $1,900,000,000 in outlays in fiscal year 1984; $2,332,000,000 in budget authority and $2,841,000,000 in outlays in fiscal year 1985; and $3,235,000,000 in budget authority and $4,144,000,000 in outlays in fiscal year 1986.
(d) The Senate Committee on Small Business shall report changes in laws within the jurisdiction of that committee which will result in savings in budget authority and outlays, as follows: $139,000,000 in budget authority and $287,000,000 in outlays in fiscal year 1984; $555,000,000 in budget au-

thority and $466,000,000 in outlays in fiscal year 1985; and $544,000,000 in budget authority and $443,000,000 in outlays in fiscal year 1986.

(e) The Senate Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority by $228,000,000 and outlays by $226,000,000 in fiscal year 1984; to reduce budget authority by $139,000,000 and outlays by $138,000,000 in fiscal year 1985; and to reduce budget authority by $141,000,000 and outlays by $140,000,000 in fiscal year 1986.

(f) The House Committee on Armed Services shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority by $253,000,000 and outlays by $253,000,000 in fiscal year 1984; to reduce budget authority by $360,000,000 and outlays by $360,000,000 in fiscal year 1985; and to reduce budget authority by $621,000,000 and outlays by $621,000,000 in fiscal year 1986.

(g) The House Committee on Energy and Commerce shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce outlays by $400,000,000 in fiscal year 1984; to reduce outlays by $500,000,000 in fiscal year 1985; and to reduce outlays by $800,000,000 in fiscal year 1986.

(h) The House Committee on Foreign Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce outlays by $3,000,000 in fiscal year 1984; to reduce outlays by $4,000,000 in fiscal year 1985; and to reduce outlays by $4,000,000 in fiscal year 1986.

(i) The House Committee on Post Office and Civil Service shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority by $1,619,000,000 and outlays by $1,900,000,000 in fiscal year 1984; to reduce budget authority by $2,332,000,000 and outlays by $2,841,000,000 in fiscal year 1985; and to reduce budget authority by $3,235,000,000 and outlays by $4,144,000,000 in fiscal year 1986.

(j) The House Committee on Small Business shall report changes in laws within the jurisdiction of that committee which will result in savings in budget authority and outlays, as follows: $139,000,000 in budget authority and $287,000,000 in outlays in fiscal year 1984; $555,000,000 in budget authority and $466,000,000 in outlays in fiscal year 1985; and $544,000,000 in budget authority and $443,000,000 in outlays in fiscal year 1986.

(k) The House Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority by $228,000,000 and outlays by $226,000,000 in fiscal year 1984; to reduce budget authority by $139,000,000 and outlays by $138,000,000 in fiscal year 1985; and to reduce budget authority by $141,000,000 and outlays by $140,000,000 in fiscal year 1986.

(l)(1) The House Committee on Ways and Means shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce outlays by $400,000,000 in fiscal year 1984; to reduce outlays by $500,000,000 in fiscal year 1985; and to reduce outlays by $800,000,000 in fiscal year 1986.

(2) The House Committee on Ways and Means shall report changes in laws within the jurisdiction of that committee sufficient to increase revenues as follows: $12,000,000,000 in fiscal year 1984; $15,000,000,000 in fiscal year 1985; and $46,000,000,000 in fiscal year 1986.

(3) If the changes in laws reported to the House by the Committee on Ways and Means pursuant to paragraph (2) of this subsection contain changes involving the imposition of new or expanded taxes to directly finance programs within the jurisdiction of any other committee of the House (including, but not limited to, inland waterways or deep draft ports) or the imposition of any new or expanded user fees within the jurisdiction of any other committee of the House, an appropriate referral pursuant to Rule X of the Rules of the House should be considered.

(m) Should provisions in Subtitle A of Title I of Public Law 97-253, relating to 50 cent per hundredweight assessments against milk producers, be finally adjudicated by the courts to be unconstitutional or unenforceable, the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition, and Forestry shall report changes in laws within their jurisdiction within 30 days of that disposition which provide spending authority only as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce outlays by $1,243,000,000 in fiscal year 1984; to reduce outlays by $1,332,000,000 in fiscal year 1985; and to reduce outlays by $1,327,000,000 in fiscal year 1986.

MISCELLANEOUS PROVISIONS

SEC. 4. No bill or resolution providing new discretionary budget authority or new spending authority described in section 401(c)(2)(C) of the Congressional Budget Act of 1974, for fiscal year 1984, which exceeds the appropriate allocation of new discretionary budget authority or new spending authority described in section 401(c)(2)(C) of the Congressional Budget Act, made pursuant to section 302(a) of such Act, shall be enrolled in the House of Representatives, and no bill or resolution providing new budget authority or new spending authority described in section 401(c)(2)(C) of the Congressional Budget Act of 1974, for fiscal year 1984, which exceeds the appropriate allocation of new budget authority or new spending authority described in section 401(c)(2)(C) of the Congressional Budget Act, made pursuant to section 302(a) of such Act, shall be enrolled in the Senate, until after the Congress has completed action on the second concurrent resolution on the budget required to be reported under section 310 of such Act or until October 1, 1983, whichever occurs first.

SEC. 5. (a) If Congress has not completed action by October 1, 1983, on the concurrent resolution on the budget required to be reported under section 310(a) of the Congressional Budget Act of 1974 for the 1984 fiscal year, then this concurrent resolution shall be deemed to be the concurrent resolution required to be reported under section 310(a) of such Act, for the purposes of section 311 of such Act.

(b) Section 311(a) of the Congressional Budget Act of 1974, as made applicable by subsection (a) of this section, shall not apply to bills, resolutions, or amendments within the jurisdication of a committee, or any conference report on any such bill or resolution, if—

(1) the enactment of such bill or resolution as reported;

(2) the adoption and enactment of such amendment; or

(3) the enactment of such bill or resolution in the form recommended in such conference report;

would not cause the appropriate allocation for such committee of new discretionary budget authority, new budget authority, or new spending authority as described in section 401(c)(2)(C) of the Congressional Budget Act of 1974 made pursuant to section 302(a) of such Act for fiscal year 1984 to be exceeded.

(c) The provisions of this section shall cease to apply when Congress completes action on a subsequent concurrent resolution on the budget for fiscal year 1984 pursuant to section 304 or 310 of the Congressional Budget Act of 1974.

SEC. 6. MONETARY POLICY.—Inasmuch as—

(1) there is a need for coordination between fiscal and monetary policy,

(2) actual and projected budget deficits have placed a heavy burden on monetary policy,

(3) any reduction in the budget deficit brought about by this budget resolution will reduce pressures on monetary policy,

(4) there is a need for vigorous economic growth consistent with reasonable price stability,

(5) the Banking and Budget Committees of the respective Houses require information regarding the Federal Reserve's monetary policy and the economic assumptions consistent with that policy, and

(6) the Budget Committees are, therefore, interested in the recommendations of the Banking Committees of the respective Houses with respect to such information,

the House Committee on Banking, Finance and Urban Affairs, and the Senate Committee on Banking, Housing, and Urban Affairs are requested to report to their respective bodies, no later than September 30, 1983, a resolution expressing the sense of the Congress as to (A) the coordination of the Federal Reserve's monetary policy with the fiscal policy reflected in this budget resolution and the appropriate information regarding the economic assumptions and goals of the Federal Reserve System, (B) the appropriate information to implement this policy coordination including, but not limited to, the effects of the Federal Reserve's monetary policy on the economy, and (C) any other matters pertaining to the Federal Reserve's execution or congressional oversight of monetary policy, as the above Committees deem appropriate.

SEC. 7. It is the sense of the Congress that, in light of budget restraint, limited resources, and the need to foster economic growth, the House Committee on Armed Services should initiate a thorough review of military retirement programs which constitute a major sector of the defense budget and should recommend changes which

would result in reduced spending under these programs.

SEC. 8. It is the sense of the Congress that President and the Congress, through the appropriations process, should limit the on-budget new direct loan obligations of the Federal Government to an amount not to exceed $38,150,000,000 in fiscal year 1983 and $31,000,000,000 in fiscal year 1984; off-budget new direct loan obligations to an amount not to exceed $16,100,000,000 in fiscal year 1983 and $16,900,000,000 in fiscal year 1984; new primary loan guarantee commitments to an amount not to exceed $99,600,000,000 in fiscal year 1983 and $101,700,000,000 in fiscal year 1984; and new secondary loan guarantee commitments to an amount not to exceed $68,250,000,000 in fiscal year 1983 and $68,250,000,000 in fiscal year 1984. It is further the sense of the Congress that the President and the Congress should limit total Federal Financing Bank origination of direct loans guaranteed by other Federal agencies to $15,000,000,000, in fiscal year 1983 and $15,500,000,000 in fiscal year 1984, and Federal Financing Bank purchases of certificates of beneficial ownership from Federal agencies to $12,050,000,000 in fiscal year 1983 and $13,950,000,000 in fiscal year 1984. It is further the sense of the Congress that direct borrowing transactions of Federal agencies should be, to the maximum extent possible, restricted to the Federal Financing Bank.

SEC. 9. It is the sense of the Congress and the budgets of Federal agencies initiating Federal Financing Bank purchases of certificates of beneficial ownership and originations of guaranteed loans should include the budget authority and outlays resulting from the transactions. The Congress recommends that the committees with jurisdiction over the Federal Financing Bank Act of 1973 consider expeditiously legislation to require that the budgetary impact of such Federal Financing Bank transactions be included in the budgets of the initiating agencies beginning with the fiscal year 1985 budget.

Mr. BAKER. Mr. President, under the provisions of the order just granted, I designate the distinguished Senator from New Mexico, the chairman of the Budget Committee, to manage the time on this side.

Mr. BYRD. Mr. President, under the agreement, I designate the distinguished Senator from Florida (Mr. CHILES) to manage and control the time on this side.

Mr. DOMENICI addressed the Chair.

The PRESIDING OFFICER. The Senator from New Mexico is recognized.

Mr. DOMENICI. Mr. President, I ask unanimous consent that the presence and use of small electronic calculators be permitted on the floor of the Senate during the consideration of the resolution.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. DOMENICI. Mr. President, I send to the desk a list of staff members and I ask unanimous consent that the persons named therein be granted privileges of the floor during the consideration of the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOMENICI. Mr. President, I yield myself 6 minutes.

The PRESIDING OFFICER. The Senate will be in order.

The Senator from New Mexico is recognized.

Mr. DOMENICI. Mr. President, on June 7, the Senate named its conferees to meet with representatives of the House and work out details of a budget resolution for fiscal year 1984. The conference committee has completed its work and today I am pleased to submit its resolution to the Senate.

Committees do not operate in the same fashion as individuals. Of necessity, they negotiate, they compromise, they balance various goals and set certain priorities. Sometimes they get bogged down in resolving their differences and they accomplish very little, but that was not the case in this conference committee.

We came to conference with a Senate budget resolution that left little room for negotiation. As my colleagues will recall, I had hoped to go to conference with a resolution calling for higher defense spending and lower taxes to give the Senate conferees at least some room to compromise with the House.

The resolution that the Senate finally adopted, however, was quite close to the resolution I had hoped to have after our give and take with the House. To complicate matters, the Senate resolution passed by a one-vote margin, after several alternatives had been defeated. This meant that the Senate conferees could not make any major changes in the Senate resolution; if they lost one vote, they could not hold together the coalition that passed the original resolution. At least that is my assumption now, and that was my assumption when I went into the conference.

If we made the wrong decisions, we could have seen the budget process fall apart. However, I think we made the right decisions.

That does not mean that the budget process will still hold together. That is up to the Members of this body as they decide how to vote on the conference report and on the legislation that will follow. But so far, at least, the budget process is working.

I believe the Senate conferees did an outstanding job under very delicate conditions. Let me explain how we performed in relationship to the House.

On revenue increases for the 3-year period fiscal year 1984 through 1986, the Senate maintained its position 100 percent. The total of those 3 years in tax increases is exactly the number that the Senate voted out in its resolution. That total was $73 billion. It still is. It is exactly the same as the Senate-passed resolution and much less than the $120 billion contained in the House resolution. Although that $73 billion is spread out over the 3 years, with $3 billion more in 1984, $2 billion more in 1985, and $5 billion less in 1986 than the numbers the Senate passed, it is obvious that both bodies would be in compliance under reconciliation if they chose any mix over the 3 years so long as the total was $73 billion. We made that clear in the conference.

I think it is important to point out that the President requested $54 billion in revenue increases over the same period—three-fourths of the conference agreement level. This has somehow been forgotten as we discuss the proposed tax increases that are required in this resolution.

Let us talk about the defense budget authority for 1984 for a minute. The Senate again prevailed. The Senate moved 30 percent of the way to the House, and the House came 70 percent of the way to the Senate. In other words, the House gave up more than twice as much as the Senate.

The conference agreement provides for real growth of 5 percent in defense budget authority in 1984, a figure of $268.6 billion. If you look at the entire 5-year period in terms of budget authority for defense, the conference agreement provides 92 percent of the President's request over those 5 years, even assuming the 5 percent real growth for fiscal year 1984 that is in the budget which we bring here today.

I should add this: It is with respect to budget authority that we measure real growth in defense spending.

Let me add a note about the defense outlay number contained in the conference agreement. It is $240 billion. Staff judgment and CBO's judgment is that that number should probably be $241.3 billion based upon traditional spendout rates for budget authority in defense.

I have discussed this with interested Senators and, to the best of my ability, assured them that we would score against budget authority as we have in the past since that is what the Appropriations Committee actually appropriates.

However, I am concerned that the conference agreement may be interpreted to mean that the estimate of outlays—and that is all that the outlay number is, an estimate—may be used to yield a budget authority number that is less than 5 percent. I want to emphasize that the agreement is 5-percent real growth in defense budget authority, which is $268.6 billion in fiscal year 1984. My assumption is that we will score outlays in the normal manner, and that total outlays for the year might very well be $241.3 billion instead of the $240 billion estimate shown in the conference agreement.

Next let us look quickly at domestic discretionary spending. Excluding the

reserve fund, which I will discuss in a few moments and will be pleased to answer questions about, the Senate moved 9 percent toward the House on domestic discretionary spending for 1984, while the House moved 91 percent toward the Senate. This means that this conference agreement holds the real growth in these programs to only 1.3 percent between 1983 and 1984.

The PRESIDING OFFICER. The 6 minutes of the Senator have expired.

Mr. DOMENICI. I yield myself 2 additional minutes.

The reserve fund deserves a special word of explanation. It contains $8.5 billion for fiscal year 1984, but that money is not created, borrowed, or obligated by the resolution. The fund cannot be used to expand existing activities and it is not available to be spent by the Appropriations Committee in the usual manner. The reserve fund merely preserves the rights of the House and Senate to pass designated programs within predetermined spending limits, subject to Presidential approval or veto. No money in the reserve can be spent until the legislation becomes law. Until that occurs, the amounts in the reserve fund are not allocated to House and Senate committees. If all of this money were spent, total Federal outlays would increase less than 1 percent and deficits would increase 3.8 percent over the 3-year period. My guess, however, is that most of this money will never be spent.

In short, if we look at revenues, defense and domestic discretionary spending, the Senate has prevailed by a wide margin.

I believe that if the Senate did not like the resolution before, it would not like the resolution now. On the other hand, if it was acceptable before, I say without any doubt that we prevailed, and this budget resolution is just as good as it was when it passed here. In some respects in may be better.

I do not point out our success in order to gloat over the House or to ask for the votes of Senators simply to celebrate a pyrrhic victory. I ask support for this resolution because it is a good resolution for the Senate, it is a good resolution for the economy, and it is a good resolution for the people of this great Nation.

Most analysts believe that total outlays are the best single measure of the impact of the Government's fiscal policy on the Nation's economy. So let us look at total outlays. For the period from fiscal 1984 to 1986, the conference agreement provided total outlays of $2.7 trillion. To put this into perspective, the President also requested $2.7 trillion for this same period. So we are not talking about a budget that spends wildly and recklessly; we are talking about priorities within the total. The outlays in the proposed budget signal a prudent fiscal policy, one that meets the just commitments of our National Government, but does not weigh the country down with excessive spending.

Perhaps the second best measure of the impact of the Government's fiscal policy on the Nation's economy is the deficit. Again this budget signals a prudent fiscal policy. Deficits in the conference agreement—excluding the reserve fund—are lower than in the Senate-passed budget resolution. They are also lower than in the President's budget—as reestimated by CBO. I would prefer still lower deficits, and I know that many of my colleagues would too. But we have made far more progress against deficits in this conference agreement than any of us had a right to hope for. That progress should not be thrown away. To borrow a phrase, we should not let the perfect be the enemy of the good.

We cannot choose a perfect budget. We are not that lucky. But we can choose a good budget. It is right here. Let us not throw it away because of small flaws, real or imagined. I ask my colleagues to support it, because it is a very good budget and because, realistically, our choice is between a very good budget and the chaos and uncertainty of no budget at all.

There were two sides in our negotiations, that were bona fide and different. I merely submit to the U.S. Senate that if the Members want a budget resolution and if they thought the one passed by this body was reasonably acceptable, we got the message; we understood. We understood that there was little room for play, little room for change, and we did not do much of that. We have brought back an agreement which I believe deserves the concurrence of the Senate.

I ask unanimous consent to have certain tables and explanatory material printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CONFERENCE SUBSTITUTE, FIRST BUDGET RESOLUTION, FISCAL YEAR 1984

[In millions of dollars]

	Fiscal year 1983		Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
Excluding reserve fund:								
050: National defense	244,600	214,300	268,600	240,000	297,300	265,300	329,000	295,000

Mr. CHILES. Mr. President, I yield myself such time as I may need in discussing the conference report.

I join in the remarks made by the distinguished chairman of the Budget Committee. I think the Senate conferees did an outstanding job. The report he has given explains the kind of difficulty we faced as we went into conference with the House.

As a result of the conference, we approved the Senate figure giving us a true 5 percent growth rate in defense. We came to the Senate figure that holds down domestic spending. We came out with a reconciliation on savings that exceeds what either body had. So we are saving more money than we expected.

Mr. President, we need to talk about some basics as we get ready to vote on the budget conference report. We need to talk about what it will mean if we approve this report, and what will happen if we do not. We need to talk about why this conference report should be supported—and it should.

GOOD OF THE NATION

We all have a responsibility to do the best we can in the best interests of the Nation. Economic recovery has begun. It is off and running and all of us, Republicans and Democrats alike, want it to keep going because economic recovery is best for everyone. There is no politics in wanting the country to be as strong as it can be.

Plenty of politics went into this budget resolution, however. It was the kind of politics, Democrat and Republican just the same, that gave everybody the chance to have a say. All of the opinions were expressed, and some were expressed many times.

All of us started off with bargaining positions knowing we would not get everything we hoped for. Each of us expected we would finally arrive at a point different from where we began, but not so far away that we could not live with the result.

We are at that point now on this budget conference report.

It is well past the time where we can say "the conference report is not everything we wanted so we will not support it." This is the crucial time in the process. Now we must give final approval to what we have produced, even though it does not have a particular Senator's name on it.

WHOSE BUDGET

No, this is not the President's budget. But this is not the Republican's budget or the Democrat's budget, either. This is the public's budget. It is the product of months of negotiations and arguments. It is the product of floor fights that went on several days in the Senate before we passed our measure. It is the result of a long-and-hard-fought conference that went on for 2 weeks. That is the way the public's process is put together in deliberative bodies like the House and Senate.

Most important, it is the product of Congress listening to the people who sent us here. It is the product of everyone having a say. Now we must determine whether this conference report merits our support. Or are we going to say that we are not going to have a budget process?

There are a lot of voices in this budget.

You can hear the voices of those who said we need a strong national defense. But you can also hear the voices of the people who said we cannot afford to spend as much on defense as the President wanted. So we have increased national defense spending by 5 percent for next year. We will spend $11.6 billion less next year than the President wanted for defense, but we are still spending $24 billion more than we did last year to defend the Nation.

Yes, there are a lot of voices in this budget.

You can hear the voices of restraint on domestic spending. This conference report reconciles savings in domestic spending of $16 billion over 3 years. But we held back from the cuts requested by the President.

The majority in both parties heard enough from the majority of their constituents who said they did not want the Government to keep spending at a breakneck rate. But they also told us they did not want to turn their backs on their neighbors who have been hit so hard by the recession, and need a little more time and a little more help to join the mainstream of the economic recovery.

Let me cite some examples:

The administration wanted a 41-percent cut in job training. There was not a majority in either House, in either party, that felt that would be a wise cut to make. So that cut was rejected.

The administration wanted a 20-percent cut for spending on the environment and natural resources. There was no majority in either House, on either side of the aisle, that felt we should cut the environment and natural resources by 20 percent.

The administration wanted to cut humanitarian food assistance. There was no vioce on either side that said we should cut that. It was not in our conference. It was not on the floor of the Senate. It was not on the floor of the House.

Despite what the administration has been saying lately, it wanted to cut back aid by $5.6 billion for education. That was rejected. A bipartisan vote on this floor added $1 billion to what our committee felt was necessary for education, and that survived the conference.

The administration wanted to cut food stamps for 79 percent of those whose income is below the poverty line.

This conference report restores those misdirected cuts, and I think it is because we were better listeners.

There are other voices to hear in this budget conference report. Despite the President's public reservations, these voices add up to a chorus. There are more revenues in this budget so we can cut the deficits. We have added $73 billion over a 3-year period. The $46 billion to be added in 1986 is exactly the same as the President requested for that year.

Among the other voices in this budget is the voice of the Senate. When the conference on the budget resolution began, the House of Representatives and Senate were far apart. But look at this conference report and you will find the Senate revenue number. You will find the domestic spending figures are much closer to the restraint of the Senate than the higher numbers in the House of Representatives. And on defense spending, we got the House to move three-quarters of the way toward our figures so that we could have a verifiable 5-percent spending figure.

DECLINE IN SPENDING AS A SHARE OF GNP

This budget resolution sets us on a course of fiscal restraint. Total Federal spending as a share of gross national product declines by 2.1 percent, from 25.1 percent in 1983 to 23 percent in 1986. Entitlement spending declines 1.7 percent, from 12.1 to 10.4 percent. Domestic discretionary and civilian pay declines from 4.6 to 4 percent of GNP.

Both of those curves, Mr. President, are going down. Both of those curves signal that this budget report is going to show the financial markets and to the policymakers who sit in Wall Street and other places that Congress has a blueprint, and we are holding down spending and, in fact, bending the curve downward.

The total nondefense reduction of 2.5 percent of GNP is offset by a 0.4 percent increase for national defense, leaving a net spending reduction of 2.1 percent of gross national product. Since GNP is estimated to be $4.2 trillion by 1986, that 2.1 percent amounts to an $88 billion reduction in spending over that 3-year period of time. The tax burden is increased only 1.2 percent, from 18.8 percent of GNP to 20 percent of GNP. The spending contribution to deficit reduction is, therefore, almost twice as much as the tax contribution. I would also note that when the President submitted his budget in January, he said an increase of the tax burden to 20.6 percent of GNP by 1986 was acceptable, and we are below that guideline.

MAJOR COMPONENTS OF THE BUDGET AS PERCENT OF GNP

	Fiscal year—			
	1983	1984	1985	1986
National Defense	6.7	6.8	6.9	7.0
Non-Defense:				
Entitlements	12.1	10.9	10.6	10.4
Discretionary + Pay	4.6	4.4	4.2	4.0
Net Interest	2.8	2.7	2.7	2.5
Total Outlays	25.1	24.0	23.5	23.0
Revenues	18.8	19.2	19.4	20.0
Deficit	6.3	4.8	4.0	3.0

THE DEFICIT

With all that said, we have to look at the key issue in this conference report. And that issue is the size of the Federal deficit. The President's budget would have given us a deficit in 1984 of $185 billion. The deficit in the conference report is $15 billion. The deficit in the conference report is $15 billion lower, and even if we authorize and fully fund every single program contained in the reserve fund, the deficit would still be $5 billion lower than the President's.

The deficit in the conference report is $156.3 billion for 1985, some $22.5 billion lower than the deficit projected by the President. And, again, even if every dollar in the reserve fund were spent, the deficit will still be nearly $18 billion lower than the President's.

For 1986, even if we spend every dollar in the reserve, our deficit will still be over $18 billion lower than the deficit projected by the President for that year.

We do not have to retrace all the warnings about the threat the deficit poses to economic recovery, but let me summarize the situation briefly.

THE THREAT

The University of Michigan's Survey Research Center, the most respected insitution of its kind in the country, published an article in its spring issue of "Economic Outlook USA." Let me read you a concise quote from the article written by Raymond Saulnier, professor emeritus of economics at Columbia University:

> The chances of achieving a respectable recovery in 1983, and extending the advance into 1984 and beyond will depend on interest rates, on which both the Federal deficit and money policy will have a major impact.

Mr. President, you cannot make it any clearer than that. Interest rates are tied to the size of the deficit and whether we can make the deficit lower. This conference report still has high deficits. But they are lower than the President's, and lower in every year. That tells the markets, the consumers, the business and industrial investor that the Congress knows economic recovery is hitched to lower interest rates. And that is the path adopted in this budget resolution conference report.

KEEP FIGHTING DEFICITS

Yes, we can see the economic recovery is underway. But it is not going to keep going all by itself if the Government keeps piling debt on its shoulders. Things may look rosy now, but this is not the time to back away from the deficit struggle. If we want to keep economic recovery going, we will have to pay more attention to deficits now than ever before. Let me tell you why.

We had a little deficit leeway when we were in the depths of the recession. But with economic activity picking up, demand for borrowed money will increase as more and more businesses add investment momentum to the recovery. The demand for borrowed money will keep up as long as the interest rates do not climb. If the interest rates do climb in the wake of mounting Federal deficits, the demand for money will evaporate and the recovery will dry up along with it.

So now is the time to pick up the fight against deficits, and keep doing everything we can to keep those deficits declining. That is a chief virtue of this conference report.

VETO STRATEGY AND CHAOS

I know some in the Senate are skeptical, if not about the budget resolution, then about the strategy the White House plans to pursue. We have all heard about the veto strategy. We have heard Caspar Weinberger advise the President to ignore the budget resolution, and just veto appropriations bills.

I think each of us understands that will not really do any good. The amount of money the President can control with vetos amounts to just 18 percent of the overall budget. Even if you eliminated those programs entirely, you would still have a deficit.

If you are still skeptical about supporting this budget resolution, let me suggest you go back to the national newspaper headlines of just 1 year ago. While Congress stood at an impasse on the budget, the financial markets were in chaos. Nobody could plan ahead. Business was fearful, and filled with doubt. If we do not pass a budget resolution this year, we will be in the same fix, because this year economic recovery is a fact, and last year it was just a dream. Without a budget resolution to guide us, we face months of friction between the White House and the Congress. And we will face almost certain higher deficits as we fight it out over 13 separate bills with no reference point to measure our position against.

THE BOTTOM LINE

Let me conclude by being as frank as I know how. This is not heaven, so this budget resolution is not perfect. But it is a good one. It is not a bulky, low-grade collection of giveaways. Nothing like that at all. It reflects 6 months of negotiation and debate; 6 agonizing months during which we came to the floor, went back to committee, then came back again to finally adopt a resolution.

Republicans and Democrats took their shots, winning some, losing others. Then we matched our work against the House of Representatives and the Republicans and Democrats over there. And the Senate generally prevailed.

But more than that, everybody had a chance, everyone was heard, and we have forged a measure that the President may not like, but that comes as close as we can to reflecting the wishes of the constituencies we represent.

We must come closer the next time. And I will give it all my effort. But this conference report represents a solid, respectable statement that we can get our economic house in order. It is bipartisan. It deserves the support of the Senate, and I hope you will do that today.

I ask unanimous consent to print a summary of the conference report at this point in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

HIGHLIGHTS OF THE CONFERENCE REPORT—FIRST BUDGET RESOLUTION FOR FISCAL YEAR 1984

(Prepared by Minority Staff, Senate Budget Committee, June 20, 1983)

Revenues: The House came most of the way to the Senate-passed figures, providing Reconciled revenue increases of $12, $15 and $46 billion in fiscal years 1984, 1985 and 1986. The $46 billion figure is the same as the President's recommended tax increase for 1986. The 3-year total is the same as the Senate passed: $73 billion.

Defense: The House moved three-quarters of the way to the Senate to provide a true five percent real growth in Defense Budget Authority. While this is $11.6 billion below the President's proposal, it is still an increase of $24 billion over the 1983 level.

Domestic spending: The Senate agreed to increases in domestic spending of about $8 billion in Budget Authority and $3.5 billion in Outlays, out of an initial difference of $26.3 billion in Budget Authority and $16.4 billion in Outlays.

Reserve fund: In addition, the Conferees provided for up to $8.5 billion of additional domestic spending set aside in a Reserve Fund for new programs with no authorizing legislation yet enacted. These funds have not been allocated to any Committee and will not be available until the authorization is enacted into law.

DESCRIPTION OF RESERVE FUND

A specified amount of Budget Authority and Outlays for fiscal years 1983 and 1984 will be reserved from allocation to committees.

The statement of managers describes what programs in each function could be funded from the reserve amount and at what levels.

The Budget Totals and deficits appear with and without the Reserve Fund.

The section 302(a) allocation of the Appropriations Committee will be increased when the authorization for a program assumed in the Reserve Fund is enacted.

The section 302(a) allocation of a committee reporting new entitlement legislation or direct spending legislation assumed in the Reserve Fund will be increased when the

legislation is reported. In the Senate, this allocation will occur when the Senate "proceeds to consideration" of the specific legislation.

The spending ceiling by which points of order are determined will not reflect the Reserve Fund until the allocation has actually been made to a committee, at which point the spending ceiling would be adjusted respectively.

Any adjustment to a committee's 302(a) allocation for a particular program shall not exceed the amount for that program set forth in the statement of managers.

The Budget Committees will perform the ministerial task of reporting to their respective Houses any adjustment to a committee's 302(a) allocation or the spending ceiling which would be triggered under the Reserve Fund procedure described above.

RESERVE FUND SUMMARY

[In millions of dollars]

FUNCTION/PROGRAM TITLE	Fiscal year— 1983 BA	1983 O	1984 BA	1984 O	1985 BA	1985 O	1986 BA	1986 O
Function 350:								
Loan foreclosure relief to farmers	250	250	500	500				
Direct loans for farm ownership, operating, or economic emergency	200	200	100	100				
Function 370: Emergency mortgage foreclosure relief to aid the unemployed	760	50		200		350		160
Function 450:								
Physical infrastructure program			75	75	2,500	750	2,500	1,325
National Industrial Development Bank			50	50	100	100	50	50
Function 500: Economic recovery program	4,500	4,500	3,500	3,500				
Function 550: Health insurance and benefits for the unemployed	350	350	2,000	2,000	1,650	1,650		
Function 600:								
Extension of Federal supplemental compensation benefits for the long-term unemployed			1,500	1,500				
Increased benefits and expanded eligibility for food stamp program			450	450	450	450	450	450
Function 700: Veterans job training program			150	150	150	150		
Total	6,060	5,350	8,325	8,525	4,850	3,450	3,000	1,985

Reconciliation: Authorizing Committees will be required to report spending cuts and revenue increases by July 22. This will allow two weeks for floor action and conference prior to the August recess. Tax and spending changes will be sent to the President in a single bill which will reduce the deficit by about $89 billion over the three years.

Deficits:

COMPARISON OF DEFICITS

	Fiscal year— 1984	1985	1986
Conference agreement:			
Without reserve	169.9	156.3	127.2
With reserve	179.3	161.1	130.8
Senate passed	171.3	158.0	121.2
House passed	161.0	130.3	119.8
President's	184.9	178.8	149.3

The deficits under the conference agreement without the reserve are below the Senate passed resolution by $1.4 billion in 1984, $1.7 billion in 1985 and above the Senate passed resolution by $6.0 billion in 1986.

Even if all Reserve Fund programs are enacted, the Conference agreement brings deficits below the President's April budget. The Conference agreement without the reserve has lower deficits than the President's budget in each year, totalling $59.6 billion. The Conference agreement including the reserve calls for lower deficits than the President's budget in all years as well, totalling $41.8 billion for the three year budget horizon.

ECONOMIC ASSUMPTIONS

The conferees accepted the economic assumptions shown in the table below as the basis for the revenue, spending and credit estimates in the conference substitute. These economic assumptions update and revise those contained in the House resolution and the Senate amendment to the House-passed resolution. Both the House and Senate based their economic assumptions on projections prepared by the Congressional Budget Office in January 1983. Recent economic developments and economic data reported since the beginning of the year make these revisions desirable.

[Calendar years, dollars in billions]

	1983	1984	1985	1986
Gross national product:				
Current dollars	$3,292	$3,621	$3,948	$4,269
Percent change	7.6	10.0	9.0	8.1
Constant (1972) dollars	$1,518	$1,595	$1,661	$1,722
Percent change	2.8	5.1	4.1	3.7
GNP deflator (percent change, year over year)	4.7	4.6	4.7	4.3
CPI–U (percent change, year over year)	3.5	5.0	4.7	4.1
CPI–W (percent change, year over year)	3.0	4.6	4.4	4.1
Unemployment rate—civilian (percent)	10.1	9.3	8.5	7.9
3-month Treasury bill rate (percent)	7.8	7.4	7.2	6.6
Taxable incomes:				
Wages and salaries	$1,653	$1,803	$1,947	$2,098
Nonwage personal income	$620	$674	$741	$792
Corporate profits from current production	$210	$264	$300	$338

Revenues: The three-year total for additional revenue is the same in the conference agreement as in the Senate passed resolution, totalling $73 billion.

The timing of the additional revenues is, however, different. The Conference agreement calls for additional revenues of $12 billion in 1984, $15 billion in 1985, and $46 billion in 1986. The Senate passed resolution called for additional revenues of $9.9 billion in 1984, $13.7 billion in 1985, and $51 billion in 1986, while the House-passed resolution called for additional revenues of $30 billion in 1984, $40 billion in 1985, and $50 billion in 1986.

Function 050: National defense

Real growth is 5 percent in Budget Authority as calculated by CBO.

Pay set at 4 percent for civilian and military, effective January, 1984 with 17 percent absorption.

Retirement COLA previously due in May, 1984 moves to January 1985.

Function 150: International affairs

In fiscal year 1984 the House resolution was higher than the Senate by $.65 billion. The Senate accepted 75 percent of the difference, to insure that Congressionally mandated increases in Security Assistance for Israel and Egypt can be funded and still allow other increases requested in the President's Security Assistance budget.

Function 250: General space, science and technology

NSF science and math education: Conference added $75 million—$25 million of the $75 million was transferred out of Function 500 for Math and Science Education. House had requested $169 million in Budget Authority for fiscal year 1984, and Conference set funding at $105 million.

Additional NSF funding: House wanted $100 million in Budget Authority for three years (fiscal year 1984–86). Conference added $50 million in Budget Authority for fiscal years 1984–85.

NASA: House wanted $150 million above the President's request, or $6.65 billion in Budget Authority for fiscal year 1984. Conference set fiscal year 1984 Budget Authority at $133 million, which is $100 million over the Senate.

Function 270: Energy

DOE energy research and development: Conference added $240 million, above the Senate fiscal year 1983 freeze level.

Energy conservation: Conference added $160 million more than the Senate's request.

Function 300: National resources and environment

Conferees adopted the House funding levels for fiscal years 1983–86.

Superfund: House accepted the Senate's recommendation, which added $73 million in Budget Authority, and $23 million in Outlays, to Superfund in fiscal year 1984.

Water Resources: Conference adopted the House recommendation, which assumes an increase of $0.15 billion in Budget Authority and $0.05 billion in Outlays for Bureau of Reclamation and the Corps of Engineers appropriated accounts.

EPA construction grants and EPA operating: Conference accepted the House recommendations. This assumes a funding increase of $0.20 billion in Budget Authority and $0.15 billion in Outlays above fiscal year 1984 freeze level for EPA operations.

Funding for Remaining Function 300 Programs: Conference adopted a freeze on remaining Function 300 programs for fiscal year 1983, 1985 and 1986.

Function 350: Agriculture

Non-Reserve Account: CCC (Commodity Credit Corporation)—Conference added $100 million in Budget Authority and Outlays for fiscal year 1984, and $100 million in Outlays in fiscal year 1985 to the Senate baseline funding level.

Reserve Account: FmHA Loan Foreclosures—Conference added $250 million in Budget Authority and Outlays in fiscal year 1983, and $500 million in fiscal 1984;

ACIF (Agricultural Credit Insurance Fund)—Conference added $200 million in Budget Authority and Outlays in fiscal 1983, and $100 million in Budget Authority and Outlays, in fiscal year 1984.

Reconciliation Language: Conference adopted reconciliation language which says that should the 50 cent per hundredweight dairy assessment be finally adjudicated to be unconstitutional or unenforceable by the courts, the House Committee on Agriculture and the Senate Agriculture Committee shall report changes in laws rather than jurisdiction, within 30 days. Sufficient to reduce Outlays by $1.243 billion in fiscal year 1984, by $1.332 billion in fiscal year 1985, and by $1.327 billion in fiscal year 1986.

Function 370: Commerce and housing credit

Non-Reserve Account: Non-Profit Mail Subsidy—Conference added $60 million in Budget Authority to the Senate level of $760 million, for fiscal year 1984.

Reserve Account: Mortgage Foreclosure Relief—Conference added $760 million in Budget Authority, and $50 million in outlays in fiscal year 1983; $200 million in outlays in fiscal year 1984, $350 million in fiscal year 1985, and $160 million in fiscal year 1986.

Function 400: Transportation

The Conference Agreement includes Highway Transit and Airport Direct Spending (Contract Authority). Programs at the levels authorized by the Surface Transportation Assistance Act.

The Conference Agreement is $0.5 billion over current law for the Discretionary Programs. This is explained by two factors:

It is $0.3 billion over current law for the Federal Aviation Administration Facilities and Equipment Program. This program is funding the modernization and rebuilding the National Air Space System.

It is $0.2 billion over current law for the Urban Mass Transportation Administration. The Conference Agreement does not accept the Administration's proposal to phase out transit operating assistance but instead maintains operatings assistance at levels agreed to in the Surface Transportation Assistance Act. The $0.2 billion increase will be available for Transit Capital Programs such as New Rail Starts, Rail Modernization and Bus Replacement Programs.

On an overall basis, the conferees agreed to split the $0.6 billion difference increasing the Senate figure by $0.3 billion difference increasing the Senate figure by $0.3 billion and bringing the 1984 budget authority total to $20 billion.

Function 450: Community and Regional Development

Eonomic Development Administration (EDA) and Appalachian Regional Development Programs: Conference committee rejected House-proposed increase for EDA in fiscal year 1984. Agreement splits remaining difference between House and Senate proposals for EDA and ARDP. (Senate had proposed phase-out of both programs; House proposed $200 million increase for EDA and freeze at 1983 levels for Appalachian Regional Development programs.)

Community Development Block Grants (CDBGs): Conference commmittee agreement assumes that CDBGs will be continued at $3.5 billion through fiscal year 1986. Conference Committee rejected House proposal to continue $1.0 billion supplemental provided under 1983 Emergency Jobs bill for CDBG in fiscal year 1984.

Urban Development Action Grants (UDAG): Conference agreed to continue UDAG at 1983 levels ($440 million Budget Authority and $600 million in Outlays in fiscal year 1984).

Infrastructure: House proposed $75 million in Budget Authority in fiscal year 1984 and $5.0 billion in Budget Authority in fiscal year 1985 for new infrastructure initiative. House agreed to reduce funds for the initiative by half in fiscal year 1985 and fiscal year 1986, providing instead $2.5 billion in Budget Authority. Conference then agreed to place infrastructure initiative in reserve fund.

National Industrial Development Bank: House proposed $100 million for this initiative in fiscal year 1984. Conference agreed to reduce this funding by half and also place this initiative in reserve fund.

Function 500: Education, training, employment and social services

Education: In addition to the $1 billion added on the Senate floor by the Hollings Amendment, the Conferees split the remaining difference with the House and added $250 million for elementary and secondary education.

Job Training: The conference added $1.6 billion in BA and $0.5 billion in outlays, two-thirds of the House amount, to allow increased funding of the Job Training Partnership Act.

Social Services: added $0.6 billion BA, $0.4 billion Outlays, two-thirds of the House amount, to allow increased funding for Title XX, Child Welfare and other social services.

Function 550 and 570: Health

Medicare: Split the difference with House, $400 million in 1984, manager's statement precluding increased beneficiary cost sharing. Very similar to Baucus floor amendment.

Medicaid: House level, no savings assumed. $200 million in 1984 for new initiative for low-income pregnant women and for children, up from $49 million Cranston floor amendment.

Health Insurance for Unemployed: More than split the difference with House, $2 billion in 1984, up from $900 million Senate floor amendment. This is only health item in reserve fund.

Discretionary: Slight increase in 1984 from Senate level (+$100 million).

Function 600 and 650: Income security

Reduced BA by $5.1 billion below House resolution and .6 billion below Senate resolution by taking into account $2.9 billion in rescissions projected by both Appropriations Committees for low-income housing programs.

Rejected House's $1.3 billion in BA for new multifamily housing program.

Split difference with House on several programs where House had budgeted a modest amount more than the Senate: Child Nutrition, Energy Assistance, Public Housing Operating Subsidies.

Accepted House increases in WIC (.05 billion) and AFDC (.1 billion).

Adopted Senate position of moving all retirement and disability COLAs to January rather than House position of straight six-month delay. Ignored different positions regarding one-half COLA for under-62 retirees because budgetary impact of the provision does not appear until fiscal year 1987.

Rejected Senate's reconciliation of Child Support Enforcement savings (.04 billion) and of 20-week work requirement for unemployment benefits (.4 billion each in 1985 and 1986). Maintained UI savings in functional total, however.

Reserve: $1.5 billion to extend Federal Supplemental Compensation (for long-term jobless) into fiscal year 1984.

$450 million per year for increased food stamp funding.

Function 700: Veterans

Two-year funding for Emergency Job Training provided in Reserve Fund ($150 million each year).

Adopted Senate positions on Compensation COLAs: (a) 3.5 percent rather than 4.1 percent in April 1984; (b) subsequent COLA's in January rather than April.

Function 750: Administration of justice

Conference agreement adds $450 million in BA and Outlays to the baseline in fiscal year 1984 for strengthening law enforcement activities. Increase also provides sufficient funds for immigration enforcement legislation and a criminal justice assistance grant program.

Function 800: General government

Conference agreement provides additional $200 million in Budget Authority and Outlays for the Internal Revenue Service in fiscal year 1984 for enhanced tax collection.

Conference agreement provides baseline funding for the Federal Buildings Fund through fiscal year 1986.

Function 850: General purpose fiscal assistance

Conference agreement adds $450 million in Budget Authority and $338 million in Outlays for reauthorization of General Revenue Sharing in fiscal year 1984. (House had proposed $800 million increase for General Revenue Sharing in its resolution).

Function 920: Allowances

Conference substitute assumes a four percent civilian employee pay raise effective January, 1984, with 17 percent ($150 million) absorption.

Function 950: Undistributed offsetting receipts

Conference adopted the Senate-passed numbers for Function 950, but added $75 million in BA and Outlays to reflect the House's estimate for receipts for Surplus Property sales.

CREDIT BUDGET

FMA Mortgage Insurance: Conference added $5.0 billion in new primary loan guarantee commitments in each year to accommodate the additional FHA mortgage insurance authority included in the Senate reported fiscal year 1983 supplemental and fiscal year 1984 HUD-Independent Agencies appropriations bills.

INDUSTRIAL DEVELOPMENT BANK LOAN GUARANTEES

Conference adopted the Senate's recommendation that one-half of the House's primary loan guarantee commitments be assumed: $1 billion in fiscal year 1984 and $3 billion in fiscal year 1985.

Mr. President, I reserve the remainder of my time.

Mr. DOMENICI. Mr. President, I yield 3 minutes to the distinguished Senator from Washington.

The PRESIDING OFFICER (Mr. WILSON). The Senator from Washington is recognized.

Mr. GORTON. Mr. President, in a very real sense I wish to address these remarks to my friend from New Hampshire who just left the seat of the President of the Senate and to other Members of my own party who voted for the budget resolution which was passed by the Senate.

The Senator from New Mexico pointed out that in conference with the House of Representatives the Senate came out with precisely the figure for new revenues which was passed by the Senate itself. The only differences were to push a few billion dollars of those new taxes forward into 1984 and 1985, but that change is not major. So the conference committee, led by the distinguished Senator from New Mexico, was entirely successful in attaining the Senate position in that respect.

Second, this conference committee came out with a figure for national defense which was precisely what every Member in this Chamber knew was going to be our aim. It was the goal of the figure for which we voted in the Senate, a 5-percent real increase.

Finally, as the Senator from New Mexico has pointed out, 91 percent of the differences in domestic spending, with the exception of the reserve funds, were decided in favor of the Senate position. It is hard to imagine a conference that went more favorably for the Senate position than did this one.

Therefore, there is no reason for any Member, Republican or Democratic, in this Chamber who voted for the resolution 2 or 3 weeks ago to vote against it at this point.

Other close friends, like the present occupant of the chair, who voted against the resolution as it left the Senate with some trepidation, based those votes to a certain degree on the fact that we would have to give up too much, that we were giving up on the Senate floor what we would be required to give up or might be appropriate to give up in conference with the House of Representatives.

I say to him and to others similarly situated we did not do so. We have now as a final resolution essentially the program which left the Senate.

The President loses no rights to veto domestic spending programs or tax programs as a result of the passage of this resolution. In fact, the President, will be in a far better position if this resolution passes than he will otherwise retaining all of those rights of veto. He will get reconciled savings as a result of this budget resolution which he cannot get and will not get if this resolution does not pass.

In other words, spending for domestic programs taken in toto will be less if this resolution passes and is enforced than if it is rejected and conservative Members of this body simply rely on the President's veto powers.

Finally, I am convinced that the defeat of this resolution, while giving the President no more than he will get otherwise and while probably resulting in more rather than less spending, will certainly result in far larger deficits than will be the case if this resolution passes and is enforced. Those larger deficits, in turn, clearly will threaten the recovery of the economy which is underway at the present time and more jobs for more Americans.

This budget resolution is a great tribute to the Senator from New Mexico, the Senator from Florida, and the Senator from Ohio who is in the Chamber at the present time. It is a responsible resolution. It gives us the best possible guarantee we have of continued economic recovery. It should be supported by those who voted for it before and it should be supported by many of those who opposed it when it went to the House of Representatives because they thought we would lose far more than we did in that conference.

I commend the budget resolution not as the best that could possibly be done but as the best that could be accomplished given the nature of Congress at the present time and the best for the economy and for the people of the United States of the alternatives we have before us at the present time.

Mr. DOMENICI. Mr. President, I understand that under the unanimous-consent agreement the Senator from Montana (Mr. MELCHER) has 10 minutes, and I do not intend to keep him long. I wonder if I could just yield myself 2 additional minutes and then I will be pleased to yield to the Senator.

The PRESIDING OFFICER. The Senator from New Mexico is recognized for 2 additional minutes.

Mr. DOMENICI. Mr. President, let me make one final point.

Much is said about economic growth. With some of the speculation that is around we could have dramatically increased the growth rate for the economy and significantly altered our economic and deficit for the better. We chose not to do that. We have adjusted them to conform to present day reality. Therefore, we raised the real growth rate for 1983 by about 0.7 percent and adjusted in 1984 for that increase. Unemployment is changed in 1983 to meet reality, and we carried this change through to 1984, 1985, and 1986.

But we have not assumed optimistic economic expectations in an effort to make the deficits disappear or to mitigate them. If we have better economic growth, we will have lower deficits, but we would still have large deficits. These deficits are not and cannot be assumed away.

Mr. President, I yield the floor at the present time.

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, the budget conferees have been diligent and persistent in coming to an agreement within a reasonable amount of time. I am, however, very disappointed with the compromise figures for the international affairs function which sets spending limits for foreign aid.

I expressed my concern during our initial consideration of the budget that the Senate resolution did not restrain the rate of growth in foreign aid spending, which has doubled and surpassed growth in all domestic programs since 1979. Yet the final agreement merely splits the difference between the much too large Senate amount and the even higher House spending levels. It is discouraging, to say the least, to argue that the Senate figures on foreign aid are too high and then to see the figure increased beyond that by the healthy amount of $250 million.

Then that disappointment is compounded by the final form of the budget after conference committee action. In view of the fact that the proponents of the Senate Budget Committee's figures defended those amounts as being sufficient to meet our international obligations and particularly our military-related obligations to our allies, the Senate was assured that the amount at least would not be increased in conference. As far as I am able to ascertain, we are not necessarily getting any more for this additional amount of money, $250 million, since our original target already fulfilled even additional amounts that we would commit to our partners in the Middle East peace accords.

The budget deficits in the conference report, although somewhat reduced, are large enough that they will continue to exert a drag on our fledgling economic recovery. Domestic programs have been cut several times over the last 2 years, and yet the savings achieved through these cuts are insufficient to address the problem of steadily rising deficits. It consequently makes little sense to justify this increase in foreign assistance when we are going to have to borrow this money in order to send it abroad.

It makes even less sense when you realize that the American people have strong doubts about the wisdom of our foreign aid programs. They question whether we have our priorities in order when domestic programs suffer spending reductions and subsequent reduction in the services they are able

to provide, yet foreign aid spending suffers little restraint at all, and continues to grow.

The failure to exercise fairmindedness in setting priorities between domestic and foreign aid spending is a major flaw in an otherwise carefully fashioned budget compromise.

Mr. President, there is another matter that I think I would like to address the Senate on, draw the attention of Senators to, and that is a discussion about the so-called entitlement programs. You judge what you hear from your friends and neighbors, and, if you read your mail, you must determine that there is a great number of comments on how much the entitlement programs contribute to the Federal deficits.

I quite often get the impression that I must be lacking in knowledge of the rapid growth in the entitlement programs, and so I asked the Congressional Budget Office to prepare for me a list of the entitlement programs.

Using 1983, the current year, as a base year, it projects what the budget figures will be for 1984, 1985, and 1986.

I think there is a lot of confusion as to just what an entitlement program is, and I am going to read the major ones.

They are social security, medicare and medicaid, farm price supports, guaranteed student loans, social services, unemployment benefits, railroad retirement, Federal civilian employee retirement and disability, child nutrition, food stamps, supplemental security income, public assistance; veterans pensions, compensation, and readjustment benefits; general revenue sharing, and others. The others are a very small percent totaling less than 2 percent. Those I read off are 98 percent of the so-called entitlement programs.

I am going to submit this table for the RECORD, and I ask unanimous consent, Mr. President, to have it printed.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

(These figures are recomputed from the baseline budget projections released in February 1983. The recalculations assume a Consumer Price Index of 3.5 percent during 1983.)

CONFERENCE AGREEMENT ON THE FIRST CONCURRENT BUDGET RESOLUTION FOR ENTITLEMENTS AND OTHER MANDATORY SPENDING

[By fiscal year, in billions of dollars]

	1983 base	Projections		
		1984	1985	1986
Social security:				
Outlays	$168.0	$173.0	$184.0	$196.0
Receipts	148.5	166.4	185.2	201.2
Net	19.5	6.6	−1.2	−5.2
Medicare and medicaid:				
Outlays	76.0	86.0	98.0	108.0
Receipts	40.3	44.7	49.8	57.0
Net	35.7	41.3	48.2	51.0
Farm price supports	18.0	8.0	9.0	10.0

CONFERENCE AGREEMENT ON THE FIRST CONCURRENT BUDGET RESOLUTION FOR ENTITLEMENTS AND OTHER MANDATORY SPENDING—Continued

[By fiscal year, in billions of dollars]

	1983 base	Projections		
		1984	1985	1986
Guaranteed student loans	2.0	2.0	2.0	2.0
Social services	4.0	4.0	4.0	4.0
Unemployment benefits	33.0	24.0	22.0	22.0
Railroad retirement	6.0	6.0	6.0	6.0
Federal civilian employee retirement and disability	22.0	22.0	24.0	25.0

General revenue sharing	5.0	5.0	5.0	5.0
Other	5.0	11.0	10.0	10.0
Total	386.0	387.0	411.0	437.0

Source: Congressional Budget Office. Details may not add due to rounding.

Mr. MELCHER. Mr. President, what the table shows is that after social security has been rescued by increasing the taxes that go into the fund and reducing somewhat some of the outlays, that we end up with a net gain in receipts over outlays in fiscal 1985 and 1986.

Medicare and medicaid are principal problems and they constitute $40 billion in shortfall, in 1984, almost $50 billion in 1985, and $51 billion in 1986. That indicates that those particular entitlement programs are indeed in trouble and deserve our attention.

I think all too few of the public realize that farm price supports and guaranteed student loans and railroad retirement and general revenue sharing, along with other programs, are all part of these so-called entitlement programs. They are not growing rapidly, and while the table shows how fast they are growing, it is some relief to me to find out that the growth, less the increase in the receipts from social security, that that increase in growth will be somewhere around 10 percent.

We can do better than that, we should do better than that, if we make corrections for medicare and medicaid and I trust we are all resolved to do that.

But everybody in this country is probably touched one way or another by these entitlement programs. So if we are going to foist all of the wrongs about Federal deficits just on the growth of the entitlement programs we are missing the mark. That is not the case. The great growth in the deficit and great growth in spending are the results of several different items. But the deficit increase is the result of too much spending, too high interest rates, and the economic downturn, and the lack of receipts in the Treasury from this recession we are suffering through and, hopefully, we can see some light in recovery and in the events of the past several months and, perhaps, see some readjustments of that.

We at least can hope. We have our work cut out for us. To avoid the issue, the true issue, of increased spending—I mentioned foreign aid, and I can also mention defense spending that has grown very rapidly—to avoid those facts and say our problems are just locked up with entitlement programs would be a serious mistake on the part of the Members of Congress, the House and Senate both, and certainly are misleading to the public.

It is a broader problem than that, and we had better face the issues squarely with the facts.

Mr. DOMENICI. I will yield to the Senator from Mississippi——

Mr. STENNIS. Mr. President, will the Senator yield 1 minute?

Mr. DOMENICI. I will be pleased to yield 1 minute to the distinguished senior Senator from Mississippi.

Mr. STENNIS. I want to highly commend the distinguished Senator from New Mexico (Mr. DOMENICI), the Senator from Florida (Mr. CHILES) and the Senator from Ohio (Mr. METZENBAUM), and other members of the Budget Committee for the monumental piece of work they have done on a very difficult assignment. I am sorry I did not get to the floor in time to hear the speeches of the two leaders of the committee.

Mr. President, I had considered the matter of not voting for this budget resolution conference report because of the high deficit, but I think the committee has done everything that could be done to meet the situation.

We must have a budget resolution. It would be an admission, if we cannot have it—it could well be said—that we are incapable of producing a budget resolution if we do not have one of some kind. Let the people of the country be assured that this Congress has tried and that our committee members have given leadership.

This resolution is not just what our committee wanted, or what we wanted, but it will serve a purpose and we will try to do better in future years.

I am very glad to say I will support this resolution, and I hope it will pass. This is the best we can do now.

I thank the Senator for yielding me this time.

Mr. DOMENICI. I thank the Senator and I am most appreciative of his support.

I think the Senator from Kansas has time reserved for an amendment and I would be pleased to yield at this point.

The PRESIDING OFFICER. The Senator from Kansas.

AMENDMENT NO. 1435

(Purpose: To modify the revenue reconciliation instruction)

Mr. DOLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration. I ask my colleagues if I could have their attention, particularly my colleague from Louisi-

ana, so I can interest him in this amendment, if possible.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an amendment numbered 1435.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In section 3(a) on line 2 insert after "through (e)" the following: "(except for the committee described in subsecton (b)(1))".

In section 3(a) on line 5 insert after "through (l)" the following: "(except for the committee described in subsection (l)(2))".

Strike subsection 3(b)(2) and insert in lieu thereof the following:

"The Senate Committee on Finance shall report by September 15, 1983, changes in laws within the jurisdiction of that committee sufficient to increase revenues by $59,000,000,000 in the aggregate over fiscal years 1984, 1985 and 1986".

Strike subsection 3(l)(2) and insert in lieu thereof the following:

"The House Committee on Ways and Means shall report by September 15, 1983, changes in laws within the jurisdiction of that Committee sufficient to increase revenues by $59,000,000,000 in the aggregate over fiscal years 1984, 1985 and 1986".

Mr. DOLE. Mr. President, I think there are 10 minutes for each side on the amendment. I do not think I will need more than that time, but I want to explain to my colleagues what the amendment does.

I have reduced the reconciled revenue numbers, from $73 billion to $59 billion, which is the President's number, and it is also an aggregate number. I know the distinguished Senator from New Mexico was telling me that even though they had specific numbers in other years, only the aggregate number would be binding.

In addition, I changed the reporting date from July 22, which, in my view, is impossible, to September 15, which is more realistic. We have been waiting for months and months for the budget resolution. We are going to have a recess for about 10 or 12 days in July, and then we are told to come back from the Finance Committee with $73 billion in new taxes in just 2 weeks.

So I have offered this amendment to give us adequate time, plus I have inserted the President's numbers on the revenue side. I believe between now and September 15 we are going to have a better fix on whether or not we are getting any spending reduction, and whether or not the appropriation bills are going to bring about savings. If not, the President can veto those bills.

I am convinced that if we adopt this amendment there might be a fighting chance to achieve the deficit reductions that the Budget Committee is trying to do. I commend members of the Budget Committee on both sides. But what they do, if they pass this budget resolution, is to give this dead cat to the Finance Committee; 86 percent of this package comes to the Finance Committee—86 percent.

So it is one thing to vote on just numbers, but it is quite another thing to vote on the real thing. And the real thing you are asking us to do is raise taxes $73 billion and make very little spending reduction. What the Senator from Kansas suggests is that we reduce that to the President's number and let us make it an aggregate number. Then we could make it contingent on achieving spending reduction. Then we are talking about real deficit reduction if we couple that with $59 billion in revenue.

Mr. LONG. Will the Senator yield?

Mr. DOLE. I am happy to yield to the Senator from Louisiana.

Mr. LONG. Is it not true that the last time we had a balanced budget was at a time when the Congress voted a big tax increase and there was a 10-percent surtax, but it went along with a requirement that there be very drastic cuts in spending? So it was both a major spending cut, plus the surtax that got us a balanced budget. That is the last time we ever had one.

Mr. DOLE. The Senator is correct.

Mr. LONG. But is it not also true that to try to pass a tax increase of those kinds of numbers without the support of the President of the United States is just ridiculous to even talk about?

Mr. DOLE. That is the view of this Senator. The Senator from Louisiana knows we had the Secretary of the Treasury before our committee this morning and he indicated they would stick with their numbers if, in fact, they were aggregate numbers, and we did not require $12 billion in 1984 and $15 billion in 1985. There is another caveat—if we had some spending reductions.

I believe my amendment would not only satisfy the President but encourage him to support the process. Then we could get some spending reductions, coupled with a revenue increase. I think it is going to take a combination.

But let us face it, as I said, 86 percent of this package comes to our committee and only 3 percent is savings reduction. There is $73 billion in new taxes and $1.7 billion in savings in our committee. That is a ratio of almost 40 to 1. Now, that is not a very good mix.

I hope we might accept this amendment, send it back to the House and let them vote on it, and then allow the Finance Committee some time to report out the revenue package. If we design a package that is going to mean spending reductions and lower those revenue numbers to the President's request, then we might have the President on board. He is on board indirectly, because he is on record supporting the $59 billion. So I hope that the amendment might be adopted. It is not offered to kill the budget resolution. It is offered, I think, as an effort to salvage the budget resolution.

There is no doubt in my mind that the chairman of the Ways and Means Committee would like to have a few more days beyond July 22 to work on a package. We are going to be in recess from July 1 to July 16, and that recess starts next Thursday. We have been trying to prepare ourselves in the committee. We have had hearings almost every day on preferences, on tax compliance, on the health insurance cap, and every other conceivable area where we might raise revenue.

So, Mr. President, this is a serious amendment. It is not designed to obstruct the Budget Committee. We have been hearing budget talk for months, and it is a tough job. The chairman and the distinguished ranking member have done an outstanding job. But now they want to transfer responsibility to the Finance Committee. We are willing to take our share, and our share is 86 percent. We are trying to reduce that a little bit, to about 60 percent, and also include some savings reductions. That is the sole purpose of the amendment. I hope we might adopt it.

Mr. NICKLES. Will the Senator yield?

Mr. DOLE. I am happy to yield.

Mr. NICKLES. Mr. President, if I remember, when the President called for the contingency taxes, he said if and only if we made budgetary constraints as called for by his budget recommendations. Is it the Senator's opinion that this budget does that on the spending side?

Mr. DOLE. Not yet. But it is my opinion we could design the tax so we could do that.

Just to give you one example. In this resolution we are only asked to reduce the growth of medicare over 3 years by $1.7 billion. We believe we can exceed that by three or four times in our committee. We are trying to do that. I believe there are other areas, such as in agriculture and other areas where we can save billions of dollars.

What we are trying to do is accept responsibility on the revenue side if the spending side is addressed.

We can design the tax so it does not take effect until there have been some changes on the spending side. I know some do not want any taxes. But how many want $200 billion deficits? How many want rising interest rates?

I do not think we can hide from the deficit. It is there. It is growing bigger. But I do not believe we should work the revenue side alone. In my view we could have a balanced package if this amendment is adopted. I think the

House would adopt it and then we would be in business. We could design a package in our committee with spending reduction, followed with some revenue changes to achieve a deficit reduction that would have a marked impact on interest rates and help sustain the recovery.

I reserve the remainder of my time.

Mr. DOMENICI. Mr. President, how much time does the Senator from Kansas have remaining?

The PRESIDING OFFICER. There are 2½ minutes remaining to the Senator from Kansas.

Mr. DOMENICI. I am going to take 1 minute when the Senator finishes. Does the Senator want me to take it now?

Mr. DOLE. The Senator can take the minute, then let me finish.

Mr. DOMENICI. I think this is a serious amendment. I do not oppose it because I think it is not serious. I have talked at length with the Senator from Kansas about it, but I want the Senator to know that we have tried this very same approach several times before. There were simply not enough votes for it. I tried it in the committee. There were not enough votes for it there either.

I hope the Senator is not indicating here that the Secretary of the Treasury has testified that he supports $59 billion in reconciled taxes. He does not. Had we received word that the administration supported $59 billion in reconciled revenue, I guarantee you we would have reported that proposal out of committee. It would have been in the original resolution.

I do not believe the President supports $59 billion in reconciled revenues as described by the Senator from Kansas. Furthermore, I believe, in all sincerity, that if we modify the budget at this late date, we are not going to get one. I hope the distinguished Senator will understand my opposition to it. I do not really think there is that much difference in economic impact between the amendment that the Senator from Kansas supports and the reconciled revenue increases in this conference agreement, and I hope we defeat this amendment.

The PRESIDING OFFICER. The Senator's 1 minute has expired.

Mr. DOLE. Mr. President, the only difference is rather significant. The President of the United States has indicated he supports this much of a revenue increase. I am here to suggest and to pledge to Senators on both sides of the aisle that there will not be this much of a revenue increase, even the $59 billion coming out of our committee, unless we have significant spending reductions.

I just say to my friends on the Budget Committee that I believe we have demonstrated in the Finance Committee that we are willing to make tough choices. We did it last year in raising $100 billion in revenues. We are not going to shrink from our responsibility. But do not send us a budget resolution and ask us to raise $73 billion in taxes and only cut spending $1.7 billion. That is a ratio, as I said, of almost 40 to 1, and that is not a balanced approach.

So it is not that we come here not having done anything on the revenue side.

Mr. President, I say to my good friend, the chairman of the Budget Committee, they have done an outstanding job, but please do not make it impossible for the authorizing committees.

Eleven members of the Senate Finance Committee voted against the $73 billion tax increase in the first budget resolution. Now you are asking those 11 to change their mind? If 11 out of 20 cannot vote for $73 billion on the first budget resolution there is no reason they will vote for a legislative package. It means we cannot raise any revenue.

So I hope we can adopt this rather significant change and then proceed with the budget resolution.

Mr. DOMENICI. I yield back the remainder of my time on the Dole amendment. I ask for the yeas and nays on the Dole amendment.

The PRESIDING OFFICER. All time has expired.

The yeas and nays have been requested. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kansas. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Iowa (Mr. GRASSLEY), the Senator from Alaska (Mr. MURKOWSKI), the Senator from Illinois (Mr. PERCY), the Senator from South Dakota (Mr. PRESSLER) and the Senator from Wyoming (Mr. SIMPSON) are necessarily absent.

I further announce that, if present and voting, the Senator from Alaska (Mr. MURKOWSKI) would vote "yea."

Mr. CRANSTON. I announce that the Senator from Colorado (Mr. HART), the Senator from South Carolina (Mr. HOLLINGS) and the Senator from Massachusetts (Mr. TSONGAS) are necessarily absent.

The PRESIDING OFFICER (Mr. DANFORTH). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 41, nays 51, as follows:

[Rollcall Vote No. 171 Leg.]

YEAS—41

Abdnor	Cochran	Durenberger
Armstrong	Cohen	East
Baker	D'Amato	Exon
Baucus	Denton	Garn
Boren	Dole	Hatch
Hawkins	Lugar	Specter
Hecht	Mattingly	Symms
Heinz	McClure	Thurmond
Helms	Melcher	Trible
Humphrey	Nickles	Wallop
Jepsen	Nunn	Warner
Kasten	Quayle	Wilson
Laxalt	Roth	Zorinsky
Long	Rudman	

NAYS—51

Andrews	Eagleton	Matsunaga
Bentsen	Ford	Metzenbaum
Biden	Glenn	Mitchell
Bingaman	Goldwater	Moynihan
Boschwitz	Gorton	Packwood
Bradley	Hatfield	Pell
Bumpers	Heflin	Proxmire
Burdick	Huddleston	Pryor
Byrd	Inouye	Randolph
Chafee	Jackson	Riegle
Chiles	Johnston	Sarbanes
Cranston	Kassebaum	Sasser
Danforth	Kennedy	Stafford
DeConcini	Lautenberg	Stennis
Dixon	Leahy	Stevens
Dodd	Levin	Tower
Domenici	Mathias	Weicker

NOT VOTING—8

Grassley	Murkowski	Simpson
Hart	Percy	Tsongas
Hollings	Pressler	

So Mr. DOLE's amendment (No. 1435) was rejected.

Mr. DOMENICI. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. METZENBAUM. I move to lay that motion on the table. The motion to lay on the table was agreed to.

Mr. GRASSLEY. Mr. President, unfortunately I could not be present for the vote on the Dole amendment. I did not plan it that way. It is just the way events happen sometimes. Because of the landmark decision of the Supreme Court with regard to the legislative veto, and as chairman of the Subcommittee on Administrative Practices and Procedures, I was asked to appear on a special BBC news program to discuss the decision. Consequently I was downtown in the BBC studios during the vote.

I would like the RECORD to reflect that had I been present I would have cast my vote yes.

The Dole amendment is a realistic one in that it reflects the sentiment of the Finance Committee which must deal with 88 percent of the reconciliation instructions contained in this resolution. It would also provide a great degree of flexibility in the way the committee contributes to a lower deficit. And to the degree to which this amendment lowers the tax-increase totals in the budget resolution, the Dole amendment is worthy of this body's support.

Mr. HATCH. Mr. President, I cannot support the House-Senate conference agreement on the fiscal 1984 budget. It is a perfect example of the tax and spend budgets which have caused so much damage to our economy. It is a perfect example of the failure of the budget process to control spending. How did we arrive at such an unacceptable budget?

The Congress began with the House budget, with TIP O'NEILL's budget. The House budget raised taxes massively, by $141 billion in 3 years. It drastically pruned our national defense effort to a meager 2.3 percent growth in fiscal 1984. And it proposed to spend lots more of the taxpayer's hard-earned money. It added so much spending that in 5 years it would have eliminated all but a scant 3 percent of the savings achieved in social welfare programs over the last 2 years.

Next came the Senate Democrats' budget. It went some of the way toward TIP O'NEILL's budget. It raised $73 billion in new taxes in 3 years. It trimmed our national defense effort to 6 percent growth in 1984. And it included about $12 billion more in domestic spending than the President's budget requested.

Then we proceeded to conference. And what did we get?

From the House-Senate conference we received a budget about halfway between the undesirable Senate Democrats' budget and the even more undesirable TIP O'NEILL budget from the House. This budget tells us to enact the Senate's $73 billion in new taxes over 3 years, but at an even faster pace than the Senate budget had proposed. Defense spending in 1984 was whittled down to 5 percent, which is half of what the President requested. Over the next 3 years, defense spending would be cut below even that requested in the last Carter budget—and no one ever called Jimmy Carter a hawk. And anywhere from $15 billion to $23 billion in new spending programs, depending on how we treat the reserve fund, were authorized. Thus, this budget once again does nothing to control the explosive growth of open-ended Federal spending programs. This splendid package is tied up with a nice red ribbon of at least a $170 billion deficit.

What is wrong with such a budget? Why is it insupportable?

Until the last few decades, Federal budget policy had been to balance the budget whenever possible as an essential element of sound fiscal policy. But then came the New Deal, and with it came the endorsement of deficit spending which liberals wholeheartedly supported. Additional Government spending and unbalanced budgets were necessary, so we were told, to provide the seed of economic expansion, recovery, and growth. More recently, deficit spending, and the concomitant expansion of Government, has been supported by the same crew in the name of stabilizing the economy and the business cycle. More Government spending was supposed to stimulate demand. This approach was justified by Keynesian economic theory's claim that flaws in the macroeconomic mechanics produced times when an artificially stimulated demand was the only means to economic recovery and growth.

Regrettably, however, after several decades of experience with such budgets, with stimulative deficits and demand management, we should have learned that we have stimulated little other than the growth in the Federal Government. We certainly have not stimulated the natural demand that will produce the healthy, long-term, noninflationary economic growth which would be beneficial to all our citizens.

Thus, today's budgetary crisis is not new. It has been building for a long time. Several decades of massive Federal spending and the resultant burgeoning deficits have burdened our economy with too much government. This spending has created insistent special interest pressure groups in favor of ever more government. We have probably gone too far in creating and ecouraging these groups, making promises we cannot keep. We have certainly gone too far in satisfying these groups with programs which grow faster than the economy which is expected to support them.

We should have learned that budgets which produce more government are disasterous. We should have learned that the more government there is, the worse it is for the economy. A comparison of the 1950's with the 1970's shows how much worse off we are today with more government.

During the 1950's, inflation averaged 2.1 percent per year. During the 1970's this inflation rate tripled. We should note that, in the 1970's, government took advantage of the increased tax revenues that came from higher inflation, forcing taxpayers into higher tax brackets. With the high inflation of the 1970's, this bracket creep forced taxpayers to hand over approximately an extra $127 billion in Federal income taxes.

Or, take what has happened to the prime interest rate with more government: The prime rate averaged 3.3 percent in the 1950's. Over the last 10 years the average prime rate was 8.6 percent, more than double the average in the 1950's.

Or, take unemployment: In the 1950's, it averaged 4.6 percent. As the Federal Government increased its attempts to regulate the economy over the last two decades by deficit spending, we have experienced worsening unemployment. Over the last 10 years unemployment has averaged 6.6 percent, practically 50 percent higher than in the 1950's. The unfortunate trend is for each recession to push the unemployment rate to a new, higher level. The level that we have accepted as each cycle of recession fades has been progressively higher. This should not, and need not, be the case if we get rid of excessive government, of excessive governmental spending.

Or, look at what has happened to productivity with more government: During the 1950's, productivity increased, on the average, 3.25 percent per year. After 20 years of government spending, productivity was cut in half.

Even if Congress adopted all of the spending restraints that the President's budget requested, Federal spending in 1984 would still be excessive. It would still consume a larger bite of our economy than at any time since the Second World War. The Federal budget ate a fifth of the Nation's product in the Carter years. It now consumes more than a quarter. Government at all levels—Federal, State, and local—eats up more than one-third of our Nation's total product. That's a pretty hefty bite.

Government has thus come to constitute a larger and larger proportion of our lives. But that has not been beneficial and productive, contrary to the claims of those who for so long touted stimulative deficits. Deficits, particularly deficits of the massive size we are now experiencing, are, in fact, counterproductive.

According to those who support the conference agreement budget, current and projected future deficits necessitate deep cuts in defense spending and enhanced revenues—a euphemism for more taxes. The Reagan administration's 1981 tax cuts and indexing proposals and its increased spending to protect our national security are blamed for these deficits. That is absolute nonsense.

The deficits are the accumulated results of years of fiscal mismanagement, of attempts to manipulate the economy and the business cycle, and the disarray this has caused. The current and projected deficits are the results of these past erroneous policies.

They emphatically are not the result of the Reagan tax-rate reductions. Those reductions did not even begin to be implemented until well after implementation of the Congressional Budget Act, by which time deficits and economic problems were well under way. The Reagan tax cuts only reduced the burden of taxes on the economy and on the American taxpayer. With them, the rate declined from its historic high of 20.1 percent of GNP at the end of the Carter administration and returned to its traditional level of approximately 18.5 percent by fiscal year 1983.

In 1980, total Federal spending equaled 23 percent of GNP, but, even with the Reagan administration's attempts to restrain it, Federal spending is estimated to climb to a whopping 25.7 percent of GNP by the end of 1983. Thus, all that the Reagan across-the-board tax rate reductions and indexing, when fully implemented, would do is unmask, and attempt to

constrain, the accelerating growth in Federal spending.

The American taxpayer well deserves to retain the benefits of the Economic Recovery Tax Act of 1981. I would remind my friends who are so eager to raise taxes that repealing or capping the third year would hit hardest at middle- and lower-income Americans.

Households making between $10,000 and $50,000 a year currently pay about two-thirds of all income taxes. These households will get about 70 percent of the benefits of the 1983 tax cut. If this cut were eliminated, these low- to moderate-income families would be hit with a tax increase of between $31 and $838 in the first year of repeal alone.

Capping the amount receivable from the third year's reduction at $700 would steepen the progressive character of middle income tax rates. That would further harm those taxpayers who have already suffered the most from inflation-induced bracket creep.

Similarly, especially the lower- to middle-income American taxpayer deserves tax indexing. Without indexing, a taxpayer whose wages rise simply to adjust for general price-level inflation is driven into a higher tax bracket. This is particularly the case at lower levels of income, where the tax brackets are closer together. Each additional point of inflation increase has meant additional revenue increases of 1.6 percent via this bracket creep. Thus, without indexing, the average taxpayer receiving a salary increase to compensate for inflation does not retain the same after-tax real income. He is worse off despite his new salary.

As these Reagan tax-rate reductions and indexing proposals are not responsible for our huge, and growing, deficits, neither can the recent increases in defense spending be blamed. They are not the cause of the overall increase in Government spending and the resultant burgeoning Federal deficits.

In 1962, national defense spending constituted 46 percent of all Federal spending. By 1983, it will have declined to about 26 percent. Even if the President gets all that his budget requested, defense spending will equal only 29 percent of all Federal spending.

I say once again that the increases we now need in defense spending are vitally necessary to repair years of inexcusable budgetary neglect. We must never forget that if we do not provide adequately for our national security, we will lose all of the liberties and benefits of American citizenship.

I repeat, securing our national defense and lessening the burden of taxation are not the culprits. They are not the chief cause of big deficits and harm to our economy. The Federal Government must spend, for example, to protect our national defense or for some national law enforcement purposes. However, in numerous instances, Federal spending is excessive and wasteful. It is often an attempt to buy votes by catering to special-interest domestic constituencies. It is often counterproductive in competing with private spending. This excessive Federal spending is what causes big deficits and burdens our economy by crowding out more productive private spending.

In the private sector, there are incentives to be efficient and there are none of the vast and costly mechanisms for redistributing income and subsidizing consumption which characterize Government programs. The wasteful Government programs competing with the private sector are a burden on our economy, and it is a burden that is continuing to grow. In 1979, Federal spending constituted almost 22 percent of GNP. Even with the Reagan administration's attempts to restrain the growth in Government spending, it is estimated that Federal spending will constitute over 25 percent of GNP in fiscal 1983. This is too much of a burden for our economy to bear; it must be diminished for our Nation to return to economic health.

I stress again that only by reducing excessive, nonproductive Federal spending will we reduce deficits. Raising taxes, contrary to the claims of those who support the conference agreement's budget, is worthless in reducing deficits.

Higher taxes have failed to balance the budget in the past, and there is no reason to think they will in the future. Raising taxes encourages more spending, not deficit reduction.

Look at the record: Between fiscal 1977 and 1982, total accumulated taxes reached almost $820 billion. But spending increased even more. It rose $900 billion. During this time, the Government ran up deficits of nearly $550 billion. Congress did not balance the budget with more revenues, they just spent more—and increased deficits. There is no reason to doubt that precisely the same thing—more spending—will happen once again.

Thus, the battle of the budget remains. In the years ahead we must meet the challenge: We must reduce the deficit and learn once again to live within our national means. We absolutely must reduce the excessive domestic Federal spending which currently burdens our economy.

If we continue this administration's policy to encourage working, saving, and investing, if we continue to cut Government spending and refuse to raise taxes once again, our economy will recover and the deficits will take care of themselves.

The House-Senate conference agreement's budget does not do this. It must be rejected.

Mr. CHAFEE. Mr. President, I support the conference report and I commend the chairman of the Budget Committee and the conferees.

I believe that the central issue before us is the need to reduce deficits in order to insure lasting economic growth and jobs. This budget resolution does reduce deficits; it does assure financial markets that there is a will in this Congress to reduce the huge demand of Government debt on private capital markets. It assures that as the expansion continues, there will be adequate funds at reasonable interest rate to fuel continued growth.

Furthermore this resolution calls for lower deficits than the President's budget as revised in April would have entailed. The resolution envisages a 3-year total deficit of $471.2 billion; the President's revised budget deficit would total $513 billion over the same period.

Now there are some who claim that this resolution is deficient because it achieves deficit reduction through revenue increases rather than through spending cuts. In fact the resolution calls for less spending than does the President's budget request. As the chairman has pointed out, the conference resolution provides total outlays of $2.719 trillion over the next 3 fiscal years, but the President's request called for $2.724 trillion—$5 billion higher than the conference agreement.

I am constrained to point out that relying on spending cuts alone to reduce deficits is futile. The votes do not exist in this or the other body to implement this strategy. The Hatch substitute to the budget resolution won only 23 votes, Hollings substitute only 16. To argue that the correct way to reduce deficits is through draconian spending cuts that simply cannot be enacted is, in my view sophistry. To borrow a phrase, it is voodoo budget policy.

I regret that the effort to pass this budget has been so difficult. I believe that the President has an important stake in strengthening the congressional budget process. His own program of spending cuts and tax cuts could not have been enacted in 1981 without the reconciliation procedures provided by the budget process.

Mr. MATTINGLY. Mr. President, I rise to vote against the conference report on House Concurrent Resolution 91, the first concurrent resolution on the budget for fiscal year 1984.

Before doing so, however, I would like to make a few comments concerning the so-called budget compromise.

If I had to title the document containing the compromise budget resolution, I would do so in the following fashion—"Congress Reverts to its Old Ways: Tax and Tax, Spend and Spend." Mr. President, the compro-

mise budget resolution recently worked out by the House and Senate conferees is a slap in the face to the American taxpayer. As one administration official labeled the budget compromise, it is a return to "Americans make, government takes." The resolution sacrifices the basic principles of good management, good budgeting, and faith in the free enterprise system.

The passage of this budget compromise would be a travesty for the following reasons:

First, this budget compromise does not control spending. In fact, that is an understatement, for outlays of $807 billion in fiscal year 1983 are increased to $962 billion in fiscal year 1986. Such, however, does not include another $8.5 billion which is in a contingent fund for so-called recession relief programs, although the economic recovery is underway. As the President recently described the budget compromise, it appears Congress is "running up the white flag on controlling domestic spending." To combat the irresponsible action of Congress, President Reagan has promised to veto each and every budget-busting appropriations bill. I pledge my support to the President in this regard and will vote to sustain each and every budget-busting appropriations bill which is vetoed.

Mr. President, I am afraid that what has taken place in the last few years is that Congress has become a bunch of reckless spenders. Until Congress comes to grips with its spending habit and examines the spending side of the ledger, adverse economic consequences will follow. In other words, Congress must eventually learn to say "no."

Second, tax increases are generally bad medicine for the economy and specifically, a threat to the emerging recovery. Nevertheless, in the wake of an economic recovery, the compromise budget resolution calls for increasing revenues over the next 3 years by $73 billion. Raising taxes at the beginning of economic recovery is counterproductive, senseless, and irresponsible. For the past decade, Congress has attempted to balance the budget by raising taxes. However, as history has shown us, every dollar which comes into the Federal Government, and then some, continues to be spent. It does not take a mathematical genius to calculate that by raising $73 billion in taxes while at the same time increasing spending by over $155 billion, the deficit will increase. Again, Congress must examine the spending side of the ledger if it ever hopes to balance the Federal budget and witness sustained economic growth.

Finally, I am opposed to the budget compromise because I strongly believe that no budget is better than a bad budget. Make no mistake about it, this budget compromise represents a bad budget. I fail to understand why a budget process which has failed so miserably since its inception should be so sacrosanct. Many will argue that the responsible vote would be to support the compromise budget resolution in an effort to preserve the budget process. I disagree.

Mr. President, I cast my vote against House Concurrent Resolution 91, a budget resolution which does not control spending and raises taxes as the recovery begins and will result in a retardation of economic growth, a poor environment for savings and investment, and thus less job creation.

Mr. BAKER. Mr. President, our colleague, Senator PERCY, is not here today and will not be able to vote on the budget conference report before us. I understand Senator PERCY has been in Illinois at several meetings with President Reagan and was unable to get back in time for this vote which was just scheduled late this afternoon.

Senator PERCY has asked that I insert in the RECORD a brief statement he has transmitted from Chicago on the budget vote today, explaining how he would have voted had he been here.

Mr. President, I ask unanimous consent that Senator PERCY's statement on the budget conference be included in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

● Mr. PERCY. Mr. President, I am unable to be in Washington today to vote on the conference report on the budget earlier today. I accompanied President Reagan to several meetings and speeches in Chicago. Unfortunately, when I learned of the scheduling of this vote, it was too late for me to return to Washington in time. Before leaving Washington this morning I was told that initial plans had been to hold this vote until Monday and I regret that I cannot get back in time to vote today.

Had I been able to vote on the budget conference, I would have cast my vote against it.

I supported the budget originally passed by the Senate only after it proved impossible to pass the Baker-Domenici version. The budget adopted by the conference committee goes even further in what I consider to be the wrong direction. I cannot support it.

The budget that has come back from conference raises the allowance for tax increases beyond the Senate levels. As I made clear in my remarks when the Senate passed its version of the budget, taxes are too high on the average American and proposals to raise taxes—by repealing indexing or rescinding the third part of the individual tax cut—are wrong.

The budget conference report would surely lead Congress toward significant tax increases and I cannot support that step.

In addition, the budget conference report establishes a "contingency fund" that flies in the face of the budget process itself. One of the purposes of the budget resolution is to set out national priorities and guidelines for committees. The contingency fund avoids this priority-setting regimen and is an unwise step for Congress to take. If we cannot agree to fund certain programs through the consideration of the budget, we should not try a backdoor approach through this highly unusual contingency fund.

The budget conference also does not emphasize enough on the spending cut side. Under the reconciliation provisions of the budget, only 17 cents would be cut for every dollar of new taxes raised. That is a trade-off I cannot support. Reconciliation should not become merely a vehicle for tax increases.

I think the budget conferees can come back with a lower tax budget without the contingency plans. I hope that the Senate will reject this budget so we can draft a new one that will not sanction continuing huge rises in entitlement programs and rising tax rates that could choke off the recovery.●

Mr. BYRD. Mr. President, I intend to vote for this Budget Resolution Conference Agreement, despite the fact that I believe it in many respects to be deeply flawed. I do so because the country desperately needs a budget that will chart a course for reducing the budget deficits which are the legacy of the economic and fiscal policies of the last 2½ years. Unless we are willing to put aside partisanship and join together in passing a compromise budget, these deficits will overwhelm us all and abort the economic recovery that is finally underway after nearly 2 years of deep recession.

The White House is campaigning hard against this conference agreement. Apparently, the word "compromise" is not a part of the President's lexicon, at least when it comes to the budget. But here in the Senate, we have a long and proud tradition of bipartisan debate and compromise. That tradition governed the early years of the budget process, and was essential to its acceptance and success. In recent years, that bipartisan spirit has been largely missing—and both the budget process and the budgets it produced have suffered markedly from its absence.

The conference agreement before us tonight represents a return of bipartisanship to the budget process. It is a victory for compromise and moderation. It is a victory, as well, for the country, which sorely needs the fiscal discipline which it represents.

Let us make no mistake about what is at stake here tonight. It is the very future of the budget process. What is at stake is the ability of this Con-

gress—and future Congresses—to effectively and responsibly exercise our constitutional power of the purse.

The budget process, despite its manifold problems and frustrations, has served the Congress and the Nation well. It has never been more important than it is today. I hope that all of us here tonight will put aside our partisan concerns and vote for this budget compromise.

Mr. KASTEN. Mr. President, I rise in opposition to the budget resolution before us here today. I voted against the Senate passed version of the budget a few weeks ago—and with all due respect to the distinguished Senator from New Mexico—I find that I must vote against this final version of the budget resolution.

My reasons for doing so have remained the same. The Senate-passed budget had too many spending and tax increases. The House-Senate conference has only added more spending and tax increases. This is bad policy. And this is bad politics.

In 1980, President Reagan and many of us in this Chamber today promised to get taxes and spending down—and keep them down. This is the only way we can restore the incentives to work, save, invest, and produce our way to economic strength.

If this conference report is adopted, the promise we made in 1980 will be short lived. This budget will mandate that $73 billion in new taxes be raised over the next 3 years. It also allows for deficits of $208 billion in fiscal year 1983 and $179 billion in fiscal year 1984. The deficits do decline over the next few years, but they never get below $130 billion.

It's amazing that in the year we had planned to balance the Federal budget, 1984, its proposal calls for a deficit of $180 billion. A $180 billion deficit proves that our system is one of checks and balances. When the budget doesn't balance, they post date the checks.

Mr. President, that's exactly what we'd be doing if we approved this budget resolution. Instead of restraining the rampant growth in Federal spending to get our deficits under control, we have found ways to disguise it. This budget calls for an $8 billion contingency fund for new social spending programs. With a $930 billion budget next year—and a $180 billion deficit—the last thing we should be thinking of is starting new Federal spending programs.

The budget does call for tax increases to ease some of the deficit burden, but this is a false economy. We have made great progress toward recovery in the last few months. In fact, the projected growth for the second quarter of this year is 6.6 percent. This is the highest growth rate in 2 years. The last thing we need to do is adopt a budget that kills any chance of economic recovery. We have raised taxes enough—with last year's tax increase bill, the gas tax, and the social security amendments—since the 1981 Economic Recovery Tax Act. In fact, in 1984, the net tax cut to the American taxpayer will only be $3 billion. There will be no tax cut after 1984.

Some of my colleagues in the House of Representatives would even like to take the remaining $3 billion of the $130 billion third-year tax cut away from working Americans. They say that their plan to impose a $700 cap on the tax cut will soak the rich, but this is wrong. Several facts make this very obvious:

The "rich" already benefit from the 1981 Tax Act provision that drops the maximum taxable rate from 70 to 50 percent. The "fairness Democrats" have taken no action to change this.

Approximately half of all taxpayers affected by the $700 cap are those with less than $50,000 in annual income.

Taxes for millions of married working couples—two-earner households—will be increased. Nearly half of the tax returns affected by the cap would apply to these working couples.

Instead of soaking the rich, it turns out that the cap will drown the middle class. This doesn't bother the "fairness Democrats," who have also neglected the fact that the result of last year's installment of the Reagan tax cut was an $8 billion increase in revenues from those in the top income tax bracket. This, as we have always said, was caused by a shift of resources away from useless and nonproductive tax shelters. An effort to "soak" these taxpayers will only reverse this trend.

At a time when we are trying to restore the incentives to work, save, and invest, we are taking action that would undermine all three. In our economic system, if you want more of something, you provide incentives. If you want less of something, you tax it. Here we are—on the eve of adopting the final phase of the tax reduction package we enacted on 1981—turning around and raising taxes by $73 billion in an effort to get deficits under control.

Last year Congress raised taxes $100 billion as the "price we have to pay" to get the deficits under control. However, despite last year's tax increase, the budget deficits have continued to grow. In fact, they have doubled. Clearly this is not the right course to take. It is only through spending restraint and economic growth that we can truly get the deficits down.

Mr. TOWER. Mr. President, I wish to register my strong objection to section 7 of the conference substitute version of the first concurrent resolution on the budget and to bring to the attention of the Senate what I believe to be inappropriate and unwise aspects of that provision. Section 7 of the conference substitute would express the sense of the Congress that in "light of budget restraint, limited resources, and the need to foster economic growth," that the House Armed Services Committee should initiate a thorough review of military retirement programs and recommend changes which would result in reduced spending under these programs.

Mr. President, I find this provision especially objectionable for several reasons. First, the provision is not needed. It is quite clear to me that resolution language expressing the sense of the Congress is not needed for any committee of the Congress to initiate a thorough review of any program under the oversight jurisdiction of that committee.

Second, as chairman of the Senate Armed Services Committee, I am particularly concerned that this provision in the resolution would seem to imply that the House Armed Services Committee is especially qualified, to the exlusion of the Senate Committee on Armed Services, to carry out a review of military retirement programs. Nothing could be further from the truth, but yet this resolution would certainly be seen as an endorsement of that view. The Senate Armed Services Committee has an abiding awareness of budget restraint, limited resources, and the need to foster economic growth. The committee also is fully aware of the nature of military retirement programs and their relationship to the defense budget. My colleagues should be aware that the Senate Armed Services Committee is properly carrying out its responsibilities with respect to military retirement programs and that any expression of the sense of Congress implying the contrary would be wrong.

Finally, and perhaps most importantly, I object to the language of this provision because it assumes unproven facts and assumes the result of the review it purposes to sanction. That is, the language of this resolution provision assumes that reductions in military retirement programs should be made solely because these programs constitute a portion of the defense budget. It seems to me that any thorough review of military retirement programs should focus on the purposes and needs of these programs. Only after such a review has been conducted can it be determined whether changes should be made and if so, what the nature of the changes should be. Approaching the issue of military retirement programs in the manner suggested by the resolution provision is a classic example of putting the cart before the horse.

I urge my colleagues to be aware of and to consider this matter before casting their vote on this resolution.

● Mr. NICKLES. Mr. President, the conference agreement on the budget should not be passed. This budget does not limit spending or reduce deficits. In 1984 alone it increases taxes $10 billion more than the President's budget and increases nondefense spending at least $14.5 billion over the President's figures. In addition, it calls for a $8.5 billion "reserve fund" which will only further add to both the spending levels and, of course, the deficits. This country cannot afford the same policy as we have repeatedly followed: higher taxes with even higher levels of spending with even greater deficits.

Mr. President, I ask that the two accompanying tables from CBO on the comparisons of the conference agreement and the President's budget be included in the RECORD.

The tables follow:

COMPARISON OF PRESIDENT, CONFERENCE AGREEMENT, AND CBO BASELINE, WITH SAME ECONOMIC AND TECHNICAL ASSUMPTIONS

	President's budget (with conference economic and technical assumptions)	Conference agreement (with reserve)	CBO baseline (with conference assumptions)
Budget authority	903.4	928.7	922.4
Outlays	840.8	858.9	850.6
Revenues	669.9	679.6	667.6
Deficit	170.8	179.3	183.0

Source: Congressional Budget Office, June 23, 1983.

CONFERENCE SUBSTITUTE, INCLUDING RESERVE

[By fiscal year, in billions of dollars]

	1983	1984	1985	1986
National defense	241.3	240.0	265.3	295.0

[1] Less than $500 million. June 22, 1983.

Mr. THURMOND. Mr. President, I rise today in opposition to the budget resolution that has been reported back to the Senate from the conference committee.

I know that all of the conferees have worked long and hard to come up with this resolution, especially the distinguished chairman of the Senate Budget Committee, Mr. DOMENICI. In fact, considering the extravagant spending levels and the sharp increases in taxes contained in the House version of the budget, Chairman DOMENICI and the Senate conferees have done a commendable job in shaping the final product much closer to the Senate-passed version.

Unfortunately, in my judgment, the conference report is simply unacceptable. As one who voted against the budget passed by the Senate last month because of its deficiencies in the areas of domestic spending control, unwise tax increases, and inadequate national defense funding, I certainly cannot support a budget that compounds the deficiencies in each of these key areas.

Last summer, this body passed the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA). The premise underlying that $98 billion tax bill was that there would be spending cuts forthcoming amounting to $3 for every $1 in tax revenue generated by TEFRA. That commitment to spending reductions has not been kept and is effectively negated by this latest budget resolution. It calls for only $12.3 billion in spending cuts over a 3-year period, with a mere $2.8 billion cut next year. This is far short of the reductions requested by President Reagan.

Mr. President, the only way to control the size of the deficits is to cut spending, and that is a major feature lacking in this budget resolution. In fact, this resolution goes in the other direction in several key program areas. It adds $15 billion in new spending on a number of domestic programs above that which the administration requested.

In an attempt to make up for the lack of discipline on the spending side of the budget, this resolution mandates permanent tax increases of $12 billion in fiscal year 1984 and $73 billion over the next 3 years. These further increases would occur less than a year after we passed legislation to raise taxes by $98 billion. Mr. President, in my judgment, we cannot continue to increase the tax burden every year without bringing the economic recovery to a sudden halt. While I agree that a deficit of $170 to $179 billion is far too large, additional spending cuts, and not tax increases, are the answer to deficit control.

This budget also shortchanges and endangers our national security by cutting in half the 10 percent real growth in national defense spending asked for by the President. At a time when the Soviets have embarked on a program of arms buildup the likes of which our world has never seen, we cannot afford to be ill-prepared to meet and deter this ominous threat to world peace.

We are the leaders of the free world, and we must accept our responsibility to help preserve freedom and democracy for the American people and for our allies around the world. The 5-percent growth rate contained in this budget will simply not allow us to do that which our best defense adviseors and our Commander in Chief feel is minimally necessary to insure world peace.

Mr. President, in summary, I cannot support this budget resolution because it fails to adequately control domestic spending. It unwisely raises taxes when we are finally on the road to economic recovery, and it inadequately provides for our national security.

Mr. GRASSLEY. Mr. President, somewhere along the road to recovery, this budget process hit a mud patch. And our wheels have been spinning ever since. The harder we have pressed for a budget resolution, the deeper our wheels have become buried. Each change or compromise to the resolution has failed to reduce the weight of the Government levy of higher taxes and higher deficits. The result is that the process has gotten further bogged down.

Mr. President, if the weight of the government's levy is not lessened, then the budget process in future years will continue to weaken, and consensus will continue to be elusive.

It seems to me, that two conditions must prevail before any lasting consensus for a budget resolution can be built.

The first condition is that we lower the Government levy contained in any budget resolution. In other words, we must lower the combination of deficits and taxes. That implies that spending must be restrained and taxes must not be raised.

Here is a breakdown of the resolution as they developed along the budget process:

	Administration	House	Senate	Conference
Deficit	184.9	174.5	178.6	179.3
Revenue	2.7	30.0	8.9	12.0
Total levy	187.6	204.5	187.5	191.3

Despite all the discussion about the need to close the budget deficits, the total Government levy has remained around the $190 billion-mark. This is too much of a burden on the workers of this country, and it threatens the sustainability of the current recovery.

There is a very fundamental reason why we should cut spending and not raise taxes.

Over the past decade, revenues as a percent of GNP averaged 19.4 percent. After all the tax changes we have

made since 1981, revenues are still above 19 percent of GNP. The total tax relief from the changes made since 1981 will average only $15.6 billion per year, from 1983 to 1988. With deficits projected at $200 billion and more, it is quite obvious that revenues have not caused the problem; $15.6 billion cannot cause a $200 billion problem.

Spending, on the other hand, averaged 21.6 percent of the GNP over the last decade. This year, however, that figure will leap to 25 percent. We have made changes in spending, but obviously we have not made enough, or the right kind. Congress has tied its hands with spending policies that have eliminated all flexibility from the budget. We have failed to understand the long-term consequences of present day decisions. The spending decisions we made years ago are now having an enormous impact. Our failure to deal with the effects of those past decisions is what prevents us today from narrowing the deficits.

We can draw no other conclusion, then, but that the spending side of the ledger has caused the deficit problem. Congress has shown a reluctance to restrain spending because it lacks an essential and moral basis for doing so. The second condition for a lasting consensus, then, is that spending restraint be applied across the board.

The perception of equity is the key to getting spending under control, the key to controlling deficits, and the key to lifting the budget process back on its track.

Without equity, there is no basis for the willingness to restrain spending; no basis to reach a consensus; no basis to win the support of our constituents; and no basis to pass a supportable budget resolution.

I have argued from the beginning of this year's budget process, and as a carryover from my efforts of last year, for an across-the-board spending freeze and for no tax increases. This approach is a necessity if we are to accomplish budgetary discipline and sustained economic growth. The plan I offered this year would have provided the basis for those goals. Its total government levy would have been the following:

Deficit	176.7
Revenues	
Total levy	176.7

Mr. President, we can either continue to pursue the hit-and-miss approach to the budget as we did this year, an approach which has no cohesion or direction in mind, no vision and no consensus, or we can provide the basis for national sacrifice to do what is right, fair, and responsible, by reducing the Government levy on the working men and women of this country, and by doing so in an across-the-board manner.

On the basis of these remarks, I cannot support the budget resolution which we are asked to vote on today.

Mr. CHILES. Mr. President, I want to personally thank all the Budget Committee minority staff who have worked long hard hours for the last 6 months to make this budget possible tonight.

Rick Brandon, minority staff director; Dennis Beal; Ron Chiodo; Julie Coffren; Alan Cohen; Kathy Deignan; Kenneth Erickson; Lisa Faulkner; Richard Koskella; Bentley Lipscomb; Garry Schinasi; Sandra Seay; Jim Stasny; Patricia Tate; and Georgia Williams.

Mr. BRADLEY. Mr. President. I rise in support of the conference agreement on the first budget resolution. It is by no means a perfect budget, but it strikes a generally fair balance between spending and revenues and between defense and nondefense spending. And the congressional budget is more prudent than the budget proposed by the President in that Federal deficits are significantly lowered.

Mr. President, I ask unanimous consent that a table prepared by the Democratic staff of the Senate Budget Committee be included in the RECORD at this point.

There being no objection the table was ordered to be printed in the RECORD, as follows:

COMPARISON OF DEFICITS

	Fiscal year—		
	1984	1985	1986
President's budget	184.9	178.8	149.3
Conference agreement:			
Without reserve	169.9	156.3	127.2
With reserve	179.3	161.1	130.8
Senate-Passed budget	171.3	158.0	121.2
House-Passed budget	161.0	130.3	119.8

Mr. BRADLEY. Mr. President, there is general consensus that outyear deficits must be significantly reduced if we are to have a sustained economic recovery. The congressional budget before us calls for over $40 billion lower deficits than proposed by the President for the fiscal year 1984–86 period. Even though further deficit reduction measures will be needed in future years, I believe that this year's budget is a solid step in the right direction—a step toward lower Federal deficits and sustained economic recovery.

The lower deficits are accomplished through a combination of spending reductions and tax increases. The congressional budget before us requires $16 billion in spending cuts for entitlement programs over the next 3 years. And it requires $73 billion in tax increases over the next 3 years, the same level as the Senate-passed budget resolution and approximately $20 billion more in tax increases than was proposed by the President in January.

The congressional budget assumes 5 percent real growth—a middle ground—for defense spending. This is the same level of spending as originally proposed by the Senate Budget Committee. Mr. President, the defense of our Nation requires a steady, sustained increase in resources for our military; I believe that a 5-percent growth rate is sufficient to accomplish this end.

Mr. PRESIDENT, I am pleased that the budget resolution assumes enactment of two programs aimed at helping the Nation's unemployed. It is my hope that the Congress will soon enact a health insurance program for the unemployed and an extension of unemployment benefits for those hardest hit by the current recession. It is important that we as a nation show compassion for people in need.

In sum, Mr. President, the congressional budget resolution before us is not perfect. But it reverses some of the biggest mistakes of the past 2 years by providing a more balanced mix between tax and spending policies and between defense and nondefense spending. I urge my colleagues to support the conference agreement.

Mr. TOWER. Senator DOMENICI, as I understand the situation with respect to defense outlays, irrespective of the $240 billion outlay target for function 050 contained in the conference report, it is your view that a more accurate estimate—one based on the $11.9 billion reduction in budget authority—suggests that fiscal year 1984 outlays would total $241.3 billion. Is that correct?

Mr. DOMENICI. Yes. The Senator is correct.

Mr. TOWER. Senator CHILES, is that also your understanding?

Mr. CHILES. Yes; That is my understanding.

Mr. TOWER. So, the chairman and ranking member of the Budget Committee would not be opposing, for overall budgetary reasons, defense appropriations bills whose outlays totaled $241.3 billion—as long as the $11.9 billion budget authority reduction is achieved—is that correct?

Mr. DOMENICI. The Senator is correct.

Mr. STEVENS. Mr. President, let me ask the distinguished manager of the resolution to return to his remarks earlier on the issue of defense outlay targets. I understand he indicated that $241.3 billion was a more realistic estimate than the $240 billion contained in the conference report on the budget resolution. In that context he also indicated he did not construe the figure in the conference report as any kind of a binding ceiling. Is that correct?

Mr. DOMENICI. The Senator is correct.

Mr. STEVENS. Mr. President, I wish to make clear it is my own intention to

honor the budget authority target of $268.8 billion for defense function outlays—at least so far as the defense appropriations bill is concerned since I chair the subcommittee of jurisdiction. But I must point out that any outlay estimates from that budget authority level may easily vary from the estimates we are now talking about.

Even if we were to adhere to the $241.3 billion target the Senator from New Mexico discussed, we would need flexibility here in the Senate in order to achieve that level in the final conference agreement on the defense appropriations bill. Does the Senator agree?

Mr. DOMENICI. The Senator from Alaska is correct in pointing out the realities of the congressional process, particularly as they relate to the give and take involved in developing a final appropriation bill. I agree that flexibility is needed in treating outlay estimates and targets, and that would be my position when the appropriation bills involving defense spending are before the Senate.

Mr. STEVENS. I thank the Senator. The Senate should be aware that fiscal year 1984 defense spending, as approached in the budget resolution, involves absorbing an unbudgeted $1.8 billion in civilian and military pay raises, if that be the will of the Congress, so the overall budget authority reduction from the President's defense request—$11.9 billion—has an actual programmatic impact more like $13.7 billion. That is an extremely difficult and sensitive task, finding those kinds of cutbacks in the vital defense area. We need all the flexibility we can get to reach that ultimate goal.

Mr. METZENBAUM. Regular order, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the motion to concur in the House amendment.

Mr. DOMENICI. Yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BAKER. Mr. President, there will be no more rollcall votes after this.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Alaska (Mr. MURKOWSKI), the Senator from Illinois (Mr. PERCY), the Senator from South Dakota (Mr. PRESSLER), and the Senator from Wyoming (Mr. SIMPSON) are necessarily absent.

I further announce that, if present and voting, the Senator from Wyoming (Mr. SIMPSON) would vote "yea."

On this vote, the Senator from Alaska (Mr. MURKOWSKI) is paired with the Senator from Illinois (Mr. PERCY).

If present and voting, the Senator from Alaska would vote "yea" and the Senator from Illinois would vote "nay."

Mr. CRANSTON. I announce that the Senator from South Carolina (Mr. HOLLINGS) and the Senator from Massachusetts (Mr. TSONGAS) are necessarily absent.

The PRESIDING OFFICER (Mr. GORTON). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 51, nays 43, as follows:

[Rollcall Vote No. 172 Leg.]

YEAS—51

Andrews	Dodd	Mathias
Baker	Domenici	Matsunaga
Biden	Eagleton	Metzenbaum
Bingaman	Ford	Mitchell
Boschwitz	Glenn	Moynihan
Bradley	Gorton	Packwood
Bumpers	Hart	Pell
Burdick	Hatfield	Pryor
Byrd	Heinz	Randolph
Chafee	Huddleston	Riegle
Chiles	Inouye	Rudman
Cochran	Jackson	Sarbanes
Cohen	Kassebaum	Sasser
Cranston	Kennedy	Stafford
D'Amato	Lautenberg	Stennis
Danforth	Leahy	Stevens
Dixon	Levin	Weicker

NAYS—43

Abdnor	Hawkins	Nunn
Armstrong	Hecht	Proxmire
Baucus	Heflin	Quayle
Bentsen	Helms	Roth
Boren	Humphrey	Specter
DeConcini	Jepsen	Symms
Denton	Johnston	Thurmond
Dole	Kasten	Tower
Durenberger	Laxalt	Trible
East	Long	Wallop
Exon	Lugar	Warner
Garn	Mattingly	Wilson
Goldwater	McClure	Zorinsky
Grassley	Melcher	
Hatch	Nickles	

NOT VOTING—6

Hollings	Percy	Simpson
Murkowski	Pressler	Tsongas

So the motion to concur in the House amendment was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BYRD. Mr. President, will the Senator yield to me.

Mr. STEVENS. I yield to my good friend.

Mr. BYRD. Mr. President, I called Senator HART somewhere—I forget where he was—but I said: "I expect this to be a razor-thin vote," and so did Senator CHILES who was standing by the telephone booth, and it actually looked as though at that time it would be razor thin.

I had gone to Senator BAKER and I said to Senator BAKER: "If you do not mind telling me and if you now know, how you are going to vote I would appreciate you telling me."

He said: "Honestly, I do not know. I am telling you right up front."

And as it turned out, because of certain things that developed, I suppose the amendment by Mr. DOLE, Mr. BAKER voted for this. I think that made a difference of five or six votes at least.

So it would have been razor thin if Senator BAKER had not voted for it, and at the time I talked to the Senator, I did not know that. I thought it would be razor thin.

So I apologize to him for urging him to come back because I thought that might be the one vote, inasmuch as when it originally passed the Senate this passed by one vote, and Mr. CHILES and I implored that he come back. We arranged with the leadership on the other side of the aisle to have the rollcall vote run an hour.

We heard that the Senator's plane was 15 minutes late taking off. I went to Mr. BAKER and went to Mr. STEVENS, and they and Mr. DOMENICI all very graciously agreed inasmuch as this was the last vote and the Senator's vote would not make a difference in the outcome, they were willing to extend the vote and we kept right up with the Senator's plane. We knew when he was going to land. We knew when he landed.

And I wish to make that explanation in the RECORD to apologize to the Senator and also to thank the leadership on the other side, Mr. BAKER, Mr. STEVENS, and Mr. DOMENICI, for their being so courteous and considerate of the Senator.

It would just be too bad for him to have made this trip and then gotten here 2 minutes too late to vote.

Mr. HART. Mr. President, will the minority leader yield?

Mr. BYRD. I yield.

Mr. HART. Mr. President, I express my appreciation for the minority leader and his cooperation in helping arrange a rather lengthy vote and also the distinguished manager on the other side, the Senator from Alaska, and the majority leader for their understanding and working around the vicissitudes of travel these days.

Mr. BYRD. And Mr. DOMENICI.

Mr. HART. And Mr. DOMENICI.

There are few things these days that are more important than the budget of the United States, and all I can say it was worth the trip.

Mr. BYRD. I say I do not remember as long as I have been here the galleries and everyone applauding the arrival of a Senator on this occasion.

Mr. CHILES. Mr. President, if the Senator will yield for a minute, I wish to say to my good friend from Colorado I feel somewhat bad that we did tell him that we thought the vote was going to be close, but, of course, at the time we were saying that I really did not know whether we were up or down, and this vote kind of vacillated all day long in that direction.

But I thank him very much for the effort that I know he made and the work that he has done in regard to the budget because he is a member of our committee and has worked long and hard on it. I thank him very much.

Mr. HART. Mr. President, the Senator from Florida is characteristically generous. He, I think, deserves the credit on our side for the hours, weeks, and months of work in bringing this about, and the least I could do was give him a hand, I appreciate his remarks.

Mr. BYRD. Again, I thank Mr. STEVENS, Mr. DOMENICI, and all the Senators on that side of the aisle for their patience and their courtesy.

Mr. STEVENS. I thank the Senator from West Virginia.

Mr. BYRD. Mr. President, I want to thank the Presiding Officer (Mr. GORTON) for his patience and courtesy that were extended in the case of Mr. HART.

Mr. STEVENS. Mr. President, the distinguished minority leader has anticipated me. I was going to thank the distinguished Presiding Officer whose patience—he inquired of me how long this would be, and I told him it would be just minutes and would he please assist us, and he has been patient. So I do think the distinguished Senator from Washington deserves our thanks also, and I thank the distinguished Democratic leader for his comments.

MESSAGES FROM THE HOUSE

At 2:31 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following joint resolution, without amendment:

S.J. Res. 96. Joint resolution to designate August 1, 1983, as "Helsinki Human Rights Day."

The message also announced that the House has passed the following bill and joint resolutions, in which it requests the concurrence of the Senate:

H.R. 2972. An Act to authorize certain construction at military installations for fiscal year 1984, and for other purposes;

H.J. Res. 168. Joint resolution to designate the week beginning May 27, 1984, as "National Tourism Week"; and

H.J. Res. 293. Joint resolution to commemorate the anniversary of the establishment of the George Washington Carver National Monument in Diamond, Mo.

At 3:51 p.m., a messsge from the House of Representatives, delivered by Ms. Goetz, one of its clerks, announced that the House recedes from its disagreement to the amendment of the Senate to the concurrent resolution (H. Con. Res. 91) revising the congressional budget for the U.S. Government for the fiscal year 1983 and setting forth the congressional budget for the U.S. Government for the fiscal years 1984, 1985, and 1986, and has agreed thereto, with an amendment.

The message further announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 3329. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1984, and for other purposes.

HOUSE MEASURES REFERRED

The following bills were read the first and second times by unanimous consent, and referred as indicated:

H.R. 2972. An act to authorize certain construction at military installations for fiscal year 1984, and for other purposes; to the Committee on Armed Services.

H.R. 3329. An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1984, and for other purposes; to the Committee on Appropriations.

H.J. Res. 168. Joint Resolution to designate the week beginning May 27, 1984, as "National Tourism Week"; to the Committee on the Judiciary.

H.J. Res. 293. Joint resolution to commemorate the 40th anniversary of the establishment of the George Washington Carver National Monument in Diamond, Mo.; to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. DOMENICI, from the Committee on the Budget, without amendment:

S. Res. 160. A resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 602.

By Mr. THURMOND, from the Committee on the Judiciary, with amendments:

S. 32. A bill to amend title 17 of the United States Code with respect to rental, lease, or lending of sound recordings (Rept. No. 98-162).

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry, without amendment:

S. 1529. An original bill to stabilize a temporary imbalance in the supply and demand for dairy products, to enable milk producers to establish, finance, and carry out a coordinated program of dairy product promotion, to adjust the support levels for the 1983 and subsequent crops of tobacco, to make modifications in the tobacco production adjustment program, and for other purposes (with additional views) (Rept. No. 98-163).

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry, with amendments and an amendment to the title:

H.R. 2733. An act to extend and improve the existing program of research, development, and demonstration in the production and manufacture of guayule rubber, and to broaden such program to include other critical agricultural materials (with minority views) (Rept. No. 98-164).

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry, without amendment:

S. Res. 165. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 2733; referred to the Committee on the Budget.

S. Res. 166. An original resolution waiving sections 303(a) and 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1529; referred to the Committe on the Budget.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HUMPHREY:

S. 1523. A bill to direct the Secretary of the Army, acting through the Chief of Engineers, to construct a project for modification of Portsmouth Harbor and the Piscataqua River Basin in Maine and New Hampshire; to the Committee on Environment and Public Works.

By Mr. PELL:

S. 1524. A bill to suspend for 2 years the duty on parts of spindle motors suitable for computer memory disk drives; to the Committee on Finance.

By Mr. STAFFORD (for himself and Mr. HUMPHREY) (by request):

S. 1525. A bill to amend the Disaster Relief Act of 1974, and for other purposes; to the Committee on Environment and Public Works.

By Mr. DENTON:

S. 1526. A bill to provide lump sum death benefits for the survivors of Federal law enforcement officers killed in the line of duty; to the Committee on Governmental Affairs.

By Mr. INOUYE:

S 1527. A bill to provide parity for psychiatrists and psychologists in title 18, United States Code; to the Committee on the Judiciary.

By Mr. MOYNIHAN (for himself and Mr. DANFORTH):

S. 1528. A bill to amend the Internal Revenue Code of 1954 to provide that certain museums and organizations which operate libraries will be treated as public charities; to the Committee on Finance.

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry:

S. 1529. An original bill to stabilize a temporary imbalance in the supply and demand for dairy products, to enable milk producers to establish, finance, and carry out a coordinated program of dairy product promotion, to adjust the support levels for the 1983 and subsequent crops of tobacco, to make modifications in the tobacco production adjustment program, and for other purposes; placed on the calendar.

By Mr. ANDREWS:

S. 1530. A bill to make technical amendments to the Indian Self-Determination and Education Assistance Act and other acts; to the Select Committee on Indian Affairs.

By Mr. RIEGLE (for himself, Mr. PELL, Mr. KENNEDY, Mr. CRANSTON, Mr. DODD, Mr. METZENBAUM, Mr. RANDOLPH, Mr. MATSUNAGA, Mr. HART, Mr. LEVIN, and Mr. CHILES):

S. 1531. A bill to encourage the use of public school facilities before and after school hours for the care of school-age children and for other purposes; to the Committee on Labor and Human Resources.

By Mr. GARN (for himself, Mr. HEINZ, Mr. PROXMIRE, and Mr. DODD) (by request):

S. 1532. A bill to limit temporarily the acquisition of depository institutions and the commencement of certain new activities by State-chartered depository institutions, and

for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. COCHRAN:

S. 1533. A bill for the relief of Gerald M. Hendley of Harmons, Md.; to the Committee on the Judiciary.

By Mr. MATHIAS (for himself and Mr. WARNER):

S. 1534. A bill to amend the Internal Revenue Code of 1954 to allow the voting interests of disqualified persons to be taken into account in determining a private foundation's voting interest for purposes of section 4943 of such code; to the Committee on Finance.

By Mr. MATHIAS (for himself, Mr. DOLE, and Mr. DECONCINI):

S. 1535. A bill to amend title 35 of the United States Code to increase the effectiveness of the patent laws, and for other purposes; to the Committee on the Judiciary.

By Mr. DODD:

S. 1536. A bill to amend the Federal Water Pollution Control Act with respect to ocean waivers; to the Committee on Environment and Public Works.

By Mr. DANFORTH (for himself. Mr. EAGLETON, Mr. BRADLEY, Mr. CHAFFEE, Mr. Kennedy, Mr. MOYNIHAN, and Mr. PELL);

1537. A bill to provide additional authorzation of appropriations for certain programs for fiscal year 1984 and each of the four following fiscal years; to the Committee on Labor and Human Resources.

By Mr. MATHIAS (for himself and Mr. DOLE):

S. 1538. A bill to amend the patent laws of the United States; to the Committee on the Judiciary.

By Mr. HATCH (for himself, Mr. KENNEDY, and Mrs. HAWKINS):

S. 1539. A bill to amend the Public Health Service Act to provide home and community based services for the elderly and the disabled; to the Committee on Labor and Human Resources.

S. 1540. A bill to amend the Public Health Service Act to provide for coordination with State medicaid plans in the furnishing of home care services, and to amend title XIX of the Social Security Act to allow States to implement programs of home care services; to the Committee on Labor and Human Resources.

By Mr. SASSER (for himself, Mr. BAKER, Mr. ABDNOR, Mr. BAUCUS, Mr. BURDICK, Mr. DECONCINI, Mr. DOLE, Mr. EAST, Mr. HECHT, Mr. HOLLINGS, Mr. KASTEN, Mr. LAXALT, Mr. LEAHY, Mr. LEVIN, Mr. LUGAR, Mr. MITCHELL, Mr. NUNN, Mr. PERCY, Mr. PRYOR, Mr. STENNIS, Mr. COCHRAN, Mr. GORTON, Mr. SARBANES, Mr. GARN, and Mr. DIXON):

S.J. Res. 120. Joint resolution to provide for the awarding of a special gold medal to Danny Thomas in recognition of his humanitarian efforts and outstanding work as an American; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. ABDNOR (for himself, Mr. STENNIS, and Mr. WEICKER):

S.J. Res. 121. A joint resolution to designate November 1983 as "National Diabetes Month"; to the Committee on the Judiciary.

By Mr. HATCH (for himself, Mr. KENNEDY, Mrs. HAWKINS, Mr. GRASSLEY, and Mr. HEINZ):

S.J. Res. 122. A joint resolution to designate the week of November 27, 1983, through December 3, 1983, as "National Home Care Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry:

S. Res. 165. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of H.R. 2733; to the Committee on the Budget.

S. Res. 166. An original resolution waiving sections 303(a) and 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1529; to the Committee on the Budget.

By Mr. PRESSLER:

S. Res. 167. A resolution expressing the sense of the Senate that the Federal Government take all necessary steps to promote travel to the United States by foreign visitors during the 1984 summer Olympics and the 1984 Louisiana World Exhibition, to inform such visitors of recreational and commercial opportunities throughout the United States, and to facilitate their entry into and travel within this country; to the Committee on Commerce, Science, and Transportation.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HUMPHREY:

S. 1523. A bill to direct the Secretary of the Army, acting through the Chief of Engineers, to construct a project for modification of Portsmouth Harbor and the Piscataqua River Basin in Maine and New Hampshire; to the Committee on Environment and Public Works.

PORTSMOUTH HARBOR IMPROVEMENTS

● Mr. HUMPHREY. Mr. President, I am today introducing legislation which would authorize construction funding for improvements to Portsmouth Harbor and the Piscataqua River Basin in Maine and New Hampshire. The Congress authorized a study of this project in 1970 and the New England Division of the Corps of Engineers recently recommended that it be undertaken. Their report proposes widening the existing channel in three locations in the vicinity of the Maine/New Hampshire Bridge and off the coast of the Portsmouth Naval Shipyard.

Portsmouth Harbor is unique. It is a Northeastern port that never freezes in the winter due to the swiftness of current flow. That current, which has been known to approach 7 knots, also provides a virtually maintenance-free harbor. On the other hand, however, the swiftness of the current makes navigation through the existing narrow, winding channels extremely difficult for larger vessels such as tankers.

The difficulty arises when a tanker enters the harbor channel, negotiates the turns, is cleared for passage under the Maine/New Hampshire Bridge, and either misses the precise angle for further passage or experiences loss of way due to the current. Such an event would cause the tanker to be forced to abort passage under the bridge. Similarly, a malfunction in the lift mechanism of the bridge could require a ship to abort. In Portsmouth Harbor, however, large tankers cannot abort because there is insufficient room for them to make a turn without the current sweeping the vessel into the bridge. We have been fortunate in avoiding such a tragedy, primarily because of the expertise and determination of our harbor pilots, but the risk is omnipresent.

The Maine/New Hampshire Bridge Authority has expressed serious concern to me over the rapidly diminishing safety margin in the harbor as modern economic demands require larger tankers to pass under the interstate bridge. The authority characterizes the current situation as "very critical." Alternate solutions, such as fenders placed on the bridge tower piers, have not been workable because of the technical piloting problems presented which increased the level of risk. The need to provide an adequate turning radius to protect the interstate bridge from serious damage and the harbor from a major oil spill is essential.

It should be noted that the endangered bridge also carries the rail line serving the Portsmouth Naval Shipyard. That line is used by the Navy to transport heavy nuclear submarine components and nuclear fuels into the shipyard. Pentagon officials have advised the bridge authority that rail access to the shipyard is imperative for military mobilization.

There is a further defense consideration. Portsmouth Harbor also supplies Pease Air Force Base, a major SAC facility, with the jet fuel necessary to its operations. The defense fuel supply center, manager of the Pease terminal, indicates that the current barge shipments could be switched to more efficient tankers if harbor improvements were made.

The estimated cost of this project is approximately $21 million. The cost/benefit ratio comports with administration guidelines. The project could be completed in 3 years with little or no residual maintenance costs. Because the citizens of northern New England rely upon Portsmouth Harbor for the bulk of their fuel deliveries, and because our continued economic vitality is dependent upon a harbor that can support modern shipping needs, I urge my colleagues' support of this measure.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1523

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Secretary of the Army, acting through the Chief of Engineers, shall construct, at an estimated Federal cost of $21,200,000 and in accordance with the plans and recommendations set forth in the draft report of the Division Engineer, dated January 1982, a project for modification of Portsmouth Harbor and the Piscataqua River Basin in Maine and New Hampshire. Such construction shall be carried out so as to provide for—

(1) widening from four hundred feet to five hundred and fifty feet, the channel in the vicinity of Goat Island for a length of approximately one thousand three hundred feet;

(2) widening the turning basin between Badger's Island and the Maine/New Hampshire Bridge from six hundred feet to one thousand feet; and

(3) widening, by 100 feet, the northern limit of the channel at the southern end of the turning basin described in paragraph (2).

(b) In carrying out such construction in accordance with such plans and recommendations contained in such report, the Secretary of the Army is authorized to make such modifications as he may deem advisable.●

By Mr. PELL:

S. 1524. A bill to suspend for 2 years the duty on parts of spindle motors suitable for computer memory disk drives; to the Committee on Finance.

SUSPENSION OF DUTY ON ELECTRIC MOTOR PARTS

Mr. PELL. Mr. President, I introduce legislation today which would temporarily suspend the duty on imported parts of small, electronic motors. Presently, the rate of electric motors is higher than the rate of duty on finished motors themselves. Thus, current tariff law encourages companies to manufacture motors abroad.

This bill represents the very specific limited purpose of correcting an anomaly in the structure of present tariffs. The amendment would allow American companies to hire American workers and to produce more American parts sales. To my knowledge, this bill is not burdensome to the U.S. Customs Department or any other company. The insignificant loss of customs revenues would be more than offset by more American jobs. For that reason, I urge all of my colleagues here in the Senate to join with me in passing this small but necessary piece of legislation.

By Mr. STAFFORD (for himself and Mr. HUMPHREY) (by request):

S. 1525. A bill to amend the Disaster Relief Act of 1974, and for other purposes; to the Committee on Environment and Public Works.

DISASTER RELIEF ACT AMENDMENTS OF 1983

● Mr. STAFFORD. Mr. President, I am introducing by request, the "Disaster Relief Act Amendments of 1983," and I ask for its appropriate referral. This bill would amend the Disaster Relief Act of 1974, which was the product of the Committee on Environment and Public Works.

I am informed that this bill is substantively similar to S. 2250, the "Disaster Relief Act Amendments of 1982," which, in the last Congress, was written and introduced by Senator FRANK MURKOWSKI, then-chairman of the Subcommittee on Regional and Community Development. Senator RANDOLPH, Senator BURDICK and I joined as cosponsors. That measure passed the Senate unanimously but was not acted upon by the House.

Mr. President, I ask that the bill be printed in the RECORD at the conclusion of remarks about the measure by myself and my colleague, Senator HUMPHREY. Following that, I ask that the letter of transmittal from the General Counsel of the Federal Emergency Management Agency be printed in the RECORD, together with the section-by-section anaylsis of the legislation.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1525

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Disaster Relief Act Amendments of 1983".

SEC. 2. The short title of the Disaster Relief Act of 1974 (Public Law 93-288) is hereby amended by deleting the words "Disaster Relief Act of 1974" and inserting in lieu thereof "Major Disaster Relief and Emergency Assistance Act".

SEC. 3. Section 102(1) of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5122(1)), is amended to read as follows:

"(1) 'Emergency' means any occasion or instance for which, in the determination of the President, Federal assistance is needed to supplement State and local efforts and capabilities to save lives and to protect property, public health and safety or to lessen or avert the threat of a catastrophe in any part of the United States."

SEC. 4. Title VIII of the Public Works and Economic Development Act of 1965, as amended (Public Law 89-136; 42 U.S.C. 3231-3236) is hereby repealed, and title V of the Disaster Relief Act of 1974, as amended (Public Law 93-288), is hereby amended to read as follows:

"TITLE V—FEDERAL EMERGENCY ASSISTANCE PROGRAMS

"PROCEDURES

"SEC. 501. (a) All requests for a determination by the President that an emergency exists shall be made by the Governor of the affected State. Such request shall be based upon the Governor's finding that the situation is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local governments and that Federal assistance is necessary. The Governor's request will furnish information describing State and local efforts and resources which have been or will be used to alleviate the emergency, and will define the type and extent of Federal aid required. As a part of this request, and as a prerequisite to emergency assistance under the Act, the Governor shall take appropriate action under State law and direct execution of the State's emergency plan. Based upon such Governor's request, the President may declare that an emergency exists.

(b) The President may exercise any authority vested in him by Section 502 and Section 503 of this Act with respect to an emergency when he determines that an emergency exists for which the primary responsibility for response rests with the United States because the emergency involves a subject area for which, under the Constitution or laws of the United States, the United States exercises exclusive or preeminent responsibility and authority. The President may determine that such an emergency exists only after consultation with the Governor of the affected State, if practicable. The President's determination, however, may be made without regard to the provisions of Section 501(a) of this Act.

"EMERGENCY ASSISTANCE

"SEC. 502. In any emergency, the President may—

"(a) provide assistance to save lives and protect property and public health and safety, or to lessen or avert the threat of a catastrophe;

"(b) provide emergency assistance by directing Federal agencies to provide technical assistance and advisory personnel to the affected State and local governments in—

(1) the performance of essential community services; warning of further risks and hazards; public information and assistance in health and safety measures; technical advice on management and control; and reduction of immediate threats to public health and safety; and

(2) the distribution of medicine, food and other consumable supplies, or emergency assistance;

"(c) coordinate all Federal agencies and voluntary relief or disaster assistance organizations providing emergency assistance and coordinate emergency assistance with State and local officials.

"COOPERATION OF FEDERAL AGENCIES IN RENDERING EMERGENCY ASSISTANCE

"SEC. 503. (a) In any emergency, Federal agencies are hereby authorized, on the direction of the President, to provide assistance by—

(1) utilizing or lending, with or without compensation therefor, to States and local governments, their equipment, supplies facilities, personnel, and other resources, other than the extension of credit under the authority of any Act;

(2) distributing or rendering, through the American National Red Cross, the Salvation Army, the Mennonite Disaster Service, and other relief and disaster assistance organizations, or otherwise, medicine, food and other consumable supplies, or emergency assistance;

(3) donating or lending equipment and supplies including that determined in accordance with applicable laws to be surplus to the needs and responsibilities of the Federal Government, to State and local governments for use or distribution by them for the purposes of this Act; and

(4) performing on public or private lands or waters any emergency work or services essential to save lives and to protect and preserve property, public health and safety,

including but not limited to: search and rescue, emergency medical care, emergency mass care, emergency shelter, and provisions of food, water, medicine, and other essential needs, including movement of supplies or persons; construction of temporary bridges necessary to the performance of emergency tasks; and essential community services; provision of temporary facilities for schools and other essential community services; warning of further risks and hazards; public information and assistance on health and safety measures; technical advice to State and local governments on disaster management and control; reduction of immediate threats to life, property, and public health and safety; and making contributions to State or local governments for the purpose of carrying out the provision of this paragraph. Contributions for emergency work under this section and section 502 of this Act shall not exceed 100 per centum of the net eligible cost, or for small projects 100 per centum of the Federal estimate of the net eligible cost, of such emergency work or services performed by State and local governments, *Provided*, that where debris removal is appropriate under this title, it shall be provided in accordance with the terms and conditions of section 406 of this Act.

(b) Work performed under this section shall not preclude additional Federal assistance under any other section of this Act for the purposes of saving lives and protecting public health and safety, or to lessen or avert the threat of a catastrophe.

"LIMITATIONS ON EMERGENCY ASSISTANCE

"SEC. 504. (a) In any emergency the President shall not obligate funds appropriated to carry out this Act, other than for purposes of coordination and direction, or the provision of technical and advisory assistance, where Federal assistance is available and adequate under other Federal authorities.

"(b) In any emergency and except as provided by subsection (c) of this section, the costs of providing emergency assistance under this section shall not exceed $5,000,000 of funds appropriated to carry out this Act.

"(c) The limitation of subsection (b) of this section may be exceeded when the President determines that continued emergency assistance is immediately required; that there is a continuing and immediate risk to lives, property, public health or safety; and that necessary assistance will not otherwise be provided on a timely basis."

SEC. 5. Section 102(2) of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5122(2)), is amended to provide:

(2) "major disaster" means any natural catastrophe, including any hurricane, tornado, storm, high water, wind-driven water, tidal wave, tsunami, earthquake, volcanic eruption, landslide, mudslide, snowstorm, or drought, or any fire, flood or explosion regardless of cause, in any part of the United States which, in the determination of the President, causes damage of sufficient severity and magnitude to warrant major disaster assistance under this Act to supplement the efforts and available resources of States, local governments, and disaster relief organizations in alleviating the damage, loss, hardship, or suffering caused thereby.

SEC. 6. Title II of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5131-5132), is amended by:

(1) striking the words "(including the Defense Civil Preparedness Agency)" in section 201(a);

(2) adding the words "including evaluations of natural hazards and development of the programs and actions required to mitigate such hazards," between the words "plans", and "except" in section 201(d); and

(3) striking "$25,000" in section 201(d) and inserting in lieu thereof "$50,000".

SEC. 7. Title III of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5141-5158), is amended by:

(1) deleting sections 301, 305, and 306 and renumbering subsequent sections appropriately;

(2) deleting the caption "FEDERAL ASSISTANCE" of section 302 and inserting in lieu thereof "RULES AND REGULATIONS";

(3) deleting the first and second sentences of subsection (a) of section 302 and amending the final sentence thereof by adding ", with or without reimbursement," immediately before "through"; and

(4) deleting ", or economic status" in the second sentence of section 311(a), and adding "or" before "age,".

SEC. 8. Section 303(a) of the Disaster Relief Act of 1974, as amended, (42 U.S.C. 5143(a)), is amended by adding at the end thereof the following: "The Federal coordinating officer shall represent the President in coordinating the emergency or the major disaster response and recovery effort.".

SEC. 9. Section 314 of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5154), is amended by redesignating subsections (a), (b), and (c) as (b), (c), and (d), respectively, and by adding at the beginning thereof a new subsection as follows:

"(a) As a condition of assistance, any public facility and any private nonprofit facility which is:

"(1) located in a special flood hazard area as identified by the Director pursuant to the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4001 *et seq.*):

"(2) damaged or destroyed by flooding; and

"(3) otherwise eligible for assistance under section 405 of this Act, must be covered, on the date of the flood damage, by reasonable and adequate flood insurance. Assistance under section 405 for any such facility not so covered shall be reduced by the maximum amount of benefits which could have been received had reasonable and adequate flood insurance been in force; *Provided*, however, that this reduction of assistance shall not apply to uninsured facilities where such communities have been identified for less than one year as having special flood hazard areas. The limitations of assistance required by this subsection shall not apply until final regulations are promulgated by the President. Such regulations shall define reasonable and adequate flood insurance."

SEC. 10. Section 315 of the Disaster Relief Act of 1974, as amended (42 U.S.C 5155), is amended to read as follows:

"DUPLICATION OF BENEFITS

"312. (a) Agencies or other organizations providing Federal assistance following a major disaster or emergency shall assure that no person, business concern or other entity receives any Federal assistance as a result of a major disaster or emergency if such person, business concern or entity receives or is entitled to receive benefits for the same purposes from insurance or any other source, *Provided*, that nothing in this section shall prohibit the provision of Federal assistance to a person, business concern or other entity who is or may be entitled to receive benefits for the same purposes from insurance or any other source when any such applicant for Federal assistance has not received such other benefits by the time of application for Federal assistance, so long as the applicant for Federal assistance agrees as a condition of receipt of Federal assistance to repay duplicative assistance from insurance or any other source to the agency or other organization providing the Federal assistance. The President shall establish such procedure as are deemed necessary to insure uniformity in preventing such duplication of benefits. Receipt of partial benefits for a loss or need does not preclude provision of additional assistance.

"(b) A person, business concern or other entity receiving Federal assistance following a major disaster or emergency shall be liable to the United States to the extent that such Federal assistance has duplicated benefits available to the person, business concern or other entity for the same purpose from insurance or any other sources. The agency or other organization which provided the duplicative assistance shall collect such duplicative assistance from the recipient in accordance with the Claims Collection Act of 1966, as amended. The repayment shall not exceed the amount of Federal assistance received."

"(c) Federal disaster assistance and comparable disaster assistance provided by States, local governments, and disaster assistance organizations to individuals and families shall not be considered as income or a resource when determining eligibility or benefit levels for federally funded income assistance or resource tested benefit programs.".

SEC. 11. (a) Title III of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5141-5158), is amended by adding at the end thereof four new sections as follows:

"PROTECTION OF ENVIRONMENT

"SEC. 315. No action taken or assistance provided pursuant to section 402, 403, 406, 502, or 503 of this Act, or any assistance provided pursuant to section 405 of this Act that has the effect of restoring facilities substantially as they existed prior to the disaster, shall be deemed a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (83 Stat. 852). Nothing in this section shall alter or affect the applicability of the National Environmental Policy Act of 1969 (83 Stat. 852) to other Federal actions taken under this Act or under any other provisions of law.

"RECOVERY OF FUNDS

"SEC. 316. The Attorney General of the United States is authorized to institute actions in the United States District Court for the district in which an emergency or major disaster occurred, or in such district as otherwise provided by law, against any party whose acts or omissions may in any way have caused or contributed to the damage or hardship for which Federal assistance is provided pursuant to this Act. Upon the showing that an emergency or major disaster or the associated damage or hardship was caused in whole or in part by an act or omission of such party, then such party shall be liable to the United States for the full amount of Federal expenditures made to alleviate the suffering or damage attributable to such act or omission. The autority of this section shall also apply to the recovery of Federal funds expended under the

authority of section 419 of this Act for fire suppression.

"AUDITS AND INVESTIGATIONS

"SEC. 317. (a) The President, when deemed necessary to assure compliance with any provision of this Act or related regulations, shall conduct audits and investigations and in connection therewith may enter such places and inspect such records and accounts and question such persons as deemed necessary to determine the facts relative thereto.

"(b) The President, when deemed necessary to assure compliance with any provision of this Act or related regulations, may require audits by State and local governments in connection with assistance provided under the Act.

"(c) The President and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access, for purposes of investigation, audit, and examination, to any books, documents, papers, and records of any person or entity relating to any activity or program undertaken or funded pursuant to this Act.

"CRIMINAL AND CIVIL PENALTIES

"SEC. 318. (a) Any person, organization, or other entity who knowingly makes a false statement or representation of a material fact, or who knowingly fails to disclose a material fact, in any application or other document in connection with a request for assistance under this Act, or who knowingly falsifies or withholds, conceals, or destroys any documents, books, records, reports, or statements upon which such request for assistance is based, shall be fined not more than $10,000 or imprisoned for not more than one year, or both, for each violation.

"(b) Any person, organization, or other entity who knowingly makes a false statement or representation of a material fact, or who knowingly fails to disclose a material fact, in any bill, invoice, claim, or other document requesting reimbursement for work or services performed in connection with assistance provided under this Act, or who knowingly falsifies or withholds, conceals, or destroys any documents, books, records, reports, or statements upon which such request for reimbursement is based, shall be fined not more than $10,000 or imprisoned for not more than one year, or both, for each violation.

"(c) Any person, organization or other entity who knowingly misapplies the proceeds of a loan or other cash benefit obtained under any section of this Act shall be subject to a fine in an amount equal to one and one-half times the misapplied amount of the loan or cash benefit.

"(d) Whenever it appears that any person, organization or other entity has violated or is about to violate any provision of this Act, including rules and regulations issued and civil penalties imposed, the Attorney General may bring a civil action for such relief as may be appropriate. Such action may be brought in the district court of the United States having jurisdiction where the violation occurred or, at the option of the parties, in the United States District Court for the District of Columbia.

"(e) The President, or the duly authorized representative of the President, shall expeditiously refer to the Attorney General of the United States for appropriate action such evidence developed in the performance of functions under this Act as may be found to warrant consideration for criminal prosecution under the provisions of this Act or other Federal law.".

(b) Title III of the Disaster Relief Act of 1974, as amended, is amended by deleting subsections (a) and (c) of section 317 (42 U.S.C. 5157), and by renumbering "(b)" from the remaining subsection of section 317 as subsection "(f)" of amended section 318.

(c) Title IV of the Disaster Relief Act of 1974, as amended, is amended by deleting section 405 (42 U.S.C. 5175) and by renumbering subsequent sections appropriately.

SEC. 12. Title IV of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5171-5189), is amended by adding three new sections as follows and by renumbering subsequent sections appropriately:

PROCEDURES

"SEC. 401. (a) All requests for a declaration by the President that a major disaster exists shall be made by the Governor of the affected State. Such Governor's request shall be based upon a finding that the disaster is of such severity and magnitude that effective response is beyond the capabilities of the State and the affected local governments and that Federal assistance is necessary. As a part of this request, and as a prerequisite to major disaster assistance under the act, the Governor shall take appropriate action under State law and direct execution of the State's emergency plan. He shall furnish information on the extent and nature of State resources which have been or will be used to alleviate the conditions of the disaster, and shall certify that for the current disaster, State and local government obligations and expenditures (of which State commitments must be a significant proportion) will constitute the expenditure of a reasonable amount of the funds of such State and local governments for alleviating the damage, loss, hardship, or suffering resulting from such disaster, including, but not limited to, the cost-sharing provisions pursuant to sections 405, 406, 407, and 410 of this Act. Based upon such Governor's request, the President may declare that a major disaster exists.

"(b) In any case where an eligible applicant (or the State) is unable to assume its financial responsibility under the cost-sharing provisions of sections 405, 406, and 407 of this Act, the President is authorized to lend or advance to the State such 25 per centum share. For the purposes of section 405, such loan or advance shall be authorized only after the occurrence of concurrent, multiple major disasters in a given jurisdiction, or the extraordinary costs of a particular major disaster, and when the damages caused by such major disasters are so overwhelming and severe that it is not possible for the applicant or the State to assume their financial responsibility under this Act immediately. Any such loan or advance is to be repaid to the United States; there shall be no deferral of the repayment of loans or advances authorized by this subsection or of accrued interest. Such obligations shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the current market yields on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the reimbursement period of the loan or advance. The President shall issue regulations describing the terms and conditions under which any loans or advances authorized by this section may be made.

"MAJOR DISASTER ASSISTANCE

"SEC. 402. In any major disaster, the President may—

"(a) provide assistance to save lives and protect property and public health and safety, or to lessen or avert the threat of a catastrophe;

"(b) provide assistance by directing Federal agencies to provide technical assistance and advisory personnel to the affected State to assist the State and local governments in—

(1) the performance of essential community services; warning of further risks and hazards; public information and assistance in health and safety measures; technical advice on management and control; and reduction of immediate threats to public health and safety;

(2) the distributions of medicine, food, and other consumable supplies, or emergency assistance;

"(c) coordinate all Federal agencies and voluntary relief or disaster assistance organizations providing major disaster assistance, and coordinate major disaster assistance with State and local officials;

"(d) provide such other assistance under this Act as the President deems appropriate.

"COOPERATION OF FEDERAL AGENCIES IN RENDERING DISASTER ASSISTANCE

"SEC. 403. (a) In any major disaster, Federal agencies are hereby authorized, on the direction of the President, to provide assistance by—

"(1) utilizing or lending, with or without compensation therefor, to States and local governments, their equipment, supplies, facilities, personnel, and other resources, other than the extension of credit under the authority of any Act;

"(2) distributing or rendering, through the American National Red Cross, the Salvation Army, the Mennonite Disaster Service, and other relief and disaster assistance organizations, or otherwise, medicine, food, and other consumable supplies, or emergency assistance;

"(3) donating or lending equipment and supplies, including that determined in accordance with applicable laws to be surplus to the needs and responsibilities of the Federal Government, to State and local governments for use or distribution by them for the purposes of this Act; and

"(4) performing on public or private lands or waters any emergency work or services essential to save lives and to protect and preserve property, public health and safety, including but not limited to: search and rescue, emergency medical care, emergency mass care, emergency shelter, and provisions of food, water, medicine, and other essential needs, including movement of supplies or persons; construction of temporary bridges necessary to the performance of emergency tasks and essential community services; provision of temporary facilities for schools and other essential community services; warning of further risks and hazards; public information and assistance on health and safety measures; technical advice to State and local governments on disaster management and control; reduction of immediate threats to life, property, and public health and safety; and making contributions to State or local governments for the purpose of carrying out the provisions of this paragraph. Such contributions for emergency work under this section and section 402 of this Act shall not exceed 100 per centum of the net eligible cost, or for small projects 100 per centum of the Federal estimate of the net eligible cost, of such emergency work or services performed by State and local governments, *Provided*, that where

debris removal assistance is appropriate under this section or section 402 of this Act it shall be provided in accordance with the terms and conditions of section 406 of this Act."

"(b) Work performed under this section shall not preclude additional Federal assistance under any other section of this Act.

SEC. 13. (a) Section 402 of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5172), is amended to read as follows:

"(a) The President is authorized to make contributions to State or local governments, to help repair, restore, reconstruct, or replace public facilities belonging to such State or local government which were damaged or destroyed by a major disaster. Notwithstanding any other provision of law, such contributions shall be limited to 75 per centum of the net eligible cost, or for small projects 75 per centum of the Federal estimate of the net eligible cost, of repairing, restoring, reconstructing, or replacing any such facility estimated on the basis of the design of such facility as it existed immediately prior to such major disaster and in conformity with current applicable codes, specifications, and standards. For the purposes of this section, 'public facility' includes any publicly owned flood control, navigation, irrigation, reclamation, public power, sewage treatment and collection, water supply and distribution, watershed development, or airport facility, any non-Federal-aid street, road, or highway, any other public building, structure, or system including those used for educational or recreational purposes, and any park.

"(b) The President is authorized to make contributions to help repair, restore, reconstruct, or replace eligible private nonprofit facilities which were damaged or destroyed by a major disaster. Notwithstanding any other provision of law, such contributions shall be limited to 75 per centum of the net eligible cost, or for small projects 75 per centum of the Federal estimate of the net eligible cost, of repairing, restoring, reconstructing, or replacing any such facility estimated on the basis of the design of such facility as it existed immediately prior to such major disaster and in conformity with current applicable codes, specifications, and standards. For the purposes of this section, 'eligible private nonprofit facility' means private nonprofit educational, utility, emergency, medical, and custodial care facilities, including those for the aged and disabled, and such private nonprofit facilities on Indian reservations, which were damaged or destroyed by a major disaster.

"(c) No authority under this section shall be exercised unless the affected State, local government, or eligible private nonprofit organization first agrees that such facility shall be repaired, restored, reconstructed, or replaced in compliance with floodplain management and hazard mitigation criteria required by the President, with the provisions of the Coastal Barrier Resources Act and other applicable Federal statutes, and in conformity with other applicable codes, specifications and standards, except as otherwise provided in section 315 of this Act.

"(d) For those facilities eligible under this section which were in the process of construction when damaged or destroyed by a major disaster, the contribution shall be based on 75 per centum of the net eligible costs of restoring such facilities substantially to their predisaster condition, *Provided*, That the term 'net eligible costs' shall not include costs which, under a contract, are the responsibility of a contractor".

(b) The Disaster Relief Act of 1974, as amended, is amended by deleting section 419 (42 U.S.C. 5189) and by striking "or 419" each place that this phrase appears in section 314 (42 U.S.C. 5154).

(c) Section 403 of the Disaster Relief Act of 1974, as amended (42U.S.C. 5173), is amended by adding at the end thereof the following:

"(c) Notwithstanding any other provision of law, whether carried out directly through Federal departments, agencies, or instrumentalities or through grants to State or local governments, Federal assistance provided under authority of this section shall not exceed 75 per centum of the net eligible costs, or for small projects 75 per centum of the Federal estimate of the net eligible costs, of debris removal.".

SEC. 14. Section 404(a) of the Disaster Relief Act of 1974 is amended to read as follows:

"(a)(1) The President is authorized to provide, either by purchase or lease, temporary housing, including, but not limited to, unoccupied habitable dwellings, suitable rental housing, mobile homes, or other readily fabricated dwellings for those who, as a result of a major disaster, require temporary housing. Temporary housing assistance shall be provided only when adequate alternate housing is unavailable, unless there is a compelling need to do so because of severe hardship. The assistance to be provided shall be determined by the President based on the fair market value of the accommodations being furnished, adjusted to take into consideration the financial ability of the occupant. Any mobile home or other readily fabricated dwelling shall be placed on a site complete with utilities provided either by the State or local government, or by the owner of the site who was displaced by the major disaster. When the President determines such action to be in the public interest, he may authorize installation of essential utilities at Federal expense and he may elect to provide other more economical or accessible sites. However, in the event the President authorizes the development of a group site, i.e., a site for two or more households, the Federal share shall be limited to 75 per centum of the development costs, and the remainder shall be met by funds provided by the State.

"(2) The President is authorized to make contributions not to exceed 100 per centum (or 75 per centum with respect to group site development) of the costs to a State for the purpose of providing temporary housing assistance to those who require it as a result of a major disaster. Whenever he determines it to be in the public interest, the President is authorized to provide temporary housing assistance by using Federal departments, agencies, or instrumentalities. The Federal financial and operational responsibilities for temporary housing assistance shall not exceed 18 months from the date of a major disaster declaration by the President unless he determines that due to extraordinary circumstances it would be in the public interest to extend the 18-month period.".

SEC. 15. Section 406 of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5176), is amended by adding "(a)" after "406." and by adding a new subsection "(b)" as follows:

"(b) The President is authorized to contribute up to 50 per centum of the cost of implementing hazard mitigation projects which he has determined would be cost-effective and would substantially reduce the risk of future damage, hardship, loss or suffering in the area affected by a major disaster. Such projects shall be identified following the evaluation of natural hazards provided for in subsection (a) of this section and shall be subject to approval by the President. The total of the contributions made under this subsection shall not exceed 2.5 per centum of the Federal estimate of grants made under the authority of section 405 of this Act for each major disaster."

SEC. 16. (a) Section 407(a) of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5177), is amended by striking the first and second sentences thereof and inserting in lieu thereof the following: "The President is authorized to privide unemployment assistance to individuals who are unemployed as a result of a major disaster and who are not otherwise eligible for payment of unemployment compensation or waiting weekly credit under the authority of any other Federal or State Act. Such disaster unemployment assistance shall not be payable with respect to any week which begins more than 26 weeks after the first week in which the major disaster occurred.".

(b) Section 407(a) of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5177), is further amended by striking the words "of unemployment compensation or" in the third sentence thereof.

SEC. 17. (a) Section 408(b) of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5178), is amended by adding a period after the word "share" in the second sentence of that subsection and by deleting the following phrase from the second sentence of section 408(b): "and any such advance is to be repaid to the United States when such State is able to do so."

(b) Section 408(b) of the Disaster Relief Act of 1974, as amended, is further amended by adding the following sentences between the second and third sentences of the subsection: "Such advances shall bear interest from the date of the advance at a rate determined by the Secretary of the Treasury taking into consideration the current market yields on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the reimbursement period of the loan or advance. Repayment of such advances and of interest which accrues on the advances may be deferred for no longer than two years from the date of the major disaster declaration."

SEC. 18. Section 408(d) of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5178), is amended by adding at the end thereof the following new sentence: "Whenever a State demonstrates efficiency by promptly completing all grants to eligible individuals and families within the period prescribed by the President, the State may be reimbursed for 50 per centum of those administrative expenses which exceed 3 per centum of the Federal grant made under subsection (a) of this section.".

SEC. 19. Section 418(d) of the Disaster Relief Act of 1974 (42 U.S.C. 5188), is deleted.

SEC. 20. Section 606 of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5202), is amended to read as follows: "There are authorized to be appropriated to the President such sums as may be necessary to carry out this Act through the close of September 30, 1986, and to the Federal Emergency Management Agency such sums as may be necessary through the close of September 30, 1986, for administrative expenses."

SEC. 21. The Disaster Relief Act of 1974 (Public Law 93-288), as amended, is amended by:

(1) striking paragraph (7) of section 101(b) (42 U.S.C. 5121), striking "; and" from paragraph (6) and adding in lieu thereof a period, and adding "and" at the end of paragraph (5);

(2) striking "the Canal Zone," in paragraphs (3) and (4) of section 102 (42 U.S.C. 5122);

(3) striking "DISASTER" in the caption of title III (42 U.S.C. 5141-5158) and inserting in lieu thereof "MAJOR DISASTER RELIEF AND EMERGENCY";

(4) striking "section 402 or 404 of" in section 311(b) (42 U.S.C. 5151);

(5) adding "emergency or" before the word "major" each of two places that word appears in section 310 (42 U.S.C. 5150);

(6) striking in section 313(b) (42 U.S.C. 5153) everything after the word "areas" and inserting in lieu thereof a period;

(7) striking "or section 803 of the Public Works and Economic Development Act of 1965," each place the phrase appears in section 314 (42 U.S.C. 5154);

(8) striking "402" each place that number appears in section 314 (42 U.S.C. 5154) and inserting in lieu thereof "405";

(9) adding "emergency and major" before the word "disaster" in section 316 (42 U.S.C. 5156);

(10) adding the word "MAJOR" between the words "FEDERAL" and "DISASTER" in the caption to title IV (42 U.S.C. 5171-5189);

(11) striking "in emergencies or in major disasters" in the third sentence of paragraphs (2) of section 404(d) (42 U.S.C. 5174);

(12) striking "311" in section 404(d)(2) (42 U.S.C. 5174) and inserting in lieu thereof "308";

(13) striking "an emergency or" in section 415 (42 U.S.C. 5185) and inserting in lieu thereof "a";

(14) striking "408" in section 605 (42 U.S.C. 5121) and inserting in lieu thereof "410";

(15) striking "301" in subtitle C of title I of the State and Local Fiscal Association Act of 1972 (Public Law 92-512; 86 Stat. 919) and inserting in lieu thereof "401";

(16) striking "President" each place that word appears is section 312(a) and inserting in lieu thereof "Federal coordinating officer".

(17) striking "rent" in section 313(a)(2) (42 U.S.C. 5153) and inserting in lieu thereof "income"; and

(18) striking paragraph (1) of section 313(a) (42 U.S.C. 5153) and renumbering subsequent paragraphs appropriately.

SEC. 22. (a) Section 6(a)(6)(E) of the Coastal Barrier Resources Act, 16 U.S.C. 3505(a)(6)(E), is amended by striking out "pursuant to sections 305 and 306 of the Disaster Relief Act of 1974" and inserting in lieu thereof "pursuant to sections 402, 403, 502 and 503 of the Major Disaster Relief and Emergency Assistance Act."

(b) Whenever any reference is made in any provision of law (other than this Act), regulation, rule, record, or document of the United States to provisions of the Disaster Relief Act of 1974 repealed by this Act or renumbered by this Act, such reference shall be deemed to be a reference to the appropriate provisions of the Major Disaster Relief and Emergency Assistance Act.

SEC. 23. This Act shall be effective ninety days after enactment, except it shall not affect the administration of any assistance provided under authority of the Disaster Relief Act of 1974, as amended, for any major disaster or emergency declared by the President prior to the effective date, *Provided*, that regulations issued under statutory provisions which are repealed, modified, or amended by this Act shall continue in effect as though issued under the authority of this Act until they are expressly abrogated, modified or amended by the President. Provision of disaster assistance authorized by statutory provisions repealed, modified or amended by this Act or regulations issued thereunder, or proceedings involving violations of statutory provisions repealed, modified or amended by this Act or regulations issued thereunder which are in process prior to the effective date of this Act, may be continued to conclusion as though the applicable statutory provisions had not been repealed, modified or amended. Violations of statutory provisions or regulations issued under the authority of statutory provisions repealed, modified or amended by this Act or regulations issued thereunder which are committed prior to the effective date of this Act may be proceeded against under the law in effect at the time of the specific violation.

FEDERAL EMERGENCY MANAGEMENT AGENCY,
Washington, D.C., June 10, 1983.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed is a draft entitled "Disaster Relief Act Amendments of 1983." This is a comprehensive set of proposed amendments to the Disaster Relief Act of 1974 (Public Law 93-288, as amended). Also enclosed is a section-by-section analysis of the bill.

The current legislation has functioned well for nine years. However, we believe that there are a number of adjustments which are now needed. The major provisions of the proposed legislation are summarized below, with the proposed bill at Tab A and the section-by-section analysis at Tab B.

1. New definition of "major disaster" and "emergency."

In recent years there has been considerable concern by Members of Congress about the correct interpretation of the Act and its applicability to non-natural disasters or emergencies. The combined effect of the changes to the definition of "major disaster" and "emergency," and the addition of the new Title V, Federal Emergency Assistance Programs, would be to establish separate statutory authority for providing supplemental Federal assistance in two distinct types of situations.

"Major disaster" responses would entail those activities currently authorized under Public Law 93-288 in response to any naturally caused disaster and any fire, explosion or flood. A "major disaster" declaration by the President would authorize a broad range of authorities and programs to supplement State and local efforts and resources in natural disaster (and floods, fires, and explosions of natural, non-natural and undetermined causes).

The new definition of "emergency" would allow the Federal Emergency Management Agency (FEMA), in coordination with other Federal agencies, to respond to a much broader range of catastrophes where Federal emergency supplemental assistance is required. The new Title V would authorize the Federal Government to provide limited assistance to save lives and protect property, public health and safety, or to lessen or avert the threat of a catastrophe regardless of the cause, including natural and non-natural events. FEMA would be limited to emergency and technical assistance, with an initial cap of $5 million for each event.

The new Title V also provides extraordinary authority in situations where there is a requirement for direct Federal action. These may be circumstances threatening life and property where the United States exercises exclusive or pre-eminent responsibility and authority under the Constitution or the laws of the United States. In such cases, following an emergency declaration by the President, the Federal Government would be able to take necessary measures to save lives and protect property but with the same limitation as in any other "emergency."

2. Increased Disaster Preparedness Improvement Grant (DPIG).

The proposed legislation provides for doubling—from $25,000 to $50,000—the funds available annually on a matching basis with the States, for maintaining and improving disaster plans and procedures. This change would reflect the need for States to plan adequately for increased State and local funding and operational involvement in disaster response and recovery. Since the enactment of this section in the 1974 Act, inflation alone provides a basis for increasing the matching share to $50,000.

3. 75/25 cost sharing for public assistance.

Section 13 of the proposed bill establishes in the statute the requirement that, in Presidentially-declared major disasters, State and local governments share the cost of debris removal and permanent restorative work on a 75% Federal, 25% State and local basis. This assures the supplemental nature of Federal aid under the public assistance authorities of the Disaster Relief Act. The cost-sharing formula established by section 13 would be modified by section 12, which authorizes loans or advances of the 25 per centum State and local share when a State and affected local governments are unable to provide their 25 per centum share immediately. Emergency work, as well as technical assistance, would be funded at 100%.

While ensuring a reasonable commitment of State and local efforts and resources, the cost sharing approach also results in prudent disaster project management with regard to the extent and nature of work selected and design criteria.

The 75/25 cost sharing approach for public assistance has been established in the Federal/State Agreement for major disasters since May 1980. This cost sharing requirement currently is stated in the language of the President's declaration of a major disaster."

4. Expanded public assistance small project grant.

Section 13 also expands current Section 419 (P.L. 93-288) authority relating to small project grants. The proposed change would speed cash flow to State and local applicants for eligible and approved work, and reduce administrative costs and delays. The section currently permits FEMA to make full grant payments based on the estimated cost of repairing disaster damage to public facilities. The current limitation on the applicability of Section 419 is $25,000 for the cumulative estimated costs for all projects belonging to a particular applicant. Under the proposed legislation, this limitation would be changed to $25,000 for each individual project.

FEMA anticipates that approximately 90% of all projects processed, representing

less than 10% of all funds expended, could be included under the new small project grant mechanism.

5. Flood insurance for local government applicants.

The proposed bill provides that, to the extent that a local public assistance applicant could reasonably have been expected to obtain flood insurance coverage, it would be denied funding for restoration of insurable structures. Federal help would continue to be available in designated disaster areas for emergency work, debris clearance, and repair or restoration of facilities such as roads, bridges, sewer and water systems and other such facilities.

6. Temporary Housing Assistance.

The proposed legislation would eliminate the automatic one-year, rent-free period, permit the States to perform the temporary housing program (if they are willing and capable) at Federal expense, limit Federal involvement to 18 months except in unusual circumstances, and provide for 75/25 cost sharing in establishing group mobile home sites.

These changes are proposed on the basis of FEMA's considerable experience in administration of temporary housing assistance. The purpose for eliminating the rent-free period is to impose the reasonable requirement that individuals and families needing temporary housing continue to pay at least what they were paying for housing prior to the disaster.

7. Increased reimbursement for Individual and Family Grants (IFG) administrative costs.

The IFG authority of the current disaster legislation requires State administration of such programs. Under the proposed legislation, States which administer IFG programs efficiently will receive reimbursement for 50 per centum of their administrative costs above the currently-authorized 3 per centum reimbursement level.

8. Disaster Unemployment Assistance (DUA).

The principal changes in the proposed legislation involve eliminating eligibility for DUA assistance where individuals are otherwise eligible for Unemployment Insurance Assistance, and limiting the duration of assistance to 26 weeks.

9. Funding hazard mitigation measures.

Section 15 of the proposed bill would allow the Federal Government to contribute to the cost of performing hazard mitigation measures in designated disaster areas. Such projects would be identified in the hazard mitigation plans developed by the State under the authority of Section 406 of the current Act. The plan would rank the most important and potentially cost-effective hazard mitigation projects. The total of contributions made under this authority would be limited to 2.5% of the Federal estimate of grants for permanent restorative work in that particular major disaster. Any Federal funds contributed under this section would have to be matched on a 50-50 basis.

10. Recovery of Funds.

The bill would authorize the Attorney General to bring suit to recover Federal funds spent in assisting State and local governments to recover from disasters where there is evidence that some party was responsible for causing or aggravating disaster damage.

The Office of Management and Budget has advised that there is no objection from the standpoint of the Administration's program to the presentation of this legislative proposal to the Congress and that its adoption would be in accord with the program of the President.

Sincerely,

GEORGE W. JETT,
General Counsel.

[Section-by-Section Analysis]

DISASTER RELIEF ACT AMENDMENTS OF 1983

SECTION 1

The short title of the bill is "Disaster Relief Act Amendments of 1983".

SECTION 2

Section 2 changes the title of the Act from the "Disaster Relief Act of 1974" to the "Major Disaster Relief and Emergency Assistance Act." This change reflects the significant amendments to the Act made by this bill whereby two distinct, identifiable and separate programs of assistance are established: (1) programs of response and recovery following disasters (primarily of "natural" origin) are consolidated in title IV and (2) programs of response to save lives and protect public health and property in emergencies are established in a newly written title V. Administration of responses to both major disasters and emergencies is provided for in title III.

SECTION 3

Section 3(a) redefines "emergency" to mean any occasion or instance in which, in the determination of the President, Federal assistance is needed to supplement State and local efforts and capabilities to save lives and to protect property, public health and safety or to lessen or avert the threat of a catastrophe in any part of the United States. That Federal assistance is supplemental to the efforts and resources of State and local governments is a central principle in both the revised definition of "emergency" and in the new Title V, "Federal Emergency Assistance Programs."

After enactment of the Disaster Relief Act Amendments of 1983, Executive Order 12148 will be revised to clarify the delegations of authority from the President commensurate with the provisions of the legislation. The revisions to the Executive Order will define the action to be taken by FEMA under this Act and will identify the requirements for coordinating emergency planning and response activities with other Federal agencies for any of their facilities where emergency planning may be required.

SECTION 4

Title V of the Disaster Relief Act of 1974 added a new Title VIII to the Public Works and Economic Development Act of 1965. Sec. 4 would repeal Title VIII of that Act and amend Title V of the Disaster Relief Act of 1974 to add a new title, "Federal Emergency Assistance Programs." The new Title V would provide an entirely separate set of authorities for use in a Presidentially-declared "emergency." Authorities available for use in a "major disaster" would be found exclusively in amended Title IV. While Title IV includes provisions for both emergency work and permanent restorative work, the authorities of Title V pertain exclusively to emergency work, i.e., assistance to save lives and protect property, public health and safety and to lessen or avert the threat of a catastrophe. New Title V must be read in conjunction with the entirely new definition of "emergency" made by sec. 3(a). An "emergency" declaration under Sec. 501(a) would be made by the President on the request of the Governor. The Governor's request would have to be supported by information similar to that currently required for "major disaster" requests. Following a declaration, the President (and by delegation, FEMA) could use the authorities of sec. 502 to respond to the emergency situation. In addition, under the authority of sec. 503 the President (and by delegation, FEMA) could coordinate the provision of emergency assistance among a variety of Federal agencies and private organization. However, no funds appropriated to carry out the Act could be expended on such emergency assistance (except for direction, coordination and technical and advisory assistance under new title V) where Federal assistance is available and adequate under other Federal authorities. If this emergency assistance is inadequate, funding would still be limited to $5 million per emergency, except in accordance with subsection 504(c). Subsection 504(c) would provide that the President may determine that additional emergency assistance is required. If such a determination were made, the President (FEMA) would be able to continue to provide needed emergency assistance.

The language of new sec. 501(a) is largely drawn from current sec. 301(a) which relates to the declaration process for an "emergency" (current definition). Extra requirements were modeled on current sec. 301(b) dealing with the declaration process for a "major disaster." The central principle of Federal disaster assistance, that it be supplemental to the efforts and resources of State and local governments, remains in both the revised definition of "emergency" and new sec. 501. New sec. 502 is basically adapted from current sec. 305, and new sec. 503 is adapted from current sec. 306.

Section 501(b) would add a modified emergency declaration procedure for a special type of emergency. On rare occassions, there are threatening situations where the Federal Government has unique responsibilities. In such situations, sec. 501(b) would permit the President to act without the request from a Governor. After consultation with the Governor of the affected State, if such consultation is practicable given the emergency circumstances, the President may declare an "emergency" to exist on his own initiative. As a result, the Federal Government will be able to provide assistance to save lives and protect property, but with the same limitations as any other "emergency".

The situations where the President may need this extraordinary authority are defined by sec. 501(b) to be those where the United States has primary responsibility for addressing threats to life and property. These would be circumstances involving subject areas for which the United States exercises exclusive or pre-eminent responsibility and authority under the Constitution or the laws of the United States. The nature of these various situations indicate the requirement for a modified declaration procedure. The President may not be able to wait for a Governor's decisions to commit State resources and ultimately request Federal assistance. Furthermore, for practical or political reasons a Governor should not be forced to request assistance where the Federal, not the State, government has the primary responsibility for response. After the declaration, however, Federal assistance would be provided as in any other emergency. The United States would take necessary actions to assist State and local governments in coping with the immediate threats to life and property. The Federal response typically would be coordinated by FEMA and would rely on existing authorities and

agency missions to the maximum extent possible.

Section 504(a) states that no funds appropriated to carry out the Act can be expended on emergency assistance under this title where Federal assistance is available and adequate under other Federal authorities. For example, the Atomic Energy Act of 1954, as amended, 42 U.S.C. 2011 et seq., provides authority for the control of radioactive materials that may pose a hazard to the public. In a situation requiring the control of radioactive materials to prevent danger to the public health, the Departments of Energy and Defense would be responsible for the direct response to the release of radioactive materials pursuant to the Atomic Energy Act. On the other hand, if a situation created by the release of radioactive materials could not be remedied entirely based upon the authority of the Atomic Energy Act, then the President could respond under this Act to provide assistance which could not otherwise be provided under the Atomic Energy Act. In situations involving the release of radioactive materials, any actions taken by FEMA will be coordinated in advance with the Departments of Defense and Energy and/or the Nuclear Regulatory Commission, as appropriate, in accordance with procedures established in agreements among these agencies.

Overall, when read with the amended definition of "emergency", sec. 4 would authorize the President to respond to natural and non-natural civil emergencies where supplemental emergency assistance is required or where assistance is needed to lessen or avert the threat of a catastrophe. This authority would essentially permit the Federal Government to provide the most needed lifesaving and property-protecting assistance in a broad range of incidents. The Administration could then, in a more deliberate manner, determine whether to provide continuing assistance and, if so, identify the proper authority or authorities under which to provide it. For unusual types of civil emergencies for which adequate response authorities do not exist, the Administration and Congress would have more time to design and enact legislation specifically tailored to the new problem.

One form of emergency assistance "necessary to save lives, protect property, public health and safety" is temporary housing for those individuals and families who require it. Following a declaration of "emergency" by the President, FEMA would be authorized to provide temporary housing assistance in conformity with regulations and guidance applicable to major disaster temporary housing operations. This would allow the Agency to take advantage of an existing program, rather than merely implementing an ad hoc operation based on the general emergency assistance authority. By way of example, advantages of this would be to allow FEMA to donate mobile homes no longer required in an "emergency" temporary housing operation to States, local governments and families and to provide mortgage and rental assistance.

SECTION 5

Section 5 would amend sec. 102(2) of the Act by clarifying the definition of "major disaster." The Presidential declarations for the Cuban influx emergency and, to a lesser extent, the Love Canal emergencies have caused considerable concern on the part of Members of Congress about the correct interpretation of the Act and its applicability to non-natural catastrophes. Some Members of Congress have objected to the use of the variety of disaster assistance authorities, which have been developed over the years primarily to address natural disasters, to respond to non-natural events. The effect of the enactment of section 5 would be to clarify congressional intent about the type of incidents which the President may declare a "major disaster."

There would be a number of alternative mechanisms for restricting the definition of "major disaster." These would include the insertion of the words "natural or physical" in the definition; the express exclusion of "social or economic" events; and the express exclusion of particular non-natural events such as riots, toxic spills, influx of refugees, state and local budgetary deficiencies, etc. However, the amendment which would be made by section 5 would clarify Congressional intent with the greatest simplicity and clarity.

The amended definition of "major disaster" would permit the President to declare catastrophes which are expressly listed in the definition and, of those catastrophes not expressly identified, only those resulting from natural causes. Among the expressly listed incidents are floods, fires and explosions, which the President could declare without the necessity to determine whether the damage and hardship resulted from natural or non-natural causes. In other words, the President could declare, whether they resulted from natural, non-natural or undetermined causes, floods (e.g., Teton Dam failure), fires (e.g., Lynn and Chelsea, Massachusetts, fires), and explosions (e.g., Louisville sewer explosions).

A declaration of "major disaster" where only immediate emergency assistance is required would be permissible. The change which would be made by sec. 5(2) would confirm this authority. The President will be authorized to declare a "major disaster" for which only limited forms of assistance would be provided.

The combined effect of the changes to the definitions of "major disaster" and "emergency" and the addition of the new Title V would be to establish separate statutory authority for providing supplemental Federal assistance in two distinct types of situations. Title III would contain administrative provisions which would apply to both major disasters and emergencies. Title IV would authorize a broad range of authorities for the Federal Government to provide assistance to supplement the efforts and available resources of State and local governments in carrying out their responsibilities for relieving damage, loss, hardship and suffering in the aftermath of natural catastrophes (and floods, fires and explosions of natural, non-natural or undertermined causes). The new Title V would authorize the Federal Government to provide limited assistance, namely to save lives and protect property, public health and safety or to lessen or avert the threat of a catastrophe, to supplement the efforts and capabilities of State and local governments in coping with their responsibilities in a much broader range of incidents, including natural and non-natural events. Please note that it is the position of FEMA that the changes that would be made by sec. 5 to the definition of "major disaster" are viable only if enacted simultaneously with the new definition of "emergency".

SECTION 6

Section 6 would amend Title II of the Act to eliminate the reference to the Defense Civil Preparedness Agency (an agency whose functions have been transferred to FEMA); to require natural hazard evaluation and mitigation elements in State disaster plans when updated and improved with sec. 201(d) grants; and to increase the Federal matching grant authority from $25,000 to $50,000 for sec. 201(d) grants.

Of particular significance is the doubling of the section 201(d) Federal matching grant. This change would reflect the need for States to adequately plan for the increased State and local government funding and operational involvement in public assistance and temporary housing. Since the enactment of this section in the 1974 Act, inflation alone provides a basis for increasing the matching share to $50,000.

SECTION 7

Section 7 would delete sections 301, 305, 306 and the first two sentences of sec. 302(a), while retaining the authority to have work done by other Federal agencies with or without reimbursement. Section 7 would also change the title of section 302 (new section 301) and eliminate "economic status" from the nondiscrimination provision, sec. 311 (new sec. 308).

These changes reflect the reorganization of the Act. Most of the provisions of sections 301, 305, 306 and the first two sentences of 302 are merely transferred to other sections of the Act as it would be amended.

SECTION 8

Section 8 would amend sec. 303 (new sec. 302) by providing, by statute, for a Federal coordinating officer for an emergency as well as a major disaster, and by specifically identifying the Federal coordinating officer as the President's representative. By recognition of the status, function and accountability of the Federal coordinating officer, sec. 8 should facilitate his or her efficient administration of the Federal coordinating officers' responsibility.

SECTION 9

Section 9 would restrict disaster assistance grants under new section 405 of the Act where reasonably available, adequate, and necessary flood insurance could have compensated for disaster damage. This change would be accomplished by the addition of a new first subsection to section 314 (new 311).

The purpose of this amendment would be to encourage States, local governments and eligible private nonprofit organizations to exercise prudent judgment in obtaining flood insurance, typically through the National Flood Insurance Program, to protect their insurable property against foreseeable flood hazards. The amendment would also ensure that Federal assistance under the Act to such entities not exercising prudent judgment as to insurance be appropriately limited. The denial of assistance under subsection (a) for an applicant's failure to exercise prudent judgment in obtaining reasonable flood insurance prior to a major disaster would relate only to damage of property which can be insured under the National Flood Insurance Program and which is located in a special flood hazard area. In other words, an applicant which is penalized would not necessarily lose eligibility for all disaster assistance. The limitation would apply both to vulnerable property located within communities which are participating in the National Flood Insurance Program and property located in communities which not participating, but which have been mapped for at least a year. The effect of subsection 9, therefore, would be to eliminate public assistance grants to the extent the

communities and other grant applicants could have been reasonably expected to protect themselves against flood damage.

If the proposal is enacted and proves to be workable, FEMA could propose additional legislative changes in the future to deal with other types of insurance (e.g., wind, fire, earthquake), and other forms of assistance (e.g., Individual and Family Grants, temporary housing).

Without the change proposed by this section, State and local government applicants would continue to be required to purchase insurance only at the time of the disaster, i.e., after the damage is done. Inevitably, there is a temptation for disaster applicants not to pay their own way by purchasing reasonable flood insurance, relying instead on "free" Federal disaster assistance.

All the provisions of current sec. 314 would be retained, although certain conforming changes would be made. Applicants for assistance under new section 405 would still be required to obtain reasonably available, adequate and necessary insurance to protect against future damage.

SECTION 10

Section 10 would amend section 315 (new section 312) relating to preventing and remedying duplications of benefits in disaster relief. Subsection (a) would modify and expand the requirements of current section 315, subsections (a) and (b) to prevent duplications of benefits by Federal agencies. The new subsection would place the responsibility for preventative action directly on each agency or organization which provides or administers disaster assistance under its own authorities. FEMA would retain the responsibility for preventing duplications of benefits when disaster assistance is provided or performed under mission assignment by another agency or organization. The President (FEMA) would take action to ensure uniformity of procedures. New subsection (a) would also explicitly require prevention of duplications in emergencies as well as major disasters. The subsection would also seek to prevent an applicant from receiving Federal disaster assistance where insurance did, or should have, provided benefits for the same purpose.

A recent study performed by FEMA indicated that in some places, disaster assistance provided what should have been covered by an applicant's insurance. It appears that insurance companies are not paying claims in a timely manner, or that applicants are not filing claims for items which should have been covered. This new feature of subsection (a) would give FEMA and other disaster assistance agencies and organizations a strong new mandate to provide disaster assistance only when insurance proceeds to which a person is entitled have been considered and the need for supplemental assistance remains. In addition, new subsection (a) would permit grants of disaster assistance where it is clear that an applicant for such assistance who is, or may be eligible for relief from insurance or any other sources will not receive such other assistance until some later date. Under these circumstances disaster assistance may be delivered, but upon the condition that the recipient of the assistance agreed to repay subsequently-received duplicative benefits.

New subsection (b) would require Federal disaster assistance agencies and organizations administering Federal disaster programs to collect duplicative benefits when the preventive measures taken under subsection (a) fail. The requirement would apply to emergencies as well as major disasters and would remedy duplications between Federal programs and among Federal programs, insurance and other sources. Under current section 315, subsection (c), which new subsection (b) would replace, only the President (FEMA) is vested with authority to recover duplications, and only when the duplication involves funds provided under the Disaster Relief Act. The new subsection (b) would, for the first time, provide comprehensive authority requiring the recovery of duplications arising under all Federal disaster programs.

Subsection (c) would provide that Federal and other disaster assistance shall not be considered as income or resources in the context of federally-funded income assistance or resource tested benefit programs. This change would preclude the reduction in benefits to individuals and families in federally-supported income assistance or welfare benefits as a result of their receipt of disaster assistance.

Section 318 (a) and (b) are based on similar provisions in the Labor-Management Reporting and Disclosure Act and are similar to current section 317(a); new section 318(c) is based upon the current section 317(c); new section 318(d) establishes an enforcement mechanism to respond to violations of the Act or its implementing regulations; section 318(e) is based on a similar provision in the Inspector General Act; and section 318(f) is a renumbering of current section 317(b).

SECTION 11

Section 11 would renumber current sec. 405 as new sec. 315 and make conforming changes; would add a new authority authorizing the Attorney General to institute suits to recover disaster assistance expenditures which are the proper responsibility of another party; would add a new section 317 to give the President express authority to audit and investigate, to require audits by State and local governments and to examine financial records of any person or entity relating to disaster assistance; and would renumber as new section 318, and expand, current section 317.

New section 316 would clarify the Government's authority to bring actions against parties which cause or contribute to major disasters or emergencies. The section would give the Attorney General express authority to institute actions in United States District Courts to recover disaster assistance expenditures. The Supreme Court in footnote 16 to the opinion in *Wyandotte Transportation Co. et al.* v. *United States*, 389 U.S. 191 (1967), stated that the then current disaster relief legislation, 42 U.S.C. 1855–1855g (predecessor act to the Disaster Relief Act of 1974) contained no authority to sue for recovery of disaster relief expenditures. Section 316 would overcome opposition to an action instituted by the Attorney General based on the *Wyandotte* footnote. Jurisdiction in District Courts would be expressly provided by 28 U.S.C. 1345.

Section 316, however, adds no new legal responsibilities for potential defendants. Any action brought under this section must be based on separate legal requirements such as those imposed by Federal or State statutes or regulations or common law (tort or contract, including a FEMA-State Disaster Assistance Agreement). The applicable standard of care shall be derived from such separate legal requirements. This section, by itself, does not impose strict liability or any other standard of care. It would be a matter of judicial discretion to fashion appropriate relief in addition to the repayment of Federal funds.

New section 317(a) is similar to a provision in the Labor-Management Reporting and Disclosure Act of 1959, as amended; section 317(b) is a new subsection; and section 317(c) is identical to provisions in several statutes and the regulations of several agencies, including FEMA.

New section 318 would expand on the civil and criminal sanctions of current section 317. It would also provide a mechanism by which the government could seek injunctive relief under appropriate circumstances. New subsections are based for the most part on existing and tested authorities of the Federal statutes.

SECTION 12

Section 12 would add section 401, dealing with the declaration process for major disasters and loans or advances of funds for the State and local share of assistance which is provided on a cost-sharing basis; sec. 402, authorizing the President and, by delegation FEMA, to direct other Federal agencies to provide assistance under their own authorities and without reimbursement, to coordinate Federal assistance and to coordinate with State and local governments, and to provide technical and advisory assistance; and sec. 403, authorizing the provisions of emergency assistance, under this Act, following a major disaster declaration.

Section 401(a) is currently codified at section 301(b) of the Act. Section 401(b) is new.

Among other things, section 401(a) requires a Governor's certification of a State and local government commitment to the disaster relief effort. By the parenthetical clause, a State commitment must constitute a "significant proportion" of the overall State and local commitment. The determination of whether the State commitment constitutes a "significant proportion" shall be made on a case-by-case basis. The determination shall be based on whether the State commitment is a substantial part of the overall State and local resources applied to the disaster recovery effort. It shall also be based on whether, given the resources available to the State, the Governor's commitment is adequate to demonstrate to the satisfaction of the President (FEMA) his or her sincerity in requesting supplemental Federal disaster assistance.

Section 401(b) would authorize advances or loans of the State and local share of grants under sections 405, 406 and 407 for which there would be cost-sharing requirements; it would not affect current sec. 414 (new sec. 416) dealing with community disaster loans, or current sec. 408 (new sec. 410), dealing with Individual and Family Grants. Sec. 401(b) would impose stricter standards for the advance or loan of the State and local share of grants made under new sec. 405, dealing with permanent restoration of public facilities. As a result, advances or loans of the State and local share of grants made under new section 406 (debris removal) and section 407 (temporary housing) would be more readily available than advances or loans for permanent restorative work. Sec. 403(a)(4) ensures that all debris removal assistance, whether needed as emergency work or not, would be cost-shared on a 75–25 percent basis.

Section 402 is drawn from current sec. 305; it is similar to new sec. 502. Sec. 403, with some changes in subsection (a)(4), is a recodification of current sec. 306; many features of this section are still intact from the

original 1950 comprehensive Disaster Relief Act.

SECTION 13

Section 13 amends section 402 (new section 405) and section 403 (new section 406) for several purposes. It would impose a 75 percent limitation on the Federal contribution for permanent restorative work on public facilities and debris removal, respectively. The section would also incorporate an expansion of the concepts of current section 419 into new sections 405 and 406. Several elements of current section 402 would be retained in new section 405: subsection (a) deals with the repair, restoration, reconstruction or replacement of public facilities, the definition of which is moved from 402(d) to new 405(a); subsection (b) would continue the eligibility of certain private nonprofit facilities; and subsection (d) would continue the provision of 402(c) relating to projects under construction, except that new 405(d) would preclude assistance where, under a contract, the contractor is responsible for disaster-related expenses. Current section 402(f) relating to flexible funding is unworkable and would be deleted. New section 405(c) would require that permanent restorative work still be accomplished in conformity with applicable codes, specifications and standards, as well as in compliance with floodplain management and hazard mitigation criteria required by the President, the Coastal Barrier Resources Act, and other applicable Federal statutes.

Section 13 incorporates FEMA's single most important legislative initiative, the requirement that State and local governments share the cost of permanent restorative work and debris removal at the rate of 75 percent Federal, 25 percent State and local. This change in the statute would assure the supplemental nature of the Federal aid under the public assistance authorities. The existing legislation requires a Governor, as a condition for assistance under the Act, to certify that the total obligations and expenditures of both State and local governments for a major disaster constitutes a reasonable commitment. This commitment has always been difficult to ascertain. Requiring 75-25 percent cost-sharing by statute would assure that a reasonable commitment would be made by state and local governments with regard to public assistance. With the grantees' cost-sharing in permanent restorative work, we anticipate tighter financial controls over planning and construction and other ways of reducing long-term costs related to disaster projects. We also anticipate that State and local governments will be more prudent in their assessments of needs for debris removal and permanent restorative work. Savings due to 75-25 percent cost-sharing for public assistance are currently estimated at an average of $50 million per annum. Any grant under the 75-25 percent limitation would be precluded unless there were a 25 percent nonfederal contribution; State and local governments would not be able simply to limit their expenditures to the Federal contribution. Further, the underlying purposes of the 75-25 percent provision would be frustrated if an applicant were permitted to receive other Federal funds specifically to meet the matching requirement. However, applicants should be able to apply funds originating with the Federal government when such funds were provided under general revenue sharing or broad block grant authority. In these latter situations, the applicant would still have to make decisions about where best to expend the funds under its control; this would ensure prudent applications for disaster assistance.

Section 13 also expands current section 419 relating to small project grants. We believe that this section provides a tested and time-saving method of reducing the burden of administrative costs and delays for small projects. The section currently permit FEMA to make full grant payments based on the estimated cost of repairing disaster damage to public facilities. Except on spot-checks, or upon receipt of evidence of gross errors or fraud, there generally is no requirement to perform detailed audits or final inspections of the work completed. FEMA would retain the authority to perform inspections and audits on particular projects in order to ensure the integrity of applicable programs. The current limitation on the applicability of section 419, $25,000 for the cumulative estimated cost for all projects belonging to a particular applicant, would be changed by section 13 to $25,000 for each individual project. Based on the most recent computer analysis, FEMA anticipates that approximately 90% of all projects processed, representing less than 10% of all funds expended, could be included under the new small project grant mechanism as a result of this change. The proposed change would gain the advantages of management by exception with greatly reduced administrative costs and delays.

Under section 13 contributions for permanent restorative work would be limited to 75 percent of the net eligible costs or "for small projects 75 percent of the Federal estimate of the net eligible cost" of repairs or restoration. The quoted portion would permit FEMA to make a grant based on the estimate, rather than having to resort to inspections and audits to determine the actual costs of restoration. The change would also permit FEMA to establish, by regulation, the definition of "small projects" to which this expedited procedure may be applied. We anticipate that a ceiling would be established initially at $25,000 per project. The section would also delete any provision for expending a small project grant on anything but the restoring or replacing of the damaged or destroyed public facility on which the grant was based. Section 13(c) would make provision for the same project grant mechanism for debris removal assistance; similar provisions are made for emergency work in a major disaster by section 13.

As a result of section 13, there would be authority to make grants to public assistance applicants based either on the actual net eligible costs of the restorative work or the Federal estimate of that cost. The latter mechanism would be expressly available for "small projects". There are, however, additional situations where actual net eligible costs can not be determined. There is no intent in section 13 to preclude FEMA from relying on Federal estimates in such situations. Examples include the longstanding practice of providing a "grant in lieu" when an applicant, in restoring its capability to continue providing a service, decides to rebuild a larger or better facility. By regulations, FEMA is permitted to provide funds to the extent that it would have funded the restoration of precisely what was lost. The determination of grant amount necessarily is based on an estimate. There are also other situations when actual costs are not available such as when an applicant has maintained inadequate records, where records have been destroyed or where FEMA can not justify reimbursing what it determines to be excessive costs. Each of these situations also requires reliance on estimates.

Section 13 also would amend and renumber the debris removal assistance authority, current section 403, as new section 406. As with section 405, debris removal assistance would be provided on a 75-25 percent cost-sharing basis (except for snow removal assistance which is normally provided on a 50-50 percent cost-sharing basis), regardless of whether the assistance is in the form of grants or direct Federal assistance. New section 406(c) would also authorize the small project grant mechanism for debris removal.

Section 13 would delete the "in lieu" provision relating to fundings under section 402(f). A local government involved can determine not to repair, restore, or replace a particular damaged public facility and get a 90 percent contribution in lieu therefor which can be used for non-disaster-related facility construction. Under the section an applicant is able to use available disaster funds to construct new public facilities which also may have low priority for construction and which are not essential. We estimate that of all the project applicants approved under the Act since 1974, only about 2 percent have been approved under section 402(f) representing about 5 percent of the total dollars.

Section 402(f) does not work to the best interest of the Federal Government. It contradicts the purpose and aims of Federal disaster assistance, which are, "to provide an orderly and continuing means of assistance by the Federal Government to State and local governments in carrying out their responsibilities to alleviate the suffering and damage which result from such disasters . . . ." When an applicant chooses not to restore a public facility, then presumably the facility is not needed to provide necessary services to the public, and the public will not suffer from lack of that facility. In such a situation it is not in the public interest for the Federal Government to provide funding which an applicant uses on some alternate project that is not disaster-related.

In those cases where an applicant wishes to use the opportunity of a disaster to make changes in location, size, or construction of disaster-damaged facilities, the grant-in-lieu procedure, provided for in FEMA's regulations, is of far more benefit to an applicant than flexible funding has been; it is used extensively in almost all disasters.

SECTION 14

Section 14 would amend current sec. 404 (new sec. 407) in several respects. First, it would eliminate the automatic one-year rent-free period for providing temporary housing. Second, temporary housing would only be provided when adequate alternate housing is unavailable. Third, FEMA and the affected State would share the costs of developing mobile home group sites, 75-25 percent. Fourth, there would be explicit authority for administration of temporary housing programs by State and local governments and for FEMA to reimburse 100 percent of the eligible costs incurred. Finally, the section would state that Federal operational and financial responsibility for temporary housing would not exceed 18 months unless that time were extended by the President (FEMA) in extraordinary circumstances.

The intent of the elimination of the automatic one-year rent-free period is to impose the reasonable requirement that individuals

and families needing temporary housing continue to pay at least what they were paying for housing before the disaster. This change plus the requirement that alternate housing be unavailable before the provision of temporary housing should save the Government at least $1 million per year.

The cost-sharing feature for group site development recognizes the supplemental nature of temporary housing. More to the point, however, it eliminates the confusion about the respective roles of the Federal and state governments in the cost associated with group site development. Currently, States or local governments are charged with providing group sites, except when FEMA determines that such sites should be developed at Federal expense. The presence of this waiver has encouraged States and local governments to obtain this relief whenever possible. The language of the proposal will formalize the State's responsibility for funding.

The explicit change authorizing FEMA to make contributions to State or local governments for the purpose of providing temporary housing, would clarify that FEMA, in addition to being authorized to provide such assistance directly, would have the option of providing assistance through other Federal agencies or through State or local governments which were willing and able to assume the responsibility. The determination of which mechanism is best would be within FEMA's sole discretion, assuming this section is delegated to the Agency. Finally, in all but extraordinary circumstances, FEMA's responsibility for the provision of temporary housing would end no later than 18 months from the date of the major disaster declaration.

SECTION 15

One of FEMA's major responsibilities in connection with the provision of disaster relief is to act together with State and local governments, as well as other Federal agencies, to reduce the damage sustained during natural disasters and to minimize the potential for the recurrence of disasters by initiating appropriate hazard mitigation measures.

The hazard mitigation process involves anticipating the future aspects of hazards; identifying measures that can reduce or eliminate these impacts; selecting and providing for the scheduling of the most appropriate actions for reducing impacts of the hazards; and evaluating and reviewing mitigation actions for effectiveness.

The immediate post-disaster situation presents many opportunities to reduce annual damages from natural disasters. We find, given the widespread damage and hardship, that local officials and the community at large are more interested and willing to reach a consensus on solving the problems associated with minimizing future risks than they are normally. This is especially true given the large public and private investments which are required to restore facilities damaged and destroyed as a result of the disaster. Depending on the extent of damage, there may be unprecedented opportunities to relocate damaged or destroyed facilities or homes out of the most dangerous zones; this is probably the most effective means of reducing the risk of future damage. FEMA's ability to promote cost-effective prudent hazard mitigation measures is largely dependent on its ability to participate in their costs.

Section 15 would provide authority for FEMA's contributing to the cost of performing hazard mitigation measures. Such projects would be identified in the hazard mitigation plan prepared by the State under the authority of current sec. 406 (new sec. 408) and FEMA's implementing regulations. This plan would rank the most important and potentially cost-effective hazard mitigation projects, subject to FEMA's approval. Such projects would not necessarily have to be specifically related to particular damaged facilities, but rather be significant in reducing the threat of future damage and hardship for the entire disaster area or for a significant facility in that area. There would be a limitation on the total amount of Federal disaster assistance funds to be expended on such projects of 2.5 percent of the public assistance costs assumed by FEMA for permanent restorative assistance for the subject major disaster. Based on our financial records, in fiscal year 1979, 2.5 percent of such costs would amount to approximately $4.5 million; for fiscal year 1980, the figure would have been $3.3 million; and for fiscal year 1981, the figure would have been approximately $.8 million. The potential savings to the Federal, State and local governments would be much greater. Any Federal funds contributed under this section would have to be matched on a 50 percent-50 percent basis.

SECTION 16

Section 16 would replace the current section 407 with an amended new section 409, still dealing with disaster unemployment assistance. The main changes would be to eliminate eligibility for such assistance where the individual is otherwise eligible for unemployment assistance under authority of any Federal or State act and to limit the duration of total assistance to 26 weeks. For example, a worker whose unemployment is attributable to a major disaster and who reopens or establishes a claim for unemployment compensation benefits under any State or Federal unemployment compensation law in which the duration of the benefit is less than 26 weeks would be entitled to disaster unemployment assistance for a combined duration of unemployment compensation and disaster unemployment assistance not to exceed 26 weeks.

Disaster unemployment assistance would be unavailable to supplement, week by week, benefits received under any other unemployment compensation program under Federal or State statute. This assistance would also be unavailable to provide benefits during any waiting week period under those programs. The term "unemployment compensation," as used in section 17, is intended to have the same meaning as is given to that term by section 85(c) of the Internal Revenue Code of 1954.

SECTION 17

Section 17 would delete language from section 408(b) of the Disaster Relief Act of 1974, as amended, which establishes an unspecified time frame for repayment of advances of a State's 25 per centum share of the costs of an Individual and Family Grant program. In addition, the section would add two new sentences to section 408(b). The additional sentences state that any advances of a State's 25 per centum share established by this section of the law will accumulate interest from the date such advance is made at a rate determined by the Secretary of Treasury. The new language would also provide that States which receive such advances must start repaying the advances along with accumulated interest within two years from the date of the Presidential major disaster declaration.

SECTION 18

Section 18 would amend sec. 408(d) (new sec. 410(d)) to permit FEMA to reimburse 50 percent of the State's administrative expenses in connection with the Individual and Family Grant program in excess of the currently reimbursed 3 percent of the Federal grant. Such extra reimbursement would be contingent on the State's completing all grants to eligible individuals and families within the period prescribed by FEMA.

This change is supported by the following points:

Once the emergency period is over, most state administrations do not assign high priority to the completion of the program. Historically, 85 percent of all programs received better than 90 percent of their applications within the application period (the first 60 days of the program). However, only 3 percent of the programs are completed within the regulated time frame (180 days).

Many states are reluctant to staff programs with an adequate number of people to process applications rapidly because their administrative costs would exceed the 3 percent allowed them. Some states restrict the implementing agency's administrative costs to the amount which will be reimbursed by the Federal Government. When this has occurred, in order to protect the interests of the individuals and families being assisted, FEMA has had to step in and perform functions that are normally the State's responsibility (e.g., FEMA performed the verification of a large number of all applications in Mississippi because the State restricted the staffing because costs would exceed the 3 percent.)

Auditors have been critical of the time it takes to deliver assistance. They question the validity of awarding a grant weeks, and sometimes months, after a victim has made application, since the purpose of the grant is to meet necessary expenses and serious needs.

An analysis of those completed programs authorized during 1980 and 1981 revealed that:

Overall, states are actually receiving only 15 percent of their reported administrative costs;

Only 25 percent of the programs received funds adequate to cover the reported administrative costs; and

If the authority to provide additional reimbursement as proposed by sec. 18 had been in place over the last two years, we estimate that states would have received 57 percent of their reported administrative costs, assuming the states complied with the required deadlines. For the two year period analyzed, the extra reimbursement by FEMA would have totaled approximately $775,000. This additional expenditure would have been supportable given the more efficient delivery of assistance to individuals and families.

If this section passes as written, the agency will clearly define in the program regulations the "period prescribed by the President" taking into account the fact that completing an IFG program is dependent on other programs.

SECTION 19

Section 19 would delete subsection (d) from sec. 418 (new sec. 420) authorizing grants to State and local governments for the removal of disaster-damaged timber from privately-owned lands. The section is unnecessary and is not used.

SECTION 20

Section 20 would amend sec. 606 of the Act (would not be renumbered by the bill) to authorize appropriations to the President of such sums as may be necessary to carry out the disaster assistance program for the next three fiscal years, and to FEMA for related administrative expenses for the same period. The three year authorization cycle is traditional for the Disaster Relief Act of 1974.

SECTION 21

Section 21 would make numerous changes to the Act, most of them conforming or updating amendments, not substantive costs.

Subsection 21(11) would eliminate the restriction that donated mobile homes must be used to provide temporary housing following an "emergency" or "major disaster." Subsection 21(13) would eliminate the reference to "emergency" in current sec. 415 dealing with emergency communications. This change would be a conforming amendment; all sections in Title IV make explicit reference to use in a "major disaster." However, if emergency communications were required in an emergency, as part of the Federal supplemental assistance for emergency communications would be authorized by the general emergency assistance authority of Title V. Subsection 21(16) would substitute "Federal coordinating officer" for "President" in current sec. 312 (new sec. 309) dealing with the use and coordination of private relief organizations.

SECTION 22

Section 22 would amend section 6(a)(6)(E) of the Coastal Barrier Resources Act to reflect the fact that that Act's exemption from the general prohibition on Federal expenditures on designated undeveloped coastal barriers in the context of the provision of emergency assistance remains effective. Sec. 22 also contains a general technical amendment provision to reflect the changes in the Disaster Relief Act of 1974, as amended, which would be effective upon enactment of the "Disaster Relief Act Amendments of 1983."

SECTION 23

Section 23 would provide that the Act shall be effective 90 days after enactment but only for major disasters and emergencies declared after such date. In addition, section 23 contains a savings provision which would continue in effect the current implementing regulations of the Disaster Relief Act of 1974, as amended, until those regulations are abrogated or amended by the President, and would permit the continuation of proceedings which are authorized under current law and regulations even after the enactment of the Disaster Relief Act Amendments of 1983.●

● Mr. HUMPHREY. Mr. President, I am glad to join with Senator STAFFORD to introduce the Disaster Relief Act Amendments of 1983.

This bill is a comprehensive set of proposed amendments to the Disaster Relief Act of 1974. It will serve as the focal point for the hearings and discussions with the administration, the Federal Emergency Management Agency, other departments and agencies, as well as interested groups or individuals.

The Subcommittee on Regional and Community Development, which I chair, will conduct a hearing on this important measure on July 21, 1983. The subcommittee will hear representatives of the Federal Emergency Management Agency in room 406 of the Dirksen Senate Office Building at 10 a.m. Additional hearings may be scheduled at a later date.●

By Mr. DENTON:

S. 1526. A bill to provide lump-sum death benefits for the survivors of Federal law enforcement officers killed in the line of duty; to the Committee on Governmental Affairs.

DEATH BENEFIT FOR FEDERAL LAW ENFORCEMENT OFFICERS

● Mr. DENTON. Mr. President, when a local enforcement officer is killed in the line of duty his or her immediate family receives from the Federal Government a sum of $50,000 in survivor benefits. On the other hand, when a Federal law enforcement agent is killed in the line of duty his or her immediate family does not receive such survivor benefits from the Federal Government. I introduce today a bill that would allow families of Federal agents killed in the line of duty to receive $75,000.

FROM THE FEDERAL GOVERNMENT

A bill similar to this was introduced during the Carter administration and was passed by both the House and Senate. However, President Carter vetoed this bill stating it would cost the Federal Government too much money. My research corrects the misconception that great numbers of Federal agents are killed in the line of duty. However, I believe that families of those who give their lives to defend the security of our Nation need and deserve this assistance.

I ask unanimous consent that a copy of the bill be included in the RECORD immediately following my statement.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1526

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 8133 of title 5, United States Code, is amended by adding at the end thereof the following new subsection:

"(g) If a law enforcement officer employed by the Federal Bureau of Investigation; the Drug Enforcement Administration; the U.S. Customs Service; U.S. Border Patrol; Indian Reservation Police; Uniform Division of Executive Protection Agency; Federal Protective Service; U.S. Secret Service; or as a U.S. Marshal dies as a result of injuries sustained in the performance of duty, the United States shall pay, in addition to other benefits authorized by law, a lump sum payment of $75,000 to the person or persons surviving on the date of death in the order of precedence established under subsections (a) and (b) of section 8705. No payment shall be made under this subsection if, by the end of the four-year period beginning on the date of the death of the employee, no claim for payment by a person entitled under this subsection is made. Payment under this subsection shall be made by the head of the Federal agency concerned out of appropriations available to such agency for such purposes beginning for fiscal year 1984."

(b) The amendment made by subsection (a) shall be effective upon date of enactment of this Act.●

By Mr. INOUYE:

S. 1527. A bill to provide parity for psychiatrists and psychologists in title 18, United States Code; to the Committee on the Judiciary.

AVAILABILITY OF PSYCHOLOGISTS IN THE CRIMINAL JUSTICE SYSTEM

● Mr. INOUYE. Mr. President, today I am introducing legislation which would amend the current criminal justice system to insure that the services of qualified psychologists will be made readily available throughout the Federal judicial system.

The legislation which I am proposing today would not mandate that our Nation's Federal courts give preference to these scientists and practitioners, but would instead insure that Federal judges will have the option to use their services where they so desire.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1527

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4244 of title 18, United States Code, is amended by inserting after "qualified psychiatrist" each place it appears the following: "or psychologist".

SEC. 2. Section 4247 of title 18, United States Code, is amended—

(1) in the second sentence by inserting after "qualified psychiatrist" the following: "or psychologist";

(2) in the third sentence by striking out "designated psychiatrist or psychiatrists" and inserting in lieu thereof "designated psychiatrist or psychologist or psychiatrists or psychologists"; and

(3) in the fourth sentence by inserting after "psychiatrists" the following: "or psychologists".

SEC. 3. Rule 12.2(c) of the Federal Rules of Criminal Procedure is amended—

(1) in the caption by adding after "Psychiatric" the following: "or Psychological"; and

(2) in the first sentence by—

(A) adding after "psychiatric" the following: "or psychological"; and

(B) adding after "psychiatrist" the following: "or psychologist".●

By Mr. MOYNIHAN (for himself and Mr. DANFORTH):

S. 1528. A bill to amend the Internal Revenue Code of 1954 to provide that certain museums and organizations which operate libraries will be treated as public charities; to the Committee on Finance.

TAX TREATMENT OF LIBRARIES AND MUSEUMS

● Mr. MOYNIHAN. Mr. President, I rise today with Senator DANFORTH to introduce a bill to amend section 170

of the Internal Revenue Code concerning the tax treatment of certain museums and libraries. My bill would make it easier for these institutions to qualify as public charities.

Under current law, a museum can qualify as either a public charity or a private foundation. It is advantageous for a museum to be a public charity, in part, because it is easier as a public charity to obtain grants from foundations. The reason: a foundation has to exercise expenditure responsibility for the money it donates to other foundations, but not to public charities. Section 4945(h) of the Internal Revenue Code defines "expenditure responsibility" as a duty to "exert all reasonable efforts * * * to see that the grant is spent solely for the purpose for which made, to obtain full and complete reports from the grantee on how the funds are spent, and to make full and detailed reports" to the IRS. This involves a great deal of paperwork, and, for reasons that are all too obvious, foundations prefer to avoid the added work and expense.

Another reason museums prefer to qualify as a public charity rather than a private foundation is the investment excise tax. A private foundation must pay an annual 2 percent excise tax on its net investment income, and has to file a special tax return to do so. A public charity does not.

The list of public charity advantages continues. A private foundation is also prohibited from dealing with anyone on a lengthy list of disqualified persons. For instance, under the law, family members of persons who own large blocks of stock in corporations contributing money to the foundation are considered disqualified persons. The list of disqualified persons is such, then, that a foundation may find itself unwittingly breaking the law.

And the penalty for violating the law can be stiff. The disqualified person has to pay a special tax equal to 5 percent of the amount involved, and the tax increases to 200 percent if the infraction is not corrected after notice from the IRS. A public charity, on the other hand, is prohibited only from dealing with persons for their own advancement.

There is yet another advantage. A private foundation is prohibited from owning more than 35 percent of the stock in any unrelated business. If the business is controlled by a disqualified person, the foundation may own an even lesser percentage of stock. Again, the penalty for violating this provision is an additional tax of 5 percent of the excess business holding, increasing to 200 percent if the violation is not corrected after IRS notice. A public charity, of course, is not subject to this restriction.

And, last, a private foundation must file a special information return with the IRS. A public charity does not have to meet this requirement.

I do not challenge the basis for regulating private foundations in this way. I only ask if certain museums should not qualify as public charities.

The test for determining whether an exempt organization is a private foundation is found in section 509 of the Internal Revenue Code. In general, a museum can be considered a public charity, rather than a private foundation, if among other tests it receives more than one-third of its support in the form of small "gifts, grants, contributions * * * [and from] admissions" fees. The IRS regulations say that this one-third test is "designed to ensure that an organization which is excluded from private foundation status * * * is responsive to the general public, rather than to the private interests of a limited number of donors or other persons."

My bill would add a special test for museums to qualify for public charity tax status. A museum that failed to meet the one-third test could still qualify as a public charity if at least one-fourth of the museum's directors are public officials or persons appointed by public officials to act in the public interest. To qualify as a public charity, the museum must also be a permanent organization with a professional staff. It also must display tangible objects and be open to the general public for free or nominal charge, on a regular and continuous basis.

Why does the tax law distinguish between public charities and private foundations? In the sixties some foundations were found to be abusing their exemptions from Federal income taxes. Some wealthy families transferred stockholdings to a foundation, while retaining control of the corporation—avoiding both the income tax on dividends and the estate tax on the value of the stock. Said Stanley S. Surrey, Assistant Treasury Secretary for Tax Policy, in a February 23, 1967, speech: "The present resort of tax and business planners to the creation of a private foundation to hold the stock of a business enterprise so as to perpetuate the family control of that enterprise is a complete distortion of the policies and philanthropic motivations that underlie the tax benefits granted charitable contributions and charitable institutions."

Individuals who contribute money to foundations, of course, can deduct their contributions from their income taxes. Congress also found, however, that some foundations were simply investing this money, rather than supporting charitable works.

Congress designed the 1969 Tax Reform Act to end such abuses. Since all tax-exempt organizations were not abusing the law, the new rules did not apply to all organizations. Instead, Congress created a new subspecies, termed "private foundations," for targeted regulation. As the Ways and Means Committee explained in its report on the 1969 act: "the problems that gave rise to the statutory provisions of the bill * * * appear to be especially prevalent in the case of some organizations. However * * * certain other organizations * * * generally do not give rise to the problems which have led to the restrictions and limitations."

The main determinant of whether an organization should be considered a private foundation for tax purposes, the committee said, is the degree to which "the organization is responsive to the general public."

The American Enterprise Institute, in a book on "The Tax Reform Act of 1969," explained:

> The statutory definition of "private foundation" reflects an underlying congressional philosophy which turns upon a very crucial distinction between organizations that are privately financed and those that depend upon the public for their support. In the latter case, the organization is subject to the discipline of public opinion. If it misbehaves, misuses its capital, or engages in questionable practices, the public will presumably learn about it, and by the simple expedient of cutting off contributions, correct that which has become offensive. On the other hand, the institution that is privately financed is subject to no such corrective influence and therefore must be regulated in some other way.

The bill that I am introducing today would affect at least four museums in four States: The Strong Museum of Rochester, N.Y.; the Mariners Museum of Newport News, Va.; the Merrimack Valley Textile Museum in North Andover, Mass.; and the Philadelphia Maritime Museum.

My bill is reasonable and equitable. First, the likelihood that public museums have been abusing the tax laws, or have been used to do so, is very slim. There are certainly easier and more efficient ways to shelter corporate stock than to a set up a public museum. And certainly there are easier and more efficient ways for wealthy families to finance one's exotic pastimes or interests. Any contribution a museum receives almost always go directly into paying for an exhibit, rather than into a portfolio investment. It is for this reason that hospitals, schools, and such are not private foundations.

And second, a private foundation is an exempt organization relatively immume to public pressure. How reliant an organizaton is on the public for support is one test of is immunity from public pressure. This is the test in the current statute. I propose to add another test, one that is just as good. Is the museum a permanent organization with a professional staff and normal viewing hours for the public, and are there people represent-

ing the public interest on the board of directors of the museum?

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1528

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subparagraph (A) of section 170(b)(1) of the Internal Revenue Code of 1954 (relating to percentage limitations) is amended by striking out "or" at the end of the clause (vii) by adding "or" at the end of clause (viii), and by inserting after clause (viii) the following new clause:

"(ix) a museum (as defined in subparagraph (F)(i)) if 25 percent or more of its governing body consists of individuals (other then disqualified persons as defined in subparagraph (F)(ii) with respect to the museum) who are described in any of the following subclauses:

"(I) community leaders or other individuals representing a broad cross-section of the views and interests of the community,

"(II) members of such governing body by reason of being a public official, or

"(III) individuals selected to be members of such governing body by a public official,".

(b) Paragraph (1) of section 170(b) of such Code is amended by adding at the end thereof the following new subparagraph:

"(F) SPECIAL RULES FOR SUBPARAGRAPH (A)(IX).—For purposes of subparagraph (A)(ix)—

"(i) MUSEUM.—The term 'museum' means any organization the principal function of which is (through the utilization of a professional staff) the exhibition of tangible objects to the general public on a regular and continuous basis for free or at a nominal charge.

"(ii) DISQUALIFIED PERSON.—The term 'disqualified person' has the meaning given to such term by section 4946; except that an individual shall not be treated as a disqualified person merely by reason of being a member of the governing body of the organization."

SEC. 2. (a) Clause (ii) of section 170(b)(1)(A) of the Internal Revenue Code of 1954 (relating to charitable, etc. contributions and gifts) is amended by adding at the end thereof: "or any organization which operates a qualified library within the meaning of subparagraph (G)."

(b) Paragraph (1) of section 170(b) of such Code is amended by adding at the end thereof the following new subparagraph:

"(G) QUALIFIED LIBRARIES.—For purposes of subparagraph (A)(ii), a library shall be treated as a qualified library if—

(i) such library was established as a library by a law of a State, a law of the United States, a law of possession of the United States, a law of the District of Columbia, or, before 1789, in the geographic area now comprising the United States and such library is operated by an organization as a permanent and principal part of the public services of such organization; or

"(ii) such library is open and available to the general public, does not charge a fee for admission to its premises or use on the premises of the library collection, and is operated by an organization, none of whose income is expended for purposes other than the construction, maintenance, expansion, operation or management of such library, its collection and the premises on which such library is located."

SEC. 3. The amendments made by this Act shall apply to taxable years ending after the date of the enactment of this Act; except that, for purposes of applying sections 507 and 509(c) of the Internal Revenue Code of 1954 with respect to taxable years ending after such date, such amendments shall be treated as in effect for all periods on or after October 9, 1969.●

● Mr. DANFORTH. Mr. President, I am pleased to cosponsor the bill just introduced by my friend from New York, Mr. MOYNIHAN. This bill provides that a tax-exempt organization operating a library or museum is, under certain circumstances, to be treated as a public charity for tax purposes. This bill is similar, in its treatment of libraries, to legislation I introduced in the last Congress.

Under the bill, these organizations would be treated the same way that other educational organizations such as schools and universities are treated. In order to qualify for public charity treatment, the library operated by the organization would have to be operated as a permanent and principal part of the tax-exempt activities of the organization and be organized by a public act of the United States, of any State, of the District of Columbia, or of any possession of the United States, or be in existence prior to 1789. Alternatively, if the library is open and available to the public at no charge and is operated as the sole activity of the organization in issue, public charity treatment would be extended. Libraries which meet either of these tests are not different in any material manner from other educational institutions that are already accorded public charity status under the Internal Revenue Code. In my opinion, the time has come to equalize the treatment of these similar institutions.

Under current law, some tax-exempt organizations that operate libraries of the type I have just described run the annual risk that they will fail to meet the Internal Revenue Service's guidelines to qualify as a "publicly supported organization" and that they will be classified as private foundations.

For example, two libraries in Missouri that meet these tests, the St. Louis Mercantile Library in St. Louis and the Linda Hall Library in Kansas City, run the annual risk of being classifed as private foundations because of investment income from their endowments. Once classified as a private foundation, an organization must pay an annual excise tax equal to 2 percent of its net investment income. In order to avoid this tax, libraries of the type that are the subject of this bill will often spend substantial amounts in legal and accounting fees trying to insure that they meet the publicly supported organization test. Even then they may not meet the publicly supported test. Whether the organization spends its money paying the excise tax or in legal and accounting fees, I believe that as a matter of public policy, we would be better off if the money were spent acquiring books and other library materials.

There is another adverse aspect of being classified as a private foundation. A library that is classified as a private foundation has a more difficult task than an organization classified as a public charity in soliciting funds from potential contributors. A private foundation that is not an operating foundation may make contributions to public charities and private operating foundations, but generally may not make qualifying contributions to other private foundations that are not operating foundations. Because of the uncertainty as to whether a private operating foundation continues to qualify as an operating foundation—there are complex tests that must be satisfied annually—many individual contributors and other private foundations that are not operating foundations are hesitant to contribute funds to such an organization even though it clearly serves a public purpose.

As a result, funds that would otherwise go to libraries described in the bill are diverted to other charitable organizations. This is not a hypothetical problem. I am aware of at least one situation where a private foundation that formerly made a $10,000-a-year grant to the St. Louis Mercantile Library has ceased making such grants solely because of the library's private foundation status.

Finally, libraries that are classified as private foundations must, in addition to the 2-percent excise tax, pay annual legal and accounting fees to insure that they comply with the private operating fundation rules set out in the Internal Revenue Code. Again, I believe these funds could be better spent on library activities.

I do not believe that enactment of this bill will open the floodgates to legislation exempting all sorts of organizations from the private foundation rules. The legislation is narrowly drawn and the organizations involved in the bill serve the public. No allegations have been made that these organizations have engaged in the types of activity which led to the enactment of the private foundation rules in 1969. These organizations serve the public exclusively and should be treated accordingly. They should be classified as public charities.

Since I know of only two libraries that would be affected by this legislation, I would like to briefly describe each of these institutions.

The Linda Hill Library was established in 1946. The instruments governing its establishment and operation

specifically provide that the library shall be open and available to the public at no charge. These instruments also provide that none of the library's income shall be expended for purposes other than the construction, maintenance, expansion, operation, or management of the library. The library is maintained in its own buildings situated on a tract of land adjacent to the University of Missouri at Kansas City in Kansas City, Mo.

Since its establishment, the library has assembled one of the Nation's most extensive and notable collections devoted to science and technology including more than 460,000 volumes and over 620,000 microforms. Together with a distinguished retrospective collection, it also has very extensive holdings of current books and journals from all countries where publications at the research level in science and technology are available. Among those works especially valuable to research scientists throughout the United States, and not widely held by other institutions, are the library's comprehensive collections of current journals from the Soviet Union, Japan, and the People's Republic of China.

The Linda Hall Library maintains a program of providing photocopies of its materials to persons upon request, whenever requests for such services are consistent with copyright laws and with the Copyright Clearance Center procedures. It also maintains a program of lending portions of its collection from time to time to other libraries. Shortly after its establishment, the library purchased the entire collection of the American Academy of Arts and Sciences which had its principal offices in Boston, Mass. After the purchase, the Linda Hall Library agreed to act as the agent of the academy in continuing its broad exchange program with libraries and learned societies located throughout the world.

In the early years of its existence, the Linda Hall Library was selected by the Atomic Energy Commission as one of 15 or 20 depositories throughout the United States for its literature, and the library continues to maintain a collection of material relating to the AEC's successor organization, the Energy Research and Development Administration. In the late 1950's the National Aeronautics and Space Administration selected Linda Hall Library as a depository for the literature which it distributes in connection with its information program. Literature is still being sent by NASA to the library in connection with this program.

Linda Hall Library is a depository for all specifications and standards to be used by individuals and organizations when dealing with military and civilian projects of the Federal Government. The library also maintains the patent specifications for all patents issued by the U.S. Government since July 1946, and is a depository for all current maps issued by the U.S. Geological Survey.

Linda Hall Library maintains a very close relationship with the University of Missouri at Kansas City which is almost entirely dependent upon Linda Hall for library material in the areas of science and technology.

The St. Louis Mercantile Library Association was established in 1946 to form a well-rounded collection of books for the information and convenience of St. Louisans. The formation of the library was authorized and approved by a public act of the General Assembly of the State of Missouri. The library is maintained in its own building in downtown St. Louis.

Over the past 132 years the library has assembled a notable collection of books, now over 213,000 volumes, comprising a general collection in the liberal arts area, with emphasis on history, biography, travel, philosophy, religion, and the arts. The library maintains one of the country's distinguished and most comprehensive collections of regional history pertaining to St. Louis and Western American.

The Western Americana collection, with approximately 55,000 rare books, is probably the most comprehensive collection in that field in existence. The collection is frequently consulted and referred to by many historians in this field. In addition, the library has one of the most complete files available in the St. Louis area for 6 local papers, including some 500 bound volumes of St. Louis newspapers, beginning with 1812—a few of these cannot be obtained in any other library. The library has also been the recipient of many valuable gifts during its existence. These gifts include the fragmentary journal of Pierre Laclede's stepson, Auguste Chouteau, describing the founding of St. Louis, and the original manuscript, "Journal of the Proceedings of the First Legislative Council of the Territory of Louisiana, from June 3, 1806 to October 9, 1811."

For individuals researching the organization of the territorial government of the Louisiana Purchase or Missouri's first steps toward statehood, these documents are of extreme importance. Another notable possession is the four-volume elephant folio of Audubon's "Birds of America." The library is open to the public and currently maintains a broad-based membership of over 2,000. While membership is necessary to check out materials—membership dues are currently a nominal $10 per year—anyone can use the books and collection on the premises of the library. The library is also made available to students for Washington University to observe the library's unique cataloging systems, reference department, and rate book room.

In my opinion, neither the St. Louis Mercantile Library not the Linda Hall Library should be penalized by the private foundation rules and applicable excise taxes. These provisions were not intended to penalize organizations that clearly provide a public benefit such as these libraries do. I also believe that libraries such as these should not be burdened with the additional legal and accounting expenses incident to the private foundation rules.●

By Mr. ANDREWS:

S. 1530. A bill to make technical amendments to the Indian Self-Determination and Education Assistance Act and other acts; to the Select Committee on Indian Affairs.

TECHNICAL AMENDMENTS TO INDIAN LEGISLATION

● Mr. ANDREWS. Mr. President, I am today introducing S. 1530, a bill to provide technical amendments to four acts pertinent only to Indian affairs. I previously introduced this legislation as S. 973 on April 5, 1983. The bill was reported out of the Select Committee on Indian Affairs on May 5, 1983, without amendment. However, at the time of Senate action, my esteemed colleague, the senior Senator from North Carolina, Senator HELMS, offered an amendment to authorize the North Carolina School of Arts to lease certain property which had been approved with a grant under the Public Works and Economic Development Act of 1965. This amendment was accepted by the Senate and S. 973, with the Helms amendment was passed to the House of Representatives.

S. 973 was adopted by the House without amendment and the bill was forwarded to the President on June 7, 1983. On June 17, within the time provided by law, the President noted his disapproval of S. 973 and transmitted his veto message to the Senate on June 18, 1983. In his message the President stressed that the Helms amendment was the sole cause of the veto and he urged prompt reenactment of sections 1 through 4 of S. 973 providing technical amendments to the Indian statutes. It is this purpose that the legislation I introduce today will accomplish.●

By Mr. RIEGLE (for himself, Mr. PELL, Mr. KENNEDY, Mr. CRANSTON, Mr. DODD, Mr. METZENBAUM, Mr. RANDOLPH, Mr. MATSUNAGA, Mr. HART, Mr. LEVIN, and Mr. CHILES):

S. 1531. A bill to encourage the use of public school facilities before and after school hours for the care of school-age children, and for other purposes; to the Committee on Labor and Human Resources.

SCHOOL FACILITIES CHILD CARE ACT

● Mr. RIEGLE. Mr. President, today I am joining with my colleague, the senior Senator from Rhode Island, Mr. PELL, to introduce legislation to aid communities in the establishment and operation of school-age child care programs in public school buildings. We are pleased to have Senators CRANSTON, RANDOLPH, MATSUNAGA, DODD, KENNEDY, METZENBAUM, HART, LEVIN, and CHILES joining us as original cosponsors of this important bill. Day care for the school-aged child before school, after school, and during school holidays is a need of national dimensions for working parents in America.

LATCHKEY CHILDREN

The dramatic increase in two working parent families and working single heads of households has left many children without adult company or support for long periods of each work day. Literally millions of American children leave schools with keys around their necks. Our "latchkey" children return to empty houses alone, or in the company of a sister or brother not much older than themselves. Others, who find loneliness and fear in the prospect of an empty house, stay close to the school yard or visit with friends who may also be at home, unsupervised. In factories and offices across this Nation, parents wait anxiously for their children to call and confirm their arrival at home. They hope that their children can take care of themselves for the 2 or 3 hours between the end of the school day and the time that they return from work.

How well can young schoolchildren take care of themselves? Recent studies on physical and mental risks to unattended children are nothing short of alarming. Accidents are the major causes of death of school-age children in this country. Fire department officials in Detroit have reported that one out of six fires is caused by a child at home alone. Early exposure to alcohol and drugs, poor nutrition, fear and loneliness are just a few of the health hazards faced by latchkey children.

Research also suggests that unsupervised children are vulnerable to more subtle and insidious problems. There may be severe developmental implications for youngsters deprived of interaction with peers and affirming adults for significant amounts of time during the week. The delegation of responsibility to children for their own care and perhaps the care of even younger siblings places an undue burden which may leave them feeling frustrated and inadequate. Many children left alone resort to watching television for entertainment and company instead of working on key social and communication skills which are so critical to development during the early years.

Census reports indicate that almost 20 percent of the children between the ages of 6 and 13 whose mothers are working full time are unsupervised after school until a parent returns home. But many researchers suspect that this number represents the tip of the iceberg because of the reticence of many parents to admit that their children are alone after school. Estimates show that as many as 6 million children in America may be characterized as "latchkey."

In the last part of this decade, significant grassroots efforts, usually spearheaded by parents, have emerged in local communities to create after school day care programs. But these groundbreaking efforts have not begun to meet the growing need for these services. Only slightly more than 100 of the 15,000 American public school systems currently provide some sort of before and/or after school child care.

In conducting the research which led to the development of this legislation, it has been our experience that many school-aged child care programs now in operation are subsidized exclusively by parental fees. Providers are quick to point out, however, that fees have proven prohibitive for the participation of many children in need of services. Low-income and single parent households, and even some middle-income families who must also finance preschool child care, view after school child care as an unaffordable luxury.

Mr. President, adult supervision for young school-age children during periods when school is not in session and their parents must work should not be a luxury. With few exceptions, this important service is now available only to families with adequate financial resources, who are also fortunate enough to be living in communities where these programs are available. The safety and well-being or our Nation's young children are matters of the highest priority. It is my hope that this modest legislation will serve as a catalyst by drawing attention to the growing need for school-age child care programs, as well as by offering direct support to those communities which need assistance in developing programs.

PROVISIONS

Under the "School Facilities Child Care Act," public agencies and private nonprofit organizations can apply for Federal assistance to operate school-age child care programs in public school buildings. Grant applicants must demonstrate a need for a school-age child care program, a strong parental involvement component in the program, and a sliding fee schedule which will provide for reduced or waived fees for low-income children. In addition, our legislation establishes a National Clearinghouse on School-Age Child Care to offer information and technical assistance regarding the operation of these programs. The minimal funding level for this legislation, $15 million, will only begin to address the national need for quality school-age child care programs. However, not every community in need of school-age child care programs is also in need of Federal dollars to operate these programs. It is our hope that the Clearinghouse will offer all communities interested in addressing the "latchkey" problem a valuable resource. Furthermore, it is our intention that the availability of information and expertise to all who are interested will act to further target the majority of Federal dollars to those communities and to those children most in need.

Mr. President, this $15 million authorization bill will not insure the existence of a school-age child care program in every community. It will not provide funding for every child in need of services from a family without adequate resources. Nonetheless, it is an important beginning. In addition to providing a small amount of Federal dollars to support local after school school child care programs and to developing a national resource on the state of this art, I believe that this legislation will be an important contribution to national child care policy. This legislation places a high priority on parental involvement in the provision of services for their children. The sliding fee schedule guarantees a financial contribution from parents who can afford it, encourages an economic mix of children, and further targets Federal dollars to low-income children. Our bill encourages the formulation of partnerships among disparate sectors of the community who have concerns about the welfare of school-age children—parents, public educators, child care staff and advocates, community recreation groups—in the development of local school-aged child care programs. The use of a public school building as the site for these programs offers a cost-effective strategy for the provision of care through reliance on existing resources. This bill further facilitates local involvement by encouraging financial or in-kind contributions to these programs from all sectors of the community. These contributions can take several forms other than money, including the donation of space by the public school system. Volunteers from public service organizations or from local high schools and colleges can also offer an important contribution to the quality of any school-age child care program.

CHILDREN SPEAK OUT

Mr. President, the newly formed Senate Children's Caucus recently held their first policy forum on the issue of "latchkey" children. Experts spoke to the physical and psychological risks inherent in the "latchkey" predicament as well as to the need for national leadership in this area. The

11-059 O-87-3 (Pt. 13)

ones who spoke most eloquently about the "latchkey" phenomena and the value of after school child care programs, however, were the children themselves. High school students who volunteer at local after-school programs spoke about the boredom and the occasional fear they felt when they were "latchkey" children, and did not have access to the kinds of programs they now function in as volunteers. The younger child care program participants spoke about the fun they had after school and the strong friendships they had made in the program. It became clear that these programs functioned not simply as a holding center or a safe haven for children until their parents returned home from work. In deed, these children's participation in a school-age child care program substantially enhanced the quality of their lives.

Dramatic changes in the composition of American families and of the American workforce have resulted in an increased demand for child care of every variety for children of every age. Nevertheless national policy in the area has lagged for behind. Almost 20 percent of our Nation's children are living in one/parent households for a significant portion of their lives. More than one-half of mothers from two-parent families work. Despite these facts of our national life, the title XX social services block grant has been cut and child care food programs have experienced drastic reductions. In the one area where we have made some progress—the child care tax credit—we have failed to gain refundability for this provision. Consequently, those most in need of Federal assistance to finance essential child care services, receive no benefit from this provision in the tax code. Efforts to adopt comprehensive national child care legislation have been underway in the Congress for well over a decade. As a cosponsor of Senator CRANSTON's bill, S. 4, I have long been committed to a comprehensive national response to the enormous need for child care in our Nation. The "School Facilities Child Care Act" addresses only one small part of the national child care need, but the modest nature of our porposal makes it no less worthy of serious consideration. We cannot wait to address this problem and our children cannot wait for our attention and support. A substantial percentage of a whole generation of American children sit home, alone, until we choose to act. I urge my colleagues to join us in support for this important measure.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1531

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "School Facilities Child Care Act".

STATEMENT OF FINDINGS AND PURPOSE

SEC. 2. The Congress finds that—

(1) the need for day care for the young school-age child before school, after school, during school holidays, and during school vacations when parents must work, is a national problem, affecting more and more families every year;

(2) approximately 6 million children, between the ages of 6 and 13 take care of themselves when they return home from school;

(3) unsupervised children run physical and psychological risks, including accidents and feelings of loneliness and fear;

(4) research studies have indicated increased likelihood of alcohol and drug abuse and delinquent behavior among unsupervised "latchkey" children;

(5) the number of existing child care programs designed to meet the needs of young schoolchildren for before and after school supervision are scarce, frequently filled to capacity and often unable to subsidize care for children from families with limited financial resources;

(6) the Federal Government has a role in the promotion of quality and adequate child care services which contribute to the well-being of children and families; and

(7) the use of the public school as the site for before and after school care offers effective utilization of existing resources.

(b) Recognizing that the parent is the primary influence in the life of the child and that the parent must have ultimate decisionmaking authority on issues relating to the welfare and care of the child, it is the purpose of this Act—

(1) to encourage the development of partnerships among parents, public elementary and secondary school educators and child care providers designed to serve the interests of school-age children in need of before and after school care;

(2) to promote the availability of child care services to school-age children in need of services;

(3) to provide financial assistance to public agencies and private nonprofit organizations utilizing public school facilities for before and after child care services;

(4) to provide assistance to families whose financial resources are insufficient to pay the full cost of services for before and after school care; and

(5) to encourage State and local educational agencies and community organizations to assess the need for school-age child care services and to promote public awareness of the need to provide adult supervision of school-age children and the availability of programs to provide such services.

DEFINITIONS

SEC. 3. As used in this Act—

(1) the term "elementary school" has the same meaning given that term under section 198(a)(7) of the Elementary and Secondary Education Act of 1965;

(2) the term "equipment" has the same meaning given that term by section 198(a)(8) of the Elementary and Secondary Education Act of 1965;

(3) the term "institution of higher education" has the same meaning given that term under section 1201(a) of the Higher Education Act of 1965;

(4) the term "local educational agency" has the same meaning given that term under section 198(a)(10) of the Elementary and Secondary Education Act of 1965;

(5) the term "school-age children" means children aged five through thirteen;

(6) the term "school facilities" means classrooms and related facilities used for the provision of free public education;

(7) the term "secondary school" has the same meaning given that term under section 198(a)(7) of the elementary and Secondary Education Act of 1965;

(8) the term "Secretary" means the Secretary of Health and Human Services;

(9) the term "State" means each of the several States, the District of Columbia, and the Commonwealth of Puerto Rico, Guam, American Samoa, the Virgin Islands, the Trust Territory of the Pacific Islands, and the Northern Mariana Islands; and

(10) the term "State educational agency" has the meaning given that term under section 198(a)(17) of the Elementary and Secondary Education Act of 1965.

PROGRAM AUTHORIZED

SEC. 4. (a) The Secretary of Health and Human Services is authorized, in accordance with the provisions of this Act, to make grants to public agencies and private nonprofit organizations having the capacity to furnish school-age child care services to assist such agencies and organizations to establish and operate school-age child care services in public school facilities.

(b)(1) There are authorized to be appropriated $15,000,000 for the fiscal year 1984 and for each of the succeeding fiscal years ending prior to October 1, 1986. Amounts appropriated pursuant to the first sentence of this subsection shall remain available until expended.

(2) Not more than 5 per centum of the amount appropriated in each fiscal year under paragraph (1) shall be available for administrative expenses.

APPLICATIONS

SEC. 5. Each public agency or private nonprofit organization having the capacity to furnish school-age child care services which desires to receive a grant under this Act shall submit an application to the Secretary at such time, in such form, and containing or accompanied by such information as the Secretary may reasonably require. Each such application shall—

(1) describe the need for and the type of child care services to be furnished in school facilities of an elementary or secondary school or a public institution of higher education in the community;

(2) provide assurances that the applicant has knowledge of and experience in the special nature of child care services for school-age children;

(3) provide assurances, in the case of an applicant that is not a State or local educational agency, that the applicant has or will enter into an agreement with the State or local educational agency or public institution of higher education containing provisions for—

(A) the use of school facilities for the provision of before or after school child care services (including such use during holidays and vacation periods),

(B) the restrictions, if any, on the use of such space, and

(C) the times when the space will be available for the use of the applicant;

(4) provide an estimate of the costs of the establishment and operation of the child care service program in the school facilities,

including the proposal for a fee schedule for child care services;

(5) provide for the establishment of a sliding fee schedule based upon the services provided and family income adjusted for family size for children receiving services assisted under this Act;

(6) provide assurances that the parents of school-age children will be involved in the development and implementation of the program for which assistance is sought under this Act;

(7) provide assurances that the applicant is able and willing to seek to enroll racially, ethnically, and economically diverse as well as handicapped school-age children in the child care service program for which assistance is sought under this Act;

(8) provide assurances that the child care program is in compliance with State and local licensing laws and regulations governing day care services for school-age children;

(9) provide assurances that the applicant will participate in data collection and evaluation activities relating to the program for which assistance is sought and will report such information as the Secretary may reasonably require to carry out section 6;

(10) describe the liability insurance coverage which the applicant intends to purchase; and

(11) provide such other assurances as the Secretary may reasonably require to carry out the provisions of this Act.

(b) In approving applications under this subsection (a) of this section, the Secretary shall—

(1) assure that there is an equitable distribution of approved applications both with respect to States and between innercity, urban, suburban, and rural areas;

(2) give priority to applications from applicants in communities in which there is the greatest need for child care services for school-age children and in which there is a shortage of economic resources for the provision of child care services for such children; and

(3) give consideration to applicants who can illustrate an identifiable base of support from the community in the form of financial or in-kind contributions from other agencies, parents groups, business concerns, or civic organizations.

NEEDS ASSESSMENT; REPORT

SEC. 6. (a) The Secretary shall carry out a program of collecting data from recipients of assistance under this Act designed to provide a national needs assessment for child care services of school-age children in the United States. The data shall include number of children served, number of children awaiting care, income distribution of families, percentage of families requiring reduced or waived fees.

(b) Not later than 60 days after the end of each fiscal year, the Secretary shall prepare and submit to the Committee on Education and Labor of the House of Representatives and the Committee on Labor and Human Resources of the Senate a full and complete report of its activities under this Act during the preceding fiscal year, together with a needs assessment of the availability of, and need for Federal support for, child care services for school-age children in each State in the United States.

NATIONAL CLEARINGHOUSE ON SCHOOL AGE CHILD CARE

SEC. 7. From the amount reserved under section 4(b)(2), the Secretary shall establish and operate a clearinghouse on school age child care programs. The clearinghouse shall collect and disseminate to the public information pertaining to programs and services available for the provision of school age child care, together with ways of coordinating such programs and services with other programs and services, including education and recreation, provided to school age children. The clearinghouse shall also provide technical assistance to public agencies, private nonprofit organizations, and groups of parents desiring to establish local school age child care programs or services.

The Secretary is authorized to enter into contracts with qualified public agencies and private organizations to operate the clearinghouse established or designated under this section. The Secretary is also authorized to accept donations from public and private organizations and individuals for the purpose of operating the clearinghouse.

PAYMENTS

SEC. 8. (a) From the amounts appropriated under section 4, the secretary shall pay, in accordance with the provisions of this Act, the amount required to carry out the services described in each application approved under section 5.

(b) Payments under this Act shall be made as soon after the approval of the application as is practicable.

ADMINISTRATION

SEC. 9. (a) In order to carry out the provisions of this Act, the Secretary is authorized to—

(1) appoint and fix the compensation of such personnel as may be necessary;

(2) procure temporary and intermittent services of experts and consultants as are necessary to the extent authorized by section 3109 of title 5, United States Code;

(3) precribe such regulations as the Secretary deems necessary;

(4) receive money and other property donated and bequeathed, or devised, without condition or restriction other than it be used for the purposes of this Act; and to use, sell, and otherwise dispose of such property for the purpose of carrying out the functions of the Secretary under this Act;

(5) accept and utilize the services of voluntary and noncompensated personnel and reimburse them for travel expenses, including per diem, as authorized by section 5703 of title 5, United States Code; and

(6) enter into contracts, grants, other arrangements, or modifications that are necessary to carry out the provisions of this Act.

(b) The Secretary shall submit to the President and to the Congress an annual report of the program authorized by this Act.

WITHHOLDING

SEC. 10. Whenever the Secretary, after reasonable notice and opportunity for a hearing to any applicant, finds that there has been a failure to comply substantially with the provisions set forth in the application approved under section 5, the Secretary shall notify the applicant that further payments will not be made under this Act until he is satisfied that there is no longer any failure to comply. Until the Secretary is so satisfied, no further payments shall be made under this Act.

AUDIT

SEC. 11. The Comptroller General of the United States, and any of his duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of any applicant and any contractee receiving assistance under this Act that are pertinent to the sums received and disbursed under this Act.

● Mr. PELL. Mr. President, I am introducing today with my colleague from Michigan (Mr. RIEGLE) a bill entitled the School Facilities Child Care Act. The bill is a careful and initial attempt to address a large and growing problem for our Nation: the problem of "latchkey" children.

"Latchkey" children possess no authoritative definition of who they are, but they can best be described as children in kindergarten and elementary schools who are forced to leave home by themselves in the morning or let themselves back into the house in the afternoon, often with a key fastened to their clothing or hidden near the door. They must do so because their parents work at full-time jobs and cannot be home with them in the morning before school starts and in the afternoon when school has finished. Many parents must leave for work at 7 or 7:30 a.m., and they often do not arrive home until 5:50, 6, or 6:30 in the afternoon. The children of these parents must fend for themselves at home during the hours when school is not in session if day care, relatives, or other activities are not available.

The problems presented by latchkey children have two dimensions, Mr. President. One is the large and growing number of latchkey children whose needs have not been met; the other dimension is the pyschological and physical risks that latchkey children are subject to.

The numbers are difficult to define. Parents are not anxious to admit that they allow their young children to remain at home alone for part of the day, so survey results can vary greatly according to whether parents or children are interviewed. Of the 28 million children in this country who are between the ages of 6 and 13, estimates of the number of latchkey children run from 1.8 million to 15 million. Whatever the number, it will continue to grow: it is estimated that by 1990, the number of children aged 6 to 13 will grow by 10 percent, to 30.6 million. The amount of government resources devoted to day care of any type, meanwhile, has been diminishing: Title XX, the fund for low-income social programs and the largest source of assistance for day care, has been reduced drastically in recent years, and the amount spent on day care has gone from $714 million in 1981 to approximately $500 million in 1982.

According to Dr. Lenora Cole-Alexander, Director of the Women's Bureau at the Department of Labor, only 54 percent of the children under 13 in need of child care receive it today. Dr. Thomas Long, of the School of Education at Catholic University in Washington, has found in surveys

taken in Washington, Houston, and Phoenix that one-third of school age children spend time at home by themselves.

These figures, Mr. President, give us the quantitative dimensions of the problem. What defines the problem and makes our attention urgent, however, is the knowledge of the psychological and physical damage that can occur to latchkey children.

According to Dr. Long, latchkey children experience fear at a rate that is much higher than for children who are cared for by an adult. Loneliness and boredom are also much more likely to occur. Although it is possible for some latchkey children to play with other children in their neighborhoods, for many children this is not possible because their parents instruct them to stay safely in the house when the parent is not at home. It is also not possible when other children live some distance away. The absence of contact with other children for significant periods of the day can result in a noticeable lack of socialization for the latchkey child. This lack of socialization can continue in the child's teen years if he or she has no transportation for after school and vacation activities.

Graphic and moving examples exist of the meaning of such isolation. A 1981 U.S. News & World Report article described a child in Phoenix who patrolled his house with a baseball bat in one hand and a shoe in the other, checking the windows every 15 minutes to watch for intruders. In a Cleveland suburb, a 7-year-old boy returned home every day to lock himself in the bathroom and pray that no one would break into the house before his parents arrived home. An elementary schoolteacher in Indianapolis estimated that as many as 80 percent of the school's students went home to empty houses.

As arresting as these examples are, they form the subtle and invisible damage of the latchkey phenomenon. The visible damage can be more tragic because it involves physical damage and death. Six thousand children aged 5 to 14 die in accidents every year, including 1,000 in fires; in almost all of these situations, no adult is present. In 1981, the Newark, N.J., Fire Department reported that 1 in 6 calls received by the fire department were from children home alone.

Mr. President, these sad and unfortunate instances of loneliness, fear, and harm are not the products of increased negligence or irresponsibility by parents. They are the products of a changing world, a world that bears little resemblance to the one which you and I grew up in. There are many more single-parent families, and most parents must work. Children, by necessity, have been left to fend for themselves for part of the day.

Mr. President, there is a great need for Federal leadership in this chasm between the needs of school age children and the services presently available to them. Child care activities provided to children at the same site on which they already attend kindergarten or elementary school is one answer which is now being explored, and I think that the results have been very positive.

In my own State of Rhode Island, a very successful pilot program has existed for 2 years in South Kingstown. In 1980, the Women's Club of South County became interested in the problems presented by latchkey children, and with the school board's approval conducted a survey of the parents of elementary schoolchildren in South Kingstown. Fifty percent of the parents responded that some sort of day care was needed for their school-aged children. Since that time, the Women's Club of South County has operated a program at the Wakefield Elementary School which has proven to be very popular. The women's club decided to limit enrollment to 25 students per day because its own resources were limited, and to offer an after school day care program from 3 to 6 p.m. every schoolday for children in kindergarten through fourth grade. Recreation, crafts, skills, snacks, and an occasional movie are offered. I am pleased to know that the program has maintained a full enrollment, and that its two staff members and its volunteers from the women's club and the local community have been very busy. The director of the project states that it has almost grown out of hand, and that they have had to turn children away. With its popularity has come increased interest: Parents from other schools have asked about the pilot program, and the town of Narragansett has asked the Women's Club of South County to set up a similar program next fall at the Narragansett Elementary School.

With the program's popularity have also come increasing financial burdens. With the use of donated school space and a part-time director and assistant director, the Wakefield school program has charged only $2 per child per day, but the women's club has had to contribute administrative funds by holding fundraising events. This year, it has applied to a private foundation for financial assistance. With 850 children at the Narragansett School and with 700 children in the five South Kingstown elementary schools, there is a much greater need than the women's club can meet with its present resources. The women's club would also like to be able to provide care during school vacations, but cannot do so presently.

Successful programs making use of school facilities exist in other parts of the country as well. Here in the Washington area, Arlington County, Anne Arundel County, and the District of Columbia operate successful programs which are very popular with parents and children. According to Michelle Seligson, director of the School-Age Child Project at Wellesley College, approximately 100 child-care programs in the country make use of school facilities for latchkey children. If we can assume that less than half of the 28 million children in this country between the ages of 6 and 13 receive child care, the then there is a severe need for Federal leadership in this area.

The bill that I am introducing with Senator RIEGLE provides that Federal leadership. Our bill will serve as a catalyst, bringing attention to bear on the inexpensive and efficient partnerships that can be built between schools, parents, and nonprofit day-care providers to provide before and after school care for children in kindergarten and elementary school. This bill does not seek to provide funds on the scale of the $500 million that is now used for day care in title XX funds, but rather generate a movement, we hope, toward increased local awareness and activity.

The School Facilities Child Care Act would accomplish this task by authorizing the Secretary of Health and Human Services to make grants to public agencies and to private nonprofit organizations for the purpose of furnishing child-care services in public school facilities. Local agencies or organizations would apply directly to the Secretary for grants to initiate school-child care, and the Secretary will be required to assure an equitable distribution between inner city and rural areas, as well as to give priority to those communities in which there is the greatest need but the fewest economic resources for the provision of care. The Secretary would also conduct a national assessment of the need for school age child care in the United States, and initiate a national clearinghouse for information and technical assistance. The total cost authorized would be $15 million per year for 3 years.

Mr. President, we live in the midst of a changing society. Many families have only a single parent. Women are today a strong and ever-growing part of the labor force, and few adults, whether single or married, can afford the luxury of caring for their children full time. A full-time working life has become the norm for most parents, yet school for their children still occupies only part of the day.

Our schools are based on an agrarian calendar, one that no longer exists for the vast majority of our children. In the years ahead, we will undoubtedly see the school day extended to allow for more classroom time and more

nonacademic activities. In 1983, however, we are tragically confronted with the vision of millions of young children who are at home alone for several hours every day, and those children experience fear, loneliness, social isolation, and physical harm. It is time that our Government call attention to this situation, and to the fact that it can be stopped and corrected. It is time for us to help young schoolchildren who often cannot help themselves. It is time to put vacant classrooms to use after school to help those children, and it is time that we in Congress did something to start this process rolling. I call on my colleagues to help me support and pass this bill.●

● Mr. DODD. Mr. President, I am pleased to join Senators RIEGLE and PELL in sponsoring the "School Facilities Child Care Act of 1983."

On June 9, Senator SPECTER and I convened the first policy forum of the Children's Caucus. That forum focused on the problems confronting latchkey children or those youngsters who must care for themselves after school.

At that forum, we learned that between 6 and 15 million American children could be home by themselves between the hours of 3 in the afternoon and 6 or 7 in the evening. Such children may face four serious risks. They may be injured accidentally or victimized. They may become less willing to tackle school assignments because no one is home to help them. They may end up feeling lonely or bored. And, they may act badly, vandalizing neighborhood property.

We must provide latchkey children with alternatives to staying home alone if we are to protect them from such risks. Afterschool programs provide alternatives.

At the June 9 forum, we heard from two afterschool programs. The first, Park Elementary in Anne Arundel, Md., is funded under a 2-year action grant. After that 2 years, their funding runs out. The second, the Hearst afterschool program in Washington, D.C., is funded entirely by tuition paid by parents. The director of the Hearst program spoke at length about the numbers of parents in the District of Columbia who cannot afford to pay tuition for afterschool care.

This legislation would allow HHS to make grants to both private and public services in public schools. As such, it recognizes that the Federal Government should play a role in fostering partnerships between public schools and communities. Such partnerships will help us solve the latchkey problem.

I urge my colleagues to join with me in sponsoring this legislation to help meet the pressing need for afterschool care in this country.●

Mr. KENNEDY. Mr. President, I am pleased to be a cosponsor of this important legislation to safeguard our Nation's most precious natural resource—our children.

The economic pressure of our times, rigid workplace schedules, the phenomenon of both parents working outside the home, and the increase in single parent families have produced millions of latchkey children in our society. These are school age youngsters who return to empty homes after school closes. They let themselves in the house, turn on the television and wait for their parents to return home from work. Often they must remain indoors because their parents are afraid to allow them to go outside. Alone and unsupervised, often for several hours, these children represent a national scandal and a national responsibility.

Our society has changed. While it is pleasant to recall the ideal of the past—the village green full of children at play, mother at home with cookies and milk—that is simply not the reality for the overwhelming majority of American families. The fact is that over half of the mothers of school age children work outside the home. Six million children come home not to milk and cookies, but an empty home.

These children are our responsibility. Their parents do not have the individual resources to provide care for them. We must provide the support for development of afterschool programs to meet this need.

Psychology Today reports that in State College, Pa., the American Association of Unversity Women funded a program known as Phone Friend. Volunteers cover a phone bank to provide a point of contact for children home alone after school. The children call because they need assistance, advice, reassurance, and help with homework.

Phone Friend is a laudable effort, but it is no substitute for afterschool care and supervision. It is a sad commentary on our society when 7 year olds must use a telephone when they need comforting or help with homework.

This legislation will begin to provide much needed programs for afterschool care. Public and private agencies will receive grants to develop and administer after school care programs for children ages 6–13.

The parents of Brookline, Mass., have developed a model program for before school and afterschool child care. Brookline afterschool special program (BASS) provides a trained staff to supervise youngsters 8 to 12 years old. Transportation from the eight schools served is provided by the program.

For a fee within the reach of even single parents a child can enjoy supervised play, homework, and the traditional milk and cookies.

Mr. President, I would like to see programs like this in every community. The school age child care bill will support and encourage the development of programs like BASS. I look forward to the enactment of this important legislation.

By Mr. GARN (for himself, Mr. HEINZ, Mr. PROXMIRE, and Mr. DODD) (by request):

S. 1532. A bill to limit temporarily the acquisition of depository institutions and the commencement of certain new activities by State-chartered depository institutions, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

ACQUISITION OF DEPOSITORY INSTITUTIONS

● Mr. GARN. Mr. President, I am introducing, by request of Chairman Volcker and the Federal Reserve Board, a bill to impose a temporary moratorium, until December 31, 1983, on the establishment of nonbank banks and on the scope of nondepository activities engaged in by banking and thrift organizations.

Since last year, the Federal Reserve has been concerned that the skillful use of the banking statutes has enabled many new banking organizations to avoid being subject to the regulatory framework and Federal Reserve supervisory authority contained in the Bank Holding Company Act.

As indicated by Chairman Volcker's transmittal letter, the purpose of the moratorium is to provide time for Congress to consider legislation designed to "address the fundamental need to adapt the banking and financial system to a rapidly changing world." In sum, participants in the financial marketplace are continuing to pursue aggressive and innovative business strategies which reflect technological and other contemporary advancements which were not even known or imagined when such laws were enacted.

I agree wholeheartedly with Chairman Volcker that Congress must address the changes in the financial system. How to insure such congressional attention is, in my opinion, unclear. The best way is to meet the issues head on, but some, including Chairman Volcker, believe that a moratorium is necessary to make certain that the world does not change completely before Congress acts. However, moratoriums also run the risk of being open-ended delays, much like regulation Q and the interest rate differential. To his credit, Chairman Volcker has developed a proposal with a short time limit and urges Congress to consider more substantive legislation in the interim.

As another part of this process, I expect that next week the Treasury Department will submit their updated version of last year's nonbanking activities legislation. When I receive it, I anticipate introducing this legislation

by request of Secretary Regan. As with the Federal Reserve's moratorium efforts, the Treasury Department has been meeting with all interested groups during the past several months in an effort to develop further the "separate subsidiary" legislation introduced last year as S. 2490. I look forward to receiving this revised proposal as a possible response to the ongoing evolution of our financial services industry.

The financial system established in the 1930's has served us well, and certainly the underlying principles of a diverse and a safe and sound system must be preserved. However, as is being highlighted by the committee's financial service industry oversight hearings, the organizational structure of the system is being changed by consumer demands and institutional innovations. The test for Congress is to insure that the banking statutes promote a diverse and safe and sound system that is better able to adjust to changes in the marketplace environment.

The committee's financial oversight hearings, commenced in early April and scheduled to end next week, will have involved 13 days of hearings and testimony from 63 witnesses representing a broad range of regulators and participants in the financial services industry. The hearings have served to focus attention on the continuing changes in the industry. Because of the oversight nature of these hearings and my desire to gather as much information as possible on conditions in the industry, I did not want to introduce legislation, such as the moratorium bill or the Treasury's separate subsidiary proposal, which would change the character of the hearings into more narrowly focused legislative hearings. In fact, in my discussions with Chairman Volcker during the past several months, I have indicated that I wanted to hold off until the hearings were concluded before introducing the moratorium bill being developed by the Federal Reserve. Now that the oversight hearings are coming to a close, I believe it is appropriate to introduce legislative proposals which affect some of the specific issues arising out of the hearings. And following the end of these hearings, I will schedule committee hearings in the near future on the Federal Reserve moratorium bill and the Treasury's depository institutions' activities proposal.

Mr. President, the following Senators wish to be cosponsors of the moratorium bill: Senators HEINZ, PROXMIRE, and DODD.

Also, I request unanimous consent that the transmittal letter from Chairman Volcker, the bill, and the section-by-section summary be printed in full in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1532

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SEC. 1. The effective date of this Act is the date of its enactment and this Act is hereby repealed on December 31, 1983.

SEC. 2. On or after the effective date of this Act, no company that is engaged directly or indirectly, including through a subsidiary, in any activity not permitted for a bank holding company under section 4 of the Bank Holding Company Act shall acquire control of any insured bank, and no company shall acquire control of insured banks in more than one state without prior approval under the Bank Holding Company Act.

SEC. 3. On or after the effective date of this Act, no company that is engaged directly or indirectly, including through a subsidiary (other than an insured institution), in any activity other than an activity permitted for a multiple savings and loan holding company on the effective date of this Act under subsection (c)(2) of section 408 of the National Housing Act or for a bank holding company under section 4 of the Bank Holding Company Act shall acquire control of any insured institution, except as provided in subsection (m) of section 408 of the National Housing Act.

SEC. 4. No company that acquires or acquired control of an insured bank or insured institution on or after June 23, 1983, shall retain control of such bank or institution on or after the effective date of this Act and engage directly or indirectly, including through a subsidiary (other than an insured institution), in any activity other than an activity permitted for a bank holding company under section 4 of the Bank Holding Company Act or for a multiple savings and loan holding company under subsection (c)(2) of section 408 of the National Housing Act, unless such insured institution was acquired pursuant to subsection (m) of section 408 of the National Housing Act. After the effective date of this Act, no company shall retain control of insured banks in more than one state that were acquired on or after June 23, 1983, unless such banks were acquired with prior approval under the Bank Holding Company Act.

SEC. 5. On or after the effective date of this Act, no state-chartered depository institution may commence, either directly or indirectly, including through a subsidiary, any activity not previously and lawfully engaged in by that institution unless (a) such activity was authorized for that type of institution explicitly and not by implication by a state statute adopted, or by interpretation promulgated thereunder, prior to January 1, 1983; (b) such activity is permitted under section 4(c)(8) of the Bank Holding Company Act for a bank holding company; or (c) such activity is explicitly authorized by a state statute, or interpretation promulgated thereunder, and is performed exclusively in the state authorizing such activity for customers present in that state; provided, however, that this section does not authorize the conduct of any activity currently prohibited to state chartered depository institutions under sections 20 or 21 of the Glass-Steagall Act. Nothing in this section shall prohibit a state chartered savings and loan association or savings bank from engaging in any activity expressly permitted for a federal savings and loan association or savings bank under the Garn-St Germain Depository Institutions Act of 1982.

SEC. 6. Any state-chartered depository institution that comenced, directly or indirectly, including through a subsidiary, on or after June 23, 1983, any activity that would have been prohibited by this Act if commenced after enactment of this Act shall, upon enactment of this Act, immediately terminate such activity.

SEC. 7. The provisions of this Act shall be enforced by the appropriate federal agency under the Financial Institutions Supervisory Act of 1966, as amended, and for this purpose any company that controls an insured bank shall be treated as a bank holding company.

SEC. 8. For purposes of this Act, the terms:

(a) "bank holding company", "company", "control", and "subsidiary" have the same meanings as provided in section 2 of the Bank Holding Company Act;

(b) "depository institution" has the same meaning as provided in 12 U.S.C. 461(b);

(c) "insured bank" has the same meaning as provided in 12 U.S.C. 1813(h) and shall also include any institution that is eligible to become an insured bank under 12 U.S.C. 1815, and any institution that accepts deposits that the depositor may withdraw by check or similar means for payment to third parties and engages in the business of making commercial loans. The term "bank" does not include any foreign bank having an insured branch or an institution expressly exempted under section 2(c) of the Bank Holding Company Act; and

(d) "insured institution" and "multiple savings and loan holding company" have the same meanings as provided in section 408 of the National Housing Act.

SECTION BY SECTION ANALYSIS

Section 1 of the bill provides that the Act will be effective upon enactment and is repealed effective December 31, 1983.

Section 2 of the bill prohibits the acquisition of an "insured bank" by any company engaged in activities that are impermissible for a bank holding company under section 4 of the Bank Holding Company Act. "Insured bank" is broadly defined to include any bank, the accounts of which are insured by the FDIC, as well as any institution that is eligible to become an FDIC insured bank and any institution that accepts demand or transaction account deposits and engages in the business of making commercial loans. Thus, a company that is engaged in an activity that is not now allowed for bank holding companies, such as a securities or insurance underwriter or a retailer, could not acquire a bank through the so-called "nonbank bank" loophole in the Bank Holding Company Act by divesting the bank's transaction accounts or commercial lending portfolio. This section would not prohibit the acquisition of an additional bank by a bank holding company, which is lawfully engaged in nonbanking activities pursuant to grandfather rights or other provisions of section 4, such as section 4(c)(5) or the export trading company provisions.

Section 2 also prohibits any company from acquiring control of banks in more than one state without approval under the Bank Holding Company Act. Acquisitions that are consistent with the Douglas Amendment would continue to be permitted, for example, where a given state invites entry by out-of-state banking organizations or where the acquisition involves a trust

company that does not generally accept deposits other than in a fiduciary capacity.

Section 3 contains limitations applicable to the acquisition of thrift institutions similar to those applicable to the acquisition of banks under section 2. This section of the bill thus prohibits the acquisition of an institution, the accounts of which are insured by the FSLIC, by any company engaged in activities other than those that are permissible for a multiple savings and loan holding company under the Savings and Loan Holding Company Act as of the effective date of the Act or for a bank holding company under the bank Holding Company Act. The activities authorized for multiple savings and loan holding companies are generally the same as those for bank holding companies. They differ in areas such as real estate development, property management and certain investment advisory and futures commission activities. An exception to the prohibition of this section is provided in the case of an acquisition approved under the emergency thrift acquisition provisions in section 123 of the Garn-St Germain Depository Institutions Act of 1982. Thus, this section would not prohibit the acquisition of a failing FSLIC insured thrift by a nondepository company after the priorities specified in section 123 of the Garn-St Germain Act have been applied.

Section 4 of the Act would require any company that acquires a bank or insured institution after the date of introduction of the bill to divest such bank or insured institution or conform its activities to those allowed under the Bank Holding Company Act or the Savings and Loan Holding Company Act. This section is intended to deter a possible rush of acquisitions prior to enactment of the bill.

Section 5 of the Act imposes a limitation on nonbanking activities authorized for state chartered depository institutions. This section is prospective from the date of the bill and does not affect any activity commenced by a state chartered depository institution before introduction of the bill. This section does prohibit a state chartered depository institution from commencing after the effective date of the Act any activity not previously engaged in unless:

(a) the activity was expressly authorized by state statute or an interpretation thereof prior to January 1, 1983;

(b) the activity is permitted for bank holding companies under section 4(c)(8) of the Bank Holding Company Act; or

(c) the activity is expressly authorized by state law, is performed exclusively in the authorizing state, and is provided only to customers physically located in the state.

Section 5 also makes clear that it is not intended to authorize any securities activity prohibited under sections 20 or 21 of the Glass-Steagall Act, including the issuance, underwriting, sale, or distribution of securities. Section 5 further does not prohibit the commencement of activities by state chartered thrift institutions under state statutes that allow such institutions to perform any activity authorized for a federal thrift institution under the Garn-St Germain Depository Institutions Act of 1982, which authorized expanded commercial lending and other activities.

Section 6 requires the immediate termination of any activity commenced by a state chartered depository institution during the period between the introduction of the bill and its enactment if the activity would have been prohibited by section 5 if the activity had been commenced after enactment. This section, like section 4 of the bill, is intended to prevent a possible rush to commence new nonbanking activities in anticipation of enactment of the statute.

Section 7 of the Act provides for enforcement by the appropriate federal agency under the Financial Institutions Supervisory Act of 1966 (i.e., the Comptroller of the Currency in the case of a national bank; the Federal Reserve Board in the case of a state member bank or bank holding company; the FDIC in the case of a state federally insured nonmember bank; and the FHLBB in the case of an FSLIC insured thrift or a S&L holding company). For this purpose, a company that acquires control of an insured bank would be treated as a bank holding company.

Section 8 of the Act defines terms used in the Act. Generally, with the exception of "insured bank" as noted in the discussion of section 2 above, the terms used have the same meaning as provided elsewhere in existing law.

FEDERAL RESERVE SYSTEM,
Washington, D.C., June 21, 1983.

Hon. JAKE GARN,
Chairman, Committee on Banking, Housing and Urban Affairs, Washington, D.C.

DEAR CHAIRMAN GARN: We have discussed on a number of occasions both before and after my recent testimony before the Senate Banking Committee the need for positive banking legislation to address the fundamental need to adapt the banking and financial system to a rapidly changing world. We both have spoken publicly about the need for legislative action and of the dangers to the financial system inherent in the present ad hoc and disorderly developments.

As a first, and limited, step toward responding to these concerns, I am enclosing draft legislation, with a section by section analysis, to halt temporarily the acquisition of banks and thrifts by nondepository institutions and, on this same temporary basis, to establish rules for nonbanking activities by state chartered depository institutions and their subsidiaries. You have suggested, and I agree, that it would be desirable to have a specific legislative proposal to accomplish these limited and transitional objectives placed before the Congress to focus and expedite public discussion.

As I have emphasized, this is temporary legislation—expiring of its own force on December 31, 1983—designed to avoid a preemption of Congressional discretion and to provide the time for the Congress to take up the urgent decisions on fundamental permanent banking legislation. Intensive effort by the Congress, with assistance from the agencies and other interested parties, will be required to assure that the time gained from this temporary action will be used constructively and effectively to achieve agreement on the permanent legislation. For myself personally, and for the Board, I want to assure you that we are prepared to work with you to enact the needed restructuring that will have such a major impact on the future of our financial system.

Sincerely,

PAUL A. VOLKLER.●

Mr. PROXMIRE. Mr. President, I am pleased to join in introducing legislation to establish a moratorium on the acquisition of so-called "non-bank banks" and savings and loan associations by nonbanking firms. The moratorium would also stop bank holding companies from expanding into areas not functionally related to banking by taking advantage of favorable State laws such as the one recently enacted in South Dakota.

Normally I am reluctant to support a moratorium on new developments in the marketplace, especially when they involve innovative changes that will lead to improved goods and services for the people. But I do not think the recent developments in the banking industry can accurately be called innovations. Instead, they more closely resemble the actions of clever attorneys attempting to find a way around established public policy. To be sure, these policies need to be reassessed in the light of our modern economy. But if there is to be change, it should come as a product of careful deliberation by the Congress and not through the creative exploitation of loopholes by expansionist firms and their regulatory allies.

The basic policies that are threatened with erosion are those which seek to separate the business of banking from other commercial endeavors and especially the securities business. Why do we have such policies in the first place? One reason, of course, is to maintain the safety and solvency of our banking system by limiting risk. But equally important, in my judgment, is the desire to avoid a conflict of interest between the function of banking and other commercial and industrial activities. Banking is clearly an industry affected with a public purpose. The essence of banking is to allocate a scarce resource—credit—to those enterprises where it can be most productively employed. If bankers do their job well, the entire society benefits through higher economic growth. If bankers do poorly, society loses through lower rates of growth and productivity. Thus we all have a stake in seeing that bankers make their important credit judgments based solely on the economic merits of a project and not on the basis of some other competing consideration such as a desire to protect their own equity investment in a company.

This is why we do not permit banks to buy stocks and why we confine their activities to areas that are closely and functionally related to banking. We want to be sure that bankers are as impartial as they can possibly be in allocating credit among alternative uses.

The two laws which implement these concerns are the Glass-Steagall Act and the Bank Holding Company Act. The central purpose of Glass-Steagall is to separate the business of commercial banking from investment banking. The law grew out of the abuses during the 1920's when many large banks established securities affiliates. This was a nice arrangement for the bank, but it proved to be disas-

trous for the public. If, for example, a large New York bank made too many loans to a company or foreign government overburdened with debt, it did not have to run to the IMF or the Federal Government for a bailout. It could bail out its own bad loans by refinancing them as bonds and selling them to their unsuspecting customers and correspondent banks. When the Great Depression came, many country banks found themselves loaded down with worthless paper sold to them by the security affiliates of their big city correspondent bank. The Congress decided to avoid such conflict in the future by separating the business of commercial banking from the business of investment banking.

Likewise, the Bank Holding Company Act is designed to keep commercial banks in the business of banking. The Bank Holding Company Act came about because banks and their attorneys had figured out a way to get around the direct restrictions placed on banks by the States and the Congress. For example, the National Banking Act limits national banks to certain enumerated powers plus all other powers "incidental" to the business of banking. Holding companies were formed primarily to enable banks to do indirectly through a holding company affiliate what they could not do directly as a bank—namely, engage in activities that were not incidental to the business of banking.

Congress reacted to these "developments" in the marketplace by passing the Bank Holding Company Act of 1956 with amendments in 1970. The major thrust of the Bank Holding Company Act is to limit the activities of bank holding companies to those that are functionally related to banking. Thus while the powers available to bank holding companies are somewhat broader than the powers of individual banks, there is still a fairly strict separation between banking-type activities and other types of businesses.

I believe the major purposes behind these laws were valid when they were enacted and that they remain valid today. This is not to deny that these acts should not be broadened to permit a somewhat broader range of activities. Indeed, I have supported legislation permitting banks to underwrite municipal revenue bonds and to offer mutual funds. However, these decisions must be made carefully by the Congress on a case-by-case basis in order to preserve the underlying objectives these acts were designed to achieve. I certainly would not favor a wholesale repeal of the Bank Holding Company Act or the Glass-Steagall as some officials of the Reagan administration have suggested.

It is always possible, of course, that those who favor repeal are right in their contention that these laws no longer serve any legitimate public policy purpose. However, if this is what a majority in the Congress really believes, then these laws should be repealed directly by the Congress in a straightforward and upfront manner. The Congress should not by its silence or inaction be presumed to sanction the wholesale erosion of these laws by those who seek to get around them. In the absence of a definitive judgment by the Congress, the policies embodied in existing law must be deemed to be legitimate and valid.

This, then, brings me to the need for a moratorium to close several loopholes in our banking laws that have emerged in recent months. One loophole is the so-called nonbank bank whereby a nonbanking firm can acquire a bank outside the framework of the Bank Holding Company Act if the bank refrains from either making commercial loans or accepting demand deposits. When this occurs, the bank is deemed to be not a bank for purposes of the Bank Holding Company Act. This means any corporation in any line of business can acquire, own, and operate a bank as long as the bank does not accept demand deposits or does not make commercial loans. It would thus be entirely possible for a bank to raise money other than through demand deposits—while engaging in a full-scale commercial lending business and avoid regulation under the Bank Holding Company Act. General Motors could buy Chase Manhattan and legally operate it by converting its demand deposits to some other type of account or liability.

The second loophole is the dangerous precedent created by a South Dakota law allowing its State chartered banks to engage in all forms of insurance activities as long as the activities are conducted outside the State of South Dakota. South Dakota law also permits out-of-State bank holding companies to buy a State chartered bank in South Dakota. The effect of these two laws is to allow a large bank holding company such as Citicorp to buy a South Dakota bank and use that bank to acquire a large insurance company that operates in the other 49 States.

The South Dakota law is especially egregious because it retains the traditional separation between banking and insurance within its borders. The potential for anticompetitive tie-in sales is, in effect, exported by South Dakota to the other 49 States. This is tantamount to a selective repeal of the Bank Holding Company Act by one State for the other 49. If other States follow this precedent, the Bank Holding Company Act will become a toothless shell.

I believe the Congress can and should address these issues on a permanent basis. But in the meantime, I believe we need a little time to preserve our options while we are considering legislation to further restructure the financial services industry. The Senate Banking Committee is nearing completion of a comprehensive series of oversight hearings on the financial services industry with particular attention being given to the need to update Glass-Steagall and the Bank Holding Company Act in the light of today's economy.

It is not my intention to use the moratorium as an excuse for avoiding decision on these difficult issues. Indeed, I believe a moratorium could have just the opposite effect of giving Congress a fixed deadline by which to complete action on whatever legislation may be needed to liberalize Glass-Steagall and the Bank Holding Company Act. In the meantime, we should not allow the actions of a few expansionist firms to foreclose or preempt the right of the Congress to reach a reasoned and deliberate judgment.

● Mr. HEINZ. Mr. President, I rise to support the legislation just introduced by my chairman Senator GARN.

Congress has made considerable progress on legislation to restructure the financial services industry. The enactment of the Garn-St Germain Act in 1982 was a significant first step and demonstrates clearly the congressional intent to take responsible actions in this area.

At the time Congress passed the Garn-St Germain Act there was a broad bipartisan consensus that further legislation was needed. Both the House and Senate have already begun the process.

This legislation to provide an orderly transition to a stable yet less regulated marketplace is now threatened by financial institutions, Federal regulators, and State legislators which are attempting to reconstruct the chaotic, fragile, unregulated predepression financial system through the use of loopholes in Federal statutes.

Congress must not forgo this opportunity to produce sound forward-thinking legislation firmly based in public policy. If we do not respond intelligently we could easily face a recurrence of the economic and social tragedy that followed the crash of the interwoven financial system during the depression.

The issues and dangers involved are highly technical and complex. Congress, as stated in a recent GAO study, lacks much of the information it will need to make public policy decisions in this area. We do not as yet fully understand the impact of the enhanced competition provided by last year's legislation, nor do we understand the vulnerability of the economic recovery and many currently weak financial institutions to any changes we might make. The potential for costly mis-

takes if we act precipitously is a great danger.

Congress needs time to act cautiously and thoroughly, time that it will not have if every financial institution is forced to move through the loopholes in order to prevent placing itself at a competitive disadvantage.

If competitive panic is allowed to exist while Congress sits in deliberation, restructuring will be far more difficult and socially costly to accomplish. Our progress will be slowed. Congress will face the difficult decision of having to grandfather so many institutions as to render the legislation ineffective or to trap companies that meant no harm into forced divestitures.

Furthermore, it will be difficult, if not impossible, to resurrect the local banks, savings and loans, and other small institutions that are gobbled up across State lines and industry lines or those that simply get trampled out of existence in the panic. The ink was not dry on title VI of the Garn-St Germain Act passed in 1982 which restricts bank holding company insurance activities before South Dakota signed into law provisions that would enable such companies to circumvent congressional intent. What will become of Congress ability to legislate in this area if State legislatures use loopholes, as did South Dakota, to undue the effect of Federal restructuring laws as soon as we pass them?

Congress must retain control over the financial services industry restructuring process. To do so Congress must place a moratorium on the exploitation of loopholes in Federal statutes that place institutions beyond the standards of existing public policy. It is not the place of self-interested parties, Federal regulators, or State legislatures to threaten the public with a breakdown of a system that has functioned effectively for 50 years because Congress will not adopt a timetable suitable to them.

No harm or danger has been demonstrated if Congress was to take sufficient time to deal carefully with an issue of far-reaching consequences. No defense can be made for the use of these loopholes on substantive grounds. Congress must not be placed in the position of having to act precipitously in order to protect the public from these excesses.

I say Congress should reject such blackmail and impose a moratorium on the exploitation of loopholes in Federal financial services legislation. I am prepared to work with the chairman and other members of the committee to achieve such a moratorium.

I would also like to submit for the RECORD letters from the following organizations indicating their support for a moratorium, and ask unanimous consent that they be printed.

American Land Title Association.

Independent Bankers Association of America.

Independent Insurance Agents of America.

Investment Company Institute.

National Association of Casualty and Surety Agents.

The National Association of Life Underwriters.

Professional Insurance Agents.

Securities Industry Association.

Conference of State Bank Supervisors.

There being no objection, the letters were ordered to be printed in the RECORD, as follow:

INVESTMENT COMPANY INSTITUTE,
Washington, D.C., June 15, 1983.

Hon. JOHN HEINZ,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HEINZ: We are writing to inform you of our support of a legislative moratorium on further ad hoc integration of the financial services industry for a period of time that would give Congress the opportunity to consider a comprehensive legislative approach.

We are particularly concerned that recent actions by federal bank regulators represent unprecedented attempts to reverse public policies of many years standing through agency action. Instead of interpreting the laws to effectuate Congressional purpose, these agencies have decided to substitute their judgment as to appropriate public policy for that of the Congress.

As you know, your Committee is currently holding oversight hearings which may lead to major legislative changes in our present financial system. However, whatever legislation Congress decides to enact in this area will be difficult to implement if federal agencies succeed in effecting revolutionary changes in the financial marketplace through administrative actions. Moreover, careful Congressional deliberation will undoubtedly be prejudiced by such events.

In light of these considerations, the Institute's Board of Governors has unanimously endorsed the enactment of a fair, balanced moratorium affecting all segments of the financial services industry in order to provide time for rational decision-making by the Congress.

We hope you agree that the enactment of such a moratorium would assure that it will be the Congress which determines the major public policy issues involved.

Sincerely,

DAVID SILVER.

INDEPENDENT INSURANCE AGENTS OF AMERICA INC.,
Washington, D.C., June 14, 1983.

Senator JOHN HEINZ,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR HEINZ: In our testimony June 7, IIAA urged the Senate Banking Committee to take immediate action to forestall bank holding company circumvention of insurance restrictions adopted by the committee and Congress less than nine months ago. We are writing today to reiterate our request for prompt committee action, and to urge your support for a moratorium on certain financial institution activities as the best, quickest way to give the committee the time it needs to examine more comprehensive reform.

IIAA endorsed, and others submitted to the committee in connection with the insurance agents' June 7 testimony, a draft moratorium (copy attached) for your consideration. This moratorium would address in an equitable, comprehensive way most of the ambiguities in federal banking law and regulation now being used to dismantle our federal banking system without the benefit of Congressional review and decision.

As we noted in our June 7 testimony, it is not enough, in the context of banking, to look approvingly on the innovation of the marketplace or the legal ingenuity of our nation's largest banks. Congress must either determine that certain changes are in the public's interest, or, if they are not, must set limits that are relevant to the day to day conduct of banking.

The risks to depositors' money, the federal treasury, and the future viability of our banking system are simply too great to continue to permit individual state laws and regulatory activism usurp Congressional prerogative for a more careful review of banking issues.

Again, we urge you to support, and to seek prompt committee action on, the attached moratorium. I'd be happy to discuss this proposal further with you or your staff at your convenience.

Sincerely,

ROGER N. LEVY.

CONFERENCE OF STATE BANK SUPERVISORS,
Washington, D.C., June 14, 1983.

Re Non-Bank Bank Moratorium.

Hon. JOHN HEINZ,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR HEINZ: In my recent testimony before the Senate Banking Committee, I referred to a Congressional solution to the "non-bank bank loophole" as the number one short-range priority for CSBS (see attachments). As you know, that loophole allows entrepreneurs to circumvent the will of Congress by acquiring and operating banks without regard for the Bank Holding Company Act or controls over the mixing of banking with other lines of commerce. Regulatory steps taken by federal agencies have proved insufficient to prevent continued use of the loophole, thus underscoring the need for immediate Congressional action.

It is our understanding that you will sponsor legislation to place a moratorium on contined use of the non-bank bank loophole, pending Congressional fashioning of a permanent solution. CSBS supports you in your effort to restore purpose to the statutory scheme designed by Congress.

If the Conference can be of any assistance to you in this matter, please do not hesitate to call on us.

Sincerely,

SIDNEY A. BAILEY,
President.

AMERICAN LAND TITLE ASSOCIATION,
Washington, D.C., June 15, 1983.

Hon. JOHN HEINZ,
Senate Russell Office Building,
Washington, D.C.

DEAR SENATOR HEINZ: On behalf of the American Land Title Association, the national trade association of the land title industry [1], I would like to express our Associa-

[1] The American Land Title Association (ALTA) represents nearly 2000 land title insurers, title insurance agents, abstracters, and associate members

tion's support for legislation that would place a federal moratorium on state legislative banking initiatives that undermine the intended purpose of existing federal banking law.

Our Association strongly supported Title VI of the "Garn/St Germain Depository Institutions Amendments of 1982" that placed reasonable limitations on the insurance-related activities of bank holding companies and their affiliates. However, deliberate efforts are underway to circumvent Title VI limitations and thwart the will of Congress. Several large bank holding companies have "thumbed their nose" at congressional banking policies and are lobbying several state legislatures to process legislation that enables state chartered banks to engage in insurance activities presently foreclosed to bank holding companies.

The centerpiece of any comprehensive policy determinations in restructuring the financial marketplace must adhere to the principles of safety and soundness. The enactment of a federal moratorium measure would give Congress an opportunity to carefully consider fundamental and comprehensive banking reform. One stop shopping, the advent of computer technology, financial service acquisition hybrids, and bank marketing innovation all must be secondary to the mainstay of our banking system—the safety and soundness of depositors' money.

Of particular interest, ALTA is extremely concerned with the conflict of interest potential when banks, savings and loans, and other financial intermediaries are permitted to engage in the business of insurance. Lending institutions such as those affiliated with bank holding companies, have significant power to influence or control a borrower's decision on the selection of a provider of insurance services related to the extension of credit. This is particularly true in the case of title insurance, which is generally purchased only in connection with a real estate transaction and with the extension of credit related to the financing of such a transaction. Since the average consumer may purchase real estate only once or twice in his lifetime, and lacks the time, knowledge, or experience to shop effectively for such insurance, the lender is in a strong position to influence the cosumer to place his title insurance business with a company owned by or affiliated with the lender. Accordingly, we believe that the limitations contained in Title VI of the Garn/St Germain Act are necessary to insure that all providers of insurance will have a fair and equal opportunity to compete for the borrower's insurance business and that a free and competitive marketplace will be maintained for such insurance.

ALTA strongly endorses the federal moratorium initiative and urges the Senate Banking Committee to promptly reassert its prerogatives to insure that the limitations set forth in Title VI of the Garn/St Germain Act are not compromised by the adoption of inconsistent state laws.

Sincerely,

TOM MCDONALD,
President.

---

throughout the nation. The function of the Association's members is to provide for the safe and secure transfer of an investment in real estate.

INDEPENDENT
BANKERS ASSOCIATION OF AMERICA,
Washington, D.C., June 15, 1983.

Hon. JOHN HEINZ, III,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HEINZ: The Independent Bankers Association of America which represents more than 7,000 locally owned community banks located in 48 States and the District of Columbia strongly supports your efforts toward enactment of a legislative moratorium on the chartering of non-banks as subsidiaries of holding companies.

To date, approximately a dozen non-banking companies have obtained national bank charters for their subsidiaries by avoiding the two-pronged definition of a bank in the Bank Holding Company Act. By eliminating either their demand deposit or commercial lending operations, these "non-bank" subsidiaries are not considered banks for the purpose of the Bank Holding Company Act and are apparently not subject to Federal Reserve System supervision. The Comptroller of the Currency has given impetus to the development of non-banks by granting national bank charters to the subsidiaries of such diverse firms as the Dreyfus Corporation, Gulf and Western Corporation, Parker Pen Company and a California chain of furniture stores. These non-banks hold themselves out to the public as national banks, are examined by the OCC, offer FDIC-insured deposits, have access to the Federal Reserve discount window—yet escape regulation as a bank holding company based on a legal technicality. We do not believe this was the intent of Congress in enacting the Bank Holding Company Act.

Currently, the Comptroller is preparing to hold hearings on charter applications made by Dimension Financial Corporation which plans to establish a chain of 31 non-banks located in 25 states. Approval of these applications would be the broadest use yet of the non-bank bank technicality—and would be the first to set in place an interstate "banking" chain.

These developments obviously have major implications for laws regarding the separation of banking and commerce and the prohibition on interstate ownership of banking organizations. We believe these important public policy issues should be addressed by Congress, rather than dealt with by the regulatory fiat.

IBAA urges Congress to act immediately on a legislative moratorium. The Comptroller of the Currency has adopted a temporary moratorium to "reduce the pressure of escalating marketplace innovation at the national level that could outpace Congressional deliberation." However, he exempted the Dimension application, among others, from the moratorium, and absent legislative action, he could rescind his regulatory moratorium at any time. Congressional examination of the broad implications for competition, concentration of financial resources and the erosion of the traditional barriers between banking and commerce can only be effectively achieved by suspending the current confusion in the marketplace.

We appreciate your efforts and concern regarding this critical issue.

Sincerely,

JAMES D. HERRINGTON,
President.

SECURITIES INDUSTRY ASSOCIATION,
New York, N.Y., June 14, 1983.

Hon. JOHN HEINZ
U.S. Senate,
Washington, D.C.

DEAR SENATOR HEINZ: Thursday, June 16, 1983, marks the Fiftieth Anniversary of an event of singular and continuing significance for our financial system, the signing of the Glass-Steagall Act. It also marks SIA's appearance before you, as a Member of the Senate Banking Committee, to discuss the current problems facing the financial services industry about which we are concerned.

We are encouraged especially, Senator Heinz, that your approach to the issues at hand may include an affirmative legislative proposal designed to give the Congress, the Administration and the marketplace time and occasion to make decisions without panicked haste.

The rapid pace and happenstancial character of recent structural changes affecting the financial services markets cause great apprehension to the members of the securities industry that small regard is being given to the potential adverse consequences of unchecked deregulatory actions by some Federal and State officials.

Confusion, frustration, and uncertainty have resulted from recent decisions and proposals by the governmental entities responsible for clarity, assurance, and certainty among institutions comprising the financial sector of our economy.

Above all, we fear that the control and direction of an important national public policy has been usurped from the Congress by appointees in Federal agencies and a few State legislatures.

Despite the cries of changing technology and sophisticated consumer demands, the real pressure for change comes from a handful of institutions intent upon chartering a new course for all. When friendly regulators competing for favor among the regulated void our national policy separating commercial banking from commerce, the time for Congressional action is upon us.

During the next few weeks, the Senate Banking Committee and the Congress will have to define short-term and long-term objectives for the financial services industry. This would best be done without the pressures created by a rapidly moving marketplace, and even more rapidly moving bank regulators. Given these circumstances SIA has, after much discussion, decided to support a moratorium to create the needed breathing room. This moratorium must be evenhanded, reciprocal, and affecting all industries equally. All segments of the financial services industry must be made to mark time while critical long-term policies are defined by the Congress.

We look forward to testifying before the Senate Banking Committee on Thursday to further amplify our support for such a course of action. We hope that you can agree that such an interim measure has merit as well as necessity. Our pledge of cooperative effort with you and your staff extends to others interested in prudence and stability as goals of a changing economic environment.

Very truly yours,

ROBERT E. LINTON,
Chairman.
EDWARD I. O'BRIEN,
President.

PROFESSIONAL INSURANCE AGENTS,
GOVERNMENT AFFAIRS OFFICE,
Washington, D.C. June 14, 1983.

Hon. JOHN HEINZ, III,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HEINZ: The National Association of Professional Insurance Agents (PIA) is a trade association representing more than 40,000 independent property and casualty insurance agents in all 50 States, the District of Columbia, Puerto Rico and the U.S. Virgin Islands.

PIA believes that recent efforts in the rapidly evolving financial services marketplace may well result in dismantling, as a practical matter, of the federal regulation of depository institutions by the enactment of state laws, and regulatory fiat. This situation is inconsistent with the long-standing national policy of protecting the depositing public, and the soundness of banks and thrifts by careful regulation and statutory restrictions upon the commercial activities in which depository institutions may engage. It is therefore imperative that this situation must promptly be reviewed by the Senate Committee on Banking, Housing, and Urban Affairs to protect the public interest.

The Federal Reserve System (Fed) has proposed moratorium legislation that would bring to a temporary halt efforts by financial institutions that are designed to evade the impact of federal banking laws. During the moratorium, all interested parties would have an opportunity to advocate their position before the Committee. This will provide the Congress with an opportunity to consider these controversial issues in a careful and reasoned manner and propose appropriate remedial legislation. A copy of the Fed draft bill, dated May 24, 1983, was attached to PIA's statement submitted to the Committee for the June 7 Oversight Hearing.

PIA strongly supports this moratorium legislation and urges you to sponsor it as soon as possible.

Sincerely,

EDWARD H. AKIN, CPCU,
President.
J. KNOX HILLMAN, Jr.,
Chairman, Federal/State Affairs Committee.

NATIONAL ASSOCIATION OF
CASUALTY AND SURETY AGENTS,
Washington, D.C., June 14, 1983.

Hon. H. JOHN HEINZ III,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HEINZ: On behalf of the National Association of Casualty and Surety Agents (NACSA), an association representing the leading domestic, commercial property/casualty insurance agencies and brokerage firms, I want to confirm our unequivocal support for the moratorium drafted by the Federal Reserve Board on May 24, 1983.

We believe a moratorium is necessary in order to preserve the safety and soundness of our dual banking system and to preserve fair competition in the financial services marketplace. Once enacted, the moratorium will allow the Congress to decide what the appropriate structure should be for financial services.

We appreciate your interest and commitment to this important measure, and we offer you our continued support.

Sincerely,

JOAN ALBERT DREUX,
Government Affairs Director.

THE NATIONAL ASSOCIATION OF
LIFE UNDERWRITERS,
Washington, D.C., June 14, 1983.

Hon. JOHN HEINZ,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HEINZ: I understand that you will soon introduce legislation to impose a comprehensive moratorium on the expansion into the banking and thrift industry by non-depository institutions and to prohibit state-chartered institutions from engaging in activities other than those that are permissible under Section 4 of the Bank Holding Company Act. The National Association of Life Underwriters endorses this moratorium and appreciates your efforts on this issue.

The National Association of Life Underwriters is a federation of over 1,000 states and local associations representing over 125,000 life and health insurance agents, general agents and managers doing business in virtually every city and town in the United States.

By the passage of Title VI of P.L. 97-320, the Garn-St Germain Depository Institutions Act of 1982, Congress reaffirmed the long-standing public policy first enunciated in the National Banking Act of 1864 that has separated banking from commerce.

NALU believes that passage to Title VI was a victory for consumers and will help to preserve an open, competitive marketplace by preventing bank holding companies and their subsidiaries from using their power to grant (or withhold) credit to pressure the consumer to purchase insurance. While not alway explicit, the pressure to purchase insurance (the subtle tie-in sale) may be a mere perception of the buyer that it would be to his "advantage" to make the joint purchases. Title VI will allow consumers to purchase insurance which has the best terms, quality and services, not due to a need to obtain, or a fear of losing a line of credit.

However, on March 4, 1983, less than six months after passage of Title VI, under pressure from several large bank holding companies hoping to circumvent Title VI, South Dakota adopted legislation (promoted as an "emergency" jobs bill) authorizing its state banks to engage, directly or through subsidiaries, in all facets of the insurance business. The South Dakota legislation was deliberately designed to attract out-of-state bank holding companies interested in acquiring a state-chartered bank for the purpose of underwriting and selling insurance nationwide. Delaware is also considering legislation similar to the law adopted by South Dakota.

The bankers argue that in order to remain competitive, they must be permitted to offer an entire array of financial services, including insurance. NALU stated in its testimony before the Senate Banking Committee on June 7, 1983 that the so-called "level playing field" could not be even bulldozed into playing condition where banks are the competitors. Free market discipline cannot take place so long as banks can attract federally-insured deposits and are not permitted to fail. It has been well documented that the unique power of the banks to extend or withhold credit leads consumers to purchase insurance offered by the bank, not because it has the best terms, quality or service, but so as not to jeopardize a line of credit.

The power of state legislatures to authorize expanded insurance activities within their borders is not at issue. Bank holding companies are deliberately attempting to engage in activities through state banking subsidiaries which are prohibited to bank holding companies and their non-banking subsidiaries under federal law. The South Dakota law demonstrates that the action of one state can potentially nullify federal banking laws and the related regulatory structure.

The proposed moratorium, in our view, will provide Congress with the opportunity to decide the future course of financial institutions in an orderly fashion, taking into consideration the public interest. NALU believes that a moratorium will provide the depositor with stability and freedom of choice. Bank involvement in insurance or securities activities subjects the depositor, the FDIC and FSLIC and, ultimately, the U.S. taxpayer to unknown risks.

Again, we thank you for introducing this legislation. Please contact David A. Winston at (202) 331-6054 if we can provide you with any further information.

Sincerely,

RICE E. BROWN, CLU.●

By Mr. MATHIAS (for himself and Mr. WARNER):

S. 1534. A bill to amend the Internal Revenue Code of 1954 to allow the voting interests of disqualified persons to be taken into account in determining a private foundation's voting interest for purposes of section 4943 of such code; to the Committee on Finance.

DISPOSAL OF EXCESS BUSINESS HOLDINGS

● Mr. MATHIAS. Mr. President, today Senator WARNER and I are introducing a bill to correct a disparity in the transition rules for the disposal of excess business holdings by private charitable foundations.

The bill would not cost the Treasury a penny. Its effect would be to give the Cafritz Foundation, the largest and most generous of Metropolitan Washington's private foundations, 5 more years to divest of part of its holdings in the Cafritz Co. These 5 extra years will enable the foundation to get a better price for its holdings—money that will allow the Cafritz Foundation to be even more generous than it already is to artistic and civic causes in the Nation's Capital from the National Symphony to Gallaudet College.●

By Mr. MATHIAS (for himself, Mr. DOLE, and Mr. DECONCINI):

S. 1535. A bill to amend title 35. of the United States Code, to increase the effectiveness of the patent laws, and for other purposes; to the Committee on the Judiciary.

PATENT LAW REFORM

● Mr. MATHIAS. Mr. President, the patent system lies at the heart of our country's prowess in research and innovation. Traditionally our patent system has kept the United States in the forefront of technology and kept our standard of living high. But today American inventors face stiff competition in the worldwide race for innovation.

In recent months I have consulted with a number of patent authorities

from various U.S. industries to develop a bill that will strengthen the patent system and streamline some of the administrative procedures for securing a patent. Many of the areas addressed by the bill have been considered by Congress and the executive branch over the past decade: I believe all of them need a fresh look today. I expect to examine these subjects closely in hearings in the Subcommittee on Patents, Copyrights and Trademarks in the weeks ahead, and the subcommittee, of course, invites suggestions for improving the bill in the course of the legislative process.

Briefly, the bill's provisions follow:

Section 1—Infringement of process patents by offshore production: Under current U.S. law, a process patent is not violated if a product is manufactured outside of the United States using that patented process, then imported for sale here. All other major manufacturing countries have statutes against process patent infringement by offshore production, and it is only fair to give American inventors the same protection. As a corollary to this principle, the bill also contains a provision to assure that a product patent cannot be circumvented by manufacturing the material components of the product within the United States, then assembling them and selling the finished product abroad.

Sections 2-4—License for foreign filing: Under the U.S. patent law a U.S. inventor wishing to file a foreign patent application is required to obtain a license from the U.S. Government or wait for 6 months after he or she filed for an application in this country. The purpose of these requirements is to allow U.S. agencies concerned with security matters to inspect the patent application and determine whether or not it contains technical information bearing on national security. However, they tend to impose unnecessary delays and paperwork burdens on inventors of products with no security implications because they also apply to any information, however perfunctory, that is sent to supplement an application, even if the initial patent application has cleared the agency review and obtained the license. The provisions in my bill dealing with foreign licenses would eliminate these unnecessary burdens by allowing supplemental information to be passed on to the foreign country without a subsequent license if the initial patent application has obtained a license and no secrecy order was issued by an agency. Another provision would make clear that failure to obtain a license for a patent application that is not subject to a secrecy order would not be subject to criminal penalties unless the failure was due to a deliberate intent to deceive.

Sections 5-6—Unpublished knowledge as prior art: This provision simply says that unpublished information known to an inventor does not constitute prior art in the field of his invention, and hence does not interfere with the patentability of that invention. This proposed change will help university and corporate research teams, where the free exchange of information and ideas between colleagues is hampered by prior art considerations.

Sections 7-9—Patent interference reform: Interferences are proceedings conducted by the Patent and Trademark Office to determine which rival inventor made the invention first and so is entitled to the patent. The cost of these proceedings has become inordinately high. My bill proposes to simplify the process by making priority of invention determined on the basis of affidavits and documents submitted to the Patent and Trademark Office, rather than by discovery and deposition. It would also promote the use of arbitration in facilitating the settlement of disputes.

Section 10—Licensee estoppel: Court decisions have established the right of a patent licensee to challenge the validity of the licensed patent. Case law, however, may have shifted the balance of rights in such challenges too far in favor of the licensee, allowing undue leverage against the licensor. The changes proposed in the bill would insure the right of the licensor to continue to receive the contracted royalty payments during the time his or her patent is under challenge, or to terminate the license if he or she chooses.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1535

Be it enacted by the Senate and House of Representatives of he United States of America in Congress assembled, That section 271 of title 35, of the United States Code, is amended by adding at the end thereof the following new subsections:

"(e) Whoever without authority imports into or sells or uses within the United States a product made in another country by a process patented in the United States shall be liable as an infringer.

"(f) Whoever without authority supplies or causes to be supplied in the United States the material components of a patented invention where such components are uncombined in whole or in part, intending that such components will be combined outside of the United States, and knowing that if such components were combined within the United States the combination would be an infringement of the patent, shall be liable as on infringer.".

SEC. 2. Section 184 of title 35, United States Code is amended by—

(1) amending the third sentence thereof by striking out "inadvertently" and inserting after "filed abroad" the words "through error and without deceptive intent".

(2) adding at the end thereof the following new paragraph:

"In the case of an application for which a license has been obtained or an application which has been filed in the United States Patent and Trademark Office for more than six months before the filing in a foreign country, and on which no secrecy order has been issued, a license shall not be required for any modifications, amendments, supplements, divisions, or other information filed in or transmitted to the foreign country in connection with such application if such modifications, amendments, supplements divisions, or information consist only of the illustration, exemplification, comparision, or explanation of subject matter specifically or generally disclosed in such application.".

SEC. 3. Section 185 of title 35, United States Code, is amended by adding before the period in the last sentence thereof the following: ", unless the failure to procure such license was through error and without deceptive intent, and the patent does not disclose subject matter within the scope of section 181 of this title".

SEC. 4 Section 186 of title 35, United States Code, is amended by—

(1) striking out "whoever, in violation of the provisions of section 184 of this title,"; and

(2) inserting "such" after "inrespect of any".

SEC. 5. Section 103 of title 35, United States Code, is amended by adding at the end thereof the following;

"Prior art shall not include unpublished information which is developed by the applicant singly or jointly with others, or which is known to the applicant only by virtue of his or her employment.".

SEC. 6. Section 116 of title 35, United States Code, is amended by amending the first paragraph to read as follows:

"When two or more persons have made inventive contributions to the subject matter claimed in an application, they shall apply for patent jointly and each shall sign the application and make the required oath, except as otherwise provided in this title. Joint inventors need not have made an inventive contribution to each claim of the application.".

SEC. 7. Section 135(a) of title 35, United States Code, is amended by adding at the end thereof the following: "Evidence to establish priority of invention in accordance with section 102(g) shall be provided by affidavit.".

SEC. 8. Section 135(c) of title 35, United States Code, is amended by—

(1) inserting before "shall render" in the third sentence the following: ", unless such failure was through error and without deceptive intent,"; and

(2) striking out the words "during the six-month period" in the fourth sentence and "within the six-month period" in the sixth sentence.

SEC. 9. Section 135 of title 35, United States Code, is amended by adding at the end thereof the following new subsection:

"(d) Parties to a patent interference may determine such contest or any aspect thereof by arbitration. The parties shall give notice of any arbitration award to the Commissioner, and such award shall be dispositive of the issues to which it relates. The arbitration award shall be unenforceable until such notice is given.".

SEC. 10. (a) Title 35, United States Code, is amended by adding after section 294 the following new section:

"SECTION 295. LICENSEE ESTOPPEL.

"(a) A licensee shall not be estopped from asserting in judicial action the invalidity of any patent to which it is licensed. Any agreement between the parties to a patent license agreement which purports to bar the licensee from asserting the invalidity of any licensed patent shall be unenforceable as to that provision.

"(b) In the event of an assertion of invalidity by the licensee in a judicial action, licensee and licensor shall each have the right to terminate the license at any time after such assertion. Until so terminated by either party, the licensee shall pay and the licensor shall receive the consideration set in the license agreement.".

(b) The table of sections for chapter 29 of title 35, United States Code, is amended by adding after the item relating to section 294, the following:

"295. Licensee estoppel.".

SEC. 11. The amendments made by this Act shall apply to all unexpired United States patents granted before or after the date of enactment of this Act.●

By Mr. DODD:

S. 1536. A bill to amend the Federal Water Pollution Control Act with respect to ocean waivers; to the Committee on Environment and Public Works.

OCEAN WAIVERS

● Mr. DODD. Mr. President, today I am introducing a bill amending section 301(h) of the Clean Water Act, which deals with waivers of secondary treatment for municipal treatment works discharging into marine waters.

While the waiver provision is intended to avoid unnecessary treatment in areas where the ocean can assimilate waste water effluent, I am concerned that as the law now stands, it may lead to the degradation of many of our coastal waters. The provision has opened a floodgate of applications from many municipalities in areas for which it was never really intended, such as the shallow, confined waters along much of the east coast. In the New York City area alone around 2 dozen requests for waivers have been made, and seven or eight of the treatment works involved discharge directly into the East River or into Long Island Sound, on which Connecticut depends heavily for commercial shellfishing and recreation.

Mr. President, I believe that section 301(h) needs revision and tightening. The existing law allows too much latitude in the determination of eligibility, both in terms of the geographic environment in which waivers might be appropriate and in terms of the cumulative effect of many waivers in a particular area. In addition, the section as now written fails to mandate the minimum level of primary treatment even if secondary is waived, provides inadequate control of toxic pollutants, and allows waivers in areas which are already polluted.

The amendments which I am offering are designed to deal with these inadequacies or oversights in the present law. The amendments would require full primary treatment of the effluent discharged; would mandate control of toxic pollutants equivalent to secondary treatment; would limit waivers to discharges in deep, well-flushed waters; and would prohibit waivers in areas where the collective discharges of many treatment works under such waivers could degrade water quality, or where the waters are already polluted from other sources.

It is my hope that these amendments will be considered by the Committee on Environment and Public Works as it prepares to mark up its revisions of the Clean Water Act next week. While some of my concerns have been addressed in the current mark-up vehicle, I do not believe that the amendments that have emerged from subcommittee are sufficient to close the loopholes I have described.

Mr. President, I ask that the full text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1536

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 301(h) of the Federal Water Pollution Control Act is amended—

(1) by inserting "(1)" after "(h)".

(2) by redesignating paragraphs (1) through (7) as subparagraphs (A) through (G), respectively; and

(3) by designating the second, third, and fourth sentences as paragraphs (2), (3), and (4), respectively.

(b) Section 301(h)(1) of such Act (as so redesignated) is amended—

(1) by striking out the period at the end of subparagraph (G) and adding after subparagraph (G) the following new subparagraphs:

"(H) the effluent to be discharged under the permit will receive primary treatment so as to achieve treatment equivalent to screening, comminution, grit and primary sedimentation, skimming, disinfection, and any other treatment necessary to remove all floating or settleable solids and to control pathogens;

"(I) in the case of any treatment works serving a population of 50,000 or more, with respect to any toxic pollutant introduced into such works, the applicant has in effect a pretreatment program which, in combination with the treatment of discharges from such works, removes the same amount of such pollutant as would be removed if such works were to apply secondary treatment to discharges and if such works had no pretreatment program with respect to such pollutant; and

"(J) the effluent from such works meets criteria established by section 304(a)(1) for saltwater after initial dilution.".

(c) Section 301(h)(2) of such Act is amended to read as follows:

"(2) For purposes of this subsection, the phrase 'the discharge of any pollutant into marine waters' refers to—

"(A) any discharge into deep waters of the territorial sea or the waters of the contiguous zone, or

"(B) a discharge into coastal waters within the territorial baseline which—

"(i) does not exceed 5,000,000 gallons per day and meets the requirements of subparagraphs (B) and (J) of paragraph (1), or

"(ii) is into deep saline estuarine waters, deep sounds, deep channels, or deep embayments, which have strong flushing action and other physical and hydraulic characteristics which provide such initial dilution, dispersion, transport, and other effects as the Administrator determines to be necessary to meet the requirements of subparagraphs (B) and (J) of paragraph (1) for the entire estuary, sound, channel, or embayment into which the discharge is made.".

(d) Section 301(h) of such Act is amended by adding at the end thereof the following new paragraphs:

"(5) No permit shall be issued under this subsection to any treatment works in any geographic area in which the Administrator has reason to believe that, if all the municipal treatment works in such area which are of the same or lesser size as the treatment works seeking such permit, and which would otherwise be eligible for a permit under this subsection if they were to apply, were granted permits under this subsection, the collective discharges from all such treatment works would result in a degradation in water quality in violation of subparagraph (B); except that a permit may be issued to such a treatment works in such an area if all the publically owned treatment works in such area are under the jurisdiction of the same municipality or under a regional compact among municipalities, and maintenance of water quality shall be maintained in accordance with paragraph (1)(B).

"(6)(A) No permit shall be issued under this subsection for any discharge into waters which, at the time of application for such permit, are significantly degraded for any significant portion of the year by pollutants from other sources.

"(B) For purposes of this paragraph, 'significantly degraded' means that—

"(i) the species composition and population structure of the fish, shellfish, wildlife, and other marine biota in such waters are similar to those found in similar waters with high pollutant loadings,

"(ii) such waters do not allow recreational activities in and on the waters, or

"(iii) such waters exhibit ambient levels of water quality below applicable water quality standards adopted for the protection of public water supplies, fish, shellfish, wildlife, or recreational activities, or such other standards necessary to support and protect such uses.

"(7) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this subsection.".●

By Mr. DANFORTH (for himself, Mr. EAGLETON, Mr. BRADLEY, Mr. CHAFEE, Mr. KENNEDY, Mr. MOYNIHAN, and Mr. PELL):

S. 1537. A bill to provide additional authorization of appropriations for certain programs for fiscal year 1984, and each of the 4 following fiscal years; to the Committee on Labor and Human Resources.

UNIVERSITY RESEARCH CAPACITY RESTORATION ACT OF 1983

● Mr. DANFORTH. Mr. President, today Senator EAGLETON and I, along with Senators BRADLEY, CHAFEE, KENNEDY, MOYNIHAN, and PELL, are intro-

ducing the University Research Capacity Restoration Act of 1983.

This is a bipartisan initiative to revitalize and increase Federal support for the basic science research and advanced education programs of our Nation's universities. It has been prompted by our concern about the ability of our Nation's research universities and land-grant colleges to provide the new knowledge we need in the years ahead and to educate the future generations of scientists, engineers, biomedical researchers, and skilled managers essential to the long-term vitality, security, and well-being of the Nation.

Our Nation's universities must be regarded as a vital national resource. Increased support for their basic research programs is an essential-investment in the future, because the basic science and engineering research conducted by these institutions is essential to the continued leadership of the United States in science and technology. This fundamental research leads to new discoveries in such areas as national security, health care, energy, industrial productivity, the environment, food, and agriculture.

Moreover, we cannot presume the availability of sufficient numbers of talented and highly trained research scientists, scholars, and teachers, unless national policy provides incentives to bring about that result. We must as a nation attend to the scientific training and education of our best young minds or fall behind those nations that do.

Unfortunately, today the necessary national commitment and investment are lacking. Our support for university basic science research is not keeping pace with growing needs and rising costs. Today, half the basic science research in this country is done at our universities, but we need more teachers, scholars, and research scientists, as well as better facilities and instrumentation, if we are to maintain our leadership in science and technology.

The administration's fiscal 1984 budget proposals reflect a commitment to increase our investment in our research universities, but we need to do more. Working with the Association of American Universities (AAU) we have drawn up a comprehensive 5-year plan to restore the research capacity of our Nation's universities and land-grant colleges.

This plan is set forth in the legislation we are introducing today, which focuses on the research programs of the six Federal agencies that provide 95 percent of Federal support for university basic science and engineering research. These six agencies are the National Aeronautics and Space Administration, the National Institutes of Health, the National Science Foundation, and the Departments of Agriculture, Energy, and Defense.

Specific increased funding levels for these six agencies are set in this comprehensive plan to address what we believe are the most pressing needs of our Nation's research universities. The bill recognizes six basic needs to be addressed with increased Federal support: (1) To augment and strengthen Federal support for fundamental university research programs, including biomedical and engineering research; (2) to upgrade, modernize, and replace the instrumentation and equipment of university research facilities and laboratories; (3) to provide increased numbers of graduate fellowship awards to individuals and university science departments engaged in federally supported research; (4) to support expended faculty development awards programs that promote the initiation of research careers by young faculty; (5) to support efforts, on a matching basis with the institutions involved, to rehabilitate, replace, or otherwise improve the quality of existing university research facilities and laboratories in which federally supported basic science and engineering research is carried out; and (6) to modernize and improve undergraduate science and engineering instructional programs and curriculums to meet the Nation's changing needs.

Mr. President, we regard this legislation as a blueprint for increased and sustained Federal investment in our Nation's university research capacity. The bill is intended to serve as a focal point for our effort to revitalize university research programs. Our aim is to set out in detail our agenda for the next 5 years and it is our intention to seek the objectives outlined in the provisions and titles of this legislation through amendments to the authorization and appropriations bills of the agencies involved.

I have been informed that preliminary estimates by the Congressional Budget Office of the pending budget resolution indicate that implementation of the first full year of our program would not exceed the spending levels set for the research and development functions; however, we recognize that we are already far along in the authorization and appropriation process for fiscal 1984. We will seek to accomplish what we can this year, but we regard this as a long-term initiative.

By introducing this comprehensive plan now, we hope to develop a broad, bipartisan base of support for this program over the next few years. I urge all my colleagues to give serious consideration to the detailed proposals outlined in this bill. I call upon them to join our effort to restore the basic research capacity of our Nation's universities and to make a vital investment in the future of our country.●

● Mr. EAGLETON. Mr. President, I am pleased to join with my colleague from Missouri, Senator DANFORTH, and Senators BRADLEY, CHAFEE, KENNEDY, MOYNIHAN, and PELL, as a principal sponsor of the University Research Capacity Restoration Act of 1983. The purpose of this legislation is to restore and strengthen the capacity for basic science research and undergraduate and graduate science and engineering programs in our Nation's colleges and universities. It addresses the basic research needs of institutions involved in the programs of six Federal agencies and departments: The National Institutes of Health, the National Science Foundation, the National Aeronautics and Space Administration, and the Departments of Energy, Agriculture, and Defense.

The most rapid rise in Federal support of research was in the fifties and early sixties when it claimed about 3 percent of the GNP. By 1973, the percentage of research investment to GNP had dropped to 2.3 percent and has come back to only 2.4 percent today.

In 1983, total funding for basic research is estimated at $10.5 billion, or about 12 percent of the total national research and development effort. Although national funding for basic research has more than doubled since 1967, if one factors in inflation during those years, the real increase is less than 25 percent over the 16-year period.

The Federal Government funds more than two-thirds of the money that goes for basic research at the present time, a slightly smaller percentage of the total than it supported in 1967, and colleges and universities remain the major performers of that basic research effort. Although the proportion of basic research has remained stable in the past several years, reports from the National Science Foundation clearly demonstrate that its current share is lower than that in the sixties and early seventies. and that the major growth at colleges and universities is in the applied research area.

A recent National Science Foundation report predicted that colleges and universities will increase their spending on research and development by about 2 percent a year through 1990, only half the rate of spending between 1975 and 1979. A more optimistic study by the Battelle Memorial Institute projects a 4-percent growth rate in university research and development, but bases this projection on increases in private as well as public funding. We are all aware that industry/university partnerships are increasing and that these partnerships will obviously have a major impact on funding for university research in the future. I think it is also apparent that these partnerships will bring greater emphasis on short-term results with immedi-

ate applications and therefore greater potential profit. The inclination to seek short-term results and tangible achievement, rather than long lead-time research is perhaps even more acute in our present fiscal situation, and what this bill seeks to do is to assure that the foundation of basic research is absolutely vital to our future capacity to generate applicable solutions to problems.

Perhaps the most striking example of this need for basic research is the polio experience. Perhaps too few of us remember the stopgap technology of the iron lung, a product of applied research which served a very useful purpose for many, many years. However, it was not until basic research lead to the isolation of the polio virus that we were able to extend our understanding to develop preventive technology in the form of a vaccine. With the development of the vaccine, the disease virtually disappeared and with it the use of the therapeutic technology which had been devised.

Our Nation's colleges and universities are unique not only in their focus on basic research, but also in their role as the principal source of scientists and technologists who carry out our research effort today and the research capacity we hope to build tomorrow. The erosion of our scientific manpower jeopardizes the ability of many institutions to carry out competent research and quality education programs. The availability of more lucrative employment opportunities in industry for highly trained young people seriously threatens our future research capacity. Unfavorable research and education environments marked by obsolete equipment and outmoded laboratories often are effective career disincentives to potential young faculty who might wish to pursue a career in academe. Wildly fluctuating graduate level support creates immense uncertainty about the future for many young people and also aids in driving them out of the research environment.

These problems, left unaddressed, will pose serious threats to the future of our country, academically, technologically, and militarily.

Mr. President, this bill sets an agenda for a 5-year program of increased Federal support for university-based research programs through a series of amendments to the underlying authorities for the six Federal agencies and departments mentioned above. I would emphasize, Mr. President, that the sponsors of this bill do not intend to move the bill per se through the legislative process. Our purpose in introducing it today is to present a unified package, or a blueprint, for a series of legislative actions which we are hoping to undertake over the next several years through amendments to various authorization and appropriations bills.

I would like to emphasize that although this bill we are introducing today contains specific authorizations for the National Institutes of Health, the sponsors of this bill will not seek to amend the NIH authority to establish specific dollar levels for programs therein. The title of this bill dealing with the NIH simply seeks to illustrate the levels of support which we believe necessary to restore the research capability of the National Institutes of Health. We felt it important to include this number in this particular bill because it does represent roughly one-half of the total agenda we are setting forth today. However, the funding levels which we will be seeking can be achieved under the National Institutes of Health's existing authority and we will seek to achieve them through the appropriations process.

I would also like to point out that we have already begun to realize a very small part of the goals set forth in this bill. The full Senate Appropriations Committee yesterday agreed to increase the competitive research program in the Department of Agriculture from its present funding level of $17 million to the full budget request of $21.5 million. Although that amount falls far short of the amount authorized in this bill, it is a step in the right direction and begins to build the base to further the very necessary basic research work of the State agriculture experimentation stations and colleges and universities.

I was also very pleased that the Appropriations Committee included $10 million to fund a cooperative graduate fellowship grant program which is estimated to support approximately 650 to 700 masters and doctoral students. This funding level represents the full amount authorized in the bill we are introducing today and is, in my view, absolutely essential to assure a continuing supply of capable young food and agriculture scientists.

Mr. President, I am fully aware that this total package is very ambitious, indeed. But having said that, I also believe the kind of commitment to research embodied in this bill is amply justified if we are to have the means to cope with an increasingly complex world society and the inevitable problems which will arise. Admittedly, a strong national commitment to basic research alone is not sufficient, but it is the essential underpinning to the never-ending quest for knowledge necessary to continued social and economic gains in this country and the world.●

● Mr. CHAFEE. Mr. President, our Nation has made exciting scientific advances in the past 20 years which would have been impossible to envision a hundred years ago. We have explored outer space. We have made magnificent strides in medicine, helping to save lives, reduce suffering, and extend the lifespan of our people. We have seen rapid and remarkable technological developments which have changed the way we work, live, travel, and communicate.

However, too often we tend to take such progress for granted. I believe it is extremely important to recognize that our country would not have achieved a leadership position in science and technology were it not for a Federal commitment to programs of advanced education and research. The scientists, doctors, engineers, and other skilled professionals whose knowledge and talents are crucial to the United States must receive consistent strong support in order to continue their vital work.

The primary sources for our economic, scientific, and technological development have long been our Nation's research universities. In these distinguished institutions, many of our brightest scholars have received the necessary training and tools to make tremendous contributions in a variety of fields. The future growth and prosperity of the United States resides in our universities and colleges. We can no longer afford a second-rate commitment to support the basic research that is carried out in these institutions. We must renew that commitment today.

I am very pleased to join with Senator DANFORTH in introducing the University Research Capacity Restoration Act of 1983. This is a timely and comprehensive approach to a challenging problem. It will bolster the Federal commitment to basic science and engineering research, provide for improvements in the laboratories and instruments of research institutions, and strengthen career development programs for graduate students and faculty in the sciences and related fields.

The Federal Government has derived immeasurable benefits from its partnership with our Nation's colleges and universities. This partnership has yielded results whose value is far greater than our investment. The University Research Capacity Restoration Act of 1983 recognizes that more must be done to improve the ability of our schools to educate and train those whose knowledge and abilities are crucial to the future scientific, biomedical, engineering, and technological progress of our country.

The bill will accomplish this objective by encouraging increased Federal support for institutions of higher learning which are involved in the programs of six Federal agencies and departments—the National Institutes of Health, the National Aeronautics and Space Administration, the National Science Foundation, and the Departments of Energy, Agriculture, and Defense. Ninety-five percent of all Federal funding of academic research and

development is directed at these agencies.

The administration has taken an important first step this year in seeking increases for targeted programs in science and engineering projects, research instrumentation, and fellowships. This reflects a commendable recognition of the need for a national recommitment to excellence in science, engineering, and advanced education. However, additional priorities must be addressed. These include undergraduate science education, graduate student support, research instrumentation, career incentives in research and education, and life sciences research and training programs.

Each of the amendments in this package is carefully targeted to strengthen our production of new knowledge in science, engineering, and technology within the present missions of the agencies I have mentioned.

We must not limit the discoveries of tomorrow by flagging in our commitment to research programs today. We must not hinder the ability of our students by neglecting the facilities and research equipment of higher education institutions. We must not dissuade talented scholars from pursuing research careers by limiting fellowship support for graduate students and faculty.

Although these amendments will be discussed separately throughout the authorization and appropriations process within several committees, I believe the University Research Capacity Restoration Act of 1983 provides an essential focal point for Congress to recognize the importance of a renewed commitment to science research as a national investment. This is an investment from which all of mankind will benefit for many years to come.●

By Mr. MATHIAS (for himself and Mr. DOLE):

S. 1538. A bill to amend the patent laws of the United States; to the Committee on the Judiciary.

PATENT LAW AMENDMENTS OF 1983

● Mr. MATHIAS. Mr. President, earlier this year Secretary Baldrige sent the President of the Senate a proposed patent reform bill to make several technical improvements in the patent law. In addition, one provision in the bill would institute a new type of patent called a defensive patent. The defensive patent would be a valuable resource for inventors who wish to retain their right to market their invention, but are not concerned about excluding anyone else from doing so.

Ordinarily patents give the inventor exclusive rights for a fixed period of time; the defensive patent would not confer this offensive right to exclude others from working an invention, but would also prevent others from obtaining exclusive rights. In other words, the inventor preserves the ability to practice the invention but forfeits the right to sue others for infringement. The defensive patent would be considerably easier, cheaper, and quicker for the Patent Office to process.

The new option that this weaker type of patent offers would be particularly well suited for Government agencies that deal extensively with patents, such as the Defense Department. The Government sought the patents, not to prevent other people from making or marketing the invention, but to protect itself against suits for infringement. The Patent Office thinks that the Government agencies as well as the Patent Office itself would save money and staff time if defensive patents were available as an alternative to the traditional exclusive rights patent.

I think this idea deserves our close attention and I hope to schedule a hearing at the first opportunity in the Subcommittee on Patents, Copyrights and Trademarks. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows;

S. 1538

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Patent Law Amendments of 1983".

SEC. 2. (a) Chapter 14 of title 35, United States Code, is amended by adding at the end thereof the following new section:

"§ 156. Issuance of patents without examination.

"(a) Notwithstanding any other provisions of this title, the Commissioner is authorized to issue a patent on an invention without the examination required by sections 131 and 132 of this title, except as may be required to conduct an interference proceeding, to determine compliance with section 112 of this title, or to review for formalities required for printing, if the applicant—

"(1) waives all remedies with respect to the patent and any reissue thereof, arising under sections 183 and 271 through 289 of this title and under any other provision of Federal law, within such time as the Commissioner specifies, and

"(2) pays fees, which may be less than those specified in section 41 of this title, established by the Commissioner for the filing and issuance of such a patent.

"(b) The waiver under this section shall take effect upon issuance of the patent. No maintenance fees shall be required with respect to patents issued under this section.".

(b) The analysis for chapter 14 of title 35, United States Code, is amended by adding at the end the following:

"156. Issuance of patents without examination.".

SEC. 3. Section 134 of title 35, United States Code, is amended by striking out "primary".

SEC. 4. Section 151 of title 35, United States Code, is amended—

(1) by amending the second sentence in the first paragraph to read as follows: "The notice shall specify the issue fee which shall be paid within three months thereafter, or within such shorter time, not less than one month, as fixed by the Commissioner in such notice."; and

(2) by striking out the third paragraph.

SEC. 5. Section 361(d) of title 35, United States Code, is amended by inserting "or within one month thereafter" after "application" in the first sentence.

SEC. 6. Section 366 of title 35, United States Code, is amended—

(1) by inserting "after the date of withdrawal," after "effect";

(2) by inserting ", unless a claim for the benefit of a prior filling date under section 365(c) of this part was made in a national application, or an international application designating the United States, filed before the date of such withdrawal" before the period at the end of the first sentence; and

(3) by inserting "withdrawn" after "such" in the second sentence.

SEC. 7. (a) Section 371(a) of title 35, United States Code, is amended by—

(1) striking out "is" and inserting in lieu thereof "may be"; and

(2) striking out ", except those filed in the Patent Office".

(b) Section 371(b) of title 35, United States Code, is amended to read as follows:

"(b) Subject to subsection (f) of this section, the national stage shall commence with the expiration of the applicable time limit under article 22 (1) or (2) of the treaty.".

(c) Section 371(c)(2) of title 35, United States Code, is amended by—

(1) striking out "received from" and inserting in lieu thereof "communicated by"; and

(2) striking out "verified" before "translation".

(d) Section 371(d) of title 35, United States Code, is amended to read as follows:

"(d) The requirements with respect to the national fee referred to in subsection (c)(1), the translation referred to in subsection (c)(2), and the oath or declaration referred to in subsection (c)(4) of this section shall be complied with by the commencement of the national stage or by such later time as may be fixed by the Commissioner. The copy of the international application referred to in subsection (c)(2) shall be submitted by the commencement of the national stage. Failure to comply with these requirements shall be regarded as abandonment of the application by the parties thereof, unless it be shown to the satisfaction of the Commissioner that such failure to comply was unavoidable. The payment of a surcharge may be required as a condition for accepting the national fee referred to in subsection (c)(1) or the oath or declaration referred to in subsection (c)(4) of this section if these requirements are not met by the commencement of the national stage. The requirements of subsection (c)(3) of this section shall be complied with by the commencement of the national stage, and failure to do so shall be regarded as a cancellation of the amendments to the claims in the international application made under article 19 of the treaty.".

SEC. 8. (a) Section 372(b) of title 35, United States Code, is amended by—

(1) striking out the period at the end of paragraph (2) and inserting in lieu thereof a semicolon; and

(2) inserting at the end thereof the following:

"(3) the Commissioner may require a verification of the translation of the international application or any other document pertaining thereto if the application or

other document was filed in a language other than English.".

(b) Section 372 of title 35, United States Code, is amended by deleting subsection (c).

SEC. 9. Section 376(a) of title 35, United States Code, is amended by striking out paragraph (5) and redesignating paragraph (6) as paragraph (5).

SEC. 10. Title 35, United States Code, is amended by striking out "Patent Office" each place it appears and inserting in its place "Patent and Trademark Office".

SEC. 11. Notwithstanding section 2 of Public Law 96-517, no fee shall be collected for maintaining a plant patent in force.

SEC. 12. (a) Sections 10 and 11 of this Act shall take effect upon the date of enactment.

(b) Sections 1 through 9 of this Act shall take effect six months after the date of enactment.●

By Mr. HATCH (for himself, Mr. KENNEDY, and Mrs. HAWKINS):

S. 1539. A bill to amend the Public Health Service Act to provide home and community based services for the elderly and disabled; to the Committee on Labor and Human Resources.

S. 1540. A bill to amend the Public Health Service Act to provide for coordination with State medicaid plans in the furnishing of home care services, and to amend title XIX of the Social Security Act to allow States to implement programs of home care services; to the Committee on Labor and Human Resources.

By Mr. HATCH (for himself, Mr. KENNEDY, Mrs. HAWKINS, Mr. GRASSLEY, and Mr. HEINZ):

S.J. Res. 122. Joint resolution to designate the week of November 27, 1983, through December 3, 1983, as "National Home Care Week"; to the Committee on the Judiciary.

COMMUNITY HOME HEALTH SERVICES LEGISLATION

Mr. HATCH. Mr. President, I am today introducing three major bills, each of which significantly improves and expands home health care and community-based health services for eligible elderly and disabled citizens. There is a clear and audible consensus among health experts, representatives of elderly and disabled organizations, and many of my colleagues for reorienting our national health policy away from favoring institutionalized care and a return to care in the home. I have been working for the past 4 years to accomplish this goal. I am more than ever convinced that improved home health services are essential to help control the spiraling costs of long term care. Home health care is the only solution in sight for those disabled and elderly Americans wanting to remain in the safety and comfort of their own homes, apartments or simply to be among family and friends.

My first bill is a new block grant titled the "Home and Community Based Service for the Elderly and Disabled Act." This amends title XIX of the Public Health Service Act to establish a long term care block grant to the States. Funds are authorized for fiscal year 1985 for planning and implementation, and for fiscal years 1986-88 to provide services to elderly and disabled individuals identified as at risk of being institutionalized unless support services are available in their homes. This bill will provide sufficient funds and flexibility for States to develop effective and efficient home health programs, assisting those who are most in need of the services. Furthermore, it is true to our President's philosophy of the "new federalism" by allowing States to design their own programs and provide services. Care has been taken to assure there will be no duplication of existing services, and that what is currently provided does not administratively reinvent the wheel. However, no services that are currently provided under medicare or medicaid will be supplanted by this legislation.

You do not need a weatherman or an accountant to know that our existing entitlement programs, with cost-based reimbursement, are becoming too expensive to afford. This legislation gives States a chance to contract for services with both nonprofit and proprietary home health organizations using a prepaid, capitated payment, the method of payment which is proving to be such an effective cost-saver, without compromising the quality of health care.

I am pleased to report that this bill was added to S. 242, the Employment Opportunities Act of 1983 in executive committee of the Labor and Human Resources Committee on Wednesday, June 22, 1983. This legislation was passed from committee, and thus I look forward to seeing the home health provision considered soon by my colleagues on the floor of the Senate.

There being no objection, the legislation was ordered to be printed in the RECORD, as follows:

SUMMARY OF COMMUNITY BASED SERVICES FOR THE ELDERLY AND DISABLED BLOCK GRANT OF 1983

Title XIX of the PHS is amended by adding a new part, the Home and Community Based Services Block Grant

Authorization: A new authorization provides funds for states to plan for and provide such services:

FY '85—$20,000,000; for planning and implementation.

FY '86—$700,000,000; FY '87—$750,000,000; FY '88—$800,000,000; for providing services.

Allotments: Funds are to be alloted to each State an amount which bears the same ratio to the total appropriation for the fiscal year as the total number of elderly individuals residing in the State bears to the total number of elderly individuals in all States. The allotment of these funds are subject to the same provisions govening other block grants, in terms of voluntary state participation, return of unused funds, distribution of excess funds to participating states, direct funding of Indian tribes who apply and submit a plan meeting criteria prescribed by the Secretary.

Coordinate Existing Services: Allotments may be used to coordinate home and community based services provided elderly and disabled individuals by public and private organizations in order to eliminate duplication and maximize the benefit of new service provided under this program.

Assess current needs and prepare: States will be required to develop methods to identify elderly and disabled individuals who are at risk of institutionalization, those in hospitals and long-term care facilities who could return home if services were available, assess the need for community based services within the state, and make recommendations for cost-effective services.

Funds may be used for: States may use these funds to provide for elderly homemaker/home health aide services, physical, occupational, speech or respiratory therapy, medial social services, medical supplies and appliances, drugs and biologies (only if necessary for the individual to receive other services in such place of residence), respite care for 14 days or 336 hours in a calendar year, physicians services, nursing services, adult day care, dietary services*, and any other supportive services determined appropriate and necessary to prevent the need for placement of elderly and disabled individuals in acute or long term care facilities.

Any of the services may be provided at out-patient facilities of hospitals, nursing homes or rehabilitation centers if it involves the use of equipment which cannot be made readily available in a place of residence. Funds may also be used to provide education and information to medical and social service professionals concerning home and community based services.

Funds may not be used for: States may not use these funds to provide inpatient services, make cash payments to recipients, purchase or improve land or construct buildings, purchase major medical equipment, or provide financial assistance to other than public or non-profit entities.

Application: States must apply to the Secretary of HHS to participate in this program and provide assurances that legislature of the State conduct public hearings on the proposed distribution of funds. The chief executive officer of each State must certify the funds be used for the intended purpose, and establish a mechanism to coordinate all relevant State activities in health, welfare, and rehabilitation services by State and local agencies and public and private institutions. Also, the chief executive must designate an existing State agency, or establish an agency to administer these funds in a manner which insures the needs for home and community based services of the elderly and disabled are identified and met, and that this program will not duplicate services provided under the Federal Law. Furthermore, services provided with these funds are to be coordinated with services provided by voluntary, religious and community organizations, and not supplant existing State and local activities.

Reporting requirements: States are required to provide data similar to that for other block grants including a description of intended use of allotments, a public comment period, and notification of significant revision of activities.

Mr. HATCH. My second bill is the Community Home Care Service Act of

1983. Like my block grant bill, this legislation also amends the Public Health Service Act to allow coordination of existing home and community care services currently funded by various Public Health Service Act programs, the Older American Act, and State medicaid programs. We have learned from many providers of home health care, and their patients, that it is often difficult to come by, simply because those legitimately in need are not aware it exists. This is reason in itself to bring together all the health and social service programs, private and public, to make them more accessible and less duplicative.

My second bill amends title XIX of the Social Security Act to allow States to conduct regional or statewide programs providing home health care for individuals entitled to medical assistance who are at risk of institutionalization. Similar programs are currently being conducted under waivers to States which apply to the Department of Health and Human Services for exception to traditional reimbursements for institutional care. Such waivers have been very popular with States. I understand that preliminary data from channeling programs, community based research and demonstration projects funded by the Health Care Financing Administration, shows that prepaid and capitated home health programs are saving us money. This happens all too seldom in Government today, and when it does, we ought to encourage its return.

SUMMARY OF COMMUNITY HOME CARE SERVICES ACT OF 1983

Purpose: Provide coordination between programs funded by the Public Health Service Act, the Older American's Act and state Medicaid plans in furnishing of home care services; to allow states to implement a program of community-based home care services where medically needy and appropriate for individuals qualifying for medicaid, and to assist in releasing patients from hospitals and placing them in home care.

Coordination: Section 339(a) of the Public Health Service Act is amended to provide coordination of home health services provided under such act between demonstrations and home health services provided under the state's medicaid plan and the Older American's Act.

State Programs: Title XIX of the Social Security Act is amended to allow states to establish a program, which need not be State wide, to furnish home care services (directly, or by contract with providers) which shall:

(1) assess the health care needs of individuals applying for the program, develop a plan of care and case management system for each individual participating in the program;

(2) provide assessment teams consisting of a physician or registered nurse and one social worker or other qualified professional as designated by the State plan;

(3) determine need for ongoing services by reassessment conducted at least every four months.

Eligibility: Individuals qualifying for this program must be eligible for medical assistance under the State plan and require institutional care but for the provision of home care services. Participation by any individual is voluntary.

Home Care Services: These are defined as those services furnished to an individual under the care of a physician, by staff members of a home-health care entity (home health agency, hospital or long-term care facility certified to provide home care). Such services must be deemed necessary by a plan which is periodically reviewed and supervised by a physician, registered nurse or other individual licensed under State law to provide medical care.

Such services are provided on a visiting basis in a place of residence used as the individuals home and may include; homemaker/home-health aide services, physical, occupational, speech or respiratory therapy, medical social services, medical supplies and appliances, drugs and biologies (when necessary for individuals to receive other items in such place of residence), respite care for 14 days or 336 hours in calendar year, physicians services, nursing services, and any other supportive services the Secretary determines appropriate and necessary to prevent the need for institutionalization of the participating individuals.

Any of these services may be provided on an out patient basis at a hospital, long term care facility or rehabilitation center if it involves the use of equipment which cannot be made readily available in the individual place of residence.

Home Health Entities: These are defined as a public or private entity, and may be an agency of State or local governments.

Freedom of choice: Individuals participating in this program shall not have freedom of choice with respect to providers from whom they receive assistance.

Federal Match of Medicaid Program: Title XIX of the Social Security Act is amended to increase by 10 percentage points the amount of the Federal medical assistance percentage of the total amount expended during such quarter of home care services.

Mr. HATCH. The third bill of this home health triad is a Senate joint resolution designating November 27, 1983, through December 3, 1983, as National Home Health Care Week. The resolution honors the numerous health professionals who provide compassionate and much needed care for elderly and disabled individuals in their homes. These services have grown tremendously over the past decade, because the health needs they address have so dramatically grown. Commemorative resolutions by definition are intended to draw closer public attention to the person or cause being so honored. I can think of few causes more deserving than for exclusive approbation than that of giving elderly citizens more freedom to remain in their own homes or apartments where they so desperately wish to stay.

This is why I urge my colleagues to join with me in saluting the thousands of health professionals, private and public home health agencies, and charitable organizations who work to provide health care for the infirm and disabled in the comfort of their homes. I ask unanimous consent that the text of the three bills be printed in the RECORD at the conclusion of my remarks.

S. 1539

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Home and Community Based Services for the Elderly and the Disabled Act of 1983".

SEC. 2. Title XIX of the Public Health Service Act is amended by adding at the end thereof the following new part:

"PART D—HOME AND COMMUNITY BASED SERVICES BLOCK GRANT

"AUTHORIZATIONS OF APPROPRIATIONS

"SEC. 1941. (a) For the purpose of allotments to States to carry out the activities described in section 1944, there are authorized to be appropriated $700,000,000 for fiscal year 1986, $750,000,000 for fiscal year 1987, and $800,000,000 for fiscal year 1988.

"(b) For the purpose of allotments to States for planning the implementation of this part, there are authorized to be appropriated $20,000,000 for fiscal year 1985.

"ALLOTMENTS

"SEC. 1942. (a) From the amounts appropriated under section 1941 for any fiscal year, the Secretary shall allot to each State an amount which bears the same ratio to the total amount appropriated under such subsection for such fiscal year as the total number of elderly individuals residing in the State during such fiscal year bears to the total number of elderly individuals residing in all States during such fiscal year.

"(b) To the extent that all the funds appropriated under section 1941 for a fiscal year and available for allotment in such fiscal year are not otherwise allotted to States because—

"(1) one or more States have not submitted an application or description of activities in accordance with section 1945 for such fiscal year;

"(2) one or more States have notified the Secretary that they do not intend to use the full amount of their allotment; or

"(3) some State allotments are offset or repaid under section 1906(b)(3) (as such section applies to this part pursuant to section 1945(e));

such excess shall be allotted among each of the remaining States in proportion to the amount otherwise allotted to such States for such fiscal year without regard to this subsection.

"(c)(1) If the Secretary—

"(A) receives a request from the governing body of an Indian tribe or tribal organization within any State that funds under this part be provided directly by the Secretary to such tribe or organization, and

"(B) determines that the members of such tribe or tribal organization would be better served by means of grants made directly by the Secretary under this part,

the Secretary shall reserve from amounts which would otherwise be allotted to such State under subsection (a) for a fiscal year the amount determined under paragraph (2).

"(2) The Secretary shall reserve for the purpose of paragraph (1) from amounts that would otherwise be allotted to such State under subsection (a) an amount equal to the amount which bears the same ratio to the State's allotment for the fiscal year involved under subsection (a) as the total number of elderly individuals in the tribe during such fiscal year bears to the total

number of elderly individuals residing in the State during such fiscal year.

"(3) The amount reserved by the Secretary on the basis of a determination under this subsection shall be granted to the Indian tribe or tribal organization serving the elderly individuals and disabled individuals for whom such a determination has been made.

"(4) In order for an Indian tribe or tribal organization to be eligible for a grant for a fiscal year under this subsection, it shall submit to the Secretary a plan for such fiscal year which meets such criteria as the Secretary may prescribe.

"PAYMENTS UNDER ALLOTMENTS TO STATES

"SEC. 1943 (a) For each fiscal year, the Secretary shall make payments, as provided by section 6503(a) of title 31, United States Code, to each State from its allotments under section 1942 (other than any amount reserved under subsection (c) of such section) from amounts appropriated for that fiscal year.

"(b) Any amount paid to a State for a fiscal year and remaining unobligated at the end of such year shall remain available for the next fiscal year to such State for the purposes for which it was made.

"USE OF ALLOTMENTS

"SEC. 1944 (a) Except as provided in subsection (c), amounts paid to a State under section 1943 from its allotment under section 1942 for any fiscal year beginning after September 30, 1985, may be used for the following:

"(1) Activities to coordinate home and community based services provided to elderly individuals and disabled individuals by public and private institutions and organizations in order to eliminate duplication in the provision of such services and to maximize the use of funds provided under this part and other Federal laws for such services.

"(2) The development of procedures and means to—

"(A) identify elderly individuals and disabled individuals, including elderly individuals and disabled individuals who are—

"(i) patients in hospitals who are at risk of institutionalization; and

"(ii) patients in skilled nursing facilities and intermediate care facilities who could return to the community if home and community based services were available;

"(B) assess the needs of such elderly individuals and disabled individuals for home and community based services; and

"(C) make recommendations for cost-effective measures to meet the needs of such elderly individuals and disabled individuals for home and community based services.

"(3) Pursuant to the procedures and means developed under paragraph (2), the identification of elderly individuals and disabled individuals described in subparagraph (A) of such paragraph, and for each elderly individual or disabled individual identified, the performance of the assessment described in subparagraph (B) of such paragraph and the preparation of the recommendations described in subparagraph (C) of such paragraph.

"(4) The provision to elderly individuals and disabled individuals of—

"(A) homemaker or home health aide services provided by an individual who has successfully completed a training program approved by the Secretary;

"(B) physical, occupational, speech, or respiratory therapy;

"(C) medical social services under appropriate direction;

"(D) medical supplies (other than drugs or biologicals) and the use of medical appliances;

"(E) drugs and biologicals, but only where the furnishing of such items is necessary for an elderly individual or a disabled individual to receive other items and services pursuant to this subsection in such place of residence;

"(F) respite care services for up to 14 days or 336 hours in any calendar year;

"(G) physicians' services, and nursing care provided by or under the supervision of a registered professional nurse, provided in such place of residence;

"(H) adult day care services;

"(I) dietary services provided by or under the supervision of a registered dietitian;

"(J) any other supportive services, which may be appropriate and necessary to prevent the need for institutionalization of an elderly individual or a disabled individual, including appropriate patient and family training; and

"(K) any of the foregoing items and services—

"(i) which are provided on an outpatient basis, under arrangements made by the State, at a hospital, skilled nursing facility, or intermediate care facility, or at a rehabilitation center which meets such standards as may be prescribed in regulations; and

"(ii) the furnishing of which involves the use of equipment of such nature that the items and services cannot readily be made available to the place of residence of the elderly individual or the disabled individual; and

"(L) case management services.

"(5) The conduct of activities to provide education and information to medical and social service professionals concerning home and community based services provided by public and private institutions and organizations.

"(b) The Secretary may provide technical assistance to States in planning and operating activities to be carried out under this part.

"(c) A State may not use amounts paid to it under section 1943 to—

"(1) provide inpatient services,

"(2) make cash payments to intended recipients of health services,

"(3) purchase or improve land, purchase, construct, or permanently improve (other than minor remodeling) and building or other facility, or purchase major medical equipment,

"(4) satisfy any requirement for the expenditure of non-Federal funds as a condition for the receipt of Federal funds, or

"(5) provide financial assistance to any entity other than a public or nonprofit private entity, except that a State may use amounts paid to it under section 1943 to make payments to a private for profit entity under a contract between the State and such entity for the provision of services under this part.

The Secretary may waive the limitation contained in paragraph (3) with respect to a fiscal year beginning after September 30, 1985, upon the request of a State if the Secretary finds that there are extraordinary circumstances to justify the waiver and that granting the waiver will assist in carrying out this part.

"APPLICATION AND DESCRIPTION OF ACTIVITIES; REQUIREMENTS

SEC. 1945. (a) (1) In order to receive an allotment for a fiscal year under section 1942 each State shall submit an application to the Secretary. Each such application shall be in such form and submitted by such date as the Secretary shall require.

"(2) Each application required under paragraph (1) for an allotment under section 1942 for a fiscal year beginning after September 30, 1985, shall contain assurances that the legislature of the State has complied with the provisions of subsection (b) and that the State will meet the requirements of subsection (c).

"(b) After the expiration of the first fiscal year beginning after September 30, 1985, for which a State receives an allotment under section 1942, no funds shall be allotted to such State for any fiscal year under such section unless the legislature of the State conducts public hearings on the proposed use and distribution of funds to be provided under section 1943 for such fiscal year.

"(c) As part of the annual application required by subsection (a) for an allotment for a fiscal year beginning after September 30, 1985, the chief executive officer of each State shall—

"(1) certify that the State agrees to use the funds allotted to it under section 1942 in accordance with the requirements of this part;

"(2) provide assurances that such chief executive officer will establish an appropriate mechanism to coordinate activities of State agencies which administer programs relating to health, welfare, rehabilitation, and the elderly and the provision of home and community based services by State and local agencies and public and private institutions and organizations;

"(3) provide assurances that such chief executive officer will designate or establish a State agency to administer funds provided under this part and the plan developed under paragraph (2) in a manner which will insure, to the maximum extent feasible—

"(A) that the needs of elderly individuals and disabled individuals for home and community based services identified under section 1944(a)(3) will be met; and

"(B) that services provided to elderly individuals and disabled individuals under this part will not duplicate services to elderly individuals and disabled individuals provided under other provisions of Federal law;

"(4) certify that the State will coordinate the provision of home and community based services with funds provided under this part with activities conducted to provide such services by voluntary, religious, and community organizations;

"(5) certify that the State shall not provide home and community based services under this part which are greater in amount, duration, or scope than the home and community based services provided to individuals in the same geographical area who are eligible for such services under the State's medicaid plan approved under title XIX of the Social Security Act, and shall not duplicate services provided to individuals under such State plan or any provision of Federal law;

"(6) certify that the State, will, to the extent practicable, provide services under this part through agencies and providers rendering services under the States's medicaid plan approved under title XIX of the Social Security Act; and

"(7) certify that the State agrees that Federal funds made available under section 1943 for any period will be so used as to supplement and increase the level of State, local, and other non-Federal funds that would in the absence of such Federal funds be made available for the programs and activities for which funds are provided under

that section and will in no event supplant such State, local, and other non-Federal funds.

The Secretary may not prescribe for a State the manner of compliance with the requirements of this subsection.

"(d) The chief executive officer of a State shall, as part of the application required by subsection (a) for any fiscal year beginning after September 30, 1985, also prepare and furnish the Secretary (in accordance with such form as the Secretary shall prescribe) with a description of the intended use of the payments the State will receive under section 1943 for the fiscal year for which the application is submitted, including information on the programs and activities to be supported and services to be provided. The description shall be made public within the State in such manner as to facilitate comment from any person (including any Federal or other public agency) during development of the description and after its transmittal. The description shall be revised (consistent with this section) throughout the year as may be necessary to reflect substantial changes in the programs and activities assisted by the State under this part, and any revision shall be subject to the requirements of the preceding sentence.

"(e) Except where inconsistent with the provisions of this part, the provisions of section 1903(b), paragraphs (1) through (5) of section 1906(a), and sections 1906(b), 1907, 1908, and 1909 shall apply to this part in the same manner as such provisions apply to part A of this title.

"DEFINITIONS

"SEC. 1946. For purposes of this part:

"(1) the term 'elderly individual' means an individual who has attained the age of 65 years.

"(2) The terms 'Indian tribe' and 'tribal organization' have the same meaning given such terms in section 4(b) and section 4(c) of the Indian Self-Determination and Education Assistance Act.".

S. 1540

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Community Home Care Services Act of 1983".

PURPOSE

SEC. 2. It is the purpose of this Act to provide coordination between the Public Health Service Act, the Older American's Act, and State medicaid plans in the furnishing of home care services, to allow a State to implement a program under its medicaid program under which individuals requiring long-term care may participate in a program of community based home care services where medically appropriate and cost effective, and to assist in releasing patients from hospitals and placing them in home care.

COORDINATION OF HOME HEALTH SERVICES

SEC. 3. Section 339(a)(1) of the Public Health Service Act is amended by inserting ", and providing coordination between such demonstrations and home health services provided under the State's plan under title XIX of the Social Security Act" and under the Older American's Act after "not readily accessible".

STATE PROGRAMS AUTHORIZED

SEC. 4. (a) Title XIX of the Social Security Act is amended by adding at the end thereof the following new section:

"HOME CARE SERVICES

"SEC. 1918. (a)(1) Any State may establish, as a component of its State plan, a program, which need not be in effect Statewide, under which individuals described in subsection (b) are furnished home care services (defined in subsection (c)).

"(2) A program established pursuant to paragraph (1) shall provide that the State, directly or through arrangements with service providers under the program, shall—

"(A) assess the health care needs of each individual applying for or participating in the program to determine whether such individual meets the requirements of subsection (b);

"(B) develop a plan of care for each individual determined to be eligible to participate in the program; and

"(C) provide a case management system for each individual participating in the program under which such individual shall receive home care services, in accordance with the individual's plan of care, from a qualified entity having an agreement with the State under subsection (d).

"(3) The assessments, plan of care development, and case management functions described in paragraph (2) shall be carried out by an assessment team which shall consist of a physician or registered nurse and one social services worker or other qualified professional as may be designated under the State plan. In the case of an individual being discharged from a hospital, skilled nursing facility, or intermediate care facility, the initial assessment of eligibility for the program may be made by the discharge planning unit of such facility. Any initial assessment of eligibility for the program shall include an assessment by the individual's treating physician if the individual has such a treating physician and such physician desires to participate in the assessment.

"(4) Assessments shall be made at the time of initial eligibility determination, and reassessments shall be conducted at least every four months thereafter.

"(b)(1) An individual may participate in the program established by the State under subsection (a) if such individual—

"(A) is eligible for medical assistance under the State plan or would be eligible if institutionalized,

"(B) would require institutional care, but for the furnishing of home care services described in subsection (c).

"(2) Participation in the program by any individual shall be voluntary.

"(c) For purposes of this section, the term 'home care services' means the following items and services furnished or arranged to be furnished to an individual under the care of a physician, by staff members of a home health care entity, a hospital, or a long-term-care facility which is certified to provide home care, under a plan (for furnishing such items and services to such individual) established, periodically reviewed and supervised by a physician, registered professional nurse, or other individual licensed under State law to provide medical care not involving the administering of controlled medication, which items and services are, except as provided in paragraph (11), provided on a visiting basis in a place of residence used as such individual's home:

"(1) homemaker or home health aide services provided by an individual who has successfully completed a training program approved by the Secretary;

"(2) physical, occupational, speech, or respiratory therapy;

"(3) medical social services necessary to and supportive of the plan of care and furnished under appropriate direction;

"(4) medical supplies (other than drugs or biologicals) and the use of medical appliances;

"(5) drugs and biologicals, but only where the furnishing of such items is necessary for such individual to receive other items and services pursuant to this section in such place of residence;

"(6) respite care services for up to 14 days or 336 hours in any calendar year;

"(7) physicians' services, and nursing care provided by or under the supervision of a registered professional nurse, provided in such place of residence;

"(8) adult day care services;

"(9) dietary services provided by a registered dietitian;

"(10) any other supportive services, which the Secretary determines to be appropriate and necessary to prevent the need for institutionalization of the individual, including appropriate patient and family training; and

"(11) any of the foregoing items and services which are provided on an outpatient basis, under arrangements made by the home health care entity, at a hospital, skilled nursing facility, or intermediate care facility, or at a rehabilitation center or other facility which meets such standards as may be prescribed in regulations, and—

"(A) the furnishing of which involves the use of equipment of such a nature that the items and services cannot readily be made available to the individual in such place of residence, or

"(B) which are furnished at such facility while he is there to receive any such item or service described in clause (A),

excluding, however, any item or service if it would not be included under section 1861(b) if furnished to an inpatient of a hospital.

"(d)(1) The State shall enter into an agreement with an entity under this subsection for each individual participating in the program under which such entity shall provide, or arrange for the provision of, all home care services for which such individual may be eligible under the program and the need for which is established in the individual's plan for care.

"(2) The entity having an agreement with the State under paragraph (1) may be a public or private entity, and may be an agency of State or local government designated by the State for this purpose.

"(3) Any provision of this title which provides for freedom of choice by an individual with respect to providers from whom they are to receive services shall not apply with respect to services received under this section.".

(b) Section 1903(a) of such Act is amended by redesignating paragraph (7) as paragraph (8), and by inserting after paragraph (6) the following new paragraph:

"(7) an amount equal to the Federal medical assistance percentage, increased by 10 percentage points, of the total amount expended during such quarter for home care services provided in accordance with section 1918; plus".

(c) The amendment made by this section shall become effective on the date of the enactment of this Act.

DISCHARGE PLANNING

SEC. 5. (a) Section 1961(e) of the Social Security Act is amended by striking out "and" at the end of paragraph (8), by striking out the period at the end of paragraph (9) and inserting in lieu thereof "; and", and by inserting after paragraph (9) the following new paragraph:

"(10) has in effect a procedure for discharge planning for each patient who may be eligible for home care services under a State program established pursuant to section 1918 of this Act, which provides for the exercise of informed freedom of choice and includes evaluation of each such patient prior to discharge by an interdisciplinary team (which may include the patient's treating physician, the hospital discharge planner, and a representative of home health providers) with respect to care which may be required after discharge.".

(b) Section 1861(j) of such Act is amended by striking out "and" at the end of paragraph (15), and by inserting after paragraph (15) the following new paragraph:

"(16) has in effect a procedure for discharge planning for each patient who may be eligible for home care services under a State program established pursuant to section 1918 of this Act, which provides for the exercise of informed freedom of shoice and includes evaluation of each such patient prior to discharge by an interdisciplinary team (which may include the patient's treating physician, the facility discharge planner, and a representative of home health providers) with respect to care which may be required after discharge;".

(c) The amendments made by this section shall become effective on January 1, 1984.

S.J. RES. 122

Whereas organized home health care services to the elderly and disabled have existed in this country since the last quarter of the eighteenth century;

Whereas home health care is recognized as an effective and economical alternative to unnecessary institutionalization;

Whereas caring for the ill and disabled in their homes places emphasis on the dignity and independence of the individual receiving these services;

Whereas since the enactment of the medicare program including skilled nursing services, physical therapy, speech therapy, social services, occupational therapy, and home health aide services, the number of home health agencies providing these services has increased from less than five hundred to more than three thousand; and

Whereas many private and charitable organizations provide these and similar services to millions of patients each year preventing, postponing, and limiting the need for institutionalization: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of November 27, 1983, through December 3, 1983, is designated as "National Home Care Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the week with appropriate programs, ceremonies, and activities.

By Mr. SASSER (for himself, Mr. BAKER, Mr. ABDNOR, Mr. BAUCUS, Mr. BURDICK, Mr. DECONCINI, Mr. DOLE, Mr. EAST, Mr. HECHT, Mr. HOLLINGS, Mr. KASTEN, Mr. LAXALT, Mr. LEAHY, Mr. LEVIN, Mr. LUGAR, Mr. MITCHELL, Mr. NUNN, Mr. PERCY, Mr. PRYOR, Mr. STENNIS, Mr. COCHRAN, Mr. GORTON, Mr. SARBANES, and Mr. GARN):

S.J. Res. 120. Joint resolution to provide for the awarding of a special gold medal to Danny Thomas in recognition of his humanitarian efforts and outstanding work as an American; to the Committee on the Judiciary.

PRESENTATION OF A GOLD MEDAL TO DANNY THOMAS

● Mr. SASSER. Mr. President, along with the distinguished majority leader, Senator BAKER, and a number of my colleagues, I am today introducing legislation to provide for the awarding of a special gold medal to Danny Thomas in recognition of his humanitarian efforts and outstanding work as an American.

In October of this year, the world-renowned St. Jude Children's Hospital of Memphis will hold its annual convention here in Washington. They will be honoring this great man—Danny Thomas. The President has agreed to present this award to Danny on behalf of the U.S. Senate during the St. Jude Convention.

Danny has exercised his great comedic talent in nightclubs, films, theatre, radio, and television, but it is the latter medium that projected him into becoming one of the most popular entertainers of his time.

In the early 1930's, Danny had saved enough money from jobs as a busboy, punch-press operator's assistant, and a lumberyard watchman to buy a couple of suits and several pairs of shoes so he could move from Toledo to Detroit to look for a job in show business. One of his first jobs when in Detroit was that of a singer on a radio show called "The Happy Hour Club" where he met his wife whom he married in 1936.

With Detroit turning sour on him, Danny elected to move to Chicago where he took a job as a standup comedian at the 5100 Club in Chicago's northside in 1940. His popularity swiftly increased when the William Morris Agency began managing Danny and booked him at La Martinique in New York and Chez Paree in Chicago.

There was, however, one detour up his career ladder. During World War II, Danny entertained with USO troupes in north Africa, Italy, and the Philippines.

From here, Danny moved to a different medium—that of the silver screen. In 1947, he costarred with Margaret O'Brien in MGM's "The Unfinished Dance," and followed with "The Big City" and "Call Me Mister." In 1951 he costarred with Doris Day in Warner Bros. "I'll See You in My Dreams" and then starred in the "Jazz Singer."

But as it turned out, television was Danny's medium. In 1953, he launched "Make Room for Daddy" on ABC-TV. The television series actually was based on 14 years of Danny's own life. This series evolved into one of the most successful and honored family comedy shows in television history. The television series won many awards, five Emmy's among them. But after 11 seasons, and with the show still among the top 10 in ratings, Danny voluntarily ended the series.

Then in 1960, in partnership with Sheldon Leonard, Danny became a producer of what one newspaper columnist called a comic supermarket. Shows in this stable included the "Andy Griffith Show," "Bill Danna Show," "Gomer Pyle," and "The Tycoon." And his television career was furthered in 1966 when he formed Thomas-Spelling Productions with writer-producer Aaron Spelling. The company's ventures included the "Mod Squad," "The Guns of Will Sonnet" with Walter Brennan, and "Rango" with Tim Conway.

More recently Danny has done a number of television specials and has made many guest star appearances on various TV shows. And in 1976, Danny starred in a new situation comedy entitled "The Practice" for NBC.

Although Danny is recognized as one of the most accomplished entertainers of our time, his most significant achievement is St. Jude Children's Research Hospital. This institution was erected in Memphis, Tenn., and is the fulfillment of a vow he made when he was a desperately poor, young, struggling comedian.

In 1938, when his wife Rosemarie, was about to give birth to her first child, Marlo, the Thomases were leading a precarious life with Danny working mostly, to use his own description, as a $2-a-night saloon comic. Rosemarie begged him to get into some other line of work. Desperate, Danny sought relief in prayer. He knelt before the statue of St. Jude, the patron saint of the hopeless, and vowed to erect a shrine to St. Jude should he succeed in show business. In 1946, after achieving fame and recognition, Danny began a one-man campaign to raise funds for his shrine to St. Jude. He founded ALSAC (Aiding Leukemia Stricken American Children) to raise funds for the hospital which he decided would be the only fitting shrine to his patron saint. St. Jude Children's Research Hospital is a nonprofit hospital dedicated to helping grievously ill children of all faiths and races, children living and yet unborn. This medical institution, founded by Danny Thomas, has achieved a remarkable 53-percent cure rate.

Down the years an avalanche of honors from scores of civic, religious,

cultural, medical, and brotherhood groups have inundated him mostly as tokens of appreciation for his countless acts of charity of worthy causes. Pope Paul VI presented to Danny one of the highest decorations he could bestow on a laymen—Knight Commander with Star in the Equestian Order of the Holy Sepulchre of Jerusalem. The National Conference of Christians and Jews selected Danny Man of the Year and the American Medical Association presented him with its Layman's Award, the highest honor it can bestow on a nonmedical man, and only the sixth award made since 1948. He also received the Ohio State Governor's Award from Governor James A. Rhodes. Lions International presented Danny with the Humanitarian Award and he is also the recipient of the National Exchange Club's Outstanding American Award. The list is virtually endless.

Danny Thomas, born into poverty, has become one of America's most renowned and successful entertainers. He has matured into a man with extraordinary faith, charity, and humanitarian instincts.

My purpose in life—

Danny has said,

Is to propogate the philosophy of man's faith in man, based upon my own belief that unless man reestablished his faith in his fellow beings he can never establish a faith in God. In order that others to follow may be inspired to do likewise, I have to leave something tangible. I'm not so unforgettable that I can do it only with words. I must leave something that men can touch, feel, and see. That is St. Jude Children's Research Hospital.

In closing, I would like to emphasize the fact that Danny Thomas has helped to alleviate the suffering of many children throughout the world and given them hope for a brighter future. For this reason, I believe the U.S. Senate should include itself among those who have seen fit to honor this man. The Senate resolution that we are introducing provides this Senate the opportunity to thank Danny for all he has done.

Mr. President, I urge my colleagues to support this legislation that honors a great American individual—Danny Thomas.●

By Mr. ABDNOR (for himself, Mr. STENNIS, and Mr. WEICKER):

S.J. Res. 121. Joint resolution to designate November 1983 as National Diabetes Month; to the Committee on the Judiciary,

NATIONAL DIABETES MONTH

● Mr. ABDNOR. Mr. President, I am pleased to introduce today a joint resolution to designate the month of November 1983 as National Diabetes Month. Although the ongoing war against diabetes has yielded significant advances in basic and clinical research aimed at prevention, diagnosis, and treatment of persons who are afflicted with this disease, much more remains to be done.

Eleven million Americans suffer from diabetes. Some 5 million victims are not even aware that they have this chronic disease. This year, as many as 600,000 Americans will learn that they suffer from diabetes. Tens of millions of Americans—the friends and families of diabetics—are affected personally by the grave impact the disease has on their loved ones. Over $10 billion are spent each year for health care, disability payments, and premature mortality costs which result from diabetes.

Health complications resulting from diabetes affect a variety of bodily functions and organs. The lasting effects of these complications are extremely severe.

For example, the National Diabetes Data Group has reported that diabetes causes almost 50 percent of foot and leg amputations among adults; 20 percent of all cases of kidney failure and 15 percent of all blindness is due to diabetes; diabetes is a major cause of birth defects and infant mortality; the United States ranks among the highest five nations in the world in mortality due to diabetes; diabetics run a much higher risk of developing cardiovascular disease; persons with diabetes spend twice as many days in hospitals as persons who do not suffer from the disease; and diabetes, which is the fourth leading cause of visits to general and family practice physicians, places a major drain on our Nation's health resources.

Mr. President, the designation of November of this year as National Diabetes Month will serve to call to the wider attention of the American people the human and economic costs of diabetes. It is my sincere hope and belief that a greater understanding of this disease—by both those afflicted and others—will lead to more intensive research, improved methods of preventing serious complications, new types of treatment, and general awareness of the challenge we face in seeking to lessen the impact of diabetes. I urge the speedy adoption of this joint resolution.

Mr. President, I ask unanimous consent that the text of the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 121

Whereas diabetes kills more than all other diseases except cancer and cardiovascular diseases; and

Whereas eleven million Americans suffer from diabetes and five million seven hundred thousand of such Americans are not aware of their illness; and

Whereas $9,700,000,000 annually are used for health care costs, disability payments, and premature mortality costs due to diabetes; and

Whereas up to 85 per centum of all cases of noninsulin-dependent diabetes may be controllable through greater public understanding, awareness and education; and

Whereas diabetes is a leading cause of blindness, kidney disease, heart disease, stroke, birth defects, and lower life expectancy, which complications may be reduced through greater patient and public understanding, awareness, and education: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of November 1983 is designated as "National Diabetes Month", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that month with appropriate programs, ceremonies and activities.●

ADDITIONAL COSPONSORS

S.19

At the request of Mr. DOLE, the name of the Senator from Pennsylvania (Mr. SPECTER) was added as a cosponsor of S. 19, a bill to amend the Employee Retirement Income Security Act of 1974 and the Internal Revenue Code of 1954 to assure equality of economic opportunities for women and men under retirement plans.

S. 31

At the request of Mr. MATHIAS, the name of the Senator from California (Mr. WILSON) was added as a cosponsor of S. 31, a bill to amend title 17 of the United States Code with respect to home recording and video and audio recording devices and media, and for other purposes.

S. 32

At the request of Mr. MATHIAS, the name of the Senator from California (Mr. WILSON) was added as a cosponsor of S. 32, a bill to amend title 17 of the United States Code with respect to rental, lease, or lending of sound recordings.

S. 33

At the request of Mr. MATHIAS, the name of the Senator from California (Mr. WILSON) was added as a cosponsor of S. 33, a bill to amend title 17 of the United States Code with respect to rental, lease, or lending of motion pictures and other audiovisual works.

S. 37

At the request of Mr. COCHRAN, the name of the Senator from North Carolina (Mr. HELMS) was added as cosponsor of S. 37, a bill to temporarily reduce the duty on certain disposable surgical drapes and sterile gowns.

S. 267

At the request of Mr. TOWER, his name was added as a cosponsor of S. 267, a bill entitled "The Coal Distribution and Utilization Act of 1983."

S. 427

At the request of Mr. BAUCUS, the name of the Senator from California (Mr. CRANSTON) was added as a cosponsor of S. 427, a bill to amend the Inter-

nal Revenue Code of 1954 to remove certain limitations on charitable contributions of certain literary, musical, or artistic compositions.

S. 737

At the request of Mr. MATHIAS, the name of the Senator from Vermont (Mr. STAFFORD) was added as a cosponsor of S. 737, a bill to allow business to jointly perform research and development.

S. 788

At the request of Mr. QUAYLE, the name of the Senator from New Hampshire (Mr. HUMPHREY) was added as a cosponsor of S. 788, a bill to amend the Agricultural Act of 1949 to reduce the loan rates for the 1983 through 1985 crops of sugarcane and sugar beets.

S. 858

At the request of Mr. THURMOND, the name of the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of S. 858, a bill to recognize the organization known as the National Association of State Directors of Veterans Affairs, Inc.

S. 911

At the request of Mr. CHILES, the name of the Senator from Michigan (Mr. LEVIN) was added as a cosponsor of S. 911, a bill to establish a Commission to make recommendations for changes in the role of nonparty multicandidate political action committees in the financing of campaigns of candidates for Federal office.

S. 1025

At the request of Mr. HATFIELD, the name of the Senator from Vermont (Mr. STAFFORD) was added as a cosponsor of S. 1025, a bill to establish in the Federal Government a global foresight capability with respect to natural resources, the environment, and population; to establish a national population policy; to establish an interagency Council on Global Resources, Environment, and Population, and for other purposes.

S. 1145

At the request of Mr. DENTON, the names of the Senator from Maryland (Mr. MATHIAS), the Senator from Maine (Mr. MITCHELL), and the Senator from Alaska (Mr. MURKOWSKI) were added as cosponsors of S. 1145, a bill to recognize the organization known as the Catholic War Veterans of the United States of America, Inc.

S. 1249

At the request of Mr. ANDREWS, the name of the Senator from Minnesota (Mr. BOSCHWITZ) was added as a cosponsor of S. 1249, a bill to add a representative of Indian tribal governments to the membership of the Advisory Commission on Intergovernmental Relations.

S. 1276

At the request of Mr. MITCHELL, the names of the Senator from Louisiana (Mr. JOHNSTON), the Senator from Texas (Mr. BENTSEN), and the Senator from Ohio (Mr. METZENBAUM) were added as cosponsors of S. 1276, a bill to provide that the pensions received by retired judges who are assigned to active duty shall not be treated as wages for purposes of the Social Security Act.

S. 1300

At the request of Mr. HUDDLESTON, the name of the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of S. 1300, a bill to amend the Rural Electrification Act of 1936 to insure the continued financial integrity of the Rural Electrification and Telephone Revolving Fund, and for other purposes.

S. 1306

At the request of Mr. MATHIAS, the names of the Senator from Wyoming (Mr. SIMPSON), the Senator from Iowa (Mr. JEPSEN), and the Senator from Illinois (Mr. DIXON) were added as cosponsors of S. 1306, a bill to amend the patent law to restore the term of the patent grant for the period of time that nonpatent regulatory requirements prevent the marketing of a patented product.

S. 1350

At the request of Mr. LUGAR, the name of the Senator from Utah (Mr. GARN) was added as a cosponsor of S. 1350, a bill to amend the Federal Election Campaign Act of 1971 to increase the role of political parties in financing campaigns under such act, and for other purposes.

S. 1396

At the request of Mr. DOMENICI, the names of the Senator from West Virginia (Mr. RANDOLPH), and the Senator from Louisiana (Mr. JOHNSTON) were added as cosponsors of S. 1396, a bill to amend the Internal Revenue Code of 1954 to extend the period for qualifying certain property for the energy tax credit, and for other purposes.

S. 1475

At the request of Mr. WALLOP, the name of the Senator from Montana (Mr. MELCHER) was added as a cosponsor of S. 1475, a bill to amend the Internal Revenue Code of 1954 to repeal the highway use tax on heavy trucks and to increase the tax on diesel fuel used in the United States.

S. 1498

At the request of Mr. SPECTER, the name of the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of S. 1498, a bill to amend title 23, United States Code, to modify the apportionment formula for resurfacing, restoring, rehabilitating, and reconstructing the Interstate System.

S. 1506

At the request of Mr. TOWER, the name of the Senator from Texas (Mr. BENTSEN) was added as a cosponsor of S. 1506, a bill to amend the Internal Revenue Code of 1954 to restore the deduction for percentage depletion for oil and gas wells to the 1969 level, to restore intangible drilling costs for integrated oil companies to full deductibility, and to remove the intangible drilling cost deduction for individuals from the list of tax preferences subject to the minimum tax.

S. 1513

At the request of Mr. HATFIELD,, the names of the Senator from Alaska (Mr. STEVENS), the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Hawaii (Mr. INOUYE) were added as cosponsors of S. 1513, a bill to extend for 5 years the authorization of appropriations for the National Historical Publications and Records Commission.

SENATE JOINT RESOLUTION 18

At the request of Mr. JEPSEN, the name of the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of Senate Joint Resolution 18, a joint resolution designating September 22, 1983, as "American Business Women's Day."

SENATE JOINT RESOLUTION 105

At the request of Mr. RUDMAN, the names of the Senator from Pennsylvania (Mr. SPECTER), the Senator from Iowa (Mr. JEPSEN), the Senator from Michigan (Mr. RIEGLE), the Senator from Minnesota (Mr. DURENBERGER), and the Senator from Indiana (Mr. LUGAR), were added as cosponsors of Senate Joint Resolution 105, a joint resolution calling upon the Department of Justice and all other appropriate Federal agencies to enforce Federal antitrust laws including the prohibition against vertical price restraints.

SENATE JOINT RESOLUTION 106

At the request of Mr. SIMPSON, the name of the Senator from South Dakota (Mr. ABDNOR) was added as cosponsor of Senate Joint Resolution 106, a joint resolution designating August 3, 1983, and "National Paralyzed Veterans Recognition Day."

SENATE JOINT RESOLUTION 117

At the request of Mr. HUDDLESTON, the names of the Senator from Tennessee (Mr. SASSER), and the Senator from Iowa (Mr. GRASSLEY) were added as cosponsors of Senate Joint Resolution 117, a joint resolution to authorize and request the President to designate July 15, 1983, as "National Ice Cream Day."

SENATE CONCURRENT RESOLUTION 21

At the request of Mr. COHEN, the name of the Senator from Vermont (Mr. LEAHY) was added as a cosponsor of Senate Concurrent Resolution 21, a concurrent resolution expressing the sense of the Congress respecting the administration of title X of the Public Health Service Act.

SENATE CONCURRENT RESOLUTION 30

At the request of Mr. BAUCUS, the name of the Senator from West Vriginia (Mr. RANDOLPH) was added as a

cosponsor of Senate Concurrent Resolution 30, a concurrent resolution to reject the medicare cuts contained in the President's fiscal year 1984 budget.

SENATE CONCURRENT RESOLUTION 32

At the request of Mr. SPECTER, the name of the Senator from Oregon (Mr. HATFIELD) was added as a cosponsor of Senate Concurrent Resolution 32, a concurrent resolution to express the sense of the Congress concerning the legal minimum age for drinking and purchasing alcohol.

SENATE RESOLUTION 127

At the request of Mr. ANDREWS, the name of the Senator from South Dakota (Mr. ABDNOR) was added as a cosponsor of Senate Resolution 127, a resolution to make the Select Committee on Indian Affairs a permanent Committee of the Senate.

SENATE RESOLUTION 165—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 165

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of H.R. 2733, an Act to extend and improve the existing program of research, development, and demonstration in the production and manufacture of guayule rubber, and to broaden such program to include other critical agricultural materials.

The waiver of section 402(a) is necessary to permit consideration of statutory authority to extend the Native Latex Commercialization and Economic Development Act of 1978.

SENATE RESOLUTION 166—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 166

Resolved, That pursuant to sections 303(c) and 402(c) of the Congressional Budget Act of 1974, the provisions of sections 303(a)(4) and 402(a) of such act are waived with respect to the consideration of S. 1529, a bill to stabilzie a temporary imbalance in the supply and demand for dairy products, to enable milk producers to establish, finance, and carry out a coordinated program of dairy product promotion, to adjust the support levels for the 1983 and subsequent crops of tobacco, to make modifications in the tobacco production adjustment program, and for other purposes.

The waiver of section 303(a)(4) is necessary to permit consideration of new spending authority to become effective in fiscal years for which the first concurrent resolution on the budget has not been agreed to. Specifically, S. 1529 provides new spending authority under section 401(c)(2)(C) of the Congressional Budget Act of 1974 for the Secretary of Agriculture to carry out a diversion program for dairy producers to become effective on the date of enactment and extend through December 31, 1984.

The waiver of section 402(a) is necessary to permit consideration of statutory authority to provide appropriations to carry out certain activities of the Secretary of Agriculture in connection with a dairy research and promotion program.

SENATE RESOLUTION 167—RELATING TO THE FREE FLOW OF FOREIGN VISITORS TO THE 1984 OLYMPICS AND THE 1984 WORLD'S FAIR

Mr. PRESSLER submitted the following resolution; which was referred to the Committee on Commerce, Science, and Transportation:

S. RES. 167

Whereas in 1982 some 22 million foreign tourists visited the United States;

Whereas in addition to promoting international trade and friendly relations among nations, these foreign visitors spent $12 billion on goods and services while in the United States;

Whereas a substantial increase in the number of foreign visitors to the United States is expected in 1984 in conjunction with the holding of the Olympic Games in Los Angeles, California and the Louisiana World Exposition in New Orleans, Louisiana; and

Whereas it is in the interest of the United States to encourage as many foreign visitors to the United States as possible, to inform such visitors of recreational and commercial opportunities throughout the United States, and to facilitate their entry into and travel within the United States: Now, therefore be it

Resolved, That it is the sense of the Senate that:

(1) The Secretary of Commerce should undertake all necessary steps to encourage foreign nationals to attend the 1984 Olympic Games and the Louisiana World Exposition.

(2) In conjunction with these efforts, the Secretary of Commerce should implement a systematic plan to interest such foreign nationals in other recreational and commercial activities throughout the United States.

(3) The Secretary of Commerce should consult with the Secretary of the Treasury and the Attorney General of the United States to develop and implement, before the 1984 Louisiana World Exposition, a national plan to consolidate the inspection functions pertaining to international travelers and cargo carried out by the Cabinet Departments listed above. In order to reduce and eliminate any unwarranted delays and inconvenience to passengers and shippers at United States gateway and preclearance airports, such plan should include, but not be limited to, the increased use of automated and advanced screening techniques that enhance both law enforcement and the expeditious flow of passengers and cargo, expansion of simplified passenger and cargo inspection procedures, and more cost effective use of combined Federal manpower resources.

(4) The Secretary of Commerce should, pursuant to section 202 of the International Travel Act of 1961, assist State and local governments, and other private and public entities, to facilitate and encourage travel throughout the United States by residents of foreign countries visiting the United States for the 1984 Olympic Games and the 1984 Louisiana World Exposition.

● Mr. PRESSLER. Mr. President, I am today offering a Senate resolution expressing this body's support for increasing and facilitating foreign travel to the United States during two major international tourism events we will be hosting in 1984.

These two events are the 1984 Olympics, which will be held in Los Angeles, and the 1984 Louisiana World Exposition, which will be held in New Orleans. Both events are of major significance to international tourism and they are certain to bring thousands of additional visitors to our country next year. We are fortunate in that the two events occur at roughly the same time, and also that they are widely separated geographically. I say this is fortunate because I am sure that many foreign visitors will want to attend both events, and this means that they will be traveling extensively throughout our Nation. I am particularly hopeful that many of these international visitors will take the time to visit destinations in the western and midwestern parts of our country. My own State of South Dakota, where tourism is the second largest industry, is already visited by thousands of foreign travelers each year, but we are always anxious to host more of our friends from abroad.

It is a fact that one of the best promotions for any destination is having satisfied visitors returning home and telling their friends about the good time they had. Many of the visitors to South Dakota come to the State because their friends and neighbors recommended it as a vacation destination. Obviously, this works on the international level as well. I am convinced that as we attract more and more visitors to the West and Midwest this expansion will feed upon itself and we will soon have an even more rapidly growing tourist industry in the area.

Of course, visitors to this country are only going to go home and pass along positive comments if we are prepared to welcome and accommodate them. We should all try to be aware of the fact that we, as American citizens, are the hosts for the foreign visitors who come to our shores each year. We must try to make them feel welcome.

However, there are things beyond the attitude we display which must also be done in order to accord proper treatment to overseas visitors. One of the most important of these is the manner in which foreign travelers are met when they first reach this country. We could learn much from our European neighbors in this area.

Our entry and inspection system often means long lines, long waits and

exposure to a confusing system which is not designed to accommodate non-English speaking visitors. It is critical, in my opinion, that we correct this situation if we are to have any chance of expanding our popularity as an international destination and reaping the economic rewards which that entails.

This will be especially true next year when we will have so many more visitors than usual. If we are not prepared for the first major increase in travelers in the spring, we will undoubtedly discourage many thousands of potential visitors who will hear horror stories about how hard the U.S. Government makes it for travelers to enter the country.

For all the reasons I have mentioned above, I am offering this resolution which recommends that we make an effort to prepare for the boom in foreign tourism which is certain to come next year. The resolution directs the Secretary of Commerce to conduct a broad program of promotion for these events, and to encourage foreign visitors to travel to a variety of places in the United States. Again, I would personally hope that many of them would decide to visit the midwestern part of the Nation.

The resolution also directs the Secretary of Commerce to work with the Secretary of the Treasury and the Attorney General in formulating a plan for the consolidation of the inspection services operated by their offices—Customs and INS. This consolidation is to be achieved by early next year, and its major goal is to be improvement in expediting the flow of passengers and cargo into this country.

As I said earlier, unless we make sure that foreign visitors are decently treated when they first arrive, we will be missing a major opportunity to expand this Nation's tourism industry.

I hope that my colleagues will join me in recognizing the importance of this issue, and I further hope that we can deal with this issue now while we still have time for proper planning.●

AMENDMENTS SUBMITTED

OCEAN AND COASTAL DEVELOPMENT IMPACT ASSISTANCE FUND

JEPSEN (AND HELMS) AMENDMENT NO. 1432

(Ordered to lie on the table.)

Mr. JEPSEN (for himself and Mr. HELMS) submitted an amendment intended to be proposed by them to the bill (S. 800) to establish an ocean and coastal development impact assistance fund and to require the Secretary of Commerce to provide to States national ocean and coastal development and assistance block grants from moneys in the fund, and for other purposes; as follows:

At the end of the pending business, add the following sections:

"SEC. . The Congress finds that—

"(a) it is the policy of the Government of the United States to protect innocent life, both before and after birth, and that the Government of the United States affirms that all human beings are endowed by their Creator with certain unalienable rights among which is the right to life, as embodied in our Declaration of Independence;

"(b) the American Convention on Human Rights of the Organization of American States in 1969 affirmed that every person has the right to have his life protected by law from the moment of conception and that no one shall be arbitrarily deprived of life;

"(c) the Declaration of the Rights of the Child of the United Nations in 1959 affirmed that every child needs appropriate legal protection before as well as after birth;

"(d) at the Nurenberg International Military Tribunal for the trial of war criminals the promotion of abortion among minority populations, especially the denial of the protection of the law to the unborn children of Russian and Polish women, was considered a crime against humanity;

"(e) as early as 1859 the American medical profession affirmed the independent and actual existence of the child before birth as a living being and condemned the practice of abortion at every period of gestation as the destruction of human life;

"(f) scientific evidence demonstrates the life of each human being begins at conception;

"(g) the Supreme Court of the United States in the case of Roe against Wade erred in not recognizing the humanity of the unborn child and the compelling interest of the several States in protecting the life of each person before birth;

"(h) the Supreme Court of the United States in the case of Roe against Wade erred in excluding unborn children from the safeguards afforded by the equal protection and due process provisions of the Constitution of the United States; and

"(i) a growing tolerance of infanticide in America has followed the "quality of life" ethic as was established by the United States Supreme Court in the Roe against Wade decision, and as recently evidenced by the starvation death of an innocent handicapped newborn child in Bloomington, Indiana.

"SEC. . No agency of the United States shall perform abortions, except when the life of the mother would be endangered if the child were carried to term.

"SEC. . No funds appropriated by Congress shall be used to perform abortions, to reimburse or pay for abortions, or to refer for abortions, except when the life of the mother would be endangered if the child were carried to term.

"SEC. . No agency of the United States shall promote, encourage, counsel, refer, pay for, including travel expenses, or assist in the performance of abortions abroad as a matter of our foreign policy, except when the life of the mother would be endangered if the child were carried to term.

"SEC. . The United States shall not enter into any contract for insurance that provides for payment or reimbursement for abortions other than when the life of the mother would be endangerd if the child were carried to term.

"SEC. . No institution that receives Federal financial assistance shall discriminate against any employee, applicant for employment, student, or applicant for admission as a student, on the basis of that person's opposition to abortion or refusal to counsel or assist in the performance of abortions.

"SEC. . No institution that receives Federal financial assistance shall withhold from a handicapped infant nutritional sustenance or medical or surgical treatment required to correct a life threatening condition if: (1) the withholding is based on the fact that the infant is handicapped; and (2) the handicap does not render treatment medically contraindicated. Any institution or agency in violation of such restrictions shall be denied any further Federal assistance.

"SEC. . In light of the provisions of this title, and to expedite Supreme Court consideration of the interest of the States in protecting the lives of all human beings within their jurisdiction, if any State enforces or enacts legislation which prohibits or restricts abortions or infanticide and such legislation is invalidated by interlocutory or final order of any court of the United States, any part to such case shall have a right to direct appeal to Supreme Court of the United States, under the same provisions as govern appeals pursuant to section 1252 of title 28, United States Code, notwithstanding the absence of the United States as a party to such case. Notwithstanding any other provision of Federal law, attorneys' fees shall not be allowable in any civil action involving, directly or indirectly, the provisions of this title.

"SEC. . If any provision of this title or the application thereof to any person or circumstances is judically determined to be invalid, the validity of the remainder of this title and the application of such provision to other persons and circumstances shall not be affected by such determination.".

LEGISLATIVE BRANCH APPROPRIATIONS ACT, 1984

GARN AMENDMENT NO. 1433

Mr. GARN proposed an amendment to the bill (H.R. 3135) making appropriations for the legislative branch for the fiscal year ending September 30, 1984, and for other purposes; as follows:

At the end of the bill add the following:

SEC. . (a) All unearned income earned by a Senator during a calendar year in excess of an amount equal to 30 per centum of the annual salary paid to such Senator for service as a Senator during such calendar year shall be placed in an unearned income trust for the term of service of such Senator as provided in subsection (b).

(b)(1) Except as provided in paragraph (2), all income placed in an unearned income trust as required by subsection (a) shall be unavailable to the Senator for the term of service of such Senator.

(2)(A) If the unearned income of a Senator for any calendar year of service is less than an amount equal to 30 per centum of the annual salary paid to such Senator for service during such calendar, such Senator may withdraw from his or her unearned income trust, an amount equal to 30 per centum of the annual salary less the unearned income of such Senator for such calendar year.

(B) If, during any calendar year of service, a Senator has a fiscal emergency requiring extraordinary amounts of income, such Senator may apply to the Select Committee on Ethics for a waiver of the requirements of this section. The Select Committee on Ethics shall grant waivers and allow access to unearned income trust funds in accordance with regulations prescribed by such committee.

(c) For purposes of this section, the term "unearned income" means all income other than earned income as defined in section 911(d)(2) of the Internal Revenue Code of 1954.

(d) This section shall be applicable to unearned income earned by Senators beginning January 1, 1984.

PUBLIC BUILDINGS SERVICE AUTHORIZATION

STAFFORD (AND OTHERS) AMENDMENT NO. 1434

(Ordered to lie on the table.)

Mr. STAFFORD (for himself, Mr. RANDOLPH, and Mr. MOYNIHAN) submitted an amendment intended to be proposed by them to the bill (S. 1287) to authorize appropriations for the Public Buildings Service of the General Services Administration for the fiscal year 1984; as follows:

On page 2, strike lines 22 and 23 and on page 3, strike lines 1 and 2 and insert in lieu thereof the following:

"(a) Not to exceed $172,510,000 shall be available for fiscal year 1984 as follows:

"(1) For construction of public buildings (including funds for site and expenses) at the following locations and maximum construction costs:

Massachusetts, Waltham, federal archives and records center (extension)	$1,621,000
Oregon, Portland, federal office building	67,475,000
Tennessee, Knoxville, federal office building	14,990,000
Washington, Seattle, federal archives and records center (extension)	3,525,000

"(2) For demolition of the public buildings at the following location and maximum demolition cost:

California, Los Angeles, warehouses	$599,000

"(3) $1,000,000 for construction of minor public buildings of less than ten thousand gross square feet of space;

"(4) $83,300,000 for purchase of sites and buildings at the following locations and maximum acquisition costs:

Pennsylvania, Pittsburgh, post office courthouse	$23,300,000
Other selected purchases including options to purchase	60,000

"(b) Not to exceed $181,332,000 shall be available for fiscal year 1984 as follows:

"(1) For renovations, alterations, and repairs of public buildings at the following locations and at the following maximum project costs of $1,000,000 or more:

Arkansas, Little Rock, post office-courthouse	$4,269,000
California, San Francisco, Appraisers Building	1,200,000
Colorado, Denver, Federal Center Building 20	6,427,000
District of Columbia, Auditors Building	9,294,000
District of Columbia, Blair House	6,500,000
District of Columbia, Liberty Loan Building	2,757,000
District of Columbia, Pension Building	2,650,000
Georgia, Atlanta, Federal Annex.	9,193,000
Illinois, Chicago, J. C. Kluczynski Federal Building	3,319,000
Maryland, Baltimore, Middle River Federal Depot	1,892,000
Maryland, Suitland, Naval Intelligence Command Bldg. No. 1	9,760,000
Massachusetts, Boston, John F. Kennedy Federal Bldg	2,499,000
Michigan, Detroit, Federal building-courthouse	4,957,000
Michigan, Detroit, Patrick V. McNamara Federal Bldg	5,474,000
North Carolina, Asheville, Grove Arcade Fed. Bldg	8,364,000
Ohio, Cincinnati, post office-courthouse	1,138,000
Ohio, Cleveland, Anthony J. Celebrezze Federal Bldg	3,951,000
Pennsylvania, Pittsburgh, post office-courthouse	8,975,000
Texas, San Antonio, post office-courthouse	6,190,000
Utah, Ogden, Internal Revenue Service	3,036,000
Washington, Yakima, Federal building-courthouse	1,025,000

"(2) $14,000,000 for renovations and repairs of public buildings acquired by purchase; *Provided,* That prior to obligation of funds granted under authority of this subsection, approval of the Senate Committee on Environment and Public Works and the House Committee on Public Works and Transportation is secured;

"(3) Section 3(a) of this Act notwithstanding, for design of renovations, alterations, and repairs of public buildings at the following locations and maximum costs:

District of Columbia, steam distribution system	886,000
Louisiana, New Orleans, Hebert Federal Building	611,000

"(4) $59,465,000 for renovations and repairs of public buildings at project costs of less than $1,000,000;

"(5) $3,500,000 for alterations of leased buildings, the maximum cost for a single building being less than $250,000."

On page 3, redesignate subsections "(b), (c), (d), and (e)" as "(c), (d), (e), and (f)," respectively.

On page 4, after line 17, add new sections as follows:

"SEC. 7. (a) The Administrator of General Services (hereinafter referred to as the Administrator) shall transfer the building (occupied by the United States International Trade Commission and the United States Postal Service) and the site thereof located between Seventh and Eighth Streets, and E and F Streets, Northwest in the District of Columbia, to the Smithsonian Institution for the use of certain art galleries of the Smithsonian Institution. Notwithstanding any other provision of law, such transfer shall be without reimbursement.

"(b)(1) The Administrator, at the earliest practicable date, shall relocate the United States International Trade Commission in a quality building suitable to its headquarters operations and in a location in downtown, Washington, District of Columbia, which is convenient to its mission, to congressional committees, and to private groups that do business with it. The Administrator and the Chairman of the United States International Trade Commission shall each report separately in writing to the Committees on Environment and Public Works and Finance of the Senate and to the Committees on Public Works and Transportation and Ways and Means of the House of Representatives within 60 days of enactment of this Act and every 30 days thereafter on the progress in meeting the provisions of this section.

(2) The Administrator, during the period which the United States International Trade Commission and the United States Postal Service continue to occupy the present building, shall repair such building to assure an adequate level of maintenance to prevent deterioration of the building.

"(c) The transfer required by subsection (a) shall be made at such time when the Administrator determines that the use of the building by the United States International Trade Commission and the United States Postal Service is no longer essential.

"(d) The Administrator, in consultation with the Smithsonian Institution, is authorized to enter into such contracts and take such other action as may be necessary to make the building suitable to house certain art galleries and related activities of the Smithsonian Institution upon transfer of funds available to the Smithsonian Institution for such purposes."

"SEC. 8. Notwithstanding any other provision of law, none of the funds made available to the General Services Administration pursuant to section 210(f) of the Federal Property and Administrative Services Act of 1949, shall be obligated or expended after the date of enactment of this Act for procurement by contract of any service which, before such date, was performed by individuals in their capacity as employees of the General Services Administration in any position of mechanic."

FIRST CONCURRENT RESOLUTION ON THE BUDGET

DOLE AMENDMENT NO. 1435

Mr. DOLE proposed an amendment to the amendment of the House to the amendment of the Senate to the concurrent resolution (H. Con. Res. 91) revising the congressional budget for the U.S. Government for the fiscal year 1983 and setting forth the congressional budget for the U.S. Government for the fiscal years 1984, 1985, and 1986; as follows:

In section 3(a) on line 2 insert after "through (e)" the following: "(except for the committee described in subsection (b)(1))"

In section 3(a) on line 5 insert after "through (l)" the following; "(except for the committee described in subsection (l)(2))"

Strike subsection 3(b)(2) and insert in lieu thereof the following:

"The Senate Committee on Finance shall report by September 15, 1983, changes in laws within the jurisdiction of that committee sufficient to increase revenues by $59,000,000,000 in the aggregate over fiscal years 1984, 1985 and 1986."

Strike subsection 3(l)(2) and insert in lieu thereof the following:

"The House Committee on Ways and Means shall report by September 15, 1983, changes in laws within the jurisdiction of that Committee sufficient to increase revenues by $59,000,000,000 in the aggregate over fiscal years 1984, 1985 and 1986.".

NOTICES OF HEARINGS

SELECT COMMITTEE ON INDIAN AFFAIRS

● Mr. ANDREWS. Mr. President, I would like to announce for the information of the public that the Select Committee on Indian Affairs will hold a business meeting on June 28, 1983, at 2:30 p.m. in SD-608 to mark up S. 1168, to declare that the United States holds certain lands in trust for the Kaw Tribe of Oklahoma; S. 856, to provide for an Indian housing program for construction and financing of housing for Indians; S. 1224, to provide for the disposition of certain undistributed judgment funds awarded the Creek Nation; and, S. 1249, to add a representative of Indian tribal governments to the membership of the Advisory Commission on Intergovernmental Relations, and for other purposes. Those wishing additional information should contact Paul Alexander of the Select Committee on Indian Affairs at 202/224-2251.

Mr. President, I would also like to announce for the information of the Senate and the public the scheduling of a field hearing which will focus upon issues related to the reauthorization of the Indian Health Care Improvement Act, as well as issues of general concern affecting the health of American Indians. The hearing is scheduled to commence at 10 a.m., in the Granite Room at the Sheraton Hotel at 27 North 27th Street, Billings, Mont. Those wishing to testify or submit written testimony should contact Max Richtman of the Select Committee on Indian Affairs at 202/224-2251.

Also, the Select Committee on Indian Affairs will be holding a hearing on July 13, 1983 at 9 a.m., in room SD-628 on S. 1148, to provide for the use and distribution of funds awarded the Assiniboine Tribe of Fort Belknap Indian Community, Mont., and Assiniboine Tribe of Fort Peck Indian Community, Mont., in docket numbered 10-81L by the U.S. Court of Claims, and for other purposes. Those wishing to testify should contact Max Richtman of the committee at 202/224-2251.●

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. HELMS. Mr. President, I wish to announce that the Senate Committee on Agriculture, Nutrition, and Forestry will meet Thursday, June 30, to consider S. 1101, which authorizes appropriations for programs administered under the National Aquaculture Act of 1980, and S. 663, commonly referred to as the "Sodbuster bill". It would prohibit participation in certain farm programs to farmers who produce certain crops on highly erodible lands.

The markup will begin at 10 a.m. in room 328-A Russell Building.

ADDITIONAL STATEMENTS

I SPEAK FOR FREEDOM

● Mr. HUMPHREY. Mr. President, a young man from my State, David Woetzel, has won a sizable scholarship in the Friends of Free China "I Speak for Freedom" high school speech contest. His speech points clearly to the value of freedom, and because this is such an important subject, I ask that his speech be printed in the RECORD.

The speech follows:

I SPEAK FOR FREEDOM

In 1848 Karl Marx said, "Free society is only a step of progress. The utopian economy will be achieved when after a workers dictatorship true Communism is established." After 135 years has Communism met these goals? Has it made more progress than free society?

First, let us see how the "utopian economy" has progressed. I quote U.S. News, 1982, "Communism is the great economic failure. Marshal Goldman, national expert on the Soviet economy explains the Soviet economic crisis is "the most serious since Stalin's day." He tells of the failure of an economic system that is getting worse daily and could explode. A Communist newspaper in Czechoslovakia admits, "There is no use trying to cover up the economic situation." Latest statistics reveal that Western Europe is outproducing Eastern Europe per capita by a 2 to 1 ratio. The latter also faces colossal debts. A recent newspaper article says, "Maoist ideas are being junked wholesale. Communist China's reforms indicate Peking's acknowledgment of the failure of its previous economic policies." The Kremlin model has also fallen flat in Africa, Cuba, Vietnam and the difference in the two Koreas also illustrates this. Is that progress?

Secondly, let us consider how the people in the "workers' paradise" have progressed. "Permanent austerity, slothful workers and unhappy masses," says U.S. News, 1982, "the reality is far from a dream, and the worst may still be ahead. For the 1.5 billion inhabitants of the Communist world, the Marxist promise of a workers' paradise has turned into a nightmare of permanent scarcity, economic stagnation and discontent." Workers are revolting, saying, "You make believe you are paying me and I'll make believe I work." To roughly achieve the Soviet Union's living standards the book "Death of a Nation" says, "The U.S., among other things, would be required to destroy 4 billion T.V. sets, 7 out of 10 homes; dismantle 9 out of 10 telephones; destroy 19 of 20 cars; put 60 million people back on the farms, then lower the living standards 75% by not producing enough food to feed our own people." Another current news article says, "The most satisfied customers in Eastern Europe are in Hungary and Bulgaria, primarily because they have junked as much of the Kremlin model as they think they can get away with." Reports from Afghan rebels tell of Andropov's predicament in that country. On the battlefield the modern picked Soviet Force is so thrilled to be fighting for the "workers' paradise" that the army faces a 60% desertion rate. Is that progress?

To complete our examination of the "progress" of Communism we must compare it to the progress of a free country. Perhaps the best example available is that of Free China (Taiwan) and Communist (Mainland) China. Both come from the same background, culture, economy, people and resources. However, a comparison of the two systems that exist today indicates the effect freedom has on progress. We will consider the same two major areas. The economics growth of Taiwan has exceeded Mainland China. Taiwan's per capita income is ten times that of Mainland China. The Communists are about 15 years behind. "Taiwan attracts large foreign investments," says U.S. News, 1981. "But little has been accomplished on the Mainland because of Peking's red tape." The trade balance between the two runs 3 to 1 in Taiwan's favor." That is progress. "Mismanagement, bureaucratic regulations, policy reversing, and buck-passing officialdom is why Mainland China faces 10 million urban unemployed and millions more producing very little . . . compared to Taiwan where there are more jobs vacant than job-seekers." states U.S. News.●

EXPORTS

● Mr. BENTSEN. Mr. President, a national debate has begun on trade policy. Articles appear regularly in our most distinguished newspapers and magazines advocating a little or a lot of protectionism or apologizing for the system of free trade. There is no question that our huge trade deficits—upward of $70 billion this year and over $40 billion last year—and the failure of the Geneva-based General Agreement on Tariffs and Trade (GATT) to correct the violations of international trade agreements that now abound, not to speak of the 35 million people unemployed in OECD countries, has produced skepticism that the postwar trade system has any steam left in it.

Plainly, this is a problem with many sides. Some narrowly targeted protection of domestic industries vital to our economic security and some narrowly targeted subsidies of our exports in order to demonstrate to other countries the need for the international rule of law in trade are going to be necessary. Foreign unfair trading practices are now so embedded in the culture of industrialized countries that only by using our power strategically can we control and eventually reduce these illegal and unfair trade practices.

But we must also be competitive. Our domestic adjustment mechanisms of the past have cost a lot but have not worked well. Rapid adjustment to economic change is now a matter of economic necessity. If we do not change the way we make products and the products we make, we will simply lose the international competition in goods. Positive economic adjustment is an important avenue to increasing our

productivity and thereby our competitiveness.

We must not use the short-term and narrowly targeted solutions to current problems as a cure for our long-run difficulties. In the long run, we must be efficient, and we must export.

In that connection, I was pleased to read the remarks of Senator MAX BAUCUS, a member of the Finance Committee's Subcommittee on International trade of which I am the ranking Democratic member. Senator BAUCUS' remarks, delivered on June 2 of this year to the 1983 Pacific Northwest Conference on Exports properly concentrates on the long-range problem: Exports. I ask that Senator BAUCUS' remarks at that conference be reprinted in the RECORD, so that Senators may have before them this long-range aspect of the problem, as well as some of the shorter range trade problems that come across our desks everyday.

The remarks follow:

THE 1983 PACIFIC NORTHWEST CONFERENCE ON EXPORTS

(By Senator Max Baucus)

INTRODUCTION

Thank you.

I'm happy to be in Portland today to discuss international trade policy.

These days, most discussions of international trade policy are grim. Everywhere, we hear that America is losing the battle for international sales. This generates pessimism. Some Americans have even begun to doubt our ability to compete.

If Robert Gray could hear this pessimism, he would shudder in his grave.

Back around 1800, Gray commanded the merchant sloop *Columbia*. He prowled the Northwest coastline, trading trinkets for furs. Along the way, he discovered the great river that bears his sloop's name.

Then he turned west, for the spice markets of Canton and Macao. When he finally sailed into Boston Harbor, Gray became the first American to circle the globe.

All along the voyage, Gray and his men were beset by storms, scurvy, and pirate attacks. But they persevered, because they possessed an aggressive trading spirit.

We must rekindle that spirit now. Our trade problems are serious, but they are not irreversible. With sound federal policies and confident, innovative business strategies, we can take on the world again.

EXPORT FINANCING

As you know, export financing is a critical part of any export transaction. It can make or break a sale. Several federal policies affect export financing. Today I would like to discuss three especially important ones: exchange rate policy, export financing assistance, and export taxation.

EXCHANGE RATES

Let's start with exchange rates.

An overvalued dollar makes exports more expensive. Recent events show how much harm this can cause. During the past two years, high interest rates generated a huge demand for dollars. This, in turn, inflated the dollar's international value. For example, the dollar rose 50 percent against the mark and 35 percent against the yen.

The result? Disaster: for farmers, miners, timbermen, and any Northwest company trying to develop new export markets.

To prevent such disasters from recurring, we must make two adjustments.

First, we must force interest rates to come down and stay down. Basically, this means reducing the bloated federal deficit. As the President's own chief economic adviser, Martin Feldstein, recently said: "Our trade deficits can shrink and American industry can return to its previous strong role in the world economy . . . if we provide the appropriate fiscal framework of declining budget deficits." I couldn't agree more.

Second, we must somehow control exchange rate fluctuations. The so-called "Bretton Woods" system of fixed exchange rates was abolished in 1971. Since then, the dollar has "floated" on a sea of speculation. During this time, wild exchange rate fluctuations have undermined the business certainty needed for long-term export development. And some other foreign countries have manipulated exchange rates to promote their own exports.

Given these problems, many respected economists have suggested reforming the exchange rate system. But, so far, the President has resisted these suggestions, maintaining his commitment to the current floating system.

While I admire the President's persistence, I question his judgment. Economics is not religion. The evidence clearly shows that we should restore some kind of order to the exchange rate.

Therefore, I plan to ask the Senate to consider moderate proposals for doing so. I hope that the President changes his mind and joins this effort.

EXPORT FINANCING ASSISTANCE

Now let's focus on export financing assistance.

The Export-Import Bank helps U.S. companies respond to subsidized foreign financing. Last year, Ex-Im provided loans, guarantees or other financing assistance for almost $19 billion worth of U.S. exports.

However, Ex-Im has been shackled. The Ex-Im Act requires the Bank both to compete with subsidized foreign financing and to be self-sustaining. During financing "wars" like the one during the past two years, these objectives have collided. For example, last year, nearly $1 billion in Ex-Im lending authority went unused because Ex-Im emphasized balancing its books over meeting foreign competition.

This year, Congress must reauthorize Ex-Im. When it does, I hope we make two important changes. First, we should specify that Ex-Im's primary objective is to provide competitive financing. When another financing "war" breaks out, I'd rather have Ex-Im ask Congress for an appropriation than have American companies lose sales to unfair foreign competitors.

Second, we should expand Ex-Im's coverage. For example, Ex-Im has not provided enough assistance to housing exports or small business exports. This must change.

EXPORT TAXATION

Finally, let's turn to export taxation.

Most other industrialized countries only tax income earned within their borders. What's more, they remit "value-added" taxes on exported products.

The U.S. system is very different. We tax income worldwide, wherever it is earned. And we remit nothing.

For years, the difference between the two taxation systems gave our foreign competitors a clear advantage. To compensate, in 1971, Congress passed the "Domestic International Sales Corporation" or "DISC" Act. Basically, DISC permits qualified U.S. exporters to defer 50 percent of their taxes.

DISC has worked pretty well. For example, in 1980, $131 billion worth of U.S. products were exported through DISC, including $35 billion worth of agricultural products, $3 billion of lumber products, and $800 billion of mineral products. Indeed, the Treasury Department estimates that DISC increased overall U.S. exports by as much as 9 percent.

Unfortunately, DISC has been attacked by foreign competitors. Last year, the GATT Council held that DISC is an illegal export subsidy.

I think this decision was a classic example of the pot calling the kettle black. Nevertheless, our commitment to the free trade principles embodied in GATT requires us to replace DISC with a new tax incentive that fits the GATT framework.

As you may know, the Administration has proposed a way to accomplish this. Under its proposal, an exporter who maintains a sufficient "overseas presence" will be eligible for a tax exemption of about 17 percent.

This proposal is a step in the right direction. However, several aspects of it concern me.

First, the proposal is too complex. It starts off requiring a company to have an office, an agent, a director and books overseas. So far, so good. But then it lists a dizzying array of "functions" and "processes" the company must perform overseas.

As a former SEC lawyer, I know a complex requirement when I see one. This plan might bring more business to sharp lawyers, but it won't encourage exports. I believe the requirements in the proposal must be simplified and clarified to be useful to U.S. exporters.

Second, the Administration may have overlooked the unique characteristics of agricultural trade. Some of the overseas presence tests that are appropriate for Fortune 500 manufacturing companies may be inappropriate for agricultural traders.

What's more, recent GATT decisions, like the wheat flour decision, indicate that agricultural products sometimes are subject to a more lenient standard than manufacturing products. Therefore, we may want to provide special treatment for agricultural exporters.

Third, the Administration may have underemphasized the needs of small businesses. The Small Business Administration estimates that between twenty and thirty thousand U.S. small businesses are capable of exporting but don't. To encourage these companies to export, we must develop new, streamlined mechanisms to help them.

Many small businesses will be unable to meet the Administration's general overseas presence test. Recognizing this, the Administration apparently plans to propose a special, easier, small business test.

But from what I've heard, even this test won't go far enough. I believe that we should either completely exempt small businesses from the test, or, as the Chamber of Commerce suggests, let them maintain their overseas presence in any of the so-called foreign trade zones that exist right here in the United States.

So, although we're moving in the right direction, we still have a lot of work to do. For my part, I plan to offer agricultural and small business amendments when the Finance Committee considers DISC.

CONCLUSION

The stakes are high and the competition is fierce. But this should not deter us. The great Northwest traders of the past overcame storms, scurvy, and pirate attacks.

If we rekindle their aggressive trading spirit, we can overcome trade barriers and foreign competition. That way, we can bring Northwest grain, timber, coal, and high technology to larger and larger export markets.

We can take on the world again.●

ANALYSIS OF THE DISCREPANCIES IN SUPREME COURT DECISIONS

● Mr. EAST. Mr. President, the March-April issue of Regulation magazine featured an interesting article entitled "Affirmative Action after Teal: A New Twist or a Turn of the Screw?". Regulation magazine, the American Enterprise Institute's journal on government and society, regularly features thoughtful articles worthy of serious attention. The recent article on affirmative action is a case in point. In the article, Michael W. McConnell analyzes the discrepancies in the court's decision in Connecticut against Teal and its earlier decision in United Steelworkers of America against Weber concerning the practical means of complying with title VII.

I ask unanimous consent that Mr. McConnell's article be printed in the RECORD in order that my colleagues might also benefit from his comments.

The article follows:

[From Regulation Magazine, March-April 1983]

AFFIRMATIVE ACTION AFTER TEAL: A NEW TWIST OR A TURN OF THE SCREW?

(By Michael W. McConnell)

It is by no means surprising to see a Supreme Court decision in which Justice William J. Brennan (joined by his colleagues Marshall, White, Blackmun, and Stevens) rules in favor of a black female plaintiff in an employment discrimination suit. Nor is it surprising to find Justice Lewis Powell (joined by his colleagues Burger, Rehnquist, and O'Connor) in dissent. But what is to be made of an opinion in which Justice Brennan and his liberal colleagues repeatedly stress the *individual's* right to employment *opporunity* under Title VII of the Civil Rights act of 1965—in effect returning to the original language and legislative history of the statute—and leave the conservative dissenters to defend the race-conscious hiring requirements created by the jurisprudence of the past decade?

To be sure, the field of civil rights is no stranger to judicial twists and turns. The Supreme Court's abrupt abandonment in 1954 of its former position on racial segregation (*Brown v. Board of Education*, 1954) was followed by nearly two decades of judicial assault on race-based decisions in public and private matters. With a strong if belated boost from congressional passage of the Civil Rights Act of 1964, the courts from 1954 well into the 1970s stood for a clear and forceful idea: all persons should be treated as individuals without regard to their race. The democratic logic and moral force of this idea was responsible for the success of the civil rights movement and the unparalleled societal transformation it inspired.

For the last decade, however, the Court—and especially its liberal wing—has backpedaled from the idea of color-blind treatment for all. The principle of equal opportunity for all individuals seems to be viewed as an impediment to the new agenda: race- and sex-conscious decisions for the benefit of black (and other minority and female) workers. The legal theories enunciated during the last decade, therefore, have studiously avoided or denigrated the concept of race- or sex-neutral treatment of individuals. The new buzz words are "statistical impact," "protected groups," "discriminatory results."

The shift was subtle, but rapid. In 1971, in *Griggs* v. *Duke Power Co.*, the Court—without so much as footnoting evidence in the legislative history to the contrary—announced that "Congress directed the thrust" of Title VII of the Civil Rights Act of 1964 "to the *consequences* of employment practices, not simply the motivation" (emphasis in original). That shift cast suspicion on any and all job qualifications, whether or not motivated by race, that have the consequence of excluding more blacks than whites. And if the true purpose of Title VII was really to decrease discriminatory consequences, that is, to increase minority employment, it was but a short logical step to the conclusion that the law intended minority employment to increase even if it meant deliberate discrimination against whites. While in *Griggs* the Court could still say that "[d]iscriminatory preference for any group, minority or majority, is precisely and only what Congress proscribed," by 1979, in *United Steelworkers of America* v. *Weber*, it found "ironic indeed" the notion that Title VII prohibits "all voluntary, private, race-conscious" hiring.

THE LATEST TWIST

Connecticut v. *Teal*, decided on June 21, 1982, provides the latest twist in this already convoluted history. The facts were straightforward enough. Winnie Teal, a black female employee of the Connecticut Department of Public Welfare, applied for promotion to the position of permanent welfare supervisor. Her first hurdle in the selection process was a written examination. Forty-six percent of the black applicants for the position failed this test, compared with twenty percent of the whites. Teal failed. She therefore filed suit on the ground that the examination was racially discriminatory under the "disparate impact" theory espoused in *Griggs*. Meanwhile, the Connecticut Department of Public Welfare carried on its selection process. From among the applicants who had passed the written test, the department chose permanent welfare supervisors on the basis of other factors, such as seniority, work performance, recommendations from supervisors, and (apparently) race. Eleven blacks and thirty-five whites were hired—22.9 percent of the total number of black applicants, 13.5 percent of the white applicants. The "bottom line" was thus much more favorable to blacks than to whites.

Nonetheless, Teal continued to press her suit, contending that the ultimate success rate of black applicants was irrelevant to her complaint against the disparate impact of the examination. Unless her employer could prove to the court's satisfaction that the examination validly predicted job performance, Teal argued, its use was racially discriminatory. Connecticut defended on the ground that its final selection rate—its bottom line—showed that the selection process had no discriminatory effect. In the absence of a disparate racial impact from the process as a whole, the state argued, there was no reason for the court to second-guess the validity of the test. Five members of the Supreme Court agreed with Teal.

The Court's holding *Teal* seems as straightforward as the facts. The hiring or promotion of sufficient numbers of black (or other minority, or female) applicants does not preclude a disappointed applicant from stating a prima facie case of discrimination based on the disparate impact of one component of the employer's selection process, such as a written test. Nor does the achievement of an acceptable bottom line provide the employer with a defense to such a lawsuit.

At the point we must take a moment to distinguish between the two different charges that a plaintiff can bring in employment discrimination cases under Title VII: "disparate treatment" and "disparate impact." Disparate treatment occurs when an employer intentionally treats an employee or applicant differently on the basis of race. Disparate impact cases, those based on the Court's decision in *Griggs*, occur when the statistical effects of an employment process on the races are markedly different—for example, if 80 percent of white applicants and only 30 percent of black applicants are hired. When the effects are sharply different, an employer is presumed to have discriminated—even if there is no evidence of intentional discrimination—unless the employer can prove that its employment selection devices were "job-related." And even if the employer can prove job-relatedness to the satisfaction of the court, its employment selection practices can still be found unlawful under the disparate impact theory if other practices with more favorable results to black applicants, would also serve the employer's interests. Teal's case was based on disparate impact.

It *Teal* is considered as an exercise in interperting the disparate impact theory, the question at issue boils down to this: at what level of particularity should the disparate impact test be applied? Should it be applied to the process as a whole (the bottom line), or to any identifiable component or subcomponent of the process (say, a written examination)?

Since the focus of disparate impact analysis is ultimately on the job-relatedness of the employer's selection devices, it would seem sensible to apply the analysis at the level of particularity that best reflects such job-relatedness. If a single component of the process is only a fair predictor of job performance, but when taken in conjunction with several other factors is an excellent predictor, it would seem logical to look at the impact of the various factors taken together, rather than at the single component. To import an exmaple from the college admissions process, grade point averages and Scholastic Aptitude Test (SAT) scores, taken individually, are only fair predictors of college performance, while the composite of the two is superior to either. Most colleges therefore consider both—as well as other, more subjective factors. If disparate impact analysis were applied to grade point averages or SAT scores individually, rather than to the composite actually used by the colleges, the "college-success-relatedness" of the admissions process as a whole would be significantly understated. Similarly, if an employer uses a composite of fac-

tors in making hiring or promotion decisions, it would understate the job-relatedness of the process to apply disparate impact analysis to each factor separately. And, since the process as a whole will almost invariably predict job performance more accurately than would any single component of the process—since if it did not, the employer would simply rely on the single, more reliable, component—it would seem that the bottom line is the proper place to look for evidence of disparate impact.

But in *Teal* the Court did not follow the internal logic of the disparate impact theory. It returned instead to first principles—to the purposes of Title VII. Justice Brennan's opinion for the majority relied on two basic propositions about the nature of Title VII protections.

First, the opinion emphasized that Title VII was intended to guarantee equality of employment opportunities. In just three pages of discussion, the Court used the term "opportunity" twelve times, eight times in italics. One may well wonder why Title VII's emphasis on "opportunity" would strengthen Teal's claim. Ordinarily, the term "opportunity" is used in contradistinction to the term "result." But Teal was not claiming that she was denied an equal *opportunity* to be considered on her merits for the position of Connecticut welfare supervisor. That would have been a disparate treatment claim. No, her argument was simply that the *results* of the written examination were statistically unfavorable to members of her race.

To be sure, the word "opportunity" is the key term in section 703(a)(2) of Title VII—the section that is taken to be the basis for disparate impact claims. This may explain the Court's repeated use of the term. But that use still begs the key question: by opportunity did Congress really mean result, as measured by statistics, whether at the bottom line or elsewhere?

The majority's second proposition was that Title VII focuses on protection of the individual. The majority used the term "individual" some seven times (twice in italics) in its discussion of this point, along with numerous synonymous terms. Again, however, the connection to Teal's claim was not made clear. Teal did not contend that she was discriminated against as an *individual*, but simply that her racial *group* fared poorly on an examination.

It may seem persuasive to say, with the Court, that the employer's bottom-line defense merely seeks "to justify discrimination against [Teal], on the basis of . . . favorable treatment of other members of [Teal's] racial group." There is, after all, no reason why discrimination against one individual should be excused merely because of the treatment accorded to others. However, since the very basis of Teal's lawsuit was that her *group* did not fare well in the process, it is difficult to understand why the ultimate job success of the same group should be treated as irrelevant.

RENEGING ON THE "DEVIL'S DEAL"

In business circles, the precedent set in *Teal* has been viewed as just one more way for plaintiff-oriented judges to rule in favor of sympathetic minority group members. To them, *Teal* is not so much a twist as another turn of the screw. But the irony of *Teal* is that, from a broader perspective, both its rhetoric and its practical implications constitute a reversal of the direction in which employment discrimination law has developed over the last dozen years.

The disparate impact theory of *Griggs*—that no employment selection process having a disparate impact on blacks may be used unless it is proved to be job-related—has created pressure on employers to move in one or both of two directions. Either they must engage in race-conscious hiring ("affirmative" discrimination) in order to ensure that their process has no disparate impact on blacks, or they must engage in a costly and unproductive exercise of proving that all of their tests and other employment selection devices are job-related.

The latter exercise is not an easy one. At best, validating a test means hiring an army of psychologists, statisticians, and lawyers. Nor will even the most widely accepted validation procedure guarantee success to the employer in the end; virtually no procedure, however pristine, is immune to critical reexamination by plaintiff-oriented judges and agencies. The rules of the game have been set by civil rights bureaucracies and courts with neither expertise nor interest in effective personnel management. Their apparent intent has been not to identify genuinely job-related testing methods, but merely to make it more difficult to use objective tests at all. A recent three-year study by the National Research Council found that even carefully constructed and researched tests seldom withstand legal challenge. The researchers concluded that under prevailing legal and administrative standards, "adequate or useful tests are being abandoned or struck down along with the bad" (*Ability Testing: Uses, Consequences, and Controversies*, 1982).

It is no surprise, then, that most employers have reacted by moving toward race-conscious hiring. It is easier, cheaper, and safer for employers to hire according to race than to attempt to thread the needle of test validation. In effect, employers have made a "devil's deal" with the Title VII system: if they hire sufficiently large numbers of black (and other minority and female) employees, they will be left alone to manage their businesses (including personnel matters) as they see fit.

This devil's deal by the employers found support in United Steelworkers of America v. Weber (1979), the famous decision upholding the legality of voluntary affirmative discrimination in employment. It is easy to forget that Weber was a pro-employer decision—intended, in the Court's words, to prevent "undue federal regulation of private businesses." Weber absolved the employer, Kasier Aluminum, of liability for deliberate discrimination against white employees. The argument put forward by Justice Brennan for the majority was that Title VII was intended to "integrat[e] . . . blacks into the mainstream of American society" by increasing their employment, without unnecessarily curtailing "traditional business freedom." In the Court's view, "a prohibition against all voluntary, race-conscious, affirmative action efforts would . . . augment the powers of the Federal Government and diminish traditional management prerogatives while at the same time impeding attainment of the ultimate statutory goals." Seldom has the Court expressed greater solicitude for circumscribing federal power or for maintaining traditional business freedom. Yet, of course, the whole purpose of Title VII in the Court's view is to constrict that same business freedom by increasing minority employment above the levels that would otherwise prevail. This seeming contradiction is resolved, however, if employers can be induced to discriminate voluntarily—at least apparently voluntarily—against nonminority workers, in the hope of heading off more intrusive federal interference. This, as we have seen, they are quite willing to do.

Teal reneges on this devil's deal. Even if an employer hires and promotes enough black employees, it will still not be permitted to manage its business as it sees fit. The courts and the Equal Employment Opportunity Commission will still feel free to second-guess the job-relatedness of its hiring practices, and every component and subcomponent of them, no matter how favorable to black (and other minority and female) workers the bottom line may be. In fact, no type of vigorous affirmative discrimination program short of straight quota-based hiring will suffice to get the employer off the hook. Under the logic of *Teal*, plaintiffs and courts can divide and subdivide an employer's selection procedures to an infinite degree, requiring elaborate proof of job-relatedness wherever the employer bases selection decisions on a factor not equally distributed among the races. Employer may thus be driven to more subjective criteria for hiring and promotion—criteria less susceptible to disparate impact scrutiny, but also more likely to reflect unconscious predispositions based on race and extraneous cultural values.

Teal is bad news for business, because it vastly increases the odds that employers will be held liable for unintentional racial discrimination. But this does not make *Teal* good news for civil rights activists, for it also eliminates a large part of the incentive for employers to engage in affirmative discrimination. If employers are to be called to task (and subjected to the possibility of liability, including back pay liability) *whether or not they have hired or promoted a sufficient number of minority employees*, they will have no incentive to engage in affirmative discrimination (other than that created by other governmental requirements). If the devil's deal is off for the courts, it is off for the employers as well.

Moreover, the decision in *Teal* deprives employers of the most sensible and efficient means of hiring and promoting larger numbers of minority employees: to establish minimum job qualifications on a nonracial basis, and then to hire or promote disproportionately large numbers of black (and other minority and female) workers from among those qualified. By precluding this approach the Court increases the cost of engaging in affirmative discrimination even as it decreases the incentive to do so. This is the great irony of *Teal:* that Justice Brennan and the liberal wing of the Court delivered what may be the most serious blow the judiciary has struck yet against affirmative discrimination.

A RETURN TO INDIVIDUAL RIGHTS?

Not only does *Teal* suggest an abrupt change in the practical means of complying with Title VII, but it suggests a change in the realm of ideas as well. A comparison of *Teal* and *Weber* is revealing: the two opinions, written four years apart by the same justice, take diametrically opposed positions on both the purpose and the methods of Title VII.

The *Weber* opinion adopted the view that Title VII was intended to increase black employment, irrespective of proven acts of discrimination against individual black complaintants.

"Congress' primary concern in enacting the prohibition against racial discrimination

in Title VII of the Civil Rights Act of 1964 was with 'the plight of the Negro in our economy.' Before 1964, blacks were largely relegated to 'unskilled and semi-skilled jobs.' Because of automation the number of such jobs was decreasing. As a consequence, 'the relative position of the Negro worker [was] steadily worsening.' "

Remarkably, the *Weber* Court's discussion of the purpose of Title VII does not even mention that there might be a moral objection to discriminating against an individual because of race. In fact—aside from unaviodable quotations from the statute itself in the footnotes—the *Weber* opinion does not even *use* the word "individual." The race problem, to the *Weber* Court, is solely an economic problem. In contrast, the *Teal* Court, repeatedly stressed the work "individual," and stated that the "principal focus" of Title VII "is the protection of the individual employee rather than the protection of the minority group as a whole."

Moreover, the *Weber* Court viewed affirmative discrimination programs in favor of black workers, even if they never claimed to be victims of discriminatory acts by the employer, as "effective steps to accomplish the goal that Congress designed Title VII to achieve." The *Teal* Court, in counterpoint, observed that "an employer's treatment of other members of the plaintiffs' group can be 'of little comfort to the victims of . . . discrimination.' "

To put the point simply, either affirmative discrimination is an effective step toward complying with Title VII or it is not. If the *Teal* Court is correct that increased hiring of minority workers does *not* diminish an employer's liability or advance the purposes of Title VII, then the *Weber* Court could not have been correct that prohibiting such discrimination to accomplish such increased hiring would be "completely at variance with the purpose of the statute." This inconsistency, unfortunately, is unexplained: *Teal* does not cite, let alone discuss, the earlier decision in *Weber*.

But the liberal wing of the Court has no monopoly on irony. The dissenters, too, claimed their share. In their closing remarks, Justice Powell and his fellow dissenters approvingly quoted a lower court opinion:

"Title VII should not be construed to prohibit a municipality's using a hiring process that results in a percentage of minority [employees] approximating their percentage of the local population, instead of relying on the expectation that a validated job-related testing procedure will produce an equivalent result, yet with the risk that it might lead to substantially less hiring."

There could hardly be a clearer statement of preference for hiring according to racial percentages instead of neutral procedures, or from a more surprising quarter.

In fact, the tergiversations of the justices in *Teal* may reflect the clash between two irreconcilable visions of a racially just society. Either the policy of this nation is to guarantee that all individuals are treated fairly and neutrally, without regard to their race; or is to produce social and economic results more closely reflecting the numerical division of the races in society. The former policy does not produce the latter result. Yet the Supreme Court has not faced up to the inconsistency between these visions. In its decision in *Teamsters* v. *United States* (1977), the Court stated:

"It is ordinarily to be expected that nondiscriminatory hiring practices will in time result in a work force more or less representative of the racial and ethnic composition of the population in the community from which employees are hired."

The Court's expectation is simply unrealistic, and will remain so for the foreseeable future. So long as black (and other minority and female) Americans continue to differ in economically significant ways, fair and neutral selection procedures will disproportionately exclude them from better paying jobs. But direct efforts to produce proportionate results necessarily involve a return to the morally questionable practice of racial discrimination, with its attendant social divisiveness and resentment, encouragement of racial stereotyping, stigmatization of its supposed beneficiaries, and often perverse distributional effects.

Until the Supreme Court faces the problem and chooses between the two fundamental understandings of equality, it will continue, as in *Teal*, to mix the apples of nondiscrimination with the oranges of group statistics.

REOPENING THE ISSUE

The underlying problem is the disparate impact construct itself. And that takes us back to *Griggs*, the first decision to abandon fairness of process and embrace statistical consequences instead. Oddly enough, the nine justices in *Teal* were unanimous on one point: the continued authority of *Griggs*. Both sides relied on it without a hint that it might be in conflict either with the literal language of Title VII or with the principle of nondiscrimination that Title VII embodies. In permitting plaintiffs to establish a prima facie case purely on the basis of results, the *Griggs* decision left employers to choose between two unpalatable alternatives—either to engage in race-conscious hiring, or to lose their discretion over the establishment of job qualifications. Mere neutrality, mere nondiscrimination, was not enough. Both of these alternatives are unattractive not simply as an abstract moral judgment, but also on the basis of the original congressional intention. There are no propositions so clear in the language and legislative history of Title VII as the propositions that employers would not be required to engage in affirmative discrimination for the purpose of racial balance,[1] and that employers would continue to be free to establish and enforce job qualifications.[2]

Griggs is water under the dam. The Court's departure from the original intention and language of Title VII is old news. This is especially true if the history of the 1972 amendments to Title VII is read as effectively ratifying the full sweep of *Griggs* and incorporating it into law. These relics of legal history would hardly be worthy of attention in 1983 were it not that the opinion in *Teal* drives us to retrieve them. If the emphasis of Title VII is truly on opportunity—as the *Teal* Court would have it—then what do we make of a system that relies on results, impacts, outcomes, consequences? If the emphasis of Title VII is on the individual—as the *Teal* Court would have it—then what do we make of a system that relies on racial groups and statistics?

The final irony of *Teal* is that—taken seriously—the opinion not only lessens the incentive of employers to practice race-conscious affirmative discrimination, but invites a fundamental reexamination of the very premises of employment discrimination law as they have evolved since *Griggs*. The Department of Justice has recently filed a historic brief opposing for the first time the imposition by consent decree of a 50 percent racial quota for promotions in the New Orleans police department. In the spirit of *Teal*, the Justice Department has appealed to the original ideals and meaning of Title VII in an effort to stop the trend toward employment quotas on the basis of race. The decision rests in the hands of the courts: does *Teal* genuinely signal a return to color-blind principles of individual rights, or was *Teal*, as the critics will suggest, no more than another device to ensure plaintiff victories?●

[1] Senators Joseph Clark (Democrat, Pennsylvania) and Clifford Case (Republican, New Jersey), who were the bipartisan "captains" in charge of explaining and defending Title VII in the Senate, prepared an interpretative memorandum answering a number of charges leveled against Title VII by the opposition. This memorandum has been described by the Supreme Court as one of the "authoritative indicators" of the meaning of Title VII (American Tobacco Co. v. Patterson, 1982). The memorandum stated: "There is no requirement in title VII that an employer maintain a racial balance in his work force. On the contrary, any deliberate attempt to maintain a racial balance, whatever such a balance may be, would involve a violation of title VII because maintaining a balance would require an employer to hire or to refuse to hire on the basis of race" (*Congressional Record*, vol. 110 [1964], p. 7213).

This is but one authoritative statement among many to similar effect. For example, ibid., p. 1518, Rep. Emanuel Celler (Democrat, New York); p. 11848, Sen. Harrison Williams (Democrat, New Jersey); and p. 7207, Justice Department memorandum.

To protect against possible misunderstanding, Congress added the following language to Title VII itself: "Nothing in this title shall be interpreted to require any employer . . . to grant preferential treatment to any individual or any group . . . on account of an imbalance which may exist with respect to the total number or percentage of persons of any race, color, religion, sex, or community, State, section, or other area" (42 U.S.C. § 2000e-2[j]).

[2] The Clark-Case memorandum (see note 1) also addressed this issue: "[T]itle VII would not require, and no court could read title VII as requiring, an employer to lower or change the occupational qualifications he sets for his employees simply because proportionately fewer Negroes than whites are able to meet them. . . . Title VII says merely that a covered employer cannot refuse to hire someone simply because of his color. It expressly protects the employer's right to insist that any prospective applicant, Negro or white, must meet the applicable job qualifications" (*Congressional Record*, vol. 110 [1964], pp. 7246-47).

This also is but one authoritative statement among many to similar effect. For example, ibid., p. 1518, Rep. Celler; pp. 7246-47, memorandum of Sen. Case; pp. 13079-80, Sen. Clark; p. 13088, Sen. Hubert Humphrey (Democrat, Minnesota); and p. 13825, exchange between Sens. Case and John McClellan (Democrat, Arkansas).

To protect against possible misunderstanding, Congress added the following language to Title VII itself: "Notwithstanding any other provision of this title, it shall not be an unlawful employment practice for an employer . . . to give and to act upon the results of any professionally developed ability test provided that such test, its administration or action upon the results is not designed, intended, or used to discriminate because of race, color, religion, sex or national origin" (42 U.S.C. § 2000e-2[h]).

U.S. CUSTOMS SERVICE

● Mr. BAUCUS. Mr. President, as many of my colleagues know, a major reorganization of the U.S. Customs Service was recently proposed by the administration. According to its supporters, this reorganization would have improved customs service in Montana and other border States by

offsetting proposed reductions with administrative "streamlining."

I am certainly not opposed to making Government more efficient. I have, during my tenure in Congress, urged various Federal officials to use better management techniques that required reorganizations. But reorganizations must be well thought out and the benefits must outweigh the costs. Such has not been the case with this particular reorganization plan.

After reviewing the proposed reorganization, I have concluded this plan would be counterproductive. An efficient Customs Service is essential for productive trade between the United States and Canada, our main trading partner. The Customs Service said the reorganization would merely consolidate stations and employees. This simplified analysis overlooks one important fact: some border stations process more imports than others. The removal of key employees, such as import specialists, from key stations would impede imports and disrupt existing trade patterns.

It appears that Assistant Secretary John Walker of the Department of the Treasury agrees with those of us in the Congress who oppose the proposed reorganization.

I have recently obtained a copy of a May 5, 1983, memo from Assistant Secretary Walker to Commissioner William von Raab of the Customs Service that discusses the proposed reorganization. The memo directs Commissioner von Raab not to take any further action on the reorganization without consulting directly with his Assistant Secretary.

I am hopeful that the Customs Service will abide by Mr. Walker's directive. At a time when we in Congress should be doing all that is possible to strengthen our trade relationships, any restructuring of the Customs Service should receive our careful attention before it is implemented.

Mr. President, I ask that Mr. Walker's memo be printed in the RECORD at this point.

The memo follows:

DEPARTMENT OF THE TREASURY,
Washington, D.C., May 5, 1983.

Memorandum for: William von Raab, Commissioner, U.S. Customs Service.

From: John M. Walker, Jr., Assistant Secretary (Enforcement and Operations).

This memorandum is to clarify what my position is regarding Customs' proposals for field reorganizations. Because of the considerable opposition by the Hill to our centralized appraisement initiative, we should not proceed with "Phase II" of the plan until we can fully explain the merits of our proposal to our Appropriations Subcommittees.

As I told you in early April, 1983, I wish to put off a decision for the near term on any proposals for district or regional consolidations. I made this decision based on the great amount of time you and other senior Customs officials had to spend on "Phase I" of our centralized appraisement effort. Moreover, I am afraid that any proposals we might now present to the public and the Hill with respect to district or regional consolidations would be thoroughly confused with centralized appraisement.

Lastly, you should not take any action with respect to closing of Northern Border ports of entry. My office has not reviewed your proposal, and, even if I were to conclude that it has merit, we would wish to discuss it with our Appropriations Subcommittees and other affected members of the Hill.●

POLAND AND THE POPE

● Mr. MURKOWSKI. Mr. President, this is the last day of Pope John Paul II's visit to his homeland, his second visit since his elevation in 1978. For most Popes this would hardly be a significant event. In fact, since all the Popes since 1523 have been Italian, it has not been an "event" at all.

But for Pope John Paul II, formerly bishop of Krakow, formerly Karl Wojtyla of Poland, the fact that he was even allowed to go home is a major victory.

The Pope's visit was a celebration because it signals the acknowledgment by the Communist Government of Poland, and by the Soviet Union, that the strength of religion, of freedom, and of Polish culture, cannot be either obscured or destroyed in Poland.

It signals that, however slowly, religion is being allowed to return publicly into lives that had privately never lost it.

Mr. President, a central event in the Pope's visit was the mass celebrated on Sunday at the Jasna Gora Monastery in Czestochowa. The mass honored the 600th anniversary of the famous Black Madonna icon. Of course, 1983 is not really the 600th anniversary but the 601st. The Polish authorities last year—recognizing the symbolic power inherent in a celebration for an icon known as the Queen of Poland—refused the Pope's request to come to Poland to celebrate the real anniversary. So the church authorities simply extended the date.

But how sad it is that the Polish Government should be so afraid of the consequence of a visit by the head of the Catholic Church that they refused his request several times and only reluctantly and fearfully allowed him to come.

Mr. President, it has been estimated that a third of Poland's population, some 12 million people, will see the Pope on this visit. Already millions have attended the masses he has conducted for his countrymen. His presence seems to have filled the people with a sense of "moral rejuvenation," in the words of a pilgrim from the northern part of the country. His compelling references to the solidarity of the Polish people have done much to rekindle the spirit of freedom in Poland.

Mr. President, the fight for freedom in Poland has been heroic in its peacefulness, at least on the part of the citizens. The brutality of the government has not been much tempered even during the Pope's visit. Yet, most Poles say they expect no sensational political upheavel to come out of the visit, no miracles. They seem to hope only for the strength to "enable us to keep smiling even if the police attack us."

What a tragic sound these words make when we recall with what fervent pride we witnessed the Polish will to regain self-government only a few short months ago.

Mr. President, I applaud the willingness of the Communist authorities to admit, if not welcome, the Pope. A positive first step in the current crisis in Poland would be normalization of relations between the church and the State of Poland. I am sure that John Paul's activism will serve as both example and inspiration to church leaders in Poland to renew their efforts in support of freedom for the Polish people. I am confident that the forced emigration of Polish political prisoners, many of whom have been able to come to the United States, will not mean that they have taken with them the spirit and strength of the Polish people to resist oppression.

Mr. President, I would like to have an article that appeared on June 18 in the Washington Post inserted in the RECORD at this point. The history it relates of the Black Madonna icon illustrates how long the spirit of independence of the Poles has survived. The Black Madonna is the soul of Poland, the symbol of the flame of resistance, and idealism that burns still in Poland.

The article follows:

POPE'S CHIEF THEME IS POLISH HISTORY

(By Michael Dobbs)

WARSAW, June 17.—Pope John Paul II assumed the mantle of the former kings of Poland today in urging his countrymen to turn political defeat into a moral victory.

After lecturing Poland's military rulers on the need for national reconciliation, the pope introduced a message of hope at the first open-air mass on his eight-day pilgrimage. Crowds estimated by church officials at more than a million crammed in and around Warsaw's May 10 Stadium to hear him summon up themes from Poland's troubled history.

The pope said "only a moral victory" could draw society out of the divisions induced by the imposition of martial law in December 1981 and restore national unity. Such a victory, he added, would be a victory "not only of the governed but at the same time of those who govern."

His speech showed his strong sense of Polish history, with one long passage devoted to the great victory of a former Polish king, Jan Sobieski, over the Turks 300 years ago at Vienna. That win saved Christian Europe from Islam.

The preoccupation with Polish national themes surprised long-time Vatican correspondents since it contrasted with the pre-

dominantly religious message he usually delivers on foreign trips. Here the pope is being received as the moral leader of the nation first and only second as head of the universal Catholic Church.

This impression of the pope as the spiritual descendant of the old Polish kings was heightened by the special triumphal arch through which he drove into the stadium. It was in the form of an eagle, Poland's national symbol, on top of which was painted a golden crown and the Black Madonna of Czestochowa, the country's holiest religious image.

The pope has pointedly referred to Gen. Wojciech Jaruzelski and other Communist Party leaders as "representatives of the highest authorities of the state" rather than as "representatives of the nation."

Cardinal John Krol of Philadelphia told reporters earlier that the pope knew he was on "a slippery tightrope."

"He cannot conceal the truth, indeed he must state it. But he must also make sure that this does not lead to an overreaction on the part of the people. He is calling for moderation as he knows that the good of the nation will not be served by political outbursts," he said.●

CHILDREN AND THE STATUE OF LIBERTY

● Mr. BAUCUS. Mr. President, the Statue of Liberty, which for decades has welcomed immigrants to our country, is falling apart. The copper surface of the statue and its iron framing and supports are in desperate need of repair. So, too, is Ellis Island. Some of the buildings on the island need to be renovated; others need to be completely rebuilt.

The entire restoration project will cost approximately $230 million. I am proud to bring to the attention of my colleagues that schoolchildren from Montana and all over the country have collected over $70,000 for this project.

These children have worked hard to help preserve one of our most cherished national monuments and I take this opportunity to thank them for their efforts.

Others in the private sector have begun to donate funds to the Statue of Liberty-Ellis Island Foundation, but a greater commitment is needed from the private sector.

The statue was first constructed by the French with money collected from the people of France. The people of the United States should now show their support for the monument by donating generously to the restoration fund.

This is an expense that we can all afford to bear and it is a commitment to future generations who will look at the Statue of Liberty as the most important symbol of the land of the free and the home of the brave.●

UNIVERSITY OF MONTANA HONORARY DOCTORATES AWARDED

● Mr. BAUCUS. Mr. President, on June 12 two Montanans received honorary doctorates from the University of Montana, at the University's commencement exercises. They were awarded in recognition of their many years of service to the public and accomplishment in their professions. The two honored recipients are Frederic Gordon Renner and Harold G. (Hal) Stearns.

Mr. Renner was born and raised in Montana, and has spent a great deal of his life becoming an authority on Montana's management. Mr. Stearns, of Montana's capital city, Helena, has been editor and publisher of a number of Montana newspapers, and has written extensively on Montana history. He has distinguished himself as a leader in many areas of Montana's public life.

Their achievements are best summed up in a press release from the University of Montana. I ask that this acknowledgment of Mr. Renner's and Mr. Stearns' awards be printed in the RECORD.

The material follows:

UNIVERSITY OF MONTANA WILL HONOR RENNER AND STEARNS

MISSOULA.—Frederic Gordon Renner, Paradise, Ariz., and Harold G. Stearns, Helena, Montana natives with impressive records of public service and professional achievement, will receive honorary doctorates at University of Montana commencement exercises Sunday, June 12, at 2 p.m. in the Harry Adams Field House.

Renner is an authority on artist Charles M. Russell and an internationally known range management expert. Stearns, as writer, publisher and advocate for education and the arts, has long been a force for progress in Montana and in his current role as tourism specialist for the State Department of Advertising continues to promote the state's interests.

Renner, whose parents owned a ranch near Cascade, was born in Great Falls, Nov. 23, 1897. As a 6-year-old, he became intrigued by Russell, whom he often saw on the streets of Great Falls wearing a brightly colored sash and cowboy boots. By the time he was 7, Renner was collecting Russell postcards, and he now has what is believed to be the largest and most representative collection in private ownership of Russell oils, watercolors, drawings, bronzes and memorabilia.

The Cowboy Hall of Fame and Cowboy Artists of America have honored Renner for his writings and other work on Russell—an avocation that turned into a vocation when Renner retired from the Soil Conservation Service in 1961.

Renner began his first career, as a range management specialist, with the U.S. Forest Service in 1922. He transferred in 1936 to the newly established SCS. Ten years later he directed a pilot project for the Marshall Plan for the United Nations Relief and Rehabilitation Administration. This project became a model for such efforts throughout the world.

He has been a U.N. delegate to international range management conferences and has received many citations for his contributions to the field.

He is an alumnus of the University of Washington, where he took a B.S. in forestry in 1918 and an M.S. in range management and animal husbandry in 1922.

UNIVERSITY OF MONTANA TO HONOR HAL STEARNS

Harold G. Stearns of Helena will receive an honorary doctorate at University of Montana commencement exercises in June. The University cites the former newspaperman's "impressive record of public service and professional achievement."

Stearns, 70, is the son of pioneer ranchers in the Deer Lodge Valley. He earned journalism and English degrees at UM in 1936.

He was editor and publisher of the Harlowton Times and Ryegate Clarion from 1940 to 1973. He also was editor of the Havre Daily News and wrote for the Helena Independent, Associated Press and United Press. He has written extensively on Montana history. His column for the Harlowton Times, "The Editor's Uneasy Chair," was widely quoted for more than three decades.

He directed the six mill levy campaign for the Montana University System and lobbied, without pay, for financial support of the system during several legislative sessions. He chaired the Montana Personnel Commission to establish the merit system for state employees, and he directed the Montana Bicentennial program.

He received an honorary doctorate from MSU in 1974 and the UM distinguished Alumnus Award in 1976.

He has been president of the Montana Historical Society, Montana Press Association, University of Montana Alumni Association, and chairman of the Montana State University advisory council. He served on the Montana Committee for the Humanities. He was a Navy officer in World War II.

He and his wife Jean, also a University graduate, are parents of seven children.●

INCLUDE THE HANDICAPPED

● Mr. WEICKER. Mr. President, today's Washington Post carries an article by columnist George F. Will entitled, "Include the Handicapped". It is a concise and persuasive discussion of why substantial majorities of both parties in the Senate have insisted that the Federal commitment to America's disabled citizens be maintained.

I urge my colleagues to read this article.

The article follows:

[From the Washington Post, June 23, 1983]

INCLUDE THE HANDICAPPED

(By George F. Will)

In the contemporary spirit of ruthless full disclosure, I herewith disclose that I am sleeping with a government official. Any day now the Senate will do its clear and pleasant duty, confirming Madeleine Will as assistant secretary of education for special education and rehabilitation.

Without dwelling indelicately on the erotic life of Washington, let me say that I now know what it is to sleep with the Federal Register. Madame Secretary, a veteran of service with the Maryland Association of Retarded Citizens, falls asleep talking, and wakes up talking, acronyms and numbers.

Remember how approvingly Keats spoke about the Grecian urn? That is how Ms. Will speaks about P.L. 94-142 and Section 504.

P.L. 94-142, the Education for All Handicapped Children Act, is to parents of handicapped children what Social Security is to the elderly: Their Magna Carta. It establishes a right to an "appropriate" education in the "least restrictive environment." Section 504 (of the Rehabilitation Act of 1973, requiring that programs receiving federal assistance be accessible to disabled persons) means nothing to most Americans but everything to millions of citizens. They are citizens who have been excluded from fair social participation not because of their handicaps but because of handicapping social attitudes.

Writing in Scientific American about architectural barriers, Gerben DeJong and Raymond Lifchez argue that Section 504 regulations are government power in the service of conservative values—the escape from dependency, the achievement of self-reliance. The most pervasive barriers are attitudinal, and the worst is the belief that disabled persons are helpless and inevitably are drains on public resources.

A conservative research institution here (the Heritage Foundation) has just published the factually preposterous and morally repulsive thought that a "key reason" why academic achievement standards have fallen is that the federal government has "dismantled an academically demanding curriculum" by catering to "special-interest groups" such as the handicapped, and has "favored the disadvantaged pupils at the expense of those who have the highest potential to contribute positively to society."

Leave aside the philistine social analysis: the idea that profound changes in society's educational expectations and achievements are the result of recent Washington decisions rather than of complex and autonomous cultural processes. But note this dangerous doctrine: handicapped persons are among those getting too much public assistance because, by some cost-benefit criterion, they do not have the capacity to make a sufficiently "positive" contribution to society. Note the nasty premise: an individual's enjoyment of rights is conditioned by the individual's social utility.

It is almost demeaning to assure such analysts that equity is economical. Institutionalization of the retarded is almost never necessary and almost always an expensive incarceration of potential taxpayers. And physically handicapped persons are seeking removal of barriers to self-help.

Handicapped citizens are as fully citizens as those of us who are mentally non-handicapped or temporarily able-bodied. They are just beginning to have access to social benefits that other citizens take for granted. When P.L. 94-142 was passed in 1975, 25 percent of all handicapped children were underserved and another 25 percent had no educational programs at all; they were more excluded from society's basic benefits than black children were in 1954. Now, just eight years later, we are invited to believe that federal largess toward disadvantaged pupils is a threat to America's meritocracy.

The Reagan administration's most serious self-inflicted wound has been its failure to practice creative exceptionalism. It has failed to find an area for action that is an exception to its domestic austerity and deregulation—action that would announce:

Although we conservatives believe government has been irrationally intrusive, we nevertheless know there are persons who cannot help themselves until government helps them. And we know there are conservative values that are not vivified until the federal government affirms them with strong regulations.

Instead, acting in part from unconservative fidelity to ideological abstractions, the Reagan administration aroused the anxiety of an enormous constituency—the handicapped and their friends. It did so with some contemplated "deregulations" involving P.L. 94-142 and Section 504, changes that Congress would never permit.

Even just a generation from now we will, I hope, be mortified by the memory of our complacent acceptance of the social segregation of the handicapped—as mortified as we are today by the memory of racial segregation. We are barely at the beginning of the last great inclusion in American life, the inclusion of the handicapped, and especially the mentally handicapped. This should have been, and still could be, the field where the Reagan administration confounds its critics and shows a subtlety in its conservatism.●

THE SOVIET INVASION OF LITHUANIA

● Mr. PELL. Mr. President, in February 1918 the Lithuanian people courageously broke the yoke of Russian rule and tyranny under which they had lived for more than a century and proudly declared Lithuania to be an independent state. Lithuania's existence as a sovereign nation-state was tragically and illegally ended with the brutal Soviet invasion of Lithuania on June 15, 1940.

Under a secret protocol to the Nazi-Soviet Nonaggression Pact, the Soviet Union laid claim to Lithuania and the other Baltic States of Latvia and Estonia. This agreement was a flagrant violation of the 1920 treaty in which the Soviet Union recognized Lithuania's independence and sovereignty and renounced forever all claims to Lithuania territory. Having received the green light from Germany to occupy the Baltic States, the Soviet Union moved its forces into Lithuania in June 1940, orchestrated the downfall of the nationalist government and replaced it with a new pro-Soviet government. In August 1940, at the request of the new government and against the wishes of the Lithuanian people, Lithuania was formally incorporated into the Union of Soviet Socialist Republics.

At great human cost the Lithuanian people valiantly struggled against the occupation forces of the Red army in 1940 and 1941. Thousands of Lithuanians were arrested, executed, or exiled during this period. In "The Terrible Days of June"—that is, June 14 to 20, 1941—some 35,000 Lithuanian patriots, intellectuals and clergy were arrested and deported to concentration camps in the Soviet Union. Another 5,000 political prisoners were executed by the retreating Red army. Moreover, when the Russians reoccupied Lithuania in 1945, the deportations and executions continued.

To this day, the United States has consistently refused to recognize the unlawful annexation of Lithuania by the Soviet Union and has steadfastly supported the Lithuanian people in their courageous and unending struggle against Soviet repression. This month, as we commemorate the 43d anniversary of the heinous Soviet invasion of Lithuania, it is fitting and proper that we remind the Soviet Union that it has pledged respect for human rights and fundamental freedoms and that we affirm our own commitment to the principles of liberty and self-determination for Lithuanians and for all people who are forced to live in the absence of freedom.●

THE 20TH ANNIVERSARY OF THE EQUAL PAY ACT

● Mr. DOMENICI. Mr. President, this month is the 20th anniversary of the Equal Pay Act. In 1963 this auspicious legislation joined other landmark civil rights legislation of the 1960's as part of our effort to eliminate discrimination. The act forbids unequal pay for women and men who work in the same establishment and whose jobs require equal skill, effort, and responsibility.

This anniversary is a cause for celebration and an opportunity to reflect upon our accomplishments, because as a Nation we have eliminated some of the most blatant forms of employment discrimination against women. Today, equity in the workplace is a concept that the majority of Americans support and believe in. The premise that men and women doing the same job should receive the same pay is now widely accepted. Yet, pay inequities based on sex are still prevalent.

Where we are today is a benchmark against which the next generation will measure our future progress. This anniversary is an opportunity to rededicate ourselves to completing the task of ridding the American workplace of anachronistic wage discrimination.

Studies of the effects of the Equal Pay Act reveal some disturbing statistics. Women earn only 59 percent of what men earn according to recent Bureau of the Census statistics. Not only do women earn less, but the majority of working women are still employed in the service sector of our economy, and are only beginning to move into skilled and professional positions which carry the higher wages and salaries paid to men. The following tables illustrate that we must renew our effort if equal pay for equal work and economic security are to be achieved. I ask that they be printed in the RECORD.

The tables follow:

OCCUPATIONAL DISTRIBUTION OF WORKING WOMEN

[In percent]

Occupation	1960	1978
Total	100.0	100.0
Clerical workers	30.3	34.6
Service workers, except private household	14.8	17.7
Professional and technical workers	12.4	15.6
Operatives	15.2	11.8
Sales workers	7.7	6.9
Managers and administrators	5.0	6.1
Private household workers	8.9	2.9
Craft workers	1.0	1.8
Other	4.3	5.5

Source: U.S. Department of Labor, Bureau of Labor Statistics.

AVERAGE WEEKLY EARNINGS BY SEX, 1978

Occupation	1978 average weekly earnings		Women's salary as a percent of men's
	Men	Women	
Sales workers	$335	$175	52
Blue collar workers	327	216	66
Managers and administrators	422	247	58
Clerical workers	301	195	65
Service workers, except private household	223	147	66
Professional and technical workers	392	280	71

Source: U.S. Department of Labor.

Mr. DOMENICI. Equal pay is an important issue because throughout American history women have often had to support themselves and their families when death, divorce, or war took the men from the home. During the past two decades, the proportion of women in the work force has risen from 38 to 53 percent, with most working out of economic necessity to help support their families. In 1982, more than 2.5 million wives were the only employed family members.

Families headed by mothers with no husband present are 18 percent of all households with children under 18 years of age. One out of three of these families live below the poverty line. I find these facts an alarming testimony to the necessity for these women to receive equal pay when their jobs require the same skill, effort, and responsibility as men's.

Another issue related to equal pay is retirement equity. Currently the minimum age at which working counts toward retirement credit is 25. Yet more than 70 percent of all working women take employment right after high school or after college, and find that, although they work faithfully for their employer from age 18 to 25, they are not earning any credit toward retirement benefits. In addition, many retirement plans penalize women who take time off from their job for childbirth or to tend to family responsibilities. This is not fair. Such inequities prompted me to cosponsor S. 19, the Retirement Equity Act of 1983.

In addition, this bill addresses some of the concerns of nonworking spouses and widows.

Pension laws give widows particular problems when the working spouse dies before retirement. Under current law, a homemaker can be denied survivor benefits if her husband dies 2 years before vesting in the retirement plan.

Furthermore, if a working spouse decided to drop the survivor's benefits, the homemaker, by law, does not even have to be informed by the working spouse that these benefits have been dropped. S. 19 addresses these two issues as well.

Under S. 19, pension plans would be required to pay survivor's benefits to the participant's spouse if the participant is vested and dies before retirement. The joint and survivor option would be automatic unless both spouses agree in writing not to elect this option. This legislation will go a long way toward assuring that pension plans will provide beneifits that a plan participant or spouse reasonably expect to be there.

Currently, under many pension and retirement plans, survivor annuities are paid only if a set of specified conditions are met; that is, the fine print. Because of these conditions, only 5 to 10 percent of surviving spouses actually receive any benefits. It is no wonder that the fastest growing poverty group in the United States is older women.

S. 19 does not cure all the problems of pension and retirement benefit discrimination but it is an important step that I urge Congress to take. I am committed to advance, guarantee and promote economic equity for women during their working careers and during their retirement years.●

CONGRESSMAN CLAUDE PEPPER

● Mr. BINGAMAN. Mr. President, I am very pleased to announce that Congressman CLAUDE PEPPER, chairman of the House Aging Subcommittee on Health and Long-Term Care has accepted my invitation to visit New Mexico this summer. Chairman PEPPER will conduct hearings focusing on medicare issues and participate in the conference on aging which will be held on August 30, 1983. Congressman PEPPER is widely known as Mr. Senior Citizen, and is one of the most respected and loved Members of Congress. He is a true statesman, a man who has dedicated his life to public service.

Congressman Pepper was born on a farm near Dudleyville, Ala., on September 8, 1900. His family was poor. CLAUDE PEPPER was forced to work at an early age to support the family and later to help pay his way through the University of Alabama. At the age of 8 or 9, he got into trouble when he carved, "One day, Claude Pepper will be a United States Senator," on the back of a closet door. From that day forward, he was known as Senator Pepper.

The prophesy of this nickname was realized in 1936 when PEPPER was elected to the U.S. Senate. He hit the Senate like a buzz saw. He became known worldwide for his oratorical skills. He achieved fame for his advocacy of labor rights and civil rights. He is credited with winning passage of the 40-hour workweek and other humanistic advancements. Time and time again his voice rang out against the injustices of the times. He has fought for national health insurance; sponsored legislation creating 7 of the 11 Institutes of Health; fair wages; revolving pensions for the aging and welfare for the needy. His work in the health area has won him awards from the prestigious Albert and Mary Lasker Foundation. His fight to improve the lot of the common man brought him national recognition. His picture appeared on the cover of Time magazine in May 1938.

After Senator PEPPER lost his bid for reelection of his Senate seat, he continued to be involved in politics campaigning for Stevenson in 1952 and 1956. Later PEPPER became involved in the election campaign for President Kennedy. In 1962, Senator PEPPER ran for the House seat created by a new congressional district in Miami following the 1960 census. He was easily elected and has been easily reelected to each successive term.

In 1975, the House of Representatives created the Select Committee on Aging. Congressman PEPPER was named the chairman in January 1977. Congressman PEPPER has embarked with his usual vigor to expose problems confronting the Nation's 25 million elderly and to bring about some immediate solutions.

Congressman PEPPER's achievements on aging issues are numerous. He pushed through legislation which prohibits mandatory retirement. He conducted an investigation which showed widespread abuses in the sale of health insurance to the aged and responded by pushing through immediate reforms. He has exposed all manner of frauds perpetrated against the aged from medical quackery to land fraud. His most stunning achievement in 1982 was to sidetrack the Reagan administration's efforts to make significant cuts in the social security program. He sponsored the National Symposium on Aging and Cancer in cooperation with the National Institutes on Aging and Cancer Research.

For all his achievements, CLAUDE PEPPER has never lost sight of his values. He has never forgotten where he came from. He has devoted his entire life to improving the quality of life for the poor, the disadvantaged, the weak, and the downtrodden. He has fought to preserve the basic American ideals of honesty, integrity, and hard work.

Congressman PEPPER's dedication to the poor and the elderly was recognized recently by a Time magazine cover story captioned—"Claude

Pepper: Champion of the Elderly." Mr. President, all Americans should know and appreciate the fine record Congressman PEPPER has achieved. Therefore, I ask that the article which appeared in Time magazine on April 25, 1983, be placed in the CONGRESSIONAL RECORD following my remarks.

The article follows:

CHAMPION OF THE ELDERLY—AT 82, CLAUDE PEPPER IS AT THE PEAK OF HIS CAREER

"There are only two Democrats who really bug Reagan," says a presidential aide. "One is Tip O'Neill, and the other is that Congressman who keeps talking about Social Security."

That Congressman watches the world through trifocals. He wears a pacemaker in his chest to quicken his heartbeat when it slows. One of his heart valves is synthetic; it replaced the natural one that developed a calcium deposit. He is nearly deaf without his hearing aids. A bulbous nose dominates his rumpled face, which looks forever melancholy even when its owner is not. He is 82 years old.

But Claude Denson Pepper is like a vintage automobile with new parts: he gets better and more powerful with age. By an odd convergence of historical trends, Pepper's unshakable New Deal liberalism is in phase with the graying of America, even at a time when conservatism marches forcefully through Washington's corridors of power. Some 36 million Social Security recipients, and millions more who are nearing retirement, count on Claude Pepper to protect their rights and well-being. And Pepper has doggedly done so.

That should be especially evident this week; President Reagan is scheduled to sign a historic package of Social Security reforms designed to save the system from insolvency. The undisputed champion of the elderly, Pepper had held the fate of the delicately balanced compromise in his hands. He had fought against all cuts in benefits, gave ground only grudgingly when concessions had to be made to keep the legislation alive, and responsibly withheld the veto many of his more zealous followers had wanted him to wield. Says Pepper, accurately and with no false modesty: "If I had not voted for it, then there would not have been a package, and there would have been complete chaos."

After 14 years as a U.S. Senator from Florida and 20 years as a Congressman from the Miami area, Pepper is at the peak of his astonishingly tireless and durable career. He demonstrated his political punch in the 1982 congressional elections, stumping with surprising energy in 26 states. Of the 73 House Democrats he supported, 54 won. The difference he made varied, of course, from race to race. But his presence never hurt. "Claude was the most sought-after speaker by Democratic candidates in 1982," recalls House Majority Leader Jim Wright. "At one rally for elderly people, we expected 200, but 800 showed up and waited for an hour and a quarter to hear him." Adds California Congressman Tony Coelho, Democratic congressional campaign committee chairman: "No single person had more of an impact on the 1982 elections. His mug was all over this country—on posters, on banners, on TV and billboards. He was a symbol to the elderly and the helpless."

While Pepper's critics contend that he exploited the Administration's hastily prepared and ruefully withdrawn initial proposals for cutting Social Security benefits, he is liked and respected by House colleagues of both parties. Last January he became chairman of the House Rules Committee, which can determine not only the timing of legislation but sometimes whether a bill comes to a vote at all. He reluctantly relinquished his chairmanship of the House Select Committee on Aging. "It was wrenching," he says. "Like choosing between a brother and a sister."

"His very person debunks the myths about aging," says Jack Ossofsky of the National Council on the Aging. "Concern about the elderly, the poor and the frail has characterized his entire career."

He intends to do more. A bill sponsored by Pepper and passed in 1978 eliminated any mandatory retirement age for most federal employees and raised it from 65 to 70 for workers in private industry. He has a new bill in the House hopper to remove any such age limits at all. "The only mandatory retirement," he says, "is when you can't do the work any more."

The Senator turned Congressman (everyone still calls him Senator, even though he has not been one since 1951), has an urgent interest in cancer research. In 1937 he sponsored a bill that created the National Cancer Institute. Now he wants the Government to provide an extra $100 million in each of the next five years for work on the disease. "You know I lost my wife Mildred to cancer in 1979," he says quietly. "Last month I spoke at a wake for Don Petit of my staff, who died of cancer in Florida. A woman on my staff is suffering from bone cancer and was told she'll probably never be able to walk again. Well, we've got to do more to try to stop this disease."

But will not all such social programs cost too much in an age of soaring budget deficits? Others may bend to political fashion, but Pepper never wavers: "I would rather live with $200 billion deficits and have more people living, than the reverse. And if we don't spend the money fighting cancer and arthritis and poverty and poor housing and all the rest, they'll just spend it on the military or something else." In Pepper's view, that settles that.

"He's reversed the aging process," says Florida Senator Lawton Chiles. "He has more political power than ever."

While Pepper's body has required a few repairs, his mind remains sharp. His memory is so keen that he can be introduced to seven people at lunch and thereafter address them unerringly by name. He recalls conversations with F.D.R. more than four decades ago in vivid detail. Pepper is most impressive on the podium. He never reads from a text, rarely uses notes, yet the words roll out in graceful sentences. The loose skin on his chin and neck fairly quivers with indignation and a clenched fist punches the air when he berates "an Administration that wants to cut $11 billion from Medicare." When he recounts stories of poor people hurt by budget trims, Pepper sometimes gets misty-eyed. So do his listeners. Congressman Coelho was present on one such occasion during the 1982 campaign. "Claude's eyes teared over, and by the time he finished speaking, 70 percent of the audience were teary-eyed. It was just a tremendous emotional experience."

Neither exercise nor diet explains Pepper's mental agility and physical stamina. He loves golf but gets out on the course only sporadically, recently shooting 48 over nine holes at Coral Gables Country Club and winning 75¢ from his opponents. He admits that he does not even walk as much as he would like, although when he does, he says, "I walk fast." He eats heartily and is a bit overweight (5 ft. 7½ in., 180 lbs.). His one dietary idiosyncrasy: he has soup and crackers with each meal, even breakfast.

Pepper gave up smoking in 1933. Strangers often view his red, veiny nose as a sign of heavy drinking, but he denies it. Except for one or two glasses of white wine with lunch and dinner, he abstains from alcohol. In the House dining room, waitresses automatically bring Pepper his soup, crackers and a carafe of wine. No connoisseur, he never asks for anthing fancier than chablis.

If there is a key to Pepper's vitality, it is that he enjoys his work and has never lost his passionate concern for people and issues. His home telephone numbers are listed in both the Washington and Miami directories, and constituents often call seeking help with red tape or support for legislation. He keeps regular office hours in both cities and meets with anyone who asks to see him.

After a speech to retirees or other older folks. Pepper lingers to bask in the affection of his admirers. He moves slowly among them sometimes bussing a few of the women who do not kiss him first. He eagerly grasps the outstretched hands of the men. His rapport with the elderly is such that his office is inundated with their messages whenever an issue that concerns them is pending in Washington. During the Social Security debate last month, some 3,000 letters and 100 phone calls sought his attention each week. Says Pepper about the elderly: "They deserve much—and need much. I am helping them."

On a typical weekday in Washington, Pepper rises by 6:30, reads the *Post* and keeps a breakfast appointment at 8. He drives himself around in a long Lincoln Town Car, carries his own bag through airports, normally travels alone. A housekeeper cares for his waterfront condominium in Miami, and a staff aide, James Brennan, 66, shares his northwest Washington apartment. The two often dine out together. Then Pepper watches the 11 o'clock news, skims the New York *Times* and goes to bed by midnight.

His weekends are scarcely less regimented. Not long ago, he traveled to Austin for a Saturday speech, then flew to Miami for a funeral on Sunday. He took a 10 o'clock flight that night to Boston, getting to bed in Cambridge at 3 a.m. A limousine picked him up at 7:45 a.m. Monday for breakfast with Harvard President Derek Bok. (A gentle flirt with women, Pepper probably would have preferred eggs and bacon with Bo Derek.) He held a series of press conferences, spoke for an hour to a Harvard Medical School gerontology class, then returned to Washington for an afternoon of House business. That night, Pepper made another speech.

Often described as a millionaire (he says he would qualify only if some Florida beach land he owns were sold for his asking price of $600,000), Pepper has no qualms about drawing some $650 a month in Social Security benefits that he qualified for at the age of 72. And he says he will not mind paying tax on this pension, as required under the new law for high income earners. Says he: "Social Security is an insurance program to which I have contributed. It isn't welfare."

The Peppers had no children, and he has long referred to his staff as "my family." But he has been lonely without Mildred. He sadly recalls the day when he and his wife sat at a small table in their Miami home after she had begun treatments for cancer.

"Well, Claude," said Mildred, his wife of more than 40 years, "it looks as if we may be coming to the end of the road." He embraced her and said through tears, "Don't talk like that, Mildred. I can't think of life without you." In their Washington apartment, there is still a note in his wife's handwriting attached to a shower curtain. It reads: "After your shower, please close this curtain."

"He has flair," says Anne Ackerman, 69, a Democratic leader in Miami's Dade County. "He has style. He epitomizes what a public servant should be. Claude Pepper represents an America that is a civilization rather than just a country with borders. He is what you want life to be."

Part of Pepper's style is his droll humor. Some of his jokes may be as old as he is, but his deadpan delivery delights his audiences. Arriving late for a speech, he tells his listeners about two men in colonial days who were set to duel at dawn. Only one of the antagonists showed up. The other sent a note by messenger. It read: "I'm running a little late this morning. Please go ahead without me."

Another Pepper story, which Reagan has taken to telling on occasion, involves a bishop and a Congressman who arrive in heaven together. St. Peter shows the Congressman a lavish suite of rooms, while assigning the bishop a small one with no view. When the bishop complains that his lifetime of service to the church rates something better, St. Peter replies: "Don't feel bad, Bishop. You know, we have thousands of bishops here, but this is the first Congressman we ever got."

Neatness is another Pepper trademark. He wears a fresh suit, usually with vest, every day. His sparse white hair (he stopped wearing a toupee in 1980 after it blew off as he greeted President Jimmy Carter at the Miami Airport) is carefully combed. Presiding at a recent House Rules Committee hearing, he leaned back, motioned to an aide and whispered in his ear. The aide rushed to straighten a portrait on a side wall. Pepper nodded his approval.

"In Alabama, we lived in a house that was little more than a place to sleep," recalls Claude's brother Frank, 65. "We did not have a car. I can remember hearing him come home late at night, rehearsing speeches he was going to give when he became a U.S. Senator."

Pepper cannot really explain how he managed to grow up uninfected by the redneck racism prevalent in the Alabama farm country where he was born in 1900. "Why, I was full grown," says Pepper, the eldest of four children, "before I ever traveled on a paved road." Whatever the reason, he felt the stir of ambition early on: at the tender age of ten, he carved the words "Claude Pepper, United States Senator" on a tree.

Pepper entered the University of Alabama in the fall of 1918. To help pay his way, he worked from 4 a.m. to 7 a.m. hauling coal and ashes at a power plant. He starred on the debating team, ran on the track squad, made Phi Beta Kappa, but lost his first election: for student-body president. When his oratorical skills took him to a contest in Chapel Hill, N.C., "it was the farthest north I had ever been."

The North beckoned, however. "Why shouldn't I go to the best law school there is?" he asked himself. He applied to Harvard, was admitted and got tuition, books and $100 a month support money from the Veterans Administration. The reason: during his brief Army service, spent training at the University of Alabama, he suffered an injury that developed into a double hernia. Pepper's appreciation for both education and a benevolent Uncle Sam was never to leave him: "I get so burned up when anybody tries to cut back on the money available to help needy students."

After Harvard, Pepper taught law for a year at the University of Arkansas, then set up practice in Perry, Fla. In the next 11 years, he handled some 30 murder cases, taking one of them successfully all the way to the U.S. Supreme Court.

Active in Democratic politics, Pepper, at 28, became a member of the Florida Democratic executive committee. He won at the polls for the first 15 times: he was elected to the Florida house of representatives. One of his first bills showed his early concern for the elderly. It would let anyone over 65 fish without a license.

But his sense of racial fairness may have cost him his seat two years later. He was defeated after voting against a resolution that criticized Mrs. Herbert Hoover for inviting the wife of a black Congressman to the White House. Recalls Pepper: "I thought my political career had died aborning."

He resumed his law practice, opening an office in Tallahassee and bringing his parents to live with him in 1931. The Depression had proved ruinous to his father. Pepper learned firsthand the problems of the elderly, caring for his father until he died in 1945 at the age of 72 and his mother until her death in 1961 at 84.

But Pepper yearned to return to politics. He made a brash bid in 1934 to unseat U.S. Senator Park Trammell in the Democratic primary. F.D.R. was in the White House, and Pepper's campaign slogan was wordy but effective: "The Welfare of a Common Man Is the Cornerstone of the New Deal." Virtually unknown, he nevertheless forced a run-off and lost by a mere 4,050 votes. When both of the state's Senators died within weeks of each other in 1936, Pepper filed for one of the vacancies. His earlier showing scared off challengers, and at 36, he was elected to the Senate unopposed. Says Pepper, a Baptist: "I realized then that providence can handle my affairs much better than I can."

Roosevelt sought the freshman Senator's support for his power-grabbing and ultimately unsuccessful plan to pack the Supreme Court with additional Justices. Pepper had reservations, but, far from timid, he said he would go along if F.D.R. would help him win election to his first full six-year term in 1938. "I will, and that's a commitment," promised the President, who kept his word.

Pepper, in turn, became one of F.D.R.'s stalwart supporters on Capitol Hill. When resistance to New Deal economic programs grew in the Senate, the Florida newcomer rose to scold his elders: "We haven't gone too far, we haven't gone far enough. This is not the Promised Land. Are we going to commit the same folly that the children of Israel did?" His colleagues rose in an ovation. Newspaper Columnist Drew Pearson called the Speech "one of the greatest of its kind ever heard in the Senate chamber."

Pepper easily won re-election in 1938 after defeating a former Florida Governor in the primary by more than 100,000 votes. But his liberalism was antagonizing businessmen in the state, who vowed to turn him out of office. Pepper had been instrumental in passing the nation's first minimum wage law, which guaranteed workers 25¢ an hour. "Business never forgave me," he says. It was the last major piece of New Deal legislation.

His views on foreign affairs also undermined his Florida support. He and his wife Mildred visited Berlin after his 1938 re-election, and the Senator was alarmed by what he recalls with wry understatement as "the mutterings of war." Pepper joined the push for a military draft and came up with an innovation of his own. He was convinced that the only way the U.S. could stay out of the war in Europe was to help the Allies win it. Since they were awaiting warplanes on order from the U.S., Pepper reasoned, why not send them aircraft out of the U.S. Air Force, replacing these planes later as the orders came off production lines? This idea, rejected at first in the Senate, became the Lend-Lease program, which provided Britain, in particular, with crucial ships, warplanes and other war material.

For his efforts, Pepper was hanged in effigy at the Capitol in August 1940, by women who opposed his "warmongering." He still has the coconut head and stuffed denims that the women had fashioned to look like him.

Pepper won re-election in 1944 but, mainly because of his liberal views, speaking invitations in Florida dropped off as civic clubs and local Chambers of Commerce blackballed him. Business leaders were building a campaign war chest to beat him in 1950. He played right into the hands of his foes. Traveling abroad in 1945, Pepper met Joseph Stalin and naively described the Soviet dictator as "a man Americans can trust."

The following year, Pepper accepted an invitation to attend a left-wing political rally in New York's Madison Square Garden. Waiting backstage with Secretary of Commerce Henry Wallace and others, Pepper was asked to pose for a group photo. As he did so, Paul Robeson, the opera singer who was widely considered a Communist, took a position beside him. The resulting photo of Pepper looking chummy with a black Soviet sympathizer was to prove a political disaster for him back home.

Pepper also incurred the potent wrath of Harry Truman by joining a dump-Truman movement at the 1948 Democratic convention. Pepper felt that Truman had abandoned Roosevelt's domestic programs. Pepper and others tried to persuade World War II Hero Dwight Eisenhower to run as a Democrat. They got word that Ike would not seek the nomination, but would accept it. Thus Pepper led a Florida delegation pledged largely to Ike, gaining headlines that made Truman furious. Ike left Pepper out in the cold by sending him a telegram withdrawing his name from consideration.

Truman did not forget. Shortly after upsetting Republican Thomas Dewey in the election, he summoned George Smathers, then a Florida Congressman to the White House. Pepper had helped Smathers get elected. "I want you to do me a favor," Smathers recalls Truman's saying. "I want you to beat that——Claude Pepper."

That 1950 senatorial election was one of the dirtiest on record. The Robeson-Pepper photo was circulated widely. So too was a book called *The Red Record of Senator Claude Pepper*, which distorted his attitude toward the Soviet Union. He was stuck with the labor Red Pepper.

But the campaign is chiefly remembered for remarks attributed to Smathers—and later denied by him—in Time. Quoting Northern newspapers, the magazine said Smathers used fancy language to convey sinister meanings to benighted rural listeners: "Are you aware that Claude Pepper is

known all over Washington as a shameless extravert? Not only that, but this man is reliably reported to practice nepotism with his sister-in-law, and he has a sister who was once a thespian in wicked New York. Worst of all, it is an established fact that Mr. Pepper before his marriage habitually practiced celibacy."

Pepper was defeated by 67,000 votes. "On election night people came up to our house in cars, shouting obscenities, cheering the fact that I had been defeated," Pepper recalls. "They wanted to destroy me, and just about did."

(Pepper is not a man to carry a grudge, but is was not until last year that he fully forgave Smathers. When an aide suggested asking Smathers' law firm for a campaign contribution. Pepper reluctantly agreed and was surprised when he got a $350 check in reply. Shortly thereafter, Pepper walked up to Smathers, who was lunching in the House dining room, and said without smiling: "You know that check you sent in for my campaign? Well, it bounced." It had not, of course, and when Smathers realized that Pepper was joking, both knew that their enmity was over.)

Once again, Pepper returned to his law practice. He tried a senatorial comeback in 1958, but was beaten in the Democratic primary. By 1962 he was earning more than $150,000 a year, representing mainly corporate clients. But when a new Miami congressional district was created that year, he jumped back into the political swim. He missed politics, and Mildred missed the capital's social whirl. Says Brother Joe, 74, about Claude's law practice: "He was very successful. But he was miserable, just plain miserable."

Pepper did not consider it demeaning to step down from Senator to Congressman, although he concedes that "most people go the other way." If he had somehow stayed in the Senate, he figures he would have become chairman of the Senate Foreign Relations Committee and might have wound up serving longer than anyone else. "But that committee doesn't save many souls," he adds. "I know I'm doing more good now."

At a Veterans Administration hospital in Miami, a patient in a wheelchair watches Pepper greeting the bedridden and says: "I'm a Republican. But I always vote for Senator Pepper. He doesn't care if you're an old Republican or an old Democrat. Just so you're old."

Pepper is far from a one-issue legislator. In 1945 he sponsored a resolution that led to the creation of the World Health Organization and, in the late '40s, bills establishing five of the National Institutes of Health. Not only does he favor a freeze on nuclear arms now, but he advocated one after the end of World War II. Still, nothing offends his sense of justice quite as much as modern society's tendency to view the elderly as a burden or a stereotyped group. He does not feel complimented when someone tells him: "My, you don't look your age." Inwardly, he grumps, "How am I expected to look? Toothless and doddering, a caricature of my younger self?" Pepper assails "ageism" as "just as wrong as racism or sexism."

At a recent Miami dinner in his honor, Pepper spoke eloquently about growing older. "The aging process is so slow, so gradual, that all you notice is a slight diminishing of some of your faculties," he said solemnly. What the elderly want is "to be thought of as just other people. They need love. They need compassion." He concedes that attitudes toward the aging are improving and predicts that this will get much better when, as demographers predict, the elderly constitute an even larger share of the nation's population.

If Pepper could wave "a legislative wand," he says he would "enact a Medicare bill under which the entire cost would be borne by the Government instead of just the 45 percent now." He would provide home health care, claiming that it would often save the Government the higher cost of putting people who need not be there in hospitals. And he would provide more preventive health coverage, in hopes of checking illness and prolonging life. Overall, Pepper is optimistic, even without his wand, because he feels that pressure is growing on the Administration to stop cutting social programs. "The Reagan era will come to an end. Already we're moving toward compassion in Government again."

When Pepper's admirers worry about his advancing years and how long he expects to be on Capitol Hill, he sometimes admits that he has retirement plans. "I've set the year," he drawls. As his listeners' concern grows, he adds without a smile: "The year 2000. But I reserve the right to change my mind."

In fact, Pepper has big plans for next year. He intends to lead a drive to elect some 500 delegates who are at least 65 years old to the 1984 Democratic National Convention. That would be about 12 percent of the total, and he wants to use their leverage to influence the choice of a nominee and the candidate's stand on issues dear to the elderly.

Already, the contenders for the nomination are seeking Pepper's support. Senator Alan Cranston has even listed Pepper as a possible running mate if the Californian were to succeed in his long-shot pursuit of the nomination. Such a Democratic ticket, with a combined age of 154 at election time, would accomplish the impossible: it would make a Republican team of Reagan and Vice President George Bush (combined age 133) look young.

Some of Pepper's most avid fans even urge him to run for President. He clearly considers himself just as physically fit as, and more capable than, the present occupant of the Oval Office. Claims Pepper about 1984: "I'll be better able to throw my hat in the ring at 83 than Ronald Reagan will be at 73." In less quixotic moments, Pepper admits that he is, at best, suited to the No. 2 spot. "It's easy to replace a Vice President," he says, in a rare recognition of his own mortality.

At an age when most people are savoring old memories, Claude Pepper never looks back. His latest legislative proposal is to create a House Committee on the Future of the U.S. He, of course, would like to stick around to help shape its vision, and to see that the recommendations are carried out. In the meantime, he plans to lead his graying army to greater triumphs—and to keep bugging Ronald Reagan.●

PIONEERING FOR PEACE

● Mr. DURENBERGER. Mr. President, Harold E. Stassen, former Governor of Minnesota, has devoted his life to improving the condition of Minnesota and the country. His demonstrated leadership and innovative ideas have earned him the reputation of Minnesota's senior statesman.

He recently celebrated his 76th birthday by sharing with the Minnesota House of Representatives his insights into the future of America. As always, Governor Stassen expressed his hopes and concerns directly and eloquently. I wish to share his testimony with the Senate and I submit it to be printed in the RECORD.

The material follows:

PIONEERING FOR PEACE: ADDRESS OF HAROLD E. STASSEN

May I express appreciation for the courtesy of the Speaker, the Honorable Harry Sieben, and to the House, in extending the availability of this chamber this morning.

May I also state directly the obvious fact, since I will be stating views, as to both the foreign policy and domestic policy of our country in the decades ahead, which are different from the current views in both political parties, the use of the chamber does not in any way imply any approval of what I am about to say.

In the same vein, may I recognize and express appreciation for the presence here of Former Governor C. Elmer Anderson, who presided over the Senate as Lieutenant Governor during my governorship, and of other distinguished men and women of Minnesota, and again emphasize that their gracious and welcome attendance does not in any way imply approval of or agreement with what I will here state.

On this, my 76th birthday, literally seven decades of vivid and vital recollections come cascading down the eventful river of memories.

I speak today, not of those memories in dramatic detail, but rather in an endeavor to bring those experiences into focus, with a clear-eyed view of the present, and a challenging advocacy for the decades ahead.

It is an advocacy impelled by a deep current concern for the future of America, and for all humanity, in this age of space and electronics and nucleonics.

There is an obvious ominous movement for nations and individuals to polarize in their attitudes and actions, and to confront.

But the extremes are at the roots of much of the economic suffering of the people, of most of the injury to the quality of life, and of the acute dangers of catastrophic nuclear war.

The extreme of conservatism is a cause of excessive unemployment and bankruptcies, and human suffering; and the extreme of liberalism is a cause of wild inflation and deterioration and human suffering.

The extreme of classic communism and the extreme of classic capitalism both contribute to a danger of devastating holocaustic war.

Thus I hold that the most urgent need at home and abroad is for the development of creative center policies; of a creative center economic system; a creative center philosophy!

This is pioneering for peace in the 1980's.

Let us turn our attention to specifics, and first to our domestic economy.

Currently we are suffering an outrageous level of unemployment, a terrible squeeze on farm families, excessive waves of bankruptcies, wide and spreading dislocations.

Full employment and no inflataion must be the inseparable twin objectives of the creative center approach to the economic system of the future for America.

There is no fundamantal reason why this cannot be achieved. I am confident that it

can be accomplished. But it will require some major changes, and it will include avoiding the extremes of conservatism and liberalism.

First of all, there is a failure in comprehensive thinking of the significance of modern robots and automated production.

The basic consequence of automation is that a very small percentage of the total population of a developed nation can produce and manufacture all of the food, and goods, and materials for the entire population.

This means that what is broadly referred to as the service side of the economy not only can expand, but it must expand enormously if there is to be full employment and a successful free economy.

Service in this sense means not only assistance to people but also teaching, safeguarding, protecting, transporting, entertaining, communicating, feeding, informing, healing, inspiring, and contributing in a thousand ways to the quality of life.

When the full future significance of this change is analyzed, it is apparent that government on all levels must be an important part of this expansion of the service side of the total economy.

Therefore, it is fundamental that the highway to full employment cannot be found along the path of shrinking government!

Government on all levels, conducted with intelligence and integrity, must be increasing rather than decreasing for a successful, full employment, free economy. This is not a mere theory. It is a historic lesson in the contrast of the post WWI years of President Hoover, and the post WWII and Korean War years of President Eisenhower.

A few concrete current examples will dramatize the meaning of these assertions.

Almost every major city needs more police and fire protection, and there are thousands among the unemployed who would make excellent police and fire personnel, but almost every major city is cutting back in these fields.

Almost every school system needs more programs in computers, and in music and art, and in occupations of the future; and thousands are unemployed who could be enlisted and educated to be teachers in those expansions; but almost every school system is trimming back.

The adequate financing of this new and urgent creative center approach to government's role, with a balanced budget and full employment, and no inflation, requires new thinking.

I suggest three items.

First: A minimum absolute tax which all corporations and individuals must pay on each year of above minimum income; notwithstanding any and all types of special deductions and credits and deferments.

Second: A combined local, state and national tax on sales of ten percent, assuring a regular expanded flow of funds from and for a full employment economy and higher level of service, and no inflation.

Third: A world defense fund American import tax, to assist in carrying the necessary burden for the United States of a continuing very powerful and alert national and world defense.

The extremes of protectionism or free trade are not the alternatives. The intelligent creative adjustment to a fair and balanced reflection of world facts is needed. For thirty-five years American industry has carried almost the entire necessary load of free world defense, while other competing importing industries have had virtually none of such load.

Along with the joint participation by all levels of government in the proceeds of one combined sales tax, there should be combined creative programs of action to effectively serve; and to establish the environment for service.

A creative center policy, as I see it, would constantly be aware of the parallel need to structure financial incentives in line with social, economic, and cultural objectives; and to guard against greed which, when unrestrained will demoralize and wreck any establishment.

First preference should be for service by non-governmental establishments;

Second preference for service by government at a local or state level as close to the people as practical;

And third preference for service by nationwide programs.

Along with the maintenance of the minimum tax, and sales tax, there should be a new recognition of the significance of service in the broad sense, to the individual, by granting deductions from taxable income for every payment by every person to another person for compensation for service.

Millions of Americans need service from other millions of Americans which they cannot well afford on an 'after tax' basis. But the service, and the employment, and new methods of organizing to provide both, can be and should be a part of a future full-employment, increased service, free economy.

One of the other critical future changes in classic capitalism must be to place broad limits on the use of capital credit for excessive speculation in stocks and commodities; for giant acquisitions and mergers; for over-extended foreign loans.

Such curbs are essential to bring down the rates of interest to levels where home ownership may expand, where farm ownership may survive, and true 'quality of life' long term investments may occur.

Such curbs are opposed by most bankers and conservatives, but they would in fact be in the long term advantage of both, as well as for the people as a whole.

It is nothing less than an unacceptable tragedy that at such a time there should be a cutting back of governments at all levels in such a manner that some people are short of food, many people do not have adequate homes, millions of people do not enjoy the quality of life that could be theirs.

In American foreign policy, American world policy—a creative center approach will also lead to very extensive changes.

It would involve facing fundamental facts.

All of the peoples living on this earth have a right to live, There is room for all of them, their systems of economy and government and religion and situations are different, and will continue to be so.

If a nuclear third world war occurs, it will result in mutual devastation to an extent beyond comprehension.

To me, this means that for leaders of super-powers with nuclear weapons to sit in their capitals and bombard each other with extreme words makes absolutely no sense.

There should be an annual summit conference in depth, between the United States and the U.S.S.R., at a neutral location, such as Geneva, Switzerland.

Such a conference should be followed up by continuing working committees on specific issues and problems.

Our American approach to the Soviet Union should be forthright that we propose and anticipate a competition of systems for this period of history, without resort to war.

While both systems are so different, it is anticipated that both will continue to be very powerful, and very alert.

Each is apprehensive about a surprise attack by the other. Both could have a major improvement in their security by a reciprocal opening for the installation of a few modern inspection and reporting centers. Such inspection centers could be in continuous contact with satellites in outer space. World peace prospects would be improved greatly.

In the decades ahead outer space has a magnificent potential as a developing arena to serve world peace by the pioneers of both sides of the world as their systems on Earth evolve in competition without war.

Under such conditions there could be, and would be, and should be, not only a nuclear freeze, but a gradual bilateral mutual nuclear weapon reduction!

Those millions who advocate a nuclear freeze, a mutual verifiable nuclear freeze, should not be besmirched, or ridiculed, or slapped down. They should be thanked for assisting in lifting the world out of the deep rut of the arms race, and they should be encouraged, informed, and led in sound and creative moves toward a less dangerous future for all nations.

A Summit Conference could set working committees to concentrate and follow up for solutions and initiatives on acute problems and future potentials.

Among these obviously is the Mideast and the Arab-Israeli-Palestine situation.

The Palestinians want a homeland.

The Israelis fear for their security and survival if any such homeland borders on their small homeland.

A major creative center initiative is needed.

I suggest very substantial world financial support to purchase from Lebanon an area for a Palestinian Sovereign State homeland, centering on Tripoli on the Mediterranean seacoast, with borders that at no point touch the borders of Israel, with adjustments of all borders in the area to economically and defensively sensible borders, with a fund so that anyone in the area could move and sell and buy homes and properties with financial backing for a ten-year period; and with a fund for economic development in the area. Such a program would have basic beneficial results for all peoples of the area and of the world.

First reactions to such a program will be rejection, but I do not foresee any good solutions on any less creative and less far-reaching basis.

This solution draws upon the successful lessons of Trieste and Austria and a lifetime of experience.

Other creative steps are needed to modernize and improve the United Nations. A new Charter must be drafted and adopted.

Weighted voting must be brought into the structure.

Improved instrumentalities for arbitration, mediation, and judicial decision for working out peaceful solutions are needed.

A small elite multilingual security corps for world trouble spots must be established.

The world environment, and freedom from hunger, and quality of life must be brought into modern priority focus.

I am, of course, well aware of the scope and depth of what I propose.

In an age when the ultimate confrontation, the confrontation of a nuclear war mean mutual annihilation, a new first prior-

ity for the creative center, for cooperation of opposing views for mutual benefit, must emerge as the preimminent political philosophy.

I hold that in an age when the ultimate consequence of extreme economic policies will result in widespread human economic tragedy, a new emergence of a creative center economic system must evolve.

There has not yet been an adequate intellectual recognition that this planet earth is one world, and that those who live upon it now have the potential violent means to destroy it; and the potential economic means for chaos for all humanity.

Life on this planet earth in the decades ahead will not be a game of winners and losers, but preeminently a mutual experience of all humanity.

The creative center must be more than a middle way. It must be more than compromise. It must respect the rights and views of all, but reach out for new solutions, new initiatives consistent with the most basic of values of human life.

There are many encouraging developments turning away from polarization toward initiatives for peacemaking. The Catholic Bishops letter, the Lutheran, Baptist, and other religious attention to the new analysis of the nuclear age, the emergence of a theology of peacemaking, as I see it, all point toward new creative center thinking.

I do invite consideration of this creative center approach, this creative center philosophy, in thousands of classrooms, churches, editorial rooms, professional associations, labor unions, executive offices, and especially both the Republican and Democrat parties.

With a deep and abiding faith in God; with a true respect for the beliefs of others; and with an affirmative concept and realistic optimism toward the future of humanity; I conclude this "Pioneering for Peace" message.●

RESOLUTION MEMORIALIZING THE HONORABLE HALL STONER LUSK

● Mr. HATFIELD. Mr. President, a distinguished Oregonian, Mr. Justice Hall Stoner Lusk, died last month shortly before his 100th birthday. It was my great privilege while Governor to appoint Justice Lusk to fill the unexpired term of Senator Richard Neuberger.

The Supreme Court of Oregon memorialized Judge Lusk in a resolution which has been conveyed to me for inclusion in the RECORD.

Mr. President, I ask that the Oregon Supreme Court resolution in memory of the Honorable Hall Stoner Lusk be included in the CONGRESSIONAL RECORD.

The resolution follows:

RESOLUTION IN MEMORY OF THE HONORABLE HALL STONER LUSK

On May 15, 1983, within four months of his one hundredth birthday, Mr. Justice Hall Stoner Lusk died at Beaverton, Oregon. He joined this court as an Associate Justice on August 3, 1937, to succeed James U. Campbell. Governor Charles H. Martin appointed Judge Lusk from the Circuit Court for Multnomah County, where he had served with distinction for seven years.

After thirty years on the trial and appellate bench, Judge Lusk resigned from this court on March 15, 1960, to accept an appointment by Governor Mark O. Hatfield to serve the unexpired term of United States Senator Richard Neuberger. The governor not only honored a distinguished democrat by that appointment, but honored the State of Oregon by sending to the Senate one of the most gallant and dedicated public servants Oregon had seen. As Oregon's junior senator, at the age of 76, Judge Lusk quickly earned the respect of the members of that exclusive club, and upon his departure in 1961 to return to this court as a pro-tem justice, the Congressional Record contained several columns of tribute paid by fellow senators from both political parties.

While a member of this court, Judge Lusk's opinions became known throughout the legal profession for the clarity of their language and the rational development of the legal theory that controlled each case. His opinions were widely used by law teachers as well as by other judges, who benefitted both from his graceful style and from his lucid presentation of the law. His first opinion, *Moulton* v. *Logan*, 157 Or 406 (1937), appeared about two weeks after oral argument. An unbroken stream of opinions of high quality continued thereafter until interrupted by his service in the Senate. After returning from the Senate Judge Lusk wrote many opinions for this court as a justice pro-tempore, and contributed to the jurisprudence of his state for another eight years. He also volunteered to serve as a trial judge when the opportunity arose. He said of his work in his later years that he couldn't stand loafing. Ten years ago, when he was 89, he was found trying a tax case on a day when a newspaper reporter interviewed him.

Judge Lusk was born September 21, 1883, in the City of Washington, D.C., and received his education there. He was a student of Greek and Latin, and retained his knowledge of the classics and drew upon it in his work. After graduation from Georgetown University law school, he clerked for a District of Columbia judge for a year and then made his way to Oregon where he entered the private practice of law in 1909.

Judge Lusk married Catherine Emmons of Portland, Oregon, on September 30, 1914. Catherine survives him, as do their five daughters and thirteen grandchildren.

He practiced with Dolph, Mallory, Simon, and Gearin from 1912, to 1918, and was an Assistant United States Attorney from 1918 until 1920. From 1920 until his appointment to the circuit court in 1930, Judge Lusk practiced with the firm of Emmons, Lusk and Bynon. It was during these years that he worked on the case he remembered best, *Pierce* v. *Society of Sisters*, 268 U.S. 510 (1925). Judge Lusk wrote the brief for the Archdiocese of Portland, and his position on behalf of the rights of parents to educate their children in the religious schools of their choice was sustained by the United States Supreme Court in a decision that made First Amendment history. He served as a trustee of the University of Portland and as a member of the board of advisors of Marylhurst College.

In celebrating the life of this great jurist, the court notes with appreciation the qualities of dignity, scholarship, grace and humanity that marked every aspect of his public and private life.

This memorial resolution is not one of mourning, but one of grateful recognition of a life that was full in every measure of public service, and provided for many generations a role model for judges and lawyers. He once said, "a Judge doesn't get rich except in his associations along the way." His legacy in friends, in contributions to his profession, his church, and his community, far exceeds anything that could be purchased by material wealth. A poem by Louis Untermeyer contained lines that Judge Lusk liked to quote and live by:

Keep me, O God, with stern and stubborn pride,
And when at last the race is won,
God, keep me still unsatisfied.

The foregoing resolution, presented this 7th day of June, 1983, by The Honorable Alfred T. Goodwin, a Justice of this Court from 1960 to 1969, is ordered published in the Oregon Reports, with copies to be provided to Mrs. Lusk and his daughters.●

MRS. TIMOTHY VANN OF ST. PAUL, MINN.—A SUCCESSFUL PARENT

● MR. DURENBERGER. Mr. President, this week nine American families came to Washington to be honored at a White House ceremony culminating a 10-month-long search—which began last fall during National Family Week—for parents who have successfully raised a family, and raised successful children.

By successful I do not mean material wealth. By successful I mean that they are families who have, through the traditional means of love and guidance and the virtues of patience and understanding, raised happy and productive children.

They have done so under conditions that do not always parallel that of a storybook family. They are single parents, parents of adopted and foster children, families where both parents work, or families where both parents are out of work.

They are half of all families in today's society.

And although the makeup of an American family has changed in some ways, the traditional values of patience and caring and love have not.

Mrs. Timothy Vann of St. Paul knows this. Her family was chosen from a field of 200 to be honored at the White House this week.

Mrs. Vann was widowed 20 years ago, and alone, she raised 10 children.

An active member of her community, she instilled that value in her children.

She was to her children what we all try to be to ours—a counselor, a teacher, a parent, and a friend.

During the White House ceremony this week, First Lady Nancy Reagan recalled a quote which said:

"There are only two bequests we can give our families. One of them is roots, the other is wings. Families can help to provide both the security of roots and the inspiration of wings."

Mrs. Timothy Vann has done that for her children, and she has in the

process given all of us the gift of her children as members of this society, and for that, we can both thank her and honor her.

Mr. President, I ask that the following article from the Minneapolis Star and Tribune of June 19, 1983, by Stacy Milavetz be inserted into the CONGRESSIONAL RECORD.

The article follows:

[From the Minneapolis (Minn.) Star and Tribune, June 19, 1983]

ST. PAUL CLAN TO BE RECOGNIZED AS A GREAT AMERICAN FAMILY

(By Stacy Milavetz)

Timothy Vann has always been self-sufficient. When her husband was alive he often was away, working as a waiter on the railroad and as a musician. After he died 20 years ago, she reared their 10 children alone.

"I told my children, 'No one can place limits on you but God and yourself,'" she said. "If you're driving a car to Kansas City that doesn't look that good and only goes 20 miles an hour and someone else's car goes 90 miles an hour, keep going, and when you get there you're there like the other guy."

Her life style and the values she instilled in her children are qualities that represent "the great American family," the American Family Society has decided.

Vann, 66, 705 Dayton Av., St. Paul, and her family will be one of nine families honored Wednesday by Nancy Reagan at a White House ceremony.

"She taught us that poverty was a state of mind, not being," said her daughter Arlene, 32. "We couldn't have second helpings, not because it wasn't there—which it wasn't—but because it wasn't polite."

Her oldest child, Tony, 41, said his mother instilled a sense of worth in the children by "basically teaching us that we're no better than anyone else, and there is no one else who is better than we are."

Family Services of St. Paul nominated the Vanns for the award last November. The American Family Society encouraged local organizations nationwide to look at two criteria in choosing families to nominate; how well the family works together while encouraging individual growth, and evidence of community service with a lasting impact despite obstacles said K. Wayne Scott, president of the society.

When officials at Family Services heard about the program, "(Vann) was the first one we thought of," said public relations director Jane Lansing. "We thought that they were a fine example of a family giving back to the community during all of the years they have lived here."

Vann is director of St. Paul's Model Cities Health Clinic and has been active in a variety of community groups and Roman Catholic charities.

Initially the Vanns were one of 168 families nominated throughout the nation. A screening committee reviewed the nominations and narrowed the group to 23. A group of independent judges than selected the nine to represent different types of families.

Scott said Vann represents the single mother. Other families were chosen to represent those with single fathers, families with four generations living in the same house, and military families, for instance.

When her children were young, Vann said, society placed a stigma on a single-parent family. People thought children without a father were misfits.

She reared her children, who range in age from 21 to 41, with strict discipline, casting off advice from such authorities as Dr. Benjamin Spock and child psychologists as nonsense. "My 3-year old granddaughter was sitting on the floor calling 'ma'am, ma'am,' and I realized she was calling me. She thought that was my name because my children are so polite they always say, 'yes, ma'am, no ma'am." Her 16 grandchildren call her ma'am, mother, or Mrs. Vann.

While she commands her children's respect, she has always been their friend, they said. She has coached them and others in sports since they were small. The family makes up a softball team, which used to play in leagues and now plays whoever wants to get up a game, with Vann as the coach.

"My kids didn't realize I was getting older," she said. "They still don't. When I was 55 my son got me my first pair of ice skates."

The children have faith in their mother. "From kindergarten through college, kids would talk about what their parents could do. I would say my mother can do that. She can do anything," said Arlene. "And I still say that." ●

LUPE ANGUIANO RECEIVES VOLUNTEER ACTION AWARD

● Mr. DURENBERGER. Mr. President, on April 13, President Reagan presented the 1983 Volunteer Action Awards to Americans who have dedicated themselves, selflessly, to improving the quality of life in our country. One of these award winners was Lupe Anguiano.

As founder of National Women's Employment and Education, Inc., Lupe has assisted hundreds of women in raising themselves out of poverty to become self-sufficient. Her program was launched in San Antonio, Tex., where she helped 500 women become self-reliant within 6 months. Now expanded to seven other communities, Lupe's remarkable volunteer effort has been featured on "60 Minutes" and "Good Morning America," as well as numerous publications.

Lupe's success has been deeply rooted in the cooperation, guidance, and support of many corporate entities. The accomplishments of her program demonstrate the great potential in public-private partnerships.

On June 8, Lupe was featured in the Washington Post. This article captures Lupe's many talents and spirit and I would like to share it with my colleagues. I ask that it be printed in the RECORD.

The article follows:

[From the Washington Post, June 8, 1983]

FARING WELL WITHOUT WELFARE

(By Phil McCombs)

The Reagan administration *dreams* of people like this, but seldom do they meet a radical welfare reformer like Lupe Anguiano—charming, dynamic, Hispanic, feminist, Democrat, former nun, former organizer for Cesar Chavez, former education bureaucrat for LBJ—who declares, "Our program fits the Reagan philosophy . . .

"Nothing is given to you on a silver platter," she says. "You've got to work for it. That's what makes you healthy. That's what makes life worth living. . . . The thing that I detest the most in the welfare system is it stifles the individual."

Anguiano and her volunteers have scoured the barrios and ghettos for a decade, screening and training thousands of welfare mothers in basic job skills, then jawboning local businesses and national corporations into hiring them. Anguiano says she has an 88 percent success rate, at a cost of $700 per individual. Her program operates in seven cities, placing 130 women a month in jobs, and is opening a branch for Harlem and the South Bronx next month.

Anguiano wants to go national, and reform the country's welfare system. The Reagan folks are naturally *bananas* about her.

"The Bushes have been very helpful," Anguano said. Barbara Bush visited Tacoma, Wash., and San Antonio, two of the cities where branches of Anguiano's National Women's Employment and Education Inc. operate.

Last April President Reagan invited Anguiano to the White House along with 16 other individuals, two corporations and a labor organization, and awarded her a Volunteer Action Award for helping make America "a better and more generous land."

After the ceremony, Anguiano visited Margaret Heckler, Reagan's new secretary of Health and Human Services. "I told her, 'Mrs. Secretary, be relieved we're not here to ask for government money. We want you to . . . help us get the private sector involved in our program."

Yesterday Anguiano was the star at a breakfast at the Capitol for representatives of major corporations hosted by Republican senators Charles E. Grassley (Iowa) and Dave Durenberger (Minnesota), and today she was scheduled to meet with Reagan aides in the White House to discuss her plan to turn the welfare system upside down.

"I'm a Democrat [but] I voted for Reagan and I'm going to vote for him again . . . You know, the President is so great. He really is. No one can say no to him." This being the case, she said, she will ask that Reagan personally telephone corporate executives in New York to get them behind her program.

Corporate supporters already include Atlantic Richfield, IBM, Texas Instruments and several dozen other smaller companies.

One corporate representative at yesterday's breakfast, Cynthia Mayeda of Dayton Hudson Corp., was among those who stood up and praised Anguiano's work. "It's a wonderful project for us," she said. ". . . And it works, my friends."

Anguiano's reputation as a welfare reformer began in 1973 after she led a group of 100 welfare mothers in San Antonio in a "Let's Get Off Welfare Campaign." Half of them returned their checks and took up jobs that had been readied for them. The other half soon followed, and in six months several hundred Texas women were taken off the welfare rolls and placed in jobs.

"Ninety percent of welfare families are headed by women, and [most] of these are young, healthy, intelligent women who would select a job over welfare if they were offered one," Anguiano said. "The reason they are not working is the policy is not organized to provide a job and training."

Instead, she said, the system—despite welfare "reform" efforts by every administration for years—is centered on income maintenance.

"The greatest insult of the AFDC [Aid for Families with Dependent Children, the nation's central welfare system] policy is it calls the woman the caretaker. She's the caretaker for the state. Isn't that stupid? . . . The focus should be on providing the woman with a job and skills training, plus emergency assistance until she stabilizes herself in that job."

Anguiano cites case studies galore; the welfare mother who started out as a flagger on a construction site and now owns her own company . . . the ones who started as gardeners at $4 an hour outside a brewery and are now working inside at $9 an hour . . . the computer operator . . . the electrician . . .

Local colleges are used as training centers. Volunteers from the companies pledging jobs often run the classes. The students receive training (how to be a bank cashier) and general wisdom (the way you do it is start at the bottom and work your way up).

Anguiano, now in her fifties, grew up poor in the Southwest, the daughter of parents who fled the Mexican revolution. Her father worked on the railroad in Colorado, and in the summer the family went to California to pick crops. The mother's dream was to open a little store, and eventually she did. One of Anguiano's brothers now runs it—the La Palma Grocery Store in Saticoy, Calif.

When she was 20, Anguiano joined the Victory Knoll Missionary Sisters and remained a nun for 15 years, leaving when she felt her efforts for housing reform were hindered by her official church position. Later, she was married for a year, but "I just about went insane. It was the worst experience of my life. I was supposed to do this and do that, but I need to have freedom . . . I was supposed to be the housewife and I couldn't do it . . .

"I can't remember a day not working since I was a child, and I've never felt deprived," said Anguiano. "I've worked very hard and woken up in migrant camps and worked in the fields; it has given me the energy and strength to do what I'm doing now. The worst thing that can happen to an individual is to be dependent on public funding."

With everything she's got going for her, isn't Anguiano likely to find herself in the Reagan administration? Her reply:

"I don't think I would accept a position, because I think what I'm doing is very exciting. To make systems work better, you're better off working a local area out of government."●

ORDER FOR PROCEDURE ON MONDAY, JUNE 27, 1983

Mr. STEVENS. Mr. President, I ask unanimous consent that when the Senate convenes on Monday, June 27, 1983, the reading of the Journal be dispensed with, no resolutions come over under the rule, the call of the Calendar be dispensed with, and following the recognition of the two leaders under the standing order, there be a period for the transaction of routine morning business not to exceed 30 minutes in length, with Senators permitted to speak therein for not more than 5 minutes each; and provided further that the morning hour be deemed to have expired.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE CALENDAR

Mr. STEVENS. Mr. President, I ask unanimous consent that it be in order for the Senate now to consider the unanimous consent calendar items en bloc and I refer the Senate specifically to Calendar Order No. 227, Calendar Order No. 237, Calendar Order No. 243, and Calendar Order No. 249.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask my good friend, and he is my good friend, from West Virginia, if there is an agreement on those four items, that we may handle them on a unanimous-consent basis.

Mr. BYRD. Mr. President, I am honored to have the acting Republican leader refer to me as a good friend, and that is mutual.

There is no objection to considering the measures that have been enumerated and to considering them en bloc.

EMIGRATION OF IDA NUDEL

The resolution (S. Res. 125) expressing the sense of the Senate that the Government of the Soviet Union should allow Ida Nudel to emigrate to Israel, and for other purposes, was considered, and agreed to.

The preamble was agreed to.

The resolution, and the preamble, are as follows:

S. RES. 125

Whereas the Soviet Union is a party to the Final Act of the Conference on Security and Cooperation in Europe and the Universal Declaration of Human Rights;

Whereas Ida Nudel first applied to emigrate from the Soviet Union to Israel in 1971 in order to rejoin her sister—her only living relative;

Whereas in June 1978, Ida Nudel was convicted by the Soviet Government of "malicious hooliganism" for hanging a banner on her balcony which said "KGB, give me my visa";

Whereas Ida Nudel was then sentenced to four years of exile in Siberia after a trial in which no witnesses were allowed to testify in her behalf;

Whereas Ida Nudel is in grave physical danger due to her heart, liver, kidney, and diabetic ailments and has been denied appropriate medical care;

Whereas Ida Nudel was released from Siberian exile on March 26, 1982;

Whereas upon release, Ida Nudel was denied permission by Soviet authorities to reside in Moscow;

Whereas Ida Nudel traveled the Soviet Union for nine months in search of a municipality that would grant her a residence permit;

Whereas in December 1982, Ida Nudel was finally awarded residence status in a small town in Moldavia; and

Whereas Ida Nudel currently resides in Moldavia and continues to be subjected to harassment by Soviet authorities: Now, therefore, be it

Resolved, That it is the sense of the Senate that the President, acting directly or through the Secretary of State, should—

(1) continue to express at every suitable opportunity and in the strongest possible terms the opposition of the United States Government to the forced exile and repressive treatment of Ida Nudel; and

(2) urge the Government of the Soviet Union to—

(A) provide her with adequate medical care;

(B) grant Ida Nudel residence status in Moscow; and

(C) accept Ida Nudel's application for an exit visa, and allow her to emigrate to Israel to join her sister, in accordance with the Final Act of the Conference on Security and Cooperation in Europe and with the Universal Declaration of Human Rights.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President with the request that he further transmit such copy to the Ambassador of the Union of Soviet Socialist Republics to the United States.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SETTLEMENT OF CERTAIN CLAIMS BY THE SECRETARY OF COMMERCE

The bill (S. 969) to amend section 1 of the act of June 5, 1920, as amended, to authorize the Secretary of Commerce to settle claims for damages of less than $2,500 arising by reason of acts for which the National Oceanic and Atmospheric Administration is responsible, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 969

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1 of the Act of June 5, 1920, as amended (41 Stat. 929, as amended; 33 U.S.C. 853), is further amended to read as follows: "The Secretary of Commerce is authorized to consider, ascertain, adjust, and determine all claims for damages, where the amount of the claim does not exceed $2,500, occasioned, subsequent to June 5, 1920, by acts for which the National Oceanic and Atmospheric Administration is responsible.".

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

U.N. DECADE OF DISABLED PERSONS

The concurrent resolution (S. Con. Res. 22) expressing the sense of the Congress with respect to implementing the objectives of the U.N. Decade of Disabled Persons (1983-92), was considered.

Mr. DOLE. Mr. President, Senate Concurrent Resolution 22 has had

strong bipartisan support from the moment it was introduced with 28 cosponsors. A similar version was introduced in the House by Congressman LARRY WINN and is headed toward passage over there.

This initiative stems from what has gone before—the International Year of Disabled Persons in 1981 and the National Year of Disabled Persons in 1982. On December 3, 1982, the U.N. General Assembly declared 1983-92 as the U.N. Decade of Disabled Persons. The United Nations deserves applause for taking the lead on this decade in order to continue the worthwhile goals that had already been established during the international year. By the passage of this resolution, it is our hope that the momentum generated by the international year in 1981 and the national year in 1982 will be continued throughout this decade.

FRAMEWORK FOR NATIONAL ACTION

Mr. President, the U.N. action has established a framework that can provide the incentive for our own national plan of action in furtherance of the following long-term goals to help disabled people: expanded educational opportunity; improved access to housing, buildings and transportation; greater opportunity for employment; greater participation in recreational, social and cultural activities; improved rehabilitation programs and facilities; purposeful application of biomedical research aimed at conquering major disabling conditions; reduction in the incidence of disability through accident and disease prevention; increased application of technology to ameliorate the effects of disability; and expanded international exchange of information and experience to benefit all disabled persons.

Although the lives of our Nation's 35 million disabled people have been significantly improved over the last decade by increased opportunities for health care, rehabilitation, community living, education, and employment, we still have a long way to go on the road to progress. Perhaps some of the most important doors that remain to be opened are those involving attitudinal changes. It may be customary to treat handicapped individuals with compassion, but this will never be an adequate substitute for employment opportunity and personal independence. We must all work together toward the goal of constructing a fair society in which all Americans can participate and find the path that leads to the pursuit of happiness. Once people's minds are opened, opportunities will follow as a natural course.

Partnerships between persons with and without disabilities, between government and the private sector and among National, State, and local organizations are continuing to improve the lives of Americans with disabilities but we need to continue to build upon this foundation.

ABUNDANCE OF HUMAN RESOURCES

Mr. President, the handicapped are not asking to be given anything except the opportunity to share their abilities. For much of my life, I have known firsthand the problems that go with being a handicapped person. My associations with disabled people of all ages have portrayed more than a picture of strength against overwhelming odds—theirs is a portrait of the kind of potential that has made this country great.

Those within our society who suffer from physical or mental disabilities have something to give the society in which they live—they can be productive citizens and harness their talents to the good of our society as a whole. The values that they have learned through the struggle of overcoming the effects of disability can be an inspiration to us all.

Mr. President, this resolution is intended to generate an increase in public awareness of the special needs and special talents of disabled individuals within our society. During this decade we should work together, to try to implement within our own country, the goals set forth by the United Nations.

I ask unanimous consent that a copy of the resolution and a list of cosponsors be printed in the RECORD following this statement.

Mr. WEICKER. Mr. President, I rise to urge passage of Senate Concurrent Resolution 22 expressing the sense of the Congress with respect to implementing the objectives of the U.N.'s Decade of Disabled Persons.

The purpose of Senate Concurrent Resolution 22 is simple and straightforward. It says that the momentum achieved in this country during the National and International Years of the Disabled cannot be lost. Continued attention both to the human rights of the disabled and to disabled persons' capabilities to contribute to society is essential.

This resolution establishes Congress' support for the U.N. Decade of the Disabled and calls upon our Government to continue its commitments to meeting disabled persons' needs.

I commend Senator DOLE on his sponsorship of Senate Concurrent Resolution 22 and I urge that it be approved.

Mr. RANDOLPH. Mr. President, I support Senate Concurrent Resolution 22, which expresses the sense of the Congress with respect to implementing the objectives of the U.N. Decade of Disabled Persons. This was proclaimed by the United Nations on December 3, 1982, and will continue the momentum begun by the International Year of the Disabled and the National Year of the Disabled to create an awareness and recognition of the rights of disabled individuals.

The concurrent resolution was agreed to.

The preamble was agreed to.

The concurrent resolution, and the preamble, are as follows:

S. CON. RES. 22

Whereas a new era recognition of human rights and universal respect for these rights has begun;

Whereas the United Nations General Assembly has declared 1983 through 1992 as the United Nations Decade of Disabled Persons;

Whereas the United States has made great strides during the last decade in improving the lives of thirty-five million American citizens with physical and mental disabilities;

Whereas there is still much to be done to open doors to the full participation and equality of disabled persons in society throughout the world;

Whereas handicapped individuals should be able to participate fully in the mainstreams of society through education employment, and community living opportunities;

Whereas the United States recognizes the need for further progress in strengthening public understanding and awareness of the needs and aspirations of disabled persons;

Whereas there is hope that this spirit of carrying out the goals of the International and National Years in 1981 and 1982 will continue throughout this next decade; and

Whereas a framework for national action has been established by these previous initiatives and the improvement of programs for disabled persons over the last decade: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of the Congress that the President should take all steps within his authority to implement, within the United States, the objectives of the United Nations Decade for Disabled Persons (1983-1992), as proclaimed by the United Nations General Assembly on December 3, 1982.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL REYES SYNDROME WEEK

The joint resolution (S.J. Res. 34) designating "National Reye's Syndrome Week," was considered, ordered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution, and the preamble, are as follows:

S.J. RES. 34

Whereas Reye's syndrome is a disease of unknown cause which normally attacks healthy children eighteen years of age and under, both male and female, which can kill

or cripple more than half of its victims within several days by attacking the muscles, liver, brain, and kidneys, and which affects every organ in the body;

Whereas Reye's syndrome is recognized by the Food and Drug Administration to be one of the top ten killers among all children's diseases;

Whereas Reye's syndrome was first recognized as a specific illness in 1963 and is a new illness in name only since children have been affected for decades by the illness and Reye's syndrome cases have been improperly diagnosed;

Whereas the reporting of cases of Reye's syndrome is required in only one-half of the States (for the purpose of this joint resolution, "States" includes the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, and the other territories and possessions of the Unites States);

Whereas volunteer Reye's syndrome organziations are established throughout the United States and are supported by thousands of parents;

Whereas national Reye's syndrome volunteer organizations exist to encourage involvement of the Federal Government in supporting Reye's syndrome research; to encourage coordination of the treatment and research efforts by the various Reye's syndrome treatment and research centers; to establish Reye's syndrome as a reportable disease in every state; to establish at the Center for Disease Control a position for the review of data on Reye's syndrome patients; to sponsor a multicenter research study by recognized authorities on Reye's syndrome; to sponsor programs to educate parents and medical professionals with respect to diagnosis and treatment of the illness; and to raise funds for research into cause, pevention, and treatment of Reye's syndrome;

Whereas Reye's syndrome incidence continues to increase at a pace greater than the attention of the public, the Federal Government in general, and the Congress in particular; and

Whereas the chief executive officers of several States have declared certain periods of time as Reye's syndrome weeks: Now therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of November 7 through November 13, 1983, is designated "National Reye's Syndrome Week". The President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that week with appropriate ceremonies and activities.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the joint resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PROGRAM

HATCH AMENDMENT ON ABORTION

Mr. STEVENS. Mr. President, I call the attention of the Senate to the fact that on Monday when the Senate convenes after adjournment, it will be the intention of the majority leader to ask the Chair to lay before the Senate, Senate Joint Resolution 3, the Hatch-proposed constitutional amendment dealing with giving the Congress legislative authority and the States legislative authority with respect to abortion.

THE TAX CAP ON THIRD YEAR OF TAX CUT

I further indicate it is the understanding of this Senator if the Senate does receive the legislation, the cap on the effect of the third year of the tax cut, that it is the intention of the majority leader to attempt to get to the consideration of that measure on Tuesday.

We are hopeful that the Senate will recognize there may be votes on Monday. There will be votes on Tuesday for certain.

ORDER FOR ADJOURNMENT UNTIL 10 A.M. ON MONDAY

Mr. STEVENS. Mr. President, I ask unanimous consent that when the Senate adjourns today it stand in adjournment until 10 a.m. on Monday.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADJOURNMENT UNTIL MONDAY, JUNE 27, 1983, AT 10 A.M.

Mr. STEVENS. Mr. President, I move, in accordance with the previous order, that the Senate stand in adjournment until 10 a.m. on Monday.

The motion was agreed to; and the Senate, at 7:31 p.m. adjourned until Monday, June 27, 1983, at 10 a.m.

HOUSE OF REPRESENTATIVES—*Thursday, June 23, 1983*

The House met at 10 a.m.

The Rev. J. Terry Wingate, D. Min., pastor, Purity Baptist Church, Washington, D.C., offered the following prayer:

Almighty and everlasting God, from whom we have received the gift of life, the call to commitment, the joy of service, and the burden of brotherhood. In acknowledgment of these gifts, we bow in adoration. We know we are not worthy of all of the good Thy hath done for us, and that we have failed so often to live according to Your will. Forgive us these transgressions and let Thy blessed hand lead us into yet a better way.

Thy hath walked and talked with those who do business for mankind within these hollowed walls and ask that Thy would be mindful of each one of them as they take up the business at hand.

We pray for all of those who give leadership in this great country of ours and ask that Thou would heal us of the divisions that exist and give us a greater sense of community. Cause us to be sensitive to the needs of the hungry, the homeless, the downcast, and especially the children, our legacy for the future.

In our midst, may Your spirit dwell continually so that we may speak the truth in love, seek Your will for ourselves, assist those less skilled in the knowledge of Your will, and be strengthened by knowing that Thou will be with us all the way. Thank You for all that You do for us. We give praise and lift our hearts without hesitation because, as You were with our fathers, so will You be with us, even now, and forevermore. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. COATS. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. COATS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 355, nays 34, answered "present" 4, not voting 39, as follows:

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

So the Journal was approved.

The result of the vote was announced as above recorded.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair announces that other than the gentleman from the District of Columbia (Mr. FAUNTROY), there will be no other 1-minute speeches today.

THE REVEREND J. TERRY WINGATE

(Mr. FAUNTROY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FAUNTROY. Mr. Speaker, it is my honor and pleasure to thank my good friend and fellow minister, Rev. J. Terry Wingate for his inspiring opening prayer.

Reverend Wingate has a long and distinguished record of service in the education, religious, and civil rights communities.

A native North Carolinian, Reverend Wingate earned his undergraduate degree from Fayetteville State University and doctorate degrees in education from George Washington University and theology from the Harvard Divinity School.

As pastor of the Purity Baptist Church here in our Nation's Capital, Reverend Wingate has been instrumental in organizing his congregation in community service. In addition, he has played an important role within the American Baptist Church, U.S.A., as a member of its general board.

At the same time, he has made important contributions to the quality of education in the District of Columbia, serving on a number of educational associations.

Finally, and from my perspective most significantly, Reverend Wingate has been a most active president of the Washington Chapter of the Southern Christian Leadership Conference, the organization founded by Dr. Martin Luther King, Jr., to work for justice through nonviolent social change.

I am sure you join me in welcoming Rev. J. Terry Wingate to the U.S. House of Representatives

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 3133, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT—INDEPENDENT AGENCIES APPROPRIATION, 1984

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (H.R. 3133) making appropriations for the Department of Housing and Urban Development and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1984, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

Mr. ROGERS. Reserving the right to object, Mr. Speaker, has the gentleman cleared this with the minority?

Mr. WHITTEN. We cleared it with the minority earlier, with the gentleman from Massachusetts (Mr. CONTE) and others, so I know of no objection to it.

I see the gentleman from New York (Mr. GREEN) is here now.

Mr. ROGERS. I yield to the gentleman from New York.

Mr. GREEN. Mr. Speaker, the Minority has no objection.

Mr. ROGERS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE PRIVILEGED REPORT

Mr. DIXON. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a privileged report on a bill making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1984, and for other purposes.

Mr. ROGERS received all points of order on the bill.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

PROVIDING FOR CONSIDERATION OF A MOTION TO RECEDE AND CONCUR WITH THE AMENDMENT IN THE AMEMDMENT REPORTED FROM CONFERENCE IN DISAGREEMENT ON HOUSE CONCURRENT RESOLUTION 91

Mr. DERRICK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 243 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 243

Resolved, That upon the adoption of this resolution it shall be in order, clause 2 of rule XXVIII to the contrary notwithstanding, to consider the conference report and amendment reported from conference in disagreement on the concurrent resolution (H. Con. Res. 91) revising the congressional budget for the United States Government for the fiscal year 1983 and setting forth the congressional budget for the United States Government for the fiscal years 1984, 1985, and 1986. The Senate amendment reported from conference in disagreement, and the motion to recede and concur therein with an amendment printed in the joint statement of managers accompanying the conference report, as modified by the correction printed in the CONGRESSIONAL RECORD of June 22, 1983, by Representative Jones of Oklahoma, shall be considered as having been read when called up for consideration, and said motion to recede and concur with an amendment shall be debatable for not to exceed two hours equally divided between Representative Jones of Oklahoma and Representative Latta of Ohio.

SEC. 2. The allocations of spending responsibility to committees of the House printed in the Congressional Record of June 22, 1983, by Representative Jones of Oklahoma, shall be considered to be the allocations required to be printed in the joint statement of managers on H. Con. Res. 91 pursuant to section 302(a) of the Congressional Budget Act of 1974 (Public Law 93-344).

The SPEAKER. The gentleman from South Carolina (Mr. DERRICK) is recognized for 1 hour.

Mr. DERRICK. Mr. Speaker, I yield the usual 30 minutes, for the purpose of debate only, to the gentleman from Ohio (Mr. LATTA), and pending that, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 243 waives clause 2, rule XXVIII (the 3-day layover rule) against consideration of the conference report and the amendment reported from conference in disagreement on House Concurrent Resolution 91, the first concurrent resolution on the budget for fiscal year 1984.

The rule provides that the Senate amendment reported in disagreement and the motion to recede and concur with an amendment printed in the joint statement of managers accompanying the conference report—as modified by the correction printed in the RECORD by Representative JONES of Oklahoma—shall be considered as having been read. Under the rule, the motion to recede and concur with an amendment shall be debatable for up to 2 hours, with the time equally divided between Representative JONES of Oklahoma and Representative LATTA of Ohio.

Finally, the rule provides that the committee spending allocations printed in the CONGRESSIONAL RECORD of June 22, 1983, shall be considered the allocations required to be made by section 302(a) of the Congressional Budget Act of 1974.

Mr. Speaker, the conference committee on House Concurrent Resolution 91 reached a compromise late last Monday on the first budget resolution for fiscal year 1984. Because certain provisions of the agreed upon resolution exceed the scope of the confer-

ence by falling outside of the range between the corresponding House and Senate provisions, the conference committee reported back in technical disagreement. The House managers of the conference intend to offer a motion to recede and concur in the Senate amendment with an amendment consisting of the agreed upon budget resolution. Such a motion is privileged and ordinarily would not need a rule to allow consideration. However, because the House managers of the conference were unable to file their report on Monday, the Committee on Rules has proposed a waiver of clause 2 of rule XXVIII (the 3-day layover rule) to allow consideration of this matter today.

Also, since a motion to recede and concur with an amendment is considered in the House, only 1 hour of debate would ordinarily be allowed. Because of the importance of this matter, however, the rule provides for 2 hours of debate.

Because the statement of managers printed in the RECORD on June 21 contained some typographical and technical errors, House Resolution 243 directs that this statement be modified by the corrections printed in the RECORD of June 22, 1983, by Representative JONES of Oklahoma.

Finally, the Congressional Budget Act of 1974 requires that the section 302(a) committee spending allocations be printed in the joint statement of managers on the concurrent resolution on the budget. Because of the short time allowed for filing this statement, the section 302(a) allocations were not included. House Resolution 243, therefore, provides that the committee spending allocations printed in the RECORD of June 22, 1983, by Representative JONES of Oklahoma shall be considered to be the allocations required by section 302(a) of the Budget Act.

Mr. Speaker, I will not take any time to explain the provisions of the budget resolution to be considered here today. The distinguished chairman of the Budget Committee, Mr. JONES, will do that after we have adopted this rule. I do, however, want to express my strong support for the budget resolution the members of the conference committee have agreed to. I believe it is a fair budget which carefully balances the need to reduce the awesome budget deficits we are facing with our responsibility to provide for national security, spur the recovery of our economy, and meet the legitimate social, educational, and health needs of our citizens.

I also want to state that I am a strong advocate of the congressional budget process. Without such a process, we will never be able to bring Federal spending under control or fairly and efficiently allocate the resources of the Federal Government. I ask everyone here to consider carefully what the failure to adopt a budget resolution this year would do to our ability to function as responsible decisionmakers, and I challenge anyone who is opposed to the budget proposed here today to put forward an alternative which could be adopted by this House and the other body. Because I do not believe such an alternative exists, I believe the failure to adopt this conference agreement here today would seriously jeopardize the future of a meaningful congressional budget process.

Mr. Speaker, I urge adoption of House Resolution 243 and of the budget resolution we will consider after adoption of the rule.

I yield to the gentleman from Ohio (Mr. LATTA) for the purposes of debate only.

□ 1030

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as you know, the majority leadership is attempting to push through today a budget resolution which is not a responsible approach to the economic problems facing this Nation.

Yesterday afternoon in the Rules Committee a rule was reported waiving the usual requirement that a conference agreement be available for 3 days before consideration of the rule. Thus many Members will not have an adequate opportunity to study the contents of the budget resolution nor will the American people have an opportunity in this short period of time to review it.

The rule provides for 2 hours of debate. I might say if I had objected yesterday and offered an amendment we would be here today with only 1 hour of debate on 859 billion dollars' worth of spending for fiscal year 1984.

Also, Mr. Speaker, I think it is well to point out that in this budget resolution, buried deep, where not very much light can be shed upon it, there is a paragraph raising the level of the public debt. For fiscal year 1983 the level of the public debt would be $1,389,200,000,000 and for fiscal year 1984, $1,607,450,000,000.

For fiscal year 1985 the appropriate level of the debt would be $1,804,000,000,000 and for 1986 $1,993,750,000,000.

Mr. Speaker, we are not talking about small figures. We are talking about some large figures and some heavy expenditures and more debt for our grandchildren.

Yet, we are only going to be talking about it here today under this rule for 2 hours.

Mr. Speaker, as far as the rule otherwise is concerned, I have no objection to it. But the conference substitute is something that needs a lot of light today for the American people to understand it because it calls for $73 billion in new taxes over the 3 years, $12 billion in new taxes for fiscal year 1984, $15 billion in new taxes for fiscal year 1985, and $46 billion in fiscal year 1986.

It also reverses a trend that was started 2½ years ago to rebuild this Nation's defenses. It will start us on a glidepath downward and certainly I think it is most important that we examine thoroughly what is happening to our defenses under this budget resolution.

Mr. Speaker, I will have more to say about the resolution itself under the general debate on the resolution.

Mr. Speaker, I yield 5 minutes to the gentleman from Mississippi (Mr. LOTT).

Mr. LOTT. Mr. Speaker, I am going to try to be calm, cool, and collected and not be shrill, because I am sure we will hear that as the day goes along. But I would like to advise my colleagues, since we are talking about the rule, that this rule is defective by itself.

This rule does waive the 3-day rule. It is very curious that when it is convenient for the majority to be able to complain about making sure we comply with the rules that everybody has had a chance to see the budget, then that is all right. But when we want to shove it right through, take it up on the same day we are taking up the tax bill, then, all of a sudden, it is all right to waive the 3-day rule.

It was said yesterday in the Rules Committee by the chairman that the Members have had 2 days to look at the conference report. The rules require 3 days. Why have we not complied with the rules? What would have been wrong with considering this on Tuesday or Wednesday of next week to give the Members an opportunity to take a look at what is really in this $859 billion spending bill. But the rule waives that.

Also, the request that came from the Budget Committee would have only allowed for 1 hour of debate, as the distinguished ranking minority member of the Budget Committee pointed out.

Now, the rules under which we would have ordinarily proceeded would have allowed 5 hours, but because it was being brought up with an amendment in disagreement, because of that technical deviation we would have had only 1 hour. We now have 2 hours to discuss this "great instrument of budget restraint" that we have before us.

So do not believe that this is a nice, unoffensive rule. It is not. It does waive a very important rule and we do have only 2 hours to debate this issue.

I would like to speak briefly about the process itself. I, like the gentleman from South Carolina, have supported the Budget Act from its inception. I

voted for it in the beginning. I think we should try to make it work.

I know that there are attacks on the budget process from some of the authorizations committees and the Approporiations Committee, but I say to the distinguished chairman of the Budget Committee and his lieutenants who are sitting with him here on the floor today, this budget resolution does great damage to the budget process.

As a matter of fact, what we are doing here today may not be praising the budget. In fact, it may be burying it right here along with the budget process. We are doing a great disservice.

What I do not understand is why we made it so political this year. In the past we had a tacit understanding around here that we would expect politics on the budget process in election years. But this time we started to play politics with the process early, often, and the budget has wound up in the same way as it started, as a political document, a partisan political document. That is all it is. Everybody knows it.

We probably ought to ask unanimous consent to go ahead and vote and dispense with the debate, because it is strictly a political document and we all know that.

And the American people know that, too. We are not fooling them. Nobody is fooling them.

But I do worry that we are undermining the whole Budget Act. When we go back home and try to explain to our constituents that for years we never had a budget process, that we just added up the bottom line and only looked at what is coming in and what is going out, they do not understand how we could have operated that way.

Since 1974 we have been trying to make the budget process work. Occasionally we have made it work. I think it worked in 1980 under a Democratic President. It worked in 1981. It did not work too beautifully in 1982, but we have been making an effort.

This budget undermines the process and the advantage that we have gained in the past 3 years. Is this the best we can do? No, this is a requiem for disaster—it should collapse in a pile of irrelevant ashes.

We have defeated budgets in the past, and we have come back again and again until we finally pass a budget resolution. I want you to think about that fact. It would not hurt a thing; in fact, we might improve this budget resolution if we defeated it. We could even save a lot of time if we just defeated the rule to stop this process right now.

But I want my colleagues from Oklahoma, California, Missouri, and Texas, and from Indiana and South Carolina to think about this: Can you go back home and defend this kind of spending increase, tax increase and cuts in defense spending?

I do not apologize for the latter at all. We have cut what the President asked for in defense at least in half. If you will look at the appropriations bills that have been coming through this body, so far, every one of them have been over the budget except two: The military construction bill, which we passed, and the defense bill. They are the ones that stay within the budget every year. Everything else exceeds the budget.

I want you to go back home and defend this budget resolution, and I tell you that you going to have to, and you are going to hear about it often.

Let us give this abomination a quiet, peaceful burial right now and defeat the rule. But if, for heaven's sake, we pass the rule, let us look at the substance of this resolution and admit that we can do better, defeat it, and come back with a better resolution.

Mr. LATTA. Mr. Speaker, I yield 3 minutes to the gentleman from Louisiana (Mr. MOORE).

Mr. MOORE. Mr. Speaker, I think at the very outset of the whole day's business today we ought to be honest with the American people and just say at the outset that today is a day devoted to politics, pure and simple. Today is not a legislative business day. Today we are dealing with politics.

The budget resolution we are dealing with is a political document. We all know it. It is never going to be implemented into law.

No reconciliation bill is going to pass calling for $73 billion in new taxes over the next 3 years to implement the budget resolution. We all know that.

I do not think the Congress is going to pass that big a tax increase, but if they did, the President will veto it. We all know there are more than enough votes in either House to sustain that veto.

The Ways and Means Committee chairman has already said on numerous occasions he cannot pass that much in taxes. We are not even sure the committee could give you that kind of a bill, much less pass it in the Congress or have it signed by the President. So let us just face it. The budget resolution we have today is just a political document and all of the debate and all of the rhetoric is just politics. We might just as well vote and save everybody a lot of time and save the money of printing the CONGRESSIONAL RECORD with all of this debate.

Second, the second item of business of today is the tax cap, which is not a tax cap. But we will talk about that later.

But that, likewise, is just a political act. That is not going anywhere either. Everybody knows that the President is going to veto that bill, and the other body probably will not even take it up. But if they did the President would veto it and, again, there are more than enough votes to sustain that veto.

So today, Thursday, is just a day of politics. It is a day of positioning, I suppose, for national elections. It is a day to give speeches and to make all kinds of sounds for the economy.

But, my colleagues, it is a wasted day. It is just a day of politics that is not going anywhere, not going to accomplish anything.

We would do better to go home and talk to our constituents about more meaningful things, or take up other forms of legislation, because this is not legislation.

We ought to let the American people know that at the outset.

This is politics pure and simple. That is all it is. And it is bad politics at that.

It is more of the taxing and taxing and taxing and spending and spending and spending, doing nothing for the ultimate budget deficit or problems facing this country.

I yield back the balance of my time.

Mr. LATTA. Mr. Speaker, I yield 6 minutes to the gentleman from Texas (Mr. LOEFFLER).

□ 1045

Mr. LOEFFLER. I thank the Speaker.

Mr. Speaker, we are today in a position to say to all Americans that economic recovery is underway. In fact, all economic indicators are very positive, but for one indicator. Our worst economic indicator is the U.S. Congress.

The House budget resolution which was brought to us earlier in the year, was irresponsible. The Senate did no better and the conference has come out with something that can be labeled as the most ridiculous budget resolution ever to be brought to us out of conference. In fact, it means we are returning again to the past 20 years of a high spending, high taxing Congress.

In my judgment, this reflects economic shortsightedness, political gluttony, and legislative buffoonery. It is a vicious device for building in even greater looting of the American people than we have seen in the past. The U.S. Congress is ducking its fiscal responsibility, there is no question about it.

Mr. Speaker, this budget resolution which we will be debating later during the course of the day is one that reflects an increase in domestic spending over and above what the President asked for, an increase in taxes, a reduction in defense, and an increase in the deficit for fiscal years 1983 and 1984.

This is precisely what has precipitated the past spirals of increased inflation, higher interest, greater unem-

ployment. Today we have an opportunity to vote down such an irresponsible budget and allow the Congress to work in a responsible, credible way to give the Nation guidance and direction from fiscal policy that can sustain a recovery that is underway.

As we look at the domestic spending, the increase in domestic spending will mean greater deficits which will bring about greater inflation and higher interest; it will begin to wreck the positive strides that are now underway.

Higher taxes do nothing but stifle productivity and take away individual initiative and economic incentives which in turn will prevent the creation of real and lasting jobs that are so necessary.

In my judgment, no nation can tax itself into prosperity. In fact, it is analogous to standing in a bucket and trying to lift yourself out by the handle; it just will not work

In addressing the defense figures, the President had asked for a 10-percent real increase in defense spending. The budget resolution before us today calls for a real increase of defense spending in the range of 5 percent for fiscal year 1984.

I believe we need more. The 10-percent request was not sacrosanct, nevertheless 5 percent came out of conference because, in fact, the House-passed version had such an imprudent low ball figure of 2.8 percent real increase in defense spending.

Mr. Speaker, Washington's greed for spending far exceeds the taxpayers' desire and certainly ability to pay for all the programs that are outlined in this budget resolution before us.

As we go through the course of this debate today I am hopeful that Members on the Democratic side of the aisle will join us on the Republican side of the aisle to defeat this irresponsible budget resolution. If we must, let us go back to the Budget Committee, come out with something that is effective and that will work and that does not stifle our recovery and injure our Nation's defense policy.

Mr. KAZEN. Mr. Speaker, will the gentleman yield?

Mr. LOEFFLER. I will be happy to yield to my colleague from Texas.

Mr. KAZEN. I thank the gentleman.

Mr. Speaker, my distinguished colleague knows how much I think of him and how much I admire him, how much I respect him. Would he not agree with me that what we have here today is also the product of the other body which is controlled by the gentleman's party and that were it not for that we would not have this bill here today?

Mr. LOEFFLER. As far as this gentleman is concerned, the House passed budget resolution which was forced through by the opposite side of the aisle from me in this body was absolutely ridiculous and the Senate-passed budget resolution was no better than ridiculous. So, I will defend neither body's budget resolution because I believe they both failed to meet the need of the American people, both from the standpoint of taxing policy, domestic spending policy; and as the gentleman and I have agreed so often, in the area of defense policy as well.

Mr. KAZEN. That may be so, my colleague, but when it comes to finger-pointing let us make sure that finger is straight and points at the target.

Mr. LOEFFLER. This gentleman will point fingers at all culpable entities including those on the other side of the Capitol.

Mr. LATTA. Mr. Speaker, will the gentleman yield?

Mr. LOEFFLER. I yield to the gentleman.

Mr. LATTA. Let me point out to the House and to the gentleman something that he seems to have overlooked about the passage of the budget in the Senate.

He indicated the Senate was controlled by the Republicans; that is absolutely true. But that budget resolution passed with 29 Democrat votes, 21 Republicans.

So, it was a Democratic budget that passed the Senate.

Mr. LOEFFLER. I thank my distinguished colleague.

Mr. MARTIN of North Carolina. Mr. Speaker, will the gentleman yield?

Mr. LOEFFLER. I yield to the gentleman.

Mr. MARTIN of North Carolina. Further, with regard to the support for this resolution in the other body, where there is indeed a majority of our party, does it not follow from what the gentleman from Ohio (Mr. LATTA) said that the majority of the Republicans in the other body voted against this resolution? It was only a minority of our party in the other body that supported this resolution.

So, it is hardly the work of our party.

Mr. LOEFFLER. I thank the gentleman and I urge my colleagues to defeat this rule and in the event that this passes to defeat the budget resolution which we will soon be debating.

I thank the Speaker.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, I rise in opposition to the rule.

In my judgment the several hours of debate provided by the rule are insufficient for us to debate what is in the budget, and it is insufficient to give us the time to scrutinize the budget so we know what the House is voting on.

I note for the record that we had hours and hours of debate when the House budget came to the floor the first time. We had 4 hours of debate on the Humphrey-Hawkins bill. And that was only preliminary. Now, we have the main event, and this rule will restrict our debate to only 2 hours.

Two hours of debate, it strikes me, is hardly adequate to discuss $860 billion of mandated spending. This is also inadequate to discuss the extraction of $680 billion in taxes from the American people.

A responsible rule would allow more debate. Then it would be far easier to show the disastrous effects of this big spending budget resolution.

The budget resolution was an impossible compromise. The conferees, of whom I was one, worked very hard to produce a responsible budget, and to preserve the budget process.

However, one cannot reconcile a letter to Santa Claus, as the House budget was, with a liberal budget, which the Senate budget was.

And there was no way you could put those two together and make them spell "mother." We put them together and all they spell is "money."

There are many among us who say we must preserve the budget process at any cost. We must pass a budget whether it is any good or not.

I should like to state simply that for my part the process cannot be worth more than the product. And in this case the product is not worth anything.

The process has failed to give us a budget resolution that provides for a responsible fiscal policy. Therefore we have no reason to support the process.

Because we do not have time enough for debate of the failed product of the failed process, we have no reason to support the rule.

Mr. LATTA. Mr. Speaker, I yield 6 minutes to the gentleman from Georgia (Mr. GINGRICH).

Mr. GINGRICH. Thank you, Mr. Speaker.

First of all, let me say that we are today talking about a Democratic budget that as the gentleman said earlier in the Senate a majority of the votes for this budget were Democratic votes and that the Senate committee chairman, in his eagerness to preserve the process, destroyed the substance.

This is a budget which no Conservative and no Republican who seriously cares about the President's program could possibly vote for.

In a different sense I think this is 4-D day, deceitful disaster day for the Democrats.

Unfortunately it is also a disaster for the American people. It is little wonder that the leadership is putting all of their economic insanity into 1 day, it is little wonder they postpone 1 minute, it is little wonder they shorten the time for the debate.

For the longer the American people look at today's two actions I think the more angry they will become.

This liberal Democratic budget is an assault on working Americans, this lib-

eral Democratic budget threatens the recovery; by higher spending, bigger deficits and higher taxes it will push interest rates higher, it will slow down savings, it will kill jobs.

This liberal Democratic higher interest rate budget will cripple the recovery and the recovery is the best jobs program we have had.

In the last few months hundreds of thousands of Americans are being put back to work. Liberal Democrats who claim they care about unemployment are now proposing a budget which will in fact increase unemployment, abort the recovery, and extend misery for millions of Americans.

Despite the higher unemployment promise by the liberal Democratic budget it is a legitimate budget philosophically; despite the higher taxes promised by the liberal Democratic budget it is a legitimate budget, philosophically; despite the higher spending and higher interest rates offered by the liberal Democratic budget it is a legitimate budget, philosophically. I can understand why radical Democrats and liberal Democrats would vote for the budget. They believe in big spending, in higher taxes, they believe in larger Central Government.

However, the tax increase they will vote for later on today surprises me. The liberal Democratic tax increase offered today hits working couples, it hits small business, it hits small farmers, it will cripple savings.

Imagine, at $35,200 in taxable income a couple will have the highest tax, a higher tax increase than any other level except $45,000.

If you are rich, if you pay on above $85,000 in taxable income you are going to be all right; the liberal Democrats have taken care of you.

But at $35,200 taxable income a couple will face a 30-percent increase in the rates they are paying, the second highest jump and a jump exceeded only at $45,000.

Now, frankly, if the Speaker thinks that working couples with $35,000 income are rich, and they ought to vote Republican, I would gladly embrace every couple in America whose taxable income is $35,000.

The truth is, and every Member who has been involved in this debate knows this, the truth is that no one who is genuinely rich is affected by this cap, by this tax increase.

The truth is that Democratic Study Group originally proposed cutting the rich's tax rate from 70 to 50 percent, that the Democratic Ways and Means majority, passed out that tax lowering, that the rich are not affected, that the rich are laughing all the way to their accountant, because in fact, this is a targeted upper middle class tax increase aimed right at working couples and it peculiarly affects working couples. It is an incentive for divorce to avoid the Democratic tax increase.

In fact, this tax increase is I think a denial of most of the rhetoric of liberal Democrats.

However, since liberals and radicals genuinely believe in higher taxes it is understandable today they will vote for higher taxes.

If the key question for 1984 is "Who will spend your money?", liberal and radical Democrats can honestly answer they want to reach into your pocket and spend your money. That is a legitimate, honest, ideological position, ably represented by the Budget Committee in its efforts.

However, I am surprised and saddened to see some Democrats who know better and who do not believe in that, giving in.

The gentleman from Oklahoma, in particular, offered an amendment which was legitimate and I have here a copy of the original amendment, an amendment whose last sentence said,

For purposes of the preceding sentence only action which will reduce outlays below $849 billion in fiscal year 1984 will be considered.

In the Rules Committee, the liberal and radical Democrats changed that to say that in fact it is a phony amendment. They cut out the operative sentence which made any sense.

And I beg my colleagues across the aisle, I expect all the liberals and radicals to vote for their budget, I expect them to vote for the tax increase.

Do not deceive yourselves or the people back home, I candidly do not know what you are doing.

But you know if you look at it in your heart that the Rules Committee version of that amendment is totally phony, it is inoperable, it will never happen, it is false and to go back home and hide behind that as an excuse to vote to raise taxes on working couples is indeed shameful and I think that amendment ought to be called the "Shame on you" amendment.

I thank the Speaker.

Mr. LATTA. Mr. Speaker, I have no further requests for time.

□ 1100

Mr. DERRICK. Mr. Speaker, I yield 2 minutes to the gentleman from Oklahoma (Mr. JONES).

Mr. JONES of Oklahoma. Mr. Speaker, I will not get into the substance of the debate on the budget because we will have time for that in the general debate.

I merely want to clarify and correct some of the misimpressions that have been laid before the body in the debate on the rule.

The reason this rule was necessary, to have a 2-day instead of a 3-day layover, is that Monday of this week, when we asked for unanimous consent to have until midnight Monday night to file the conference report, normally speaking, the courtesy of the House grants that unanimous consent. The other side of the aisle objected to that, therefore, we had to go to the Rules Committee.

As far as the time limit for the debate on this, we are not setting any new precedents in discussing a budget resolution.

Normally a budget conference report in technical disagreement has been given 1 hour of debate, under House rules, not 2.

So I think this is a good rule. I think it ought to be adopted.

Mr. DERRICK. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. MARTIN of North Carolina. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 265, nays 150, not voting 17, as follows:

NOT VOTING—17

Alexander	Heftel	Smith, Robert
Bethune	Leach	Sundquist
Erlenborn	Martinez	Thomas (CA)
Feighan	Rangel	Towns
Garcia	Schumer	Wirth
Hansen (ID)	Simon	

□ 1115

The Clerk announced the following pairs:

On this vote:

Mr. Alexander for, with Mr. Erlenborn against.

Mr. Garcia for, with Mr. Thomas of California against.

Mr. Heftel for, with Mr. Sundquist against.

Mr. Rangel for, with Mr. Robert F. Smith against.

Mr. Towns for, with Mr. Hansen of Idaho against.

Messrs. LEWIS of California, WINN, and BOEHLERT changed their votes from "yea" to "nay."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MAKING IN ORDER CONSIDERATION OF THE BILL MAKING APPROPRIATIONS FOR THE DISTRICT OF COLUMBIA FOR FISCAL YEAR 1984

Mr. DIXON. Mr. Speaker, I ask unanimous consent that it be in order to consider the bill making appropriations for the Government of the District of Columbia for the fiscal year ending September 30, 1984, section 303(a) of Public Law 93-344 to the contrary notwithstanding.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 1183, TAX RATE EQUITY ACT OF 1983

Mr. BONIOR of Michigan. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 242 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 242

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1183) to amend the Internal Revenue Code of 1954 to limit to $700 the maximum reduction in individual income tax resulting from the third year of the rate cuts enacted by the Economic Recovery Tax Act of 1981, the first reading of the bill shall be dispensed with, and all points of order against the consideration of the bill for failure to comply with the provisions of clause 2(l)(6) of rule XI are hereby waived. After general debate, which shall be confined to the bill and amendments made in order by this resolution and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be considered as having been read for amendment under the five-minute rule. No amendment to the bill shall be in order except: (1) the amendments recommended by the Committee on Ways and Means now printed in the bill, which shall not be subject to amendment, and all points of order against the amendment recommended by the Committee on Ways and Means now printed on page 2, lines 6 through 17 for failure to comply with the provisions of clause 7, rule XVI are hereby waived; and (2) the amendment printed in the Congressional Record of June 22, 1983 by, and if offered by, Representative McCurdy of Oklahoma, said amendment shall not be subject to amendment but shall be debatable for not to exceed thrity minutes, to be equally divided and controlled by Representative McCurdy and a member opposed thereto, and all points of order against said amendment for failure to comply with the provisions of clause 7, rule XVI are hereby waived. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER. The gentleman from Michigan (Mr. BONIOR) is recognized for 1 hour.

Mr. BONIOR of Michigan. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Tennessee (Mr. QUILLEN), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 242 provides for the consideration of H.R. 1183, to proceed to the consideration of H.R. 1183 in an orderly and expeditious manner, House Resolution 242 provides for a modified closed rule, allowing for general debate. The rule makes in order committee amendments adopted by the Committee on Ways and Means which are to be considered under the 5-minute rule, and an amendment printed in the CONGRESSIONAL RECORD of June 22, 1983, by, and if offered by, Mr. MCCURDY which is debatable for 30 minutes. Neither the committee amendments nor the amendment to be offered by Representative MCCURDY are themselves amendable under the rule.

House Resolution 242 provides that after 2 hours of general debate, the bill shall be considered for the purposes of amendment under the 5-minute rule and that the bill shall be considered as read. The Committee of the Whole would then consider the amendments to be offered by the Committee on Ways and Means under the 5-minute rule. After consideration of the committee amendments, the rule provides for the consideration of

the McCurdy amendment for a period of time not to exceed 30 minutes. None of the amendments made in order are amendable. Finally, during consideration of H.R. 1183 in the House, the rule provides for one motion to recommit.

In order to allow the House to consider H.R. 1183 in an expenditious manner, it was necessary to waive points of order against its consideration pursuant to clause 2(l)(6) of rule XI, which prohibits the consideration of a measure until the third day on which a report on such measure is available to the House. H.R. 1183 was ordered reported on June 16, but the report was not filed until June 21 to allow Members time to file minority views. Consequently, the bill could not be considered today without the waiver.

The rule also waives points of order against the consideration of the first committee amendment and the amendment to be offered by Representative MCCURDY for failure to comply with clause 7 of rule XVI, which requires that amendments to a measure be germane to the measure. The first amendment to be offered by the committee specifies that any revenues raised by the tax rate changes in the bill should be used to reduce the deficit. In addition, the amendment to be offered by the gentleman from Oklahoma (Mr. MCCURDY) would repeal the tax rate changes in H.R. 1183 on January 1, 1984, unless an equivalent level of outlay reductions is enacted by that date. Both of these amendments contain provisions not germane to the bill as introduced and therefore require a waiver of clause 7, rule XVI.

House Resolution 242 provides for the consideration of H.R. 1183, to amend the tax rate changes contained in the Economic Recovery Tax Act of 1981 (ERTA).

On July 1, 1983, the third year tax cut mandated by ERTA will become effective. H.R. 1183 would limit the maximum resulting tax savings available to individual taxpayers in 1983, 1984, and years following.

The bill would affect only taxpayers filing joint returns reflecting approximately $45,000 of adjusted gross income (or $35,200 of taxable income), and single taxpayers filing returns of $35,000 in adjusted gross income (or $28,000 of taxable income).

Under the provisions of the bill, taxpayers filing joint returns for 1984, could realize no more than $720 in tax reductions. The maximum reduction for single taxpayers would be $637 and heads of households could receive no more than $673. Because the 1983 tax cut does not take effect until July 1, the maximum allowable tax savings applicable to tax year 1983 would be one-half these savings cited for tax year 1984.

H.R. 1183 as reported would also provide that all revenues raised by establishing an upper limit on allowable tax reductions would be applied toward reducing the Federal budget deficit.

The Committee on Ways and Means estimates that by so limiting tax savings, $6.2 billion can be raised in fiscal year 1984 and an additional $39 billion can be raised through fiscal year 1988.

Mr. Speaker, both the Federal budget deficits we are currently experiencing and those that have been projected by the CBO are of a frightening and unprecedented magnitude. Even the administration projects a Federal budget so submerged in red ink that a fiscal catastrophe is imminent if Congress does not generate sufficient political will to take action to reduce these deficits. Adoption of this rule will allow the consideration of the first piece of legislation to be considered by the 98th Congress that will reduce the deficit by beginning to restore this Nation's shattered revenue base.

This rule also addresses the concerns of many Members on both sides of the aisle that today's action not be confined to revenue restoration but instead be directed toward reductions in spending beyond those already called for in House Concurrent Resolution 91, the first concurrent resolution on the budget. Accordingly, the rule makes in order the amendment to be offered by Representative MCCURDY of Oklahoma. The McCurdy amendment repeals the tax rate changes of H.R. 1183 unless legislation to reduce Federal spending by an equivalent amount to the revenue increase in the bill is enacted by the end of this year. Although Representative MCCURDY's amendment is clearly beyond the scope of H.R. 1183, which concerns itself solely with revenues, the Committee on Rules crafted a rule to allow the House to work its will on the spending issue.

I would like to emphasize two points with respect to the McCurdy amendment made in order by the rule. The revenues restored by H.R. 1183 would only partially fulfill the mandate of the conference agreement on the bipartisan budget resolution. The budget resolution, reflecting a consensus between the House and the other body, require a $12 billion increase in fiscal year 1984 revenues, of which H.R. 1183 would account for only half. On the other hand, the McCurdy amendment would mandate spending cuts of $6 billion, a sum far beyond the outlay reductions required in the budget agreement.

The McCurdy amendment made in order is specifically designed to ensure true spending reductions not tied to an arbitrary baseline. This takes into account the sensitivity of the outlay projections in the budget resolution to economic trends. For example, many of my colleagues on the other side of the aisle have been concerned that the economic assumptions used in the budget resolution are too pessimistic to reflect the hoped-for economic recovery. If more optimistic assumptions do prove true, bringing with them outlay reductions, them reductions below a preset baseline would be automatically achieved without legislative savings. Consideration of the amendment without reference to the outlay levels in the first concurrent budget resolution will endure that the House has a chance to vote on real, rather than possible spending cuts.

I would add that the heart of the first concurrent resolution on the budget for fiscal year 1984 is the reconciliation instructions requiring committees to cut spending or increase revenues. Those who doubt the sincerity of the amendment to be offered by the gentleman from Oklahoma will have the opportunity to vote for real deficit reduction when the conference report on the budget resolution is before us later today.

Mr. Speaker, even today, even at this late date, we will hear that the administration's 1981 tax bill was fair because it was across-the-board, as if the measure existed in a vacuum and that single assertion contained all that needed saying. The Members of this House know better.

David Stockman himself laid out the facts as far back as 1981 in his famous interviews that lead to the Atlantic article:

> The so-called across-the-board tax cut was always a trojan horse to bring down the top rate . . . the rest was secondary.

Yet, this was only the beginning of the problems. This Congress has historically recognized the regressive nature of our social security tax and adjusted personal income taxes to restore equity. The 1981 tax cut did not.

Today, we can no longer avoid the costs of the 1981 tax bill. While working families with $25,000 incomes will actually see a slight tax increase, those making more than $200,000 will receive a 15-percent tax cut.

These are not the priorities of the American people and we can abandon their priorities with only the greatest risks.

The equity of our tax system is more than a mere academic issue. It is the foundation of this body's ability to call upon its citizens. It is the most basic expression of the values held dear by our Nation.

H.R. 1183 moves decisively to correct the inequities of the 1981 tax bill. Those who say it comes at the expense of the middle class confuse the facts. A full 89 percent of the new revenues raised by this bill come from those making over $50,000 a year, a full 60

percent from those making more than $75,000.

What is the alternative to H.R. 1183 offered by the administration? It is the contingent tax increase outlined in the administration's budget. That alternative is the final measure of today's debate.

In the face of the present deficit, this body can vote today to control interest rates or it can hide behind a shadow tax and wait until tomorrow, hoping the wait itself will not cause further damage.

In the face of the tax inequities of the 1981 bill, this body can restore fairness to our tax code by a graduated tax, or it can wait until tomorrow and enact an additional, regressive energy tax and compound the inequities of the 1981 bill with an across-the-board surtax.

Each Member knows that it is always hard to raise taxes, but the deficits at hand leave us no choice except as to the means. I, for one, am proud of the means chosen by H.R. 1183, it is the choice of political responsibility.

Mr. Speaker, this is a fair rule, it is a good rule. I urge its adoption.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may use.

Mr. Speaker, this tax increase clearly illustrates the difference in the philosphy of the Democratic Party and the Republican Party. Let us not kid ourselves. This rule makes in order a tax increase for the American people. And this House must not stand idly by and see this happen.

Our economy is on the road to recovery. The 10-percent tax cut effective July 1 is now law. When you put a cap on the tax reduction, then what you are doing is adding a tax over what current law provides. It really is a jobs disruption bill rather than a cap on the income tax reduction of $700. If we choose to let the Government take these tax dollars, instead of letting the taxpayer keep them, we will be soaking up money that could be in circulation in the private sector, creating jobs and helping the economy.

I am proud of the progress we have made over the last 2 years in our economic recovery. I would think we would know that the Democratic Party is a spend, and spend, and spend, and tax, and tax, and tax party. The Republican Party wants to give the American middle-class people a tax break so that they can put more money into the economy, create jobs, and help our recovery go forward at a greater speed. It is time we told the American people the facts in this case. We should not use smoke and mirrors to fool them. The people who will suffer the most are two-earner couples, with both husband and wife having to work just to keep up with the inflation of the seventies. They will not be able to buy the home or the new car they want. They will not be able to make the purchases that will create jobs for their fellow Americans.

□ 1130

That is why this truly is a jobs disruption measure, and a tax increase that the American people will not stand idly by and let it happen. The full 10-percent tax decrease should go into effect July 1, and we should not change that policy.

Over the years we know that our debt limit has increased to a shocking level. Here the Democratic Party wants a tax increase. They do not call for a reduction in spending. To me it would be a greater thing for this House to tighten down and cut expenditures in the wasteful and unnecessary programs, rather than putting a smokescreen out. Actually, what we are doing is taking the money out of the pockets of the people who deserve it more than anyone else.

Take the two-earner family. This measure as proposed by the Democrats cuts the tax reduction of those people, and has the effect of cutting the marital deduction that was put into effect in 1981. We know that the maritial deduction was a very favorable thing when it took effect. This bill seeks to tell such couples with just over $35,000 in joint income that their marginal tax rate will increase 9 percent. That is a tax increase.

I would ask this House, the Members of this House, to think before voting. Vote down the previous question. Vote down this rule. And then if it comes to pass that we must vote on final passage of the measure, let us vote against it. Let us not continue to deceive the American people. I think we have to face up to the fact that this is a tax increase, just a plain and simple tax increase. Let us vote it down.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 2 minutes to the gentleman from Oklahoma (Mr. McCURDY).

Mr. McCURDY. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in support of this rule because I believe it is a fair rule. I believe it is important that we address the question today of the deficit. I believe that my colleagues on the other side of the aisle have defaulted on the issue of deficits. They have not even presented a budget. The budget that President Reagan submitted was not even introduced by the Republicans in the House.

I think it is important for us to realize that the deficits are the biggest danger and threat to economic recovery in this country today and we have to move to address them.

Today I will offer an amendment to tie dollar-for-dollar reductions to the revenues raised on this cap. I urge my colleagues to support this amendment. I urge my colleagues to support the rule. It is a fair rule. It is not a perfect rule, but it is one that I wholeheartedly support.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from Texas (Mr. GRAMM).

Mr. GRAMM. I thank the gentleman for yielding this time to me.

Mr. Speaker, if the gentleman from Oklahoma would stay at the microphone, I would like to ask him a few questions about this dollar-for-dollar cut.

I would like to first ask: What are we using as our benchmark in order to see if, in fact, there has been a cut in spending? What are we measuring from?

Mr. McCURDY. If the gentleman would yield, I would say to my colleague from Texas that if a budget resolution is adopted today, which I assume will be adopted, then it is my belief that the language when we consider it, and by the way, I will be glad to address this in more detail when I offer the amendment, that the figures which will be used are outlay figures in fiscal year 1984, and I am assuming if a budget is adopted today, that the budget outlay figure adopted will be the figure that we will use as a benchmark.

Mr. GRAMM. So the gentleman is saying that the outlay figure contained in the budget will be the figure the cuts are made from?

Mr. McCURDY. That is my interpretation, yes.

Mr. GRAMM. Now, is that in the amendment?

Mr. McCURDY. Outlay figures for fiscal year 1984 is the specific language in the amendment.

Mr. GRAMM. The amendment actually says outlay figures for 1984 as adopted in the 1984 budget. It was my understanding that the portion of the bill that set out a benchmark was struck, and I think this is important because we in this House adopted a budget last year with a commitment that we would get $3 in cuts for every dollar in revenues.

When we asked the Secretary of the Treasury to go back and figure what we actually got, we got 57 cents of spending cuts for every dollar in revenues.

The SPEAKER. The time of the gentleman from Texas (Mr. GRAMM) has expired.

Mr. QUILLEN. Mr. Speaker, I yield 2 additional minutes to the gentleman from Texas (Mr. GRAMM).

Mr. GRAMM. Mr. Speaker, we are talking about a permanent tax increase, but do we have assurance that we will have a permanent spending cut? Is there any assurance that this will tighten eligibility requirements for an entitlement to give us a continuing spending reduction over future

years equivalent to this amount, or are we simply hoping to get $6 billion of cuts—with no baseline to define it this year—in return for a permanent increase in taxes on middle-class Americans?

Mr. McCURDY. If the gentleman would yield further, I would say to the gentleman that I think this is a step in the proper direction, a step in the right direction, and that we are facing today what I have been trying to express on this side of the aisle: that we believe that the money raised, the revenue raised by this tax cap should go to reducing the deficit and should be applied to the deficit. We have gone one step further by indicating that we believe this should be accompanied by a dollar-for-dollar reduction.

Mr. GRAMM. Mr. Speaker, if I may reclaim my time, let me make this point: First of all, before we ever vote on this tax increase, we are going to vote on a budget that raises the deficit $13 billion above the level recommended by President Reagan, raises taxes by $10 billion, cuts defense by $12 billion, and raises domestic spending by $29 billion.

It seems to me that the gentleman started out with a good intention of defining a baseline and setting out an objective for Congress, although it was in no way binding. We have now what is a phony proposal to allow people to vote to raise taxes in exchange for some claim that we will get spending cuts somewhere down the line, although not cuts defined by a baseline and not specific cuts aimed at achieving permanent savings.

It seems to me that we have seen a legitimate effort turned into a sham.

Mr. BONIOR of Michigan. Mr. Speaker, I yield myself such time as I may consume.

Mr. McCURDY. Mr. Speaker, will the gentleman yield?

Mr. BONIOR of Michigan. I yield to my colleague, the gentleman from Oklahoma.

Mr. McCURDY. I thank the gentleman for yielding.

Mr. Speaker, in response to the gentleman from Texas, I would say that there are no absolute assurances. There is never an absolute assurance coming out of this body that what is stated will be achieved, but I can assure the gentleman from Texas that this Member, and I believe a large number of Members on this side of the aisle, are committed to enforcing a reduction dollar for dollar, and furthermore I think our assurances are a heck of a lot better then the one President Reagan gave that he would balance the budget by 1984.

Mr. BONIOR of Michigan. Mr. Speaker, the real sham in this argument is the argument that we need a baseline.

The McCrudy amendment is specifically designed to insure true spending reductions that are not tied to an arbitrary baseline. This takes into account the sensitivity of the outlay projections in the budget resolution and economic trends.

A lot of my colleagues over here on the aisle are saying the economic assumptions in the budget are wrong, they are not optimistic enough, they do not deal with the recovery situation. Well, let us assume that we have these more optimistic assumptions and they do prove true, bringing with them the outlay reductions, reductions in food stamps, reductions in youth unemployment, reductions in unemployment compensation, reductions in welfare costs.

□ 1140

Then these reductions will be below the baseline and we will not have to specifically deal with the $6 billion reduction if we have an arbitrary baseline. I might mention this to my liberal friends on both sides of the aisle: That if in fact the recovery does not take place, if we sputter and get ourselves in a situation where unemployment starts to increase again and where food stamps start to increase again, then that arbitrary baseline or that reduction below the arbitrary baseline will cause a tremendous amount of pain, and those of us on this side of the aisle will have to reduce that $6 billion if we are in fact above—way above it.

So the arbitrary baseline is a sham. It makes no sense, and I would suggest to my colleagues that if we really want to get a true $6 billion reduction in the deficit, we should deal with the McCurdy amendment as put out by the Committee on Rules.

I would like to make a couple of other points. Today, Mr. Speaker, even at this late date, we will hear that the administration's 1981 tax bill was fair because it was, as they say, across the board, as if the measure existed in a vacuum and that a single assertion contained all that need be said on this issue. The Members of this House know better.

David Stockman himself laid out the facts as far back as 1981 in his now famous interview in the Atlantic Monthly when he said, and I quote:

> The so-called cross-the-board tax cut was always a Trojan horse to bring down the top rate. The rest was secondary.

This is the architect of our tax plan who said:

> The so-called across-the-board tax cut was always a Trojan horse to bring down the top rate. The rest was secondary.

Mr. WATKINS. Mr. Speaker, will the gentleman yield?

Mr. BONIOR of Michigan. I yield to my colleague, the gentleman from Oklahoma.

Mr. WATKINS. Mr. Speaker, I think the gentleman will agree with me that there is one bold-faced fact that is unquestioned and undebatable. It is that this administration has increased the benefits for the rich, and they have lowered the benefits for the poor.

With this kind of a tax cut, they increase the benefits going back to the more wealthy, and at the same time they are cutting benefits to the lower income people. They have widened the gap between the rich and the poor, those who have and those who have not. This administration's philosophy is that we can afford anything for our brethren who have, but we cannot afford to help the least of these brethren, those who are less fortunate. I think that is wrong—this is a policy that will divide this country.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the Republican Party believes in less taxes. The President has said he will veto this measure, and he will, so it is not going anywhere. This is an operation in frustration.

I would like to say again that it is a plain and simple tax increase, make whatever statement you want about it, but in the end the American people are going to realize that is exactly what it is.

Mr. Speaker, I yield 6 minutes to the distinguished minority leader, the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, after today, there will be no doubt in anyone's mind that this is truly the Greatest Show on Earth, and that the Speaker of the House is truly a great ringmaster. I have to hand it to him. The manner in which this bill is being brought before us is a stroke of genius.

Just look at how this was put together. The budget was brought up so fast today few, if any, really knows what is in it. None of us in the opposition have had the time to really make the kind of case that probably ought to be made against it.

It was brought to us in a rush so that the revenue numbers would be in place in time to bring up this tax bill, making it easier for Members to vote a tax increase. But just to make doubly sure the tax increase would not cause too much heartburn, the Rules Committee made in order an amendment coupling the tax increase with spending reductions which were talked about previously by the gentleman from Texas (Mr. GRAMM) and the author of that amendment. Of course, the spending reduction is not a reduction, as I would have to reaffirm, because it simply does not have a baseline. It means that you can spend more and say you spent less. That is really what it means.

Then we have the tax bill itself. I ask the Members, "Isn't that a gem?" If you play with the numbers just right, you can make it look like only the wealthiest of Americans are being

gouged, and, oh, how popular that is politically.

I saw some of the numbers pop up in one of the papers in my district recently. No mention was made of the number of middle-class working couples or the $29,000-a-year single people who are going to be hit with this tax increase—just talk about that magic $50,000 income figure.

I can see the press releases on the Democratic side now: "I voted for a budget, a spending reduction, and a tax increase for the rich, all in one day. Doesn't that make me look good? All in one day."

Of course, the tax increase will never see the light of day, as the gentleman from Tennessee, (Mr. QUILLEN) just said. We all know that. So no one will ever feel the pinch this year, or next year, an election year, and no one will be complaining about higher taxes. Well, I guess I should say, "I'm sorry, Mr. Lincoln, maybe it is possible to fool all the people all the time."

As I said, Mr. Speaker, it is a real stroke of genius.

In my tenure in this House, there have not been too many times when we have considered legislation solely for the purpose of giving Members something to write about to the folks back home or drafting a plank in the Democratic platform for next year. But we seem to be doing a lot of that in this Congress. Some people seem to think that this institution's sole purpose is to guarantee the election of its Members.

I know it is highly irregular, but I would like to just say a few words about the merits of this legislation. It is, after all, an abomination.

This is reactionary legislation. It seeks to drag us back to the days of higher and higher taxes. It is punitive legislation. Its obvious desire to punish millions of Americans is cloaked with the latest rhetoric of demagoguery, about "fairness." Oh, that wonderful word, "fairness."

President Reagan and the vast majority of the American people wanted a tax rate reduction 2 years ago, and we campaigned on that pledge. The Democratic leadership did not; they made it quite clear they were opposed to what we had in mind. They fought a desperate battle against it.

First of all, rather than 30 percent, as the President wanted, they wanted less than half of that. We finally settled on 25 percent of it. And then, too, the effective date, instead of January 1, 1981, when we needed the stimulus to combat the recession, was delayed, delayed and delayed until October 1. A 5-percent reduction effective that late in the year turned out to be only 1¼-percent annualized.

But notwithstanding all that, the President and the American people, in my judgment, eventually won. So the Democratic leadership then mounted another attack on the third year of the tax cut and the whole concept of indexing that is scheduled to take effect in 1985.

The President and the American people have repeatedly said no to these Democratic proposals very loudly and clearly.

Now we have this latest attempt. This is not economics. It is pure political spite because the President has so obviously been right while the Democratic leadership has been wrong about tax cuts.

The politics of spite is unworthy of this great body.

Mr. PEPPER. Will the gentleman yield?

Mr. MICHEL. I will yield when I have time.

The politics of spite, as I said, Mr. Speaker, I think, is unworthy of this great body, and the tax increase is a threat, frankly, to economic recovery, now that we are moving in that direction. It will not put a tiny little dent in the deficit, but it will stifle growth, which is really our only salvation from huge deficits.

This tax increase is a slap in the face to millions of middle-income Americans and their families. They are the ones who pay most of the taxes, do most of the work, build the families, and contribute to their neighbors' and their communities' well being.

I suspect that this tax increase will have a negligible effect on the wealthy in our society. Those in higher income tax brackets—shucks, let us face it—they got taken care of in the initial reduction, and that was not proposed on our side of the aisle, it was proposed on the Democratic side of the aisle. The reduction from 70 to 50 percent in unearned income came from over there, as well as reductions in corporate taxes and capital gains taxes.

The SPEAKER. The time of the gentleman from Illinois (Mr. MICHEL) has expired.

Mr. QUILLEN. Mr. Speaker, I yield 1 additional minute to the gentleman from Illinois (Mr. MICHEL).

□ 1150

Mr. MICHEL. I thank the gentleman for the additional minute.

So we can talk this political game just as well as you folks can over there, but I think we ought to get right back on the track and make absolutely sure and reassure the American people that those massive, middle-income, low-income people out there, are going to get their third year of the tax cut.

If we talk about fairness and equity, this is the reduction that really brings them up to getting equity with those who have already gotten theirs before.

This tax increase is a fraud. It will never be enacted. If this House is irresponsible enough to enact it, it is doubtful the Senate will. If the Senate does, the President will veto it, and we in this body will sustain the veto. I assure you of that right here and now.

This tax increase is the product of false advertising. It is not a cap on the third year. It is a permanent change in the tax schedule that will impose higher taxes on anyone with $35,200 in adjusted income from now on.

When are we going to stop. When are we going to pull the needle out of the arm of this Congess and kick the habit? Tax increases are monkeys on the back of the Nation.

This one is the worst, because it has no redeeming economic value.

I am going to vote "no" today. I am not going to play these political games. And when your political salesmen start pumping out the baloney about Republicans favoring the rich, I will just remind people exactly who it is the Democrats think are rich.

To you, its the guy who just got out of school and landed his first engineering job, or the policeman and his wife, the nurse, trying to make ends meet on two salaries, or the guy who just got his long-awaited promotion to office manager who thought he can now do a few nice things for his wife and three children.

I will tell them you think they are rich and living too high on the hog. We will see.

Mr. Speaker, I would urge Members to vote against the previous question and give us the opportunity to offer a proposal for real spending reductions rather than tax increases as a means of narrowing the deficit.

Mr. BONIOR of Michigan. Mr. Speaker, I yield myself such time as I may consume.

I yield to my colleague, the gentleman from Florida (Mr. PEPPER).

Mr. PEPPER. Mr. Speaker, our distinguished brethren on the other side of the aisle who have heretofore been referred to as the defenders and protectors of the rich have now assumed the role of the protectors of the middle class. They are making a great deal to do about this amendment, this proposed change in the tax law, taking away so much money from the middle class.

I think what should not be overlooked is that under the 10-percent tax reduction which the administration forced through this House in 1981, there was a 10-percent across-the-board reduction. Well, that means that if you had an income of $1 million a year, and there are several people in the United States fortunate enough to have that much income, you get $100,000 through the Reagan tax giveaway rescission program.

Mr. ROGERS. Mr. Speaker, will the gentleman yield?

Mr. PEPPER. Just one second. Your majority leader refused to yield to me and I have to exercise the same discre-

tion, to my great regret, to the gentleman.

As I said, this provision, this change in the tax law, which is proposed by this legislation, would mean that that gentleman who was fortunate enough to make $1 million, who would have gotten $100,000 of tax giveaway, kickback, under the Reagan tax rescission program, will only get $720.

I think the American people can understand that very well.

I said the other day that this has added a great deal to the understanding of the subject by the people of this country, because the ordinary working people, and I understand that two-thirds of the people of this country have an annual income of less than $20,000, and they understand how much $720 tax rescission, tax giveaway, or tax benefits is.

All this does is simply limit to $720 the amount of taxes that the Reagan giveaway program can give away. I think that is a salutary modification.

I am very sorry that your leader set the precedent of not yielding to his colleague, who made a respectful request. I shall exercise the same discretion and express my deep regret that the manners exhibited on that side would prohibit me from being courteous on my side.

Mr. ROGERS. Will the gentleman yield to this gentleman, and not to the minority leader?

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to call to the attention of the chairman of the Rules Committee that his facts are perhaps in error.

Really, I think the gentleman from Florida is incorrect and that it is not fair to the American people for such a distinguished gentleman to possibly leave the wrong impression.

This bill provides a tax increase for two-earner couples, a man and wife who must work to eke out a living. It is a tax increase for them.

It is a tax increase for the farmers. It is a tax increase for small businesses. It is a tax increase for moderate-income people.

Mr. Speaker, I yield 3 minutes to the gentleman from Mississippi (Mr. LOTT).

Mr. LOTT. Mr. Speaker, the French like to say that, "the more things change, the more they stay the same;" and we are certainly seeing that with this tax bill today. Back in the early part of this century when King Caucus reigned supreme in this House, it was customary for tax and tariff bills to be drafted by the Democratic leadership, discussed, amended, and ratified by the Democratic Caucus, and then routinely rammed through the Ways and Means Committee without change.

The tax bill before us today has similar origins. In fact it still has the imprint of the Speaker's hip pocket on it. And we are told that it has been blessed by the results of a King Caucus questionnnaire.

Mr. Speaker, I am a firm supporter of a strong two-party system and the right and obligation of those parties to take policy positions on important issues. But, I think we cross a very dangerous boundary when we substitute the deliberations of our party councils for the judgment and work of our congressional committee system. That is what went wrong with King Caucus in an earlier age, and that is what is wrong with this bill today. When we substitute a partisian process for the constitutionally ordained legislative process in this body, we jeopardize the very foundation and survival or our system.

Mr. Speaker, the partisan origin of this tax bill should leave little question as to its purpose. This is obviously the opening round in the 1984 campaigns. And I think George Orwell would be very pleased with this particular vehicle as a prelude to 1984, since this tax bill takes a page out of his famous book by that same title—1984. The "Tax Equity Act" is Orwellian "newspeak" and "doublethink" at its finest. Here is a bill which on its face admits to rolling back the equitable, across-the-board tax cut granted to all Americans, yet daring to call itself the tax equity act. This would even make Big Brother blush.

The Democratic campaign sloganeers at the Bureau of Propaganda would have the American people believe that this bill would sock the rich, when in fact it would soak the middle-income taxpayers—the small businessmen, farmers, and two-wage earner families. Nearly half the tax returns affected by this so-called tax cap would be on incomes under $50,000.

But this tax bill has even larger consequences than the adverse effect it would have on many middle-income wage earners. The Democrats are calling for a tax increase just as the economic recovery is beginning to take hold. I have read economists of various political and ideological stripes warn against a tax increase in the midst of a recovery. The quickest way to abort the recovery is to lay on new taxes for those who could provide the greatest impetus for its continuation.

And why do the Democrats want to increase taxes now? Oh, they talk about reducing deficits, but the fact is they want this money for that so-called recession relief reserve fund of $8.5 billion that is provided in the budget resolution. In short, the tax bill may be a self-fulfilling prophecy: By increasing taxes the Democrats can throw us back into a recession, and then they can use the revenues from the tax increase for their recession relief programs. The only trouble with this scenario is that there will be even fewer revenues if this country is thrown into another recession.

Mr. Speaker, a final word about Orwellian doublethink and equity. Yesterday in the Rules Committee the Democrats pulled out their mirrors and started churning out the blue smoke, and lo and behold a modified McCurdy amendment was made in order under this rule, an amendment that would vaguely tie new tax benefits to spending reductions rather than increases. But, the McCurdy amendment was gutted in the process by eliminating his baseline spending figure—rendering the whole exercise rather meaningless. But, ignoring all considerations of equity, the Democrats on the Rules Committee denied Mr. FRENZEL's request to make in order a substitute bill to simply reduce spending by $12 billion rather than increase taxes. That motion went down on a party-line vote.

Mr. Speaker, I urge defeat of the previous question so that a substitute rule that will make the Frenzel spending cut alternative in order. This is the way to really reduce deficits and at the same time keep the economic recovery strong and growing. Let us not make the mistake of increasing taxes to pay for a recession relief package that will only be necessary because we have increased taxes and aborted the recession. Vote down the previous question and for my substitute rule.

Mr. Speaker, I could not believe my ears when I heard what the distinguished chairman of the Rules Committee just said about what this meant for the American taxpayer. To get some more information into the RECORD, I am going to yield to the gentleman from California (Mr. LUNGREN) to state what actually is involved in this tax increase.

Mr. Speaker, I yield to the gentleman from California (Mr. LUNGREN).

Mr. LUNGREN. Mr. Speaker, the distinguished chairman of the Rules Committee made a major mistake. He has talked about a 10-percent tax cut. It was a reduction in rate, not a reduction in tax income. Someone making $1 million a year does not get $100,000 off his taxes. In fact, the first study done by the Treasury Department shows that those people in the highest tax brackets paid approximately $8 billion more in taxes than they would have if rates had not been cut, or $13 billion more than earlier predicted by the Federal Government because, in fact, they were encouraged to have earned taxable income and not have that tax revenue escape through all those nontaxable loopholes that this cap will preserve. This cap will deny the American people a break in across-the-board tax rate cuts for all.

Mr. PEPPER. Mr. Speaker, I will ask the gentleman if he will yield.

Mr. LOTT. I certainly will yield to the distinguished gentleman from Florida.

Mr. PEPPER. The gentleman is very courteous and my friend.

Let us take the case of the fortunate citizen who has an income of $1 million a year. Would the gentleman tell me how that person would fare under the present law and how he would fare under this amendment to the law, the 1981 tax giveaway?

Mr. LOTT. I yield to the gentleman from Texas.

Mr. GRAMM. Under this amendment, Mr. Speaker, any individual or family earning over $162,400 will be totally unaffected, but a two wage earner family earning $35,201 will see its marginal tax rate jump by 9 percent.

Now, to the gentleman from Florida, a young married couple, both working and earning $35,201, may be rich people, but in my district they are the people working hard to try to send their kids to school. They are the people who are doing the work, paying the taxes, pulling the wagon and saving to try to put Americans back to work. Those are not the people whose taxes I would want to raise. Those are middle Americans.

I thank the gentleman for yielding.

Mr. PEPPER. Mr. Speaker, will the gentleman yield?

Mr. LOTT. Mr. Speaker, before I yield any further, I would like to ask the distinguished gentleman from Michigan, who is controlling the time, whether he would yield me another minute or so, so that I can yield to the chairman of the Rules Committee? My time is being eaten up here.

Mr. BONIOR of Michigan. Surely. Mr. Speaker, I yield for purposes of debate only an extra minute to my colleague, the gentleman from Mississippi.

Mr. LOTT. I thank the gentleman.

I yield to the gentleman from Florida.

Mr. PEPPER. Mr. Speaker, I wanted to get the specific answer. The gentleman who makes $1 million a year, how will he fare under the Reagan program of tax rescission of 1981, as compared to the law if modified according to the proposal of this legislation?

Mr. LOTT. Mr. Speaker, I yield to the gentleman from Texas (Mr. GRAMM).

Mr. GRAMM. Mr. Speaker, let me say that the individual making $1 million a year has in the data we have accumulated since the 1981 tax cut went into effect paid more taxes, not less, because he has moved out of tax shelters into ordinary income.

Under the tax increase that we have here, that individual making $1 million a year will pay no more taxes, but the family making $35,201 will find itself with a 9-percent increase in their marginal tax bracket. So if you want to tax middle income people who are doing the saving, who are pulling the wagon, you should vote for this bill. If you want to tax rich people, maybe the gentleman ought to introduce another bill, because this bill does not do it. This is not a tax on the rich. It is a tax on the middle class.

The SPEAKER. The time of the gentleman from Mississippi has expired.

Mr. LOTT. Mr. Speaker, would the gentleman from Michigan yield me 1 additional minute?

Mr. BONIOR of Michigan. Mr. Speaker, I would be delighted to yield an additional 1 minute for purposes of debate only.

Mr. LOTT. Mr. Speaker, I thank the gentleman very much.

I thought it was a very interesting debate, and the record needed to be corrected.

I would urge the distinguished chairman of the Rules Committee to check with the people that have been giving him these statistics, because obviously the gentleman is being misled about the impact of the tax rate cuts.

I will be very brief, since I have so little time left.

Mr. Speaker, this bill has a totally political and partisan origin. That is all it is, and on top of that, it is Orwellian in the terms that are used to describe it. Instead of being a tax equity act, it really is just newspeak and doublethink.

□ 1200

I do not know who they think they are trying to fool but this is a tax increase bill. That is all it was ever intended to be.

To call it tax equity on the floor of the House of Representatives is totally incredible.

I want to urge my colleagues to vote against the previous question. To talk about equity in the Rules Committee the gentleman from Oklahoma had his amendment made in order but the Rules Committee refused to make in order the amendment by the gentleman from Minnesota, which would have imposed a spending cap, instead of the tax increase we are talking about.

So vote to defeat the previous question so that we can make in order the Frenzel amendment.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 1 minute for purposes of debate only to the gentleman from Massachusetts (Mr. SHANNON).

Mr. SHANNON. I thank the gentleman for yielding.

I seek this time to clarify something that was said earlier. The gentleman from Texas was indicating that two-earner families in the $30,000 to $40,000 range would be experiencing large tax increases under this proposal when, in fact, I would point out to the gentleman that only 2 percent of the taxpayers described, the two-earner family, $30,000 to $40,000, only 2 percent of them would be affected at all by this cap. They would be affected to the tune of $43 a year or an average of 80 cents a week.

We are going to hear a lot of facts later in the day, a lot of misstatements of fact about what this cap does. But let us make a few things clear.

Only 10 percent of the taxpayers in the country are affected by this. Eighty-nine percent of the burden of increased taxes will rest on people who earn over $50,000, and the tax increases, the very small tax increases that fall on people under $50,000 will fall on a very small percentage of people who earn under $50,000.

Mr. GRAMM. Mr. Speaker, will the gentleman yield?

Mr. SHANNON. I am happy to yield.

Mr. GRAMM. Let me just clarify my point.

My point was that a two-earner family earning $35,201 will see its marginal tax rate rise by 9 percent. We did not cut taxes by 25 percent. We cut marginal rates by 25 percent.

Mr. QUILLEN. Mr. Speaker, I yield 1 minute to the gentleman from Utah (Mr. MARRIOTT).

Mr. MARRIOTT. I thank the gentleman.

I would just like to stand up and say I am opposed to the rule today and also to this pending bill.

I would just like to speak for a moment for the small businesses of America. They are the ones who are going to be hit the hardest by this gimmick that we are playing with today.

One-half of all of the jobs in America are provided by small business; 70 percent of the new jobs come from small business. And 70 percent of all new innovations come by way of small business.

Small business has been the group hardest hit by the recession. They are the group that has the most difficult time raising capital.

Eighty-six percent of all small businesses are taxed as individuals and are looking forward to this and will benefit most by the tax cut.

I do not know of any small business group that is in favor of putting a cap on the 10-percent tax cut due in July.

If this Congress is really serious about helping small business and creating jobs, and taking care of that sector of the economy which does the most for the country and that will be hit the hardest, I urge you vote against the rule and against the bill.

Mr. QUILLEN. Mr. Speaker, I yield 3 minutes to the gentleman from Virginia (Mr. PARRIS).

Mr. PARRIS. Mr. Speaker, I appreciate this opportunity to point out several examples of what I think are the

most inequitable situations under this tax bill.

This is not tax equity. This bill should be called the Democrats Huge Tax Increase on Middle Americans Act of 1983, because that is exactly what it is.

The Washington metropolitan public television station carries these House proceedings live and I sincerely hope that there are a very large number of people out there watching because if they understand what is going to happen to them I hope they will call their Representatives before the vote and let them know what their opinions are about this bill and what their objections to it are.

Let me give you just some examples of some of the things I think they should call about.

If you are a middle-income American in the Washington metropolitan area, and if you work for a private employer and have taxable income of $30,000 for this year, you had better turn down the opportunity to take a $5,000 bonus because if you earn $35,000 this year instead of $30,000 your income tax marginal rate will increase by almost 50 percent.

How many people do you think are going to work overtime? How many will make an investment to increase their income under those circumstances?

What are we doing to incentives, to tax savings, and to economic recovery?

If you are a GS-12 Federal employee or higher your income tax rates will increase under this bill. If both you and your wife work for the Federal Government your taxes will go up if either or both of you are above a GS-7.

If you are a secretary at the Department of Agriculture at the GS-4 level who earns about $14,000, married to an analyst at the Department of Commerce at the GS-12 level, who earns about $36,000, they will lose $459 of the scheduled rate reduction in 1984.

Is it not wonderful that you are considered by our Democrat friends as wealthy and therefore you deserve to have your taxes increased?

If you are a small businessman it is estimated that 86 percent of all small businessmen will have their taxes increased.

Mr. Speaker, we will have more time to debate this matter under consideration of the bill and I hope we will reject this bill at the conclusion of that debate.

Mr. QUILLEN. Mr. Speaker, I yield 2 minutes to the gentleman from Kentucky (Mr. ROGERS).

Mr. ROGERS. I thank the gentleman.

Mr. Speaker, let us make it plain that calling this a cap on anyone's tax cut is erroneous. The tax cut is in place now. It is the law. It was passed by a vote of this body over 2 years ago. What we are talking about now is a tax increase—plain and simple.

What this resolution would do would be to actually increase the taxes, and not just those of the ultrarich. We are talking about, as has been indicated here before, the working people of this country, husband and wife working at two different jobs to make ends meet.

Those are the people that are going to be hit by this tax increase proposed by the Democratic leadership of this body. The $700 cap hits particularly hard at those two-earner married couples, both working, trying to get by.

Millions of taxpayers will be affected by the action of this House. If you are above a certain income level, $35,200, and you and your spouse are working, you are considered rich by the leadership of the other party. You and your spouse must work to keep up with the inflation and high interest policies of the other party.

According to U.S. Treasury data 4 million of the 8.1 million tax returns affected by this cap involve two-earner married couples, a man and wife both trying to get by.

In addition, $2.6 billion of the estimated $5.3 billion raised by this supposed cap in the taxes in fiscal year 1984 would come from two-earner married couples. As a result, the $700 cap would offset a portion of the marriage tax relief enacted by this Congress in 1981 to help maintain the incentive for two-earner families and to give equity to the women of this country who are working.

So I say, Mr. Speaker, this tax increase proposed by the Democratic leadership in this body is just that, a tax increase, and particularly so on the two-earner families in this country, both men and women working to support their families.

Mr. QUILLEN. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania (Mr. RITTER).

Mr. RITTER. Currently, with a combined income of $35,200, the marginal tax rate of that joint income is 28 percent. With this tax cap the marginal rate will jump to 37 percent.

The fact is that this two-income earning family will take home far less on each additional dollar earned above their income base.

What the Democrats are telling two-income-earning families in this range today is, "Do not take a raise unless it is big enough to overcome what we are doing to you today. Do not work harder. Do not work overtime. Do not get a bonus because it is going to cost you more."

This flies in the face of any rational view of incentives for Americans to go out and produce.

□ 1210

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is a bad bill. This Democratic proposal is bad philosophy. It is simply a tax increase. It increases the tax of many Americans, especially in the middle-income group, the people who work hard to make a living. It takes away food from their mouths, money from their pockets and the things they would like to have. It may be called a $700 cap, but when you change tax laws to make people pay more, this is a tax increase—a tax increase in disguise.

Mr. Speaker, I urge the defeat of the previous question. I urge the defeat of the rule. I urge the defeat of the measure.

I reserve the balance of my time.

Mr. BONIOR of Michigan. Mr. Speaker, I have one speaker left.

Does the gentleman wish to yield additional time?

Mr. QUILLEN. Mr. Speaker, I have two further requests but they are not here. I reserve the balance of my time. If they get here, I would like the privilege of yielding. Otherwise, I will yield back the balance of my time.

Mr. BONIOR of Michigan. Mr. Speaker, I yield 5 minutes to the distinguished majority leader, the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Speaker, I rise in support of the rule and in support of the bill.

I had not intended to speak on the rule but several glaring mistakes of fact have been made and it seems to me that we have to clarify exactly what the truth is.

Two or three of the gentleman on the Republican side of the aisle have said this is a tax increase.

The gentleman who just spoke said this increases the tax on all Americans. Well, that just simply is not true.

This is not a tax increase; this is a limitation on a tax reduction.

Mr. QUILLEN. Mr. Speaker, would the gentleman yield?

Mr. WRIGHT. I want us to say what it really is. Does the gentleman still insist that it increases the taxes on all Americans? Does the gentleman really believe that this is what we are attempting to do?

I yield to the gentleman.

Mr. QUILLEN. If the tax cap is imposed it increases the taxes, there is no question about it.

Mr. WRIGHT. On all Americans?

Mr. QUILLEN. The distinguished gentleman from Texas, the majority leader, I know does not want to mislead the American people.

Mr. WRIGHT. No. I do not.

Mr. QUILLEN. The bill itself is misleading. And I thank the gentleman for yielding.

Mr. WRIGHT. Well, I was glad to yield to the gentleman, but the truth of it is that this is not an increase in taxes on anybody, it is a limitation on

the reductions that may be allowed in the future.

Mr. GRAMM. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. If the gentleman will be patient.

Mr. GRAMM. I want to be clear as to what I was saying.

Mr. WRIGHT. I would be delighted to yield. Does the gentleman really think this bill increases the taxes on all Americans?

Mr. GRAMM. If this is not a tax increase by changing permanent law to raise taxes because it would go into effect next year, then cutting social security benefits for next year would not be a cut in social security benefits because they had not gotten them yet.

Mr. WRIGHT. The gentleman was perfectly willing to cut social security benefits for the elderly. The gentleman was perfectly willing to put a cap on what military employees of our Government who are fighting to preserve our way of life might receive by way of a COLA, but the gentleman is not willing to put any ceiling on what the wealthiest few of our country might receive in additional tax cuts. That is what it comes down to. It is just that simple.

The gentleman wants everybody to sacrifice, everybody except the wealthy.

Mr. Reagan is not against taxes, Mr. Reagan is for taxes. Mr. Reagan made a national television speech in August of last year appealing to all of the American people to put heat on their Congress to pass what he called some kind of an equitable tax adjustment. It was a tax increase on the average American.

He was willing to put a tax on the gasoline that the worker must buy to go to work; he was willing to put a tax on the telephone bill that the housewife has to use or that the small businessman must use in the conduct of his business. Mr. Reagan was willing to put a tax on airline fares.

Mr. Reagan right now is proposing a new tax. He is proposing to raise revenue by a standby surtax, a tax on the tax we pay. Now that tax would raise 62 percent of all its revenues from those who earn $50,000 and less.

By way of contrast, the cap that we propose would be paid for 89 percent by that 5 percent of the taxpayers who earn $50,000 and more.

It would be paid for by those who are the principal beneficiaries of Mr. Reagan's 1981 tax cut, which has plunged us into this enormous deficit.

Mr. Reagan came to office in 1980 blaming all of our difficulties upon the deficit. Now that he has become the Babe Ruth of deficit financing, he wants to forget about the deficit and threatens to veto a bill that would reduce that deficit by $6 billion this year and by some $8 billion next year. He wants to veto a bill that would reduce the deficit by requiring those who are the most wealthy, the most privileged, the most affluent in our society, to accept only a $700 tax cut this year instead of a $4,000 tax cut that otherwise might inure to a $100,000 taxpayer.

That is the difference.

The gentlemen on my right are not against taxes. They are perfectly willing to place a burden upon the social security recipient.

The SPEAKER. The time of the gentleman has expired.

Mr. WRIGHT. May I have 3 additional minutes?

Mr. BONIOR of Michigan. I yield 3 minutes to the gentleman from Texas.

Mr. WRIGHT. They are willing to place a burden upon the people who work for the Government. They are willing to place a burden upon the young American of modest means who is struggling to go to college. They say, "All these people ought to sacrifice."

Mr. Reagan himself stood here in his state of the Union message and said he knew that the people who serve our military, the soldiers and the sailors and the marines, would be willing to make that sacrifice and have no cost-of-living increase, to have a cap, a ceiling upon their cost-of-living pay adjustment so long as they knew everybody else was sacrificing too.

But he is not willing, no, he and the members of the Republican party are not willing for those who make $50,000, $60,000, $100,000, $200,000 a year, to have to bear any of the burden of sacrifice.

We are not talking about increasing their taxes. We are talking about giving them a $700 tax cut. But the President says that is not enough for them. He insists that they deserve even more of a tax cut paid for in borrowed money, paid for by the losses that have been suffered by those lower-income and middle-income Americans.

The gentlemen on my right have wept crocodile tears during this debate about the poor middle-income taxpayer.

Well, they do not do anything for the middle-income taxpayer when they are given an opportunity.

The Congressional Budget Office studies have shown that for the 4 years, fiscal 1982 through 1985, the tax and budget changes that were enacted under this Reagan administration will take more than $20 billion away from households with incomes below $10,000 a year, but they will increase the after-tax incomes of those making more than $80,000 a year by $64 billion.

Now, that is the result of the Reagan policy. That is what has already been put in motion. What we seek to do today is simply to have a small bit of symmetry in the sacrifice that has been exacted upon the American people.

The people who preach most pieously about the budget deficit are unwilling to do anything to reduce that deficit even by $6 billion if those who are going to have to suffer—suffer? Suffer a $700 tax cut? That is what we are offering them. And you say that it is not enough, that they deserve more of a tax cut, paid for in borrowed money at the expense of those from whom their very sustenance has been taken by the policies of the Reagan administration. This is a modest thing that we are doing today. We simply ask them to bear their fair share of the sacrifice for fiscal solvency.

□ 1220

Mr. QUILLEN. Mr. Speaker, we have witnessed a great performance. The majority leader displays about an interesting interpretation of the details of the legislation on the floor of the House. He has downgraded the President for proposing some taxes in the past, but the gentleman from Texas has voted for those.

Mr. Speaker, I yield the balance of my time to the gentleman from Minnesota (Mr. FRENZEL).

The SPEAKER. The gentleman from Minnesota (Mr. FRENZEL) is recognized for 2½ minutes.

Mr. FRENZEL. Mr. Speaker, I rise in opposition to the closed rule which does not allow the Members of this House a suitable choice on the subject of fiscal responsibility and fairness in conducting that fiscal policy.

I went to the Rules Committee and asked them to make in order an amendment which would substitute for a tax increase a spending decrease. The Rules Committee, on a party line vote, turned my request down and, instead, made in order an amendment by the gentleman from Oklahoma to decrease spending from nothing to nothing.

There is no base on that amendment and there is no way that that amendment can reduce spending by one dime.

However, in refusing my amendment, the Rules Committee has denied this House a chance to make a choice on raising taxes, on raising permanent tax rates, and raising taxes as against reducing some spending.

Mr. Speaker, my constituents—and I think most of our constituents—are concerned about the deficit. They have, however, in my district, not been petitioning me to raise their taxes. On the contrary, they have been saying, "What in heaven's name is the matter with the Congress that it cannot contain its profligate spending tendencies?"

And that alone is what we are talking about in this case. We are being asked to raise taxes in this bill by a

rather small amount. It will have a rather small amount on the deficit. And we are told, that will purify us all.

The only way we are going to be purified is to reduce the enormous double-digit rate of spending increase that we have laid on the taxpayers of this country over the years. We are not undertaxed, we are overspent. Each year the proportion of our GNP, that is consumed by Government expenses, rises. Each year our taxpayers' contributions rise, no matter what we do to change the extra social security, the bracket creep, the extra TEFRA taxes always exceed the tax cuts which we grant from time to time.

Mr. Speaker, I ask for a vote "no" on the previous question. If the previous question is defeated—which seems rather unlikely at this time—we will have a chance to move may amendment which will give the House an honest choice.

Mr. BONIOR of Michigan. Mr. Speaker, I move the previous question on the resolution.

The SPEAKER. The question is on ordering the previous question.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 255, nays 165, not voting 12, as follows:

NOT VOTING—12

Alexander	Heftel	Schumer
English	Martinez	Smith, Robert
Erlenborn	Neal	Thomas (CA)
Garcia	Roukema	Towns

□ 1240

The Clerk announced the following pairs:

On this vote:

Mr. Alexander for, with Mr. Erlenborn against.

Mr. Garcia for, with Mr. Thomas of California against.

Mr. Heftel of Hawaii for, with Mrs. Roukema against.

Mr. Towns for, with Mr. Robert F. Smith against.

Mr. YOUNG of Alaska changed his vote from "yea" to "nay."

So the previous question was ordered.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

RECORDED VOTE

Mr. FRENZEL. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 253, noes 166, not voting 13, as follows:

[Roll No. 213]

AYES—253

NOT VOTING—13

Alexander	Kemp	Thomas (CA)
Dicks	Leach	Towns
Erlenborn	Martinez	Valentine
Garcia	Schumer	
Heftel	Smith, Robert	

□ 1300

The Clerk announced the following pairs:

On this vote:

Mr. Alexander for, with Mr. Erlenborn against.

Mr. Heftel of Hawaii for, with Thomas of California against.

Mr. Garcia for, with Mr. Robert F. Smith against.

Mr. Towns for, with Mr. Kemp against.

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON HOUSE CONCURRENT RESOLUTION 91, FIRST CONCURRENT RESOLUTION ON THE BUDGET—FISCAL YEAR 1984

Mr. JONES of Oklahoma. Mr. Speaker, pursuant to House Resolution 243, I call up the conference report on the concurrent resolution (H. Con. Res. 91) revising the congressional budget for the U.S. Government for the fiscal year 1983 and setting forth the congressional budget for the U.S. Government for the fiscal years 1984, 1985, and 1986.

The Clerk read the conference report.

(For conference report and statement, see proceedings of the House of June 21, 1983.)

The SPEAKER. The Clerk will designate the Senate amendment.

The text of the Senate amendment is as follows:

Strike all after the resolving clause and insert:

That the Congress hereby determines and declares that the concurrent resolution on the budget for fiscal year 1983 is hereby revised and replaced, the first concurrent resolution on the budget for fiscal year 1984 is hereby established, and the appropriate budgetary levels for fiscal years 1985 and 1986 are hereby set forth:

(a) The following budgetary levels are appropriate for the fiscal years beginning on October 1, 1982, October 1, 1983, October 1, 1984, and October 1, 1985:

(1) The recommended levels of Federal revenues are as follows:

Fiscal year 1983: $604,300,000,000.
Fiscal year 1984: $679,600,000,000.
Fiscal year 1985: $750,500,000,000.
Fiscal year 1986: $835,800,000,000.

and the amounts by which the aggregate levels of Federal revenues should be changed are as follows:

Fiscal year 1983: −$100,000,000.
Fiscal year 1984: +$12,000,000,000.
Fiscal year 1985: +$15,000,000,000.
Fiscal year 1986: +$46,000,000,000.

and the amounts for Federal Insurance Contributions Act revenues for hospital insurance within the recommended levels of Federal revenues are as follows:

Fiscal year 1983: $35,900,000,000.
Fiscal year 1984: $40,000,000,000.
Fiscal year 1985: $44,700,000,000.
Fiscal year 1986: $51,400,000,000.

and the amounts for Federal Insurance Contributions Act revenues and other revenues pursuant to Public Law 98-21 for old age, survivors, and disabilty insurance within the recommended levels of Federal revenues are as follows:

Fiscal year 1983: $148,800,000,000.
Fiscal year 1984: $167,900,000,000.
Fiscal year 1985: $187,300,000,000.
Fiscal year 1986: $203,300,000,000.

(2)(A) The appropriate levels of total new budget authority, including amounts reserved pursuant to section 2, are as follows:

Fiscal year 1983: $883,360,000,000.
Fiscal year 1984: $928,725,000,000.
Fiscal year 1985: $996,750,000,000.
Fiscal year 1986: $1,059,300,000,000.

(B) The appropriate levels of total new budget authority, excluding amounts reserved pursuant to section 2, are as follows:

Fiscal year 1983: $877,200,000,000.
Fiscal year 1984: $919,500,000,000.
Fiscal year 1985: $990,500,000,000.
Fiscal year 1986: $1,054,600,000,000.

(3)(A) The appropriate levels of total budget outlays, including amounts reserved pursuant to section 2, are as follows:

Fiscal year 1983: $812,850,000,000.
Fiscal year 1984: $858,925,000,000.
Fiscal year 1985: $911,600,000,000.
Fiscal year 1986: $966,635,000,000.

(B) The appropriate levels of total budget outlays, excluding amounts reserved pursuant to section 2, are as follows:

Fiscal year 1983: $807,400,000,000.
Fiscal year 1984: $849,500,000,000.
Fiscal year 1985: $906,750,000,000.
Fiscal year 1986: $962,950,000,000.

(4)(A) Unless subparagraph (B) applies, the amounts of the deficits in the budget which are appropriate in the light of economic conditions and all other relevant factors are as follows:

Fiscal year 1983: $203,100,000,000.
Fiscal year 1984: $169,900,000,000.
Fiscal year 1985: $156,250,000,000.
Fiscal year 1986: $127,150,000,000.

(B) If all of the adjustments provided for in section 2 of this resolution are made, the amounts of the deficits in the budget which are appropriate in the light of economic conditions and all other relevant factors shall not exceed:

Fiscal year 1983: $208,550,000,000.
Fiscal year 1984: $179,325,000,000.
Fiscal year 1985: $161,100,000,000.
Fiscal year 1986: $130,835,000,000.

(5) The appropriate levels of the public debt are as follows:

Fiscal year 1983: $1,389,000,000,000.
Fiscal year 1984: $1,614,600,000,000.
Fiscal year 1985: $1,830,100,000,000.
Fiscal year 1986: $2,022,800,000,000.

and the amounts by which the statutory limits on such debt should be accordingly increased are as follows:

Fiscal year 1983: $246,100,000,000.

Fiscal year 1984: $225,600,000,000.

Fiscal year 1985: $215,500,000,000.

Fiscal year 1986: $192,700,000,000.

(6)(A) The appropriate levels of total Federal credit activity, including amounts reserved pursuant to section 2, for the fiscal years beginning on October 1, 1982, October 1, 1983, October 1, 1984, and October 1, 1985, are as follows:

Fiscal year 1983:

(i) New direct loan obligations, $54,250,000,000.

(ii) New primary loan guarantee commitments, $99,600,000,000.

(iii) New secondary loan guarantee commitments, $68,250,000,000.

Fiscal year 1984:

(i) New direct loan obligations, $47,900,000,000.

(ii) New primary loan guarantee commitments, $101,700,000,000.

(iii) New secondary loan guarantee commitments, $68,250,000,000.

Fiscal year 1985:

(i) New direct loan obligations, $47,800,000,000.

(ii) New primary loan guarantee commitments, $106,600,000,000.

(iii) New secondary loan guarantee commitments, $68,250,000,000.

Fiscal year 1986:

(i) New direct loan obligations, $47,750,000,000.

(ii) New primary loan guarantee commitments, $106,800,000,000.

(iii) New secondary loan guarantee commitments, $68,250,000,000.

(B) The appropriate levels of total Federal credit activity, excluding amounts reserved pursuant to section 2, for the fiscal years beginning on October 1, 1982, October 1, 1983, October 1, 1984, and October 1, 1985, are as follows:

Fiscal year 1983:

(i) New direct loan obligations, $52,700,000,000.

(ii) New primary loan guarantee commitments, $99,600,000,000.

(iii) New secondary loan guarantee commitments, $68,250,000,000.

Fiscal year 1984:

(i) New direct loan obligations, $46,700,000,000.

(ii) New primary loan guarantee commitments, $100,100,000,000.

(iii) New secondary loan guarantee commitments, $68,250,000,000.

Fiscal year 1985:

(i) New direct loan obligations, $46,700,000,000.

(ii) New primary loan guarantee commitments, $103,050,000,000.

(iii) New secondary loan guarantee commitments, $68,250,000,000.

Fiscal year 1986:

(i) New direct loan obligations, $47,750,000,000.

(ii) New primary loan guarantee commitments, $106,800,000,000.

(iii) New secondary loan guarantee commitments, $68,250,000,000.

(b) The Congress hereby determines and declares the appropriate levels of budget authority and budget outlays, and the appropriate levels of new direct loan obligations and new loan guarantee commitments for fiscal years 1983 through 1986 for each major functional category are:

(1) National Defense (050):

Fiscal year 1983:

(A) New budget authority, $244,600,000,000.

(B) Outlays, $214,300,000,000.

(C) New direct loan obligations, $0.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1984:

(A) New budget authority, $268,600,000,000.

(B) Outlays, $240,000,000,000.

(C) New direct loan obligations, $0.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1985:

(A) New budget authority, $297,300,000,000.

(B) Outlays, $265,300,000,000.

(C) New direct loan obligations, $0.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1986:

(A) New budget authority, $329,000,000,000.

(B) Outlays, $295,000,000,000.

(C) New direct loan obligations, $0.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

(2) International Affairs (150):

Fiscal year 1983:

(A) New budget authority, $24,850,000,000.

(B) Outlays, $11,500,000,000.

(C) New direct loan obligations, $10,650,000,000.

(D) New primary loan guarantee commitments, $9,250,000,000.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1984:

(A) New budget authority, $18,700,000,000.

(B) Outlays, $12,950,000,000.

(C) New direct loan obligations, $12,000,000,000.

(D) New primary loan guarantee commitments, $10,300,000,000.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1985:

(A) New budget authority, $16,800,000,000.

(B) Outlays, $13,000,000,000.

(C) New direct loan obligations, $12,300,000,000.

(D) New primary loan guarantee commitments, $10,300,000,000.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1986:

(A) New budget authority, $16,250,000,000.

(B) Outlays, $12,900,000,000.

(C) New direct loan obligations, $12,850,000,000.

(D) New primary loan guarantee commitments, $10,300,000,000.

(E) New secondary loan guarantee commitments, $0.

(3) General Science, Space, and Technology (250):

Fiscal year 1983:

(A) New budget authority, $7,900,000,000.

(B) Outlays, $7,700,000,000.

(C) New direct loan obligations, $200,000,000.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1984:

(A) New budget authority, $8,700,000,000.

(B) Outlays, $8,300,000,000.

(C) New direct loan obligations, $50,000,000.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1985:

(A) New budget authority, $8,500,000,000.

(B) Outlays, $8,500,000,000.

(C) New direct loan obligations, $0.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1986:

(A) New budget authority, $8,150,000,000.

(B) Outlays, $8,300,000,000.

(C) New direct loan obligations, $0.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

(4) Energy (270):

Fiscal year 1983:

(A) New budget authority, $3,950,000,000.

(B) Outlays, $4,450,000,000.

(C) New direct loan obligations, $11,600,000,000.

(D) New primary loan guarantee commitments, $150,000,000.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1984:

(A) New budget authority, $4,200,000,000.

(B) Outlays, $4,300,000,000.

(C) New direct loan obligations, $12,050,000,000.

(D) New primary loan guarantee commitments, $150,000,000.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1985:

(A) New budget authority, $3,900,000,000.

(B) Outlays, $3,150,000,000.

(C) New direct loan obligations, $12,500,000,000.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1986:

(A) New budget authority, $3,500,000,000.

(B) Outlays, $3,050,000,000

(C) New direct loan obligations, $12,600,000,000.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

(5) Natural Resources and Environment (300):

Fiscal year 1983:

(A) New budget authority, $12,400,000,000.

(B) Outlays, $12,450,000,000.

(C) New direct loan obligations, $50,000,000.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1984:

(A) New budget authority, $12,050,000,000.

(B) Outlays, $12,500,000,000.

(C) New direct loan obligations, $50,000,000.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1985:

(A) New budget authority, $11,850,000,000.

(B) Outlays, $12,550,000,000.

(C) New direct loan obligations, $50,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $11,700,000,000.
(B) Outlays, $12,150,000,000.
(C) New direct loan obligations, $50,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(6)(i) Agriculture (350), including amounts reserved pursuant to section 2:
Fiscal year 1983:
(A) New budget authority, $24,650,000,000.
(B) Outlays, $24,450,000,000.
(C) New direct loan obligations, $19,400,000,000.
(D) New primary loan guarantee commitments, $5,550,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, $13,600,000,000.
(B) Outlays, $12,100,000,000.
(C) New direct loan obligations, $13,300,000,000.
(D) New primary loan guarantee commitments, $4,350,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, $14,500,000,000.
(B) Outlays, $12,400,000,000.
(C) New direct loan obligations, $12,750,000,000.
(D) New primary loan guarantee commitments, $4,350,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $13,200,000,000.
(B) Outlays, $13,100,000,000.
(C) New direct loan obligations, $13,200,000,000.
(D) New primary loan guarantee commitments, $4,350,000,000.
(E) New secondary loan guarantee commitments, $0.
(ii) Agriculture (350), excluding amounts reserved pursuant to section 2:
Fiscal year 1983:
(A) New budget authority, $24,200,000,000.
(B) Outlays, $24,000,000,000.
(C) New direct loan obligations, $18,600,000,000.
(D) New primary loan guarantee commitments, $5,550,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, $13,000,000,000.
(B) Outlays, $11,500,000,000.
(C) New direct loan obligations, $12,100,000,000.
(D) New primary loan guarantee commitments, $3,750,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, $14,500,000,000.
(B) Outlays, $12,400,000,000.
(C) New direct loan obligations, $11,650,000,000.
(D) New primary loan guarantee commitments, $3,800,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $13,200,000,000.
(B) Outlays, $13,100,000,000.
(C) New direct loan obligations, $12,200,000,000.
(D) New primary loan guarantee commitments, $3,850,000,000.
(E) New secondary loan guarantee commitments, $0.
(7)(i) Commerce and Housing Credit (370), including amounts reserved pursuant to section 2:
Fiscal year 1983:
(A) New budget authority, $6,060,000,000.
(B) Outlays, $3,550,000,000.
(C) New direct loan obligations, $7,200,000,000.
(D) New primary loan guarantee commitments, $53,700,000,000.
(E) New secondary loan guarantee commitments, $68,250,000,000.
Fiscal year 1984:
(A) New budget authority, $6,000,000,000.
(B) Outlays, $2,450,000,000.
(C) New direct loan obligations, $5,900,000,000.
(D) New primary loan guarantee commitments, $54,200,000,000.
(E) New secondary loan guarantee commitments, $68,250,000,000.
Fiscal year 1985:
(A) New budget authority, $6,250,000,000.

(B) Outlays, $6,400,000,000.
(C) New direct loan obligations, $250,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, $7,250,000,000.
(B) Outlays, $7,150,000,000.
(C) New direct loan obligations, $250,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.

Fiscal year 1985:
(A) New budget authority, $7,100,000,000.
(B) Outlays, $7,100,000,000.
(C) New direct loan obligations, $300,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $7,200,000,000.
(B) Outlays, $7,200,000,000.
(C) New direct loan obligations, $300,000,000.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(19)(i) Net Interest (900), including amounts reserved pursuant to section 2:
Fiscal year 1983:
(A) New budget authority, $88,400,000,000.
(B) Outlays, $88,400,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, $98,000,000,000.
(B) Outlays, $98,000,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, $104,500,000,000.
(B) Outlays, $104,500,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $107,200,000,000.
(B) Outlays, $107,200,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(ii) Net Interest (900), excluding amounts reserved pursuant to section 2:
Fiscal year 1983:
(A) New budget authority, $88,300,000,000.
(B) Outlays, $88,300,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, $97,100,000,000.
(B) Outlays, $97,100,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, $103,100,000,000.
(B) Outlays, $103,100,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $105,500,000,000.
(B) Outlays, $105,500,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(20) Allowances (920):
Fiscal year 1983:
(A) New budget authority, $800,000,000.
(B) Outlays, $900,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0
Fiscal year 1984:
(A) New budget authority, $750,000,000.
(B) Outlays, $800,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0
Fiscal year 1985:
(A) New budget authority, $2,050,000,000.
(B) Outlays, $2,200,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $3,400,000,000.
(B) Outlays, $3,600,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
(21) Undistributed Offsetting Receipts (950):
Fiscal year 1983:
(A) New budget authority, −$19,100,000,000.
(B) Outlays −$19,100,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, −$18,050,000,000.
(B) Outlays, −$18,050,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, −$18,900,000,000.
(B) Outlays, −$18,900,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, −$23,750,000,000.
(B) Outlays, −$23,750,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.

RESERVE PROGRAMS

SEC. 2. (a) The following amounts of new budget authority and budget outlays for fiscal year 1983 and fiscal year 1984 are hereby reserved by the Congress for subsequent allocation to committees under section 302(a) of the Congressional Budget Act of 1974 for the functions and programs listed in the Statement of Managers, accompanying this resolution:
Fiscal year 1983:
(1) New budget authority, $6,060,000,000.
(2) Outlays, $5,350,000,000.
Fiscal year 1984:
(1) New budget authority, $8,325,000,000.
(2) Outlays, $8,525,000,000.
(b) In the House of Representatives:
(1) Upon the enactment of any legislation referred to in subsection (a) which requires an appropriation, or upon enactment of an appropriation for such purpose before the authorizing legislation is enacted, the Committee on the Budget is authorized and directed to report to the House a revised allocation of new budget authority and budget outlays for fiscal years 1983 and 1984 to the Committee on Appropriations reflecting the content of such legislation; and
(2) When one or more committees, other than the Committee on Appropriations, report legislation only referred to in subsection (a) providing new spending authority defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, or providing new budget authority, or when the Committee on Rules reports a resolution providing for consideration of such legislation which has not been reported by a committee, the Committee on the Budget is authorized and directed to report to the House a revised allocation of such new spending authority for fiscal years 1983 and 1984 to the appropriate committee reflecting the content of such legislation: *Provided, however,* That if such legislation is rejected by either House, the Committee on the Budget is authorized and directed to report to the House a similar reduction in the appropriate allocation.
(c) In the Senate:
(1) Upon the enactment of any legislation referred to in subsection (a) which requires an appropriation, the Committee on the Budget is directed to report to the Senate a revised allocation of new budget authority and budget outlays for fiscal years 1983 and 1984 to the Committee on Appropriations or any other appropriate committee reflecting the content of such legislation insofar as it relates to the programs referred to in subsection (a); and
(2) When the Senate moves to proceed or proceeds to consider legislation referred to in subsection (a) providing new spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, or providing new budget authority, the Committee on the Budget is directed to report to the Senate a revised allocation of such new spending authority for fiscal years 1983 and 1984 to the appropriate committee reflecting the content of such legislation insofar as it relates to the programs referred to in subsection (a) above: *Provided, however,* That if such legislation is rejected by either House, the Committee on the Budget is directed to report to the Senate a similar reduction in the appropriate allocation.
(d) Any revised allocation reported to the House or Senate pursuant to subsection (b) or (c) of this section shall be considered to be the allocation made pursuant to section 302(a) of the Congressional Budget Act of 1974 for purposes of sections 4 and 5 of this resolution and section 401(b)(2) of such Act. The adjustments made pursuant to those sections for each program shall not exceed the amounts provided for such program as set forth in the statement of managers.
(e) For purposes of section 311(a) of the Congressional Budget Act of 1974, the appropriate levels of new budget authority

and budget outlays for fiscal years 1983 and 1984 shall be considered to be the following:

Fiscal Year 1983 Budget Authority $877,200,000,000.

Fiscal Year 1983 Budget Outlays $807,400,000,000.

Fiscal Year 1984 Budget Authority $919,500,000,000.

Fiscal Year 1984 Budget Outlays $849,500,000,000:

Provided, however, That if a revised allocation is made pursuant to subsection (b) or (c) then such levels shall be similarly adjusted in any report pursuant to such subsections to reflect the revised allocation.

RECONCILIATION

SEC. 3. (a) Not later than July 22, 1983, Senate committees named in subsections (b) through (e) of this section shall submit their recommendations to the Senate Committee on the Budget and not later than July 22, 1983, the House committees named in subsections (f) through (l) of this section shall submit their recommendations to the House Budget Committee. After receiving those recommendations, the Committees on the Budget shall report to the House and Senate a reconciliation bill or resolution or both carrying out all such recommendations without any substantive revision.

(b)(1) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce outlays by $400,000,000 in fiscal year 1984; to reduce outlays by $500,000,000 in fiscal year 1985; and to reduce outlays by $800,000,000 in fiscal year 1986.

(2) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee sufficient to increase revenues as follows: $12,000,000,000 in fiscal year 1984; $15,000,000,000 in fiscal year 1985; and $46,000,000,000 in fiscal year 1986.

(c) The Senate Committee on Governmental Affairs shall report changes within the jurisdiction of that committee, (1) sufficient to achieve savings in budget authority and outlays, or (2) which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, or (3) any combination thereof, as follows: $1,619,000,000 in budget authority and $1,900,000,000 in outlays in fiscal year 1984; $2,332,000,000 in budget authority and $2,841,000,000 in outlays in fiscal year 1985; and $3,235,000,000 in budget authority and $4,144,000,000 in outlays in fiscal year 1986.

(d) The Senate Committee on Small Business shall report changes in laws within the jurisdiction of that committee which will result in savings in budget authority and outlays, as follows: $139,000,000 in budget authority and $287,000,000 in outlays in fiscal year 1984; $555,000,000 in budget authority and $466,000,000 in outlays in fiscal year 1985; and $544,000,000 in budget authority and $443,000,000 in outlays in fiscal year 1986.

(e) The Senate Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority by $228,000,000 and outlays by $226,000,000 in fiscal year 1984; to reduce budget authority by $139,000,000 and outlays by $138,000,000 in fiscal year 1985; and to reduce budget authority by $141,000,000 and outlays by $140,000,000 in fiscal year 1986.

(f) The House Committee on Armed Services shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority by $253,000,000 and outlays by $253,000,000 in fiscal year 1984; to reduce budget authority by $360,000,000 and outlays by $360,000,000 in fiscal year 1985; and to reduce budget authority by $621,000,000 and outlays by $621,000,000 in fiscal year 1986.

(g) The House Committee on Energy and Commerce shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce outlays by $400,000,000 in fiscal year 1984; to reduce outlays by $500,000,000 in fiscal year 1985; and to reduce outlays by $800,000,000 in fiscal year 1986.

(h) The House Committee on Foreign Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce outlays by $3,000,000 in fiscal year 1984; to reduce outlays by $4,000,000 in fiscal year 1985; and to reduce outlays by $4,000,000 in fiscal year 1986.

(i) The House Committee on Post Office and Civil Service shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority by $1,619,000,000 and outlays by $1,900,000,000 in fiscal year 1984; to reduce budget authority by $2,332,000,000 and outlays by $2,841,000,000 in fiscal year 1985; and to reduce budget authority by $3,235,000,000 and outlays by $4,144,000,000 in fiscal year 1986.

(j) The House Committee on Small Business shall report changes in laws within the jurisdiction of that committee which will result in savings in budget authority and outlays, as follows: $139,000,000 in budget authority and $287,000,000 in outlays in fiscal year 1984; $555,000,000 in budget authority and $466,000,000 in outlays in fiscal year 1985; and $544,000,000 in budget authority and $443,000,000 in outlays in fiscal year 1986.

(k) The House Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority by $228,000,000 and outlays by $226,000,000 in fiscal year 1984; to reduce budget authority by $139,000,000 and outlays by $138,000,000 in fiscal year 1985; and to reduce budget authority by $141,000,000 and outlays by $140,000,000 in fiscal year 1986.

(l)(1) The House Committee on Ways and Means shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce outlays by $400,000,000 in fiscal year 1984; to reduce outlays by $500,000,000 in fiscal year 1985; and to reduce outlays by $800,000,000 in fiscal year 1986.

(2) The House Committee on Ways and Means shall report changes in laws within the jurisdiction of that committee sufficient to increase revenues as follows: $12,000,000,000 in fiscal year 1984; $15,000,000,000 in fiscal year 1985; and $46,000,000,000 in fiscal year 1986.

(3) If the changes in laws reported to the House by the Committee on Ways and Means pursuant to paragraph (2) of this subsection contain changes involving the imposition of new or expanded taxes to directly finance programs within the jurisdiction of any other committee of the House (including, but not limited to, inland waterways or deep draft ports) or the imposition of any new or expanded user fees within the jurisdiction of any other committee of the House, an appropriate referral pursuant to Rule X of the Rules of the House should be considered.

(m) Should provisions in Subtitle A of Title I of Public Law 97-253, relating to 50 cent per hundredweight assessments against milk producers, be finally adjudicated by the courts to be unconstitutional or unenforceable, the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition, and Forestry shall report changes in laws within their jurisdiction within 30 days of that disposition which provide spending authority only as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce outlays by $1,243,000,000 in fiscal year 1984; to reduce outlays by $1,332,000,000 in fiscal year 1985; and to reduce outlays by $1,327,000,000 in fiscal year 1986.

MISCELLANEOUS PROVISIONS

SEC. 4. No bill or resolution providing new discretionary budget authority or new spending authority described in section 401(c)(2)(C) of the Congressional Budget Act of 1974, for fiscal year 1984, which exceeds the appropriate allocation of new discretionary budget authority or new spending authority described in section 401(c)(2)(C) of the Congressional Budget Act, made pursuant to section 302(a) of such Act, shall be enrolled in the House of Representatives, and no bill or resolution providing new budget authority or new spending authority described in section 401(c)(2)(C) of the Congressional Budget Act of 1974, for fiscal year 1984, which exceeds the appropriate allocation of new budget authority or new spending authority described in section 401(c)(2)(C) of the Congressional Budget Act, made pursuant to section 302(a) of such Act, shall be enrolled in the Senate, until after the Congress has completed action on the second concurrent resolution on the budget required to be reported under section 310 of such Act or until October 1, 1983, whichever occurs first.

SEC. 5. (a) If Congress has not completed action by October 1, 1983, on the concurrent resolution on the budget required to be reported under section 310(a) of the Congressional Budget Act of 1974 for the 1984 fiscal year, then this concurrent resolution shall be deemed to be the concurrent resolution required to be reported under section 310(a) of such Act, for the purposes of section 311 of such Act.

(b) Section 311(a) of the Congressional Budget Act of 1974, as made applicable by subsection (a) of this section, shall not apply to bills, resolutions, or amendments within the jurisdiction of a committee, or any conference report on any such bill or resolution, if—

(1) the enactment of such bill or resolution as reported;

(2) the adoption and enactment of such amendment; or

(3) the enactment of such bill or resolution in the form recommended in such conference report;

would not cause the appropriate allocation for such committee of new discretionary budget authority, new budget authority, or new spending authority as described in section 401(c)(2)(C) of the Congressional Budget Act of 1974 made pursuant to section 302(a) of such Act for fiscal year 1984 to be exceeded.

(c) The provisions of this section shall cease to apply when Congress completes action on a subsequent concurrent resolution on the budget for fiscal year 1984 pursuant to section 304 or 310 of the Congressional Budget Act of 1974.

SEC. 6. MONETARY POLICY.—Inasmuch as—

(1) there is a need for coordination between fiscal and monetary policy,

(2) actual and projected budget deficits have placed a heavy burden on monetary policy,

(3) any reduction in the budget deficit brought about by this budget resolution will reduce pressures on monetary policy,

(4) there is a need for vigorous economic growth consistent with reasonable price stability,

(5) the Banking and Budget Committees of the respective Houses require information regarding the Federal Reserve's monetary policy and the economic assumptions consistent with that policy, and

(6) the Budget Committees are, therefore, interested in the recommendations of the Banking Committees of the respective Houses with respect to such information,

the House Committee on Banking, Finance and Urban Affairs, and the Senate Committee on Banking, Housing, and Urban Affairs are requested to report to their respective bodies, no later than September 30, 1983, a resolution expressing the sense of the Congress as to (A) the coordination of the Federal Reserve's monetary policy with the fiscal policy reflected in this budget resolution and the appropriate information regarding the economic assumptions and goals of the Federal Reserve System, (B) the appropriate information to implement this policy coordination including, but not limited to, the effects of the Federal Reserve's monetary policy on the economy, and (C) any other matters pertaining to the Federal Reserve's execution or congressional oversight of monetary policy, as the above Committees deem appropriate.

SEC. 7. It is the sense of the Congress that, in light of budget restraint, limited resources, and the need to foster economic growth, the House Committee on Armed Services should initiate a thorough review of military retirement programs which constitute a major sector of the defense budget and should recommend changes which would result in reduced spending under these programs.

SEC. 8 It is the sense of the Congress that the President and the Congress, through the appropriations process, should limit the on-budget new direct loan obligations of the Federal Government to an amount not to exceed $38,150,000,000 in fiscal year 1983 and $31,000,000,000 in fiscal year 1984; off-budget new direct loan obligations to an amount not to exceed $16,100,000,000 in fiscal year 1983 and $16,900,000,000 in fiscal year 1984; new primary loan guarantee commitments to an amount not to exceed $99,600,000,000 in fiscal year 1983 and $101,700,000,000 in fiscal year 1984; and new secondary loan guarantee commitments to an amount not to exceed $68,250,000,000 in fiscal year 1983 and $68,250,000,000 in fiscal year 1984. It is further the sense of the Congress that the President and the Congress should limit total Federal Financing Bank origination of direct loans guaranteed by other Federal agencies to $15,000,000,000, in fiscal year 1983 and $15,500,000,000 in fiscal year 1984, and Federal Financing Bank purchases of certificates of beneficial ownership from Federal agencies to $12,050,000,000 in fiscal year 1983 and $13,950,000,000 in fiscal year 1984. It is further the sense of the Congress that direct borrowing transactions of Federal agencies should be, to the maximum extent possible, restricted to the Federal Financing Bank.

SEC. 9. It is the sense of the Congress and the budgets of Federal agencies initiating Federal Financing Bank purchases of certificates of beneficial ownership and originations of guaranteed loans should include the budget authority and outlays resulting from the transactions. The Congress recommends that the committees with jurisdiction over the Federal Financing Bank Act of 1973 consider expeditiously legislation to require that the budgetary impact of such Federal Financing Bank transactions be included in the budgets of the initiating agencies beginning with the fiscal year 1985 budget.

The SPEAKER. Pursuant to House Resolution 243, the Senate amendment and the motion offered by the gentleman from Oklahoma (Mr. JONES) to recede and concur with an amendment printed in the joint statement of managers, as modified by the correction printed in the CONGRESSIONAL RECORD of June 22 by Representative JONES of Oklahoma, is considered as having been read.

The gentleman from Oklahoma (Mr. JONES) will be recognized for 1 hour, and the gentleman from Ohio (Mr. LATTA) will be recognized for 1 hour.

The Chair recognizes the gentleman from Oklahoma (Mr. JONES).

Mr. JONES of Oklahoma. Mr. Speaker, I yield myself such time as I may consume.

GENERAL LEAVE

Mr. JONES of Oklahoma. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on House Concurrent Resolution 91 and the substitute amendment.

The SPEAKER. is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. JONES of Oklahoma. Mr. Speaker, the House conferees on the budget bring to the House a budget resolution for fiscal year 1984 designed to maintain economic recovery, provide a powerful national defense, and mend and preserve the social safety net.

This agreement was hammered out over 2 weeks of negotiations between representatives of a Republican-controlled Senate and a Democratic-controlled House.

The result was a total victory for neither, but a major success for both.

The report was signed by every Democratic conferee from the House and the Senate and by two-thirds of the Republican Senate conferees.

Quite frankly, I am amazed that we were able to reach an agreement and I believe that the 10 Democratic conferees who represented the House are convinced that this is both the best agreement we could have achieved, as well as a sound, fair and effective budget for addressing the needs of our Nation.

Let me describe the conference agreement. It contains a special reserve fund for new recovery and growth initiatives, some of which are highly controversial. The House would not agree to eliminate these proposals from the budget and the other body would not agree to include them all. The solution was to set aside allocations of budget authority and outlays which would become available only if the programs were authorized into law.

If these proposals are not authorized, the funding is not available for other purposes.

This procedure both protects the advocates of these programs and those who fear that the end result would be higher spending in other areas.

This conference report reduces the deficits proposed by President Reagan by $66 billion over 3 years if the reserve fund is not used, and by $48 billion if the reserve fund is fully used.

This resolution passed and implemented will reduce deficits by $124 billion over current policy, which is if we put the Government on automatic pilot.

This conference report adds $24 billion to defense budget authority. That is a 5-percent real increase in military budget authority in fiscal year 1984, for a total of nearly $269 billion.

This conference report also directs the committees of the Congress to pass deficit reduction legislation which will total $85 billion over the next 3 fiscal years.

Passage of this budget conference report is absolutely essential to achieve these reconciliation savings.

Now, what do the opponents of this budget argue in being against it?

Well, first of all, they complain about taxes; but the President's own budget has asked for more taxes to be raised in fiscal year 1986 than is called for in the budget conference report. President Reagan's budget calls for nearly $49 billion in new taxes in fiscal year 1986 and the revenue increase called for in this conference report is $46 billion; so over the 3-year period, the revenue enhancements in this conference report are $73 billion and that compares to what the President had

recommended over the same 3-year period of $57 billion.

Now, some opponents complain that there is simply not enough money for defense. The administration has asked not for a 5-percent real growth in the military, but a 10-percent real growth after adjusting for inflation. Most of us here are convinced that our economy cannot sustain a 10-percent real growth and our military cannot absorb a 10-percent real growth without wasting billions of dollars. Almost every witness before the Budget Committee from a military standpoint testified that it is far better for our national defense to provide steady, certain growth, over many years, rather than an unsustainable growth rate which produces waste and a public backlash against defense spending.

Now, some opponents complain about higher spending; yet the administration has proposed spending $30 billion more than the congressional budget, without the reserve fund, and $12 billion if the reserve fund were to be fully spent.

The complaint actually is not about spending, but the complaint is about the priorities decided upon by Congress and by Members of both political parties in the Congress.

The congressional budget does repair the social safety net, as a matter of fact that net should be repaired.

The congressional budget increases on a selective basis funding for domestic programs such as education, and job training, and research and development. In my judgment, these programs should be strengthened.

I hope particularly those who have come lately to the recognition that our educational system needs to be improved, I hope those who rise to complain about some of the domestic spending programs are not the same people who are simultaneously telling the American public that we need better education in America.

The domestic spending increases proposed are judicious investments in the future of the United States.

Defense revenues, domestic spending, and deficits, these are the great issues in this conference report on the budget. On each of these counts, this budget meets the test better than any other plan which has been proposed.

We must pass this budget to fulfill our responsibility to our own rules and to the American people. If it is not passed, the only budget will be the President's budget, a budget so popular that not a single Member of Congress was willing to introduce it since it has been submitted to the Congress in January. If this budget is not passed, we will lose the deficit reductions called for in reconciliation. If this budget is not passed, we are telling the American people that we prefer fiscal anarchy to the discipline of the budget process.

□ 1310

We will lose our best chance to reduce interest rates and to maintain a sustained economic recovery.

This is a budget resolution fully supported by JIM JONES and JIM WRIGHT from the Southwest, by STEVE SOLARZ from New York, by TIM WIRTH from Colorado, by LEON PANETTA from California, by DICK GEPHARDT from Missouri, by BILL NELSON from Florida, by LES ASPIN from Wisconsin, by MIKE LOWRY from Washington, and by BILL GRAY from Pennsylvania. It is a budget supported by two-thirds of the Senate conferees on the Republican side.

I am saddened that it is not supported by the Republican conferees in the House. But their decision does not detract from the reality of this resolution. It has the support from all regions and from almost all of the political spectrum.

This is a congressional budget which preserves the interest of conservatives, moderates, and liberals. It is a budget which protects the interests of the American people, and it is a budget which should be adopted by an overwhelming margin here today.

I would also like to comment on the enforcement and miscellaneous provisions included in the conference agreement.

The House resolution provided budget authority and outlays for several new initiatives in domestic programs, primarily as a means of providing recession relief. The Senate amendment provided for some, but not all, of these new initiatives. To address these differences, the conferees set out to fashion a mechanism by which, although funding allocations for the initiatives would not initially be made to committees of jurisdiction, the programs would be reflected in the budget resolution and not prejudiced against consideration by the Congress.

In this regard, the conference substitute establishes a procedure whereby a reserve is set aside for identified programs to be effective only upon the enactment of the authorizing legislation for those programs. Under this procedure, $6.06 billion in budget authority and $5.35 billion in outlays for fiscal year 1983 and $8.325 billion in budget authority and $8.525 billion in outlays for fiscal year 1984 would be reserved from allocation to committees. A description of the programs assumed within the reserve amount and the funding levels assumed for those programs, within the appropriate functions is included in the statement of managers accompanying the conference report.

These new initiatives or programs are described in general terms in order not to preclude Congress from considering these initiatives in different legislative forms than they may now appear or may be anticipated to appear. However, the amount of budget authority and outlays reserved for each initiative is also identified by function. The managers believe that this distinction is necessary to assist in indicating what legislation will trigger an allocation from the reserve fund.

As committees develop and move legislation providing for programs or initiatives assumed within this reserve fund, they should develop clear legislative history as to the nature of the legislation and its inclusion within the reserve fund.

Under this procedure, allocations made to the Committees on Appropriations of each House pursuant to section 302(a) of the Budget Act would be increased when the authorization for a program assumed in the reserve fund is enacted. The Committee on the Budget will report to the House the revised 302(a) allocation of the Committee on Appropriations on the first legislative day following enactment of such authorizing legislation.

In addition, the section 302(a) allocation of a committee reporting new entitlement legislation or new direct spending legislation assumed in the reserve fund would be increased when the legislation is reported. In the Senate, this allocation would occur when the Senate proceeds to consideration or moves to consider the specific legislation. Since procedural sanctions in the Congressional Budget Act of 1974 affect legislation providing new entitlement authority or new direct spending authority at an earlier stage than simple authorization, the revised allocation to the reporting committee must occur at an earlier legislative status than enactment. The Committee on the Budget will report to the House the revised 302(a) allocation of the appropriate reporting committee within one legislative day of when the bill is ordered reported.

The spending ceiling for purposes of the point of order under section 311(a) of the Congressional Budget Act would not reflect the amounts reserved from allocation until an allocation has actually been made to a committee. When an allocation from the reserve fund to a committee is triggered, the spending ceiling would be adjusted accordingly.

Any adjustment to a committee's 302(a) allocation for a particular program included in the reserve fund shall not exceed the level set forth for that type of program in the statement of managers. If the authorization for one of the programs, assumed within the reserve fund, is enacted at a lower authorization level than that contained in the joint statement of managers the allocation to the committee would reflect the lower authorization

level. In the event that subsequent authorizing legislation is enacted, any reserve allocation for such programs remaining would be allocated at that time.

The effect of the reserve fund on other procedures under the Budget Act such as referral to the Appropriations Committee, deferred enrollment, and exceeding the spending ceiling are described below.

New entitlement bills for fiscal years 1983 or 1984 which provide for programs assumed in the reserve fund would not be referred to the Appropriations Committee pursuant to section 401(b)(2) of the Budget Act, if first, the amount of new entitlement authority in the reported bill does not exceed the amount set aside in the reserve fund for such a program, and second, if the committee's other reported entitlement bills are consistent with its 302 allocations.

Conference reports providing the funds for the programs assumed within the reserve fund should not be subject to deferred enrollment since a committee's 302(a) allocation was increased upon enactment of the authorizing legislation and since deferred enrollment is based upon the committee's total 302(a) discretionary budget authority allocation or new entitlement authority allocation.

Legislation providing funding for a reserve program should not be subject to a point of order for exceeding the spending ceiling set forth in the budget resolution because the spending ceiling is adjusted when an adjustment to a committee's 302(a) is triggered and since a bill would not be subject to a point of order if the committee is within its 302(a) discretionary budget authority allocation or new entitlement authority allocation as adjusted by reserve fund amounts.

The Budget Committees would perform the ministerial task of reporting to their respective Houses any adjustment to a committee's 302(a) allocation or the spending ceiling which would be triggered under the reserve fund procedure.

RECONCILIATION INSTRUCTIONS

The conference substitute includes instructions to seven House committees and four Senate committees to report legislation achieving reductions in budget authority of $8.932 billion and reductions in outlays of $12.285 billion over fiscal years 1984-86. Also included are instructions to the House Committee on Ways and Means and the Senate Finance Committee to report legislation increasing revenues by $73 billion over the same 3 fiscal years.

All committees are instructed to submit their recommendations for changes in laws to the Budget Committees of their respective Houses no later than July 22, 1983. The Budget Committees would then package the recommendations into an omnibus reconciliation bill which they would report to their respective Houses for consideration. This procedure would not preclude committees moving forward on separate tracks, as was done in reconciliation last year, with the separate bills subsequently being put into one package to facilitate conference.

The reconciliation instructions also provide that if the House Ways and Means Committee reports legislation requiring the imposition of new or expanded taxes or user fees within the jurisdiction of another committee, such legislation would be considered for referral under House Rule X.

In addition, the conference substitute includes provisional reconciliation instructions to the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition, and Forestry. This provisional instruction was necessitated by the fact that savings envisioned as part of last year's reconciliation involving 50-cent-per-hundredweight assessments against milk producers are uncertain. Collections under the law in question are presently the subject of litigation. The reconciliation instructions to the Agriculture Committees of the House and the Senate are contingent upon a final adjudication by the courts that the law, part of subtitle A of title I of Public Law 97-263, is either unconstitutional or unenforceable. Let me stress that only if that final disposition is arrived at will the Agriculture Committees' reconciliation instructions come into effect. The amounts included in the provisional reconciliation instructions are intended to be the amounts sufficient to insure the savings contemplated by the Congress in the assessment legislation.

DEFERRED ENROLLMENT

The conference substitute provides for deferred enrollment of certain spending bills until adoption of the second budget resolution for fiscal year 1984 or October 1, 1983, whichever occurs first.

Under the provision, spending bills exceeding the appropriate committee total allocation pursuant to section 302(a) of the Budget Act would not be enrolled until adoption of the second budget resolution or October 1, 1983. In the House, the appropriate 302(a) allocation only refers to new discretionary budget authority and new entitlement authority. In the Senate, the appropriate 302(a) allocation would include new budget authority or new entitlement authority. The difference between the definitions of appropriate allocations in the House and Senate arises from the fact that in its 302(a) allocations the Senate does not divide new budget authority between discretionary and mandatory programs for scorekeeping purposes.

Let me stress again that, unlike the deferred enrollment provisions included in last year's budget resolution, the deferred enrollment procedure in the conference substitute would apply to spending bills exceeding a committee's appropriate 302(a) allocation, the total committee allocation.

OPTIONAL SECOND BUDGET RESOLUTION

The conference substitute provides that this concurrent resolution is converted into the second concurrent resolution on the budget on October 1, 1983, for the purposes of section 311 of the Budget Act, if Congress does not otherwise adopt a resolution by that date. Consequently, the targets set forth in the conference substitute would become binding on October 1, 1983, for the purposes of the spending ceiling and revenue floor under section 311 of the Budget Act. Again it should be noted that the spending ceiling is a floating ceiling in that it does not reflect amounts in the reserve fund until an allocation from the reserve fund is triggered.

The conference substitute further provides that enforcement against breaches of the spending ceiling under section 311(a) of the Budget Act would not apply where a measure would not cause a committee to exceed its appropriate allocation pursuant to section 302(a) of the Budget Act. As under the deferred enrollment procedure in the conference substitute, in the House the appropriate 302(a) allocation would include new discretionary budget authority and new entitlement authority only. In the Senate, the appropriate 302(a) allocation would include new budget authority or new entitlement authority, the difference being that since the Senate does not divide in its 302(a) allocations new budget authority between discretionary and mandatory programs for scorekeeping purposes.

The intent of the section 302(a) discretionary budget authority and new entitlement authority subceiling provided in the proposed resolution is to protect a committee which has stayed within its spending allocation—discretionary budget authority and new entitlement authority—from points of order if the total spending ceiling has been breached because of reasons outside of its control.

MONETARY POLICY

The conference substitute includes language requesting the House Committee on Banking, Finance, and Urban Affairs and the Senate Committee on Banking, Housing, and Urban Affairs to report out a resolution expressing the sense of the Congress as to the coordination of the Federal Reserve's monetary policy with the fiscal policy included in the conference substitute. That resolution would also include a statement as to the information required by the Congress regard-

ing the Federal Reserve's economic assumptions and goals and the effects of the Federal Reserve's monetary policy on the economy, as well as any other matters pertaining to the Federal Reserve's execution or congressional oversight of monetary policy, as the Banking Committees deem appropriate.

The language is in response to the recognition of the need for coordination between fiscal and monetary policy, the heavy burden placed on monetary policy by actual and projected deficits, the fact that any deficit reduction brought about by the resolution would reduce pressures on monetary policy, the need for vigorous economic growth consistent with reasonable price stability, and the requirements of the Banking and Budget Committees regarding Federal Reserve monetary policy and the economic assumptions consistent with that policy. The language is also in response to the fact that the Banking and Budget Committees of the respective Houses require information regarding the Federal Reserve's monetary policy and economic assumptions consistent with that policy.

The Budget Committees have a particular interest in this matter because of the importance of developing budget economic assumptions that are up to date and realistic.

This compromise language was worked out in conjunction with both Banking Committees, and we believe that it represents a real step forward in the coordination of monetary and fiscal policy.

MILITARY RETIREMENT

The conference substitute contains sense of the Congress language directing the House Committee on Armed Services to initiate a review of military retirement programs and to recommend changes which would result in reduced spending under these programs. This sense of the Congress language was included in recognition of the fact that military retirement programs constitute a major sector of the defense budget and provide an appropriate area for review in Congress efforts to insure efficiency of programs while at the same time working toward reducing budget deficits.

LIMITATION ON FEDERAL ACTIVITY THROUGH THE APPROPRIATIONS PROCESS

The conference substitute contains sense of the Congress language that the President and the Congress, through the appropriations process, should limit on- and off-budget lending and loan guarantee commitments in fiscal years 1983-84 to the amounts assumed in the resolution.

FEDERAL FINANCING BANK LIMITATIONS

The conference substitute contains sense of the Congress language that the President should limit fiscal year 1983 and 1984 FFB origination of direct loans and purchases of loan assets to specified amounts and that direct borrowing by Federal agencies be limited to the FFB, to the maximum extent possible.

FEDERAL FINANCING BANK BUDGET IMPACT

The conference substitute contains sense of the Congress that budgets of agencies initiating FFB purchases of certificates of beneficial ownership and originations of guaranteed loans should include budget authority and outlays resulting from the transactions.

The conference substitute also contains language recommending that the committees of jurisdiction consider expeditiously legislation to require that the impact of such FFB transactions be included in the budgets of such agencies beginning with fiscal year 1985.

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 050: NATIONAL DEFENSE

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House passed	263.85	235.40	290.35	256.30	317.50	284.30
Senate passed	270.65	241.60	300.95	269.65	333.06	299.85
Conference agreement	268.60	240.00	297.30	265.30	329.00	295.00

The conference agreement includes the following:

Five percent real growth—above inflation—is assumed for defense funding for each of the next three years.

The funding level assumed results in savings from the President's April budget of $11.9 billion in budget authority and $5.3 billion in outlays for fiscal year 1984 and $80.3 billion in budget authority and $53.3 billion in outlays for the three years 1984-86.

The funding level assumed is an increase of $24 billion over the fiscal year 1983 budget authority level.

Assumes a delay in military retirees COLA's until January of each year, consistent with other Federal COLA assumptions. This is an eight month delay in fiscal year 1984.

Assumes a four percent pay raise for Defense Department military and civilian personnel effective January 1, 1984 with 17 percent absorption assumed for all civilian employees.

EXPLANATION OIF CONFERENCE AGREEMENT, FUNCTION 150: INTERNATIONAL AFFAIRS

[In billion of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House passed	18.85	13.20	17.10	13.20	16.55	13.00
Senate passed	18.20	12.70	16.50	12.80	15.90	12.80
Conference agreement	18.70	12.95	16.80	13.00	16.25	12.90

The conference agreement includes the following:

Export-Import Bank direct loans are assumed at the fiscal year 1983 level of $4.4 billion for fiscal year 1984, at $4.6 billion for fiscal year 1985, and at $4.8 billion for fiscal year 1986.

Security assistance programs for Israel and Egypt are assumed at levels consistent with those authorized in the International Security and Development Cooperation Act of 1983, as reported.

Other foreign assistance programs are assumed to continue at about the levels provided by Congress for fiscal year 1983.

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 250: GENERAL SCIENCE, SPACE, AND TECHNOLOGY

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House passed	8.85	8.35	8.80	8.75	8.15	8.30
Senate passed	8.50	8.20	8.50	8.50	8.40	8.40
Conference agreement	8.70	8.30	8.50	8.50	8.15	8.30

The conference agreement includes the following:

$0.1 billion is assumed in fiscal year 1984 for National Science Foundation Science and Math Education Programs.

Funding is assumed for the acquisition of additional spare parts for the space shuttle as well as additional funding for planetary research, technology transfer and the space telescope program.

$0.5 billion in fiscal year 1984 is assumed for an initiative to modernize universal research instrumentation and facilities.

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 270: ENERGY

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House passed	4.40	4.30	4.20	3.40	3.75	3.35
Senate passed	3.90	4.10	3.60	2.90	3.20	2.70
Conference agreement	4.20	4.30	3.90	3.15	3.50	3.05

The conference agreement includes the following:

Funding for energy programs is assumed at the fiscal year 1983 level, except for energy R&D programs where an additional $+250 million is assumed and energy conservation grant programs where an additional $+125 million is assumed.

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 300: NATURAL RESOURCES AND ENVIRONMENT

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House passed	12.10	12.50	11.85	12.55	11.70	12.00
Senate passed	12.00	12.50	12.20	12.60	12.50	12.20
Conference agreement	12.05	12.50	11.85	12.55	11.70	12.15

The conference agreement includes the following:

Assumes $383 million in fiscal year 1984 for the Superfund.

Assumes funding for the Environmental Protection Agency's (EPA) operations of $1.3 billion.

Assumes funding for EPA construction grants at $2,430 million.

Assumes $300 million for the enactment of House-passed H.R. 999, the American Conservation Corps.

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 350: AGRICULTURE

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House passed	14.85	14.65	15.10	13.35	14.10	14.05
Senate passed	11.60	11.40	14.00	12.30	13.20	13.10
Conference agreement:						
Including reserve	13.60	12.10	14.50	12.40	13.20	13.10
Excluding reserve	13.00	11.50	14.50	12.40	13.20	13.10

The conference agreement includes the following:

In fiscal year 1984, $600 million in budget authority and outlays is reserved for subsequent allocation to Committees. These funds are earmarked for emergency farm mortgage foreclosure relief and increased farm operating, ownership, and economic emergency loans. The agreement assumes $500 million for emergency farm mortgage foreclosure relief and $100 million for the on-budget affect of increased lending in the farm operating, ownership, and economic emergency programs.

Assumes $100 million for the implementation of House-passed H.R. 1590, Emergency Food Assistance and Commodity Distribution Act of 1983.

Agriculture reconciliation only if the courts finally adjudicate the current assessments against milk producers and determine that the assessments are unconstitutional or unenforceable. Should the agriculture committees be required to report changes in law, then they will be required to reduce outlays by $1,243 million in fiscal year 1984, $1,332 in fiscal year 1985, and $1,327 million in fiscal year 1986.

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 370: COMMERCE AND HOUSING CREDIT

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House passed	6.10	2.30	6.25	0.40	6.45	−0.35
Senate passed	5.90	1.80	6.50		6.50	−.30
Conference agreement:						
Including reserve	6.00	2.45	6.25	.50	6.45	.26
Excluding reserve	6.00	2.25	6.25	.15	6.45	.10

The conference agreement includes the following:

Assumes $760 million for a new emergency mortgage foreclosure assistance program in 1983 to assist unemployed homeowners. These funds are earmarked and reserved by Congress for subsequent allocation to Committees. This program is consistent with the House-passed Emergency Housing Assistance Act of 1983, H.R. 1983, and would have outlays of $200 million in fiscal year 1984.

Assumes $879 million in 1984 for the postal subsidy for nonprofit mail. This amount is estimated to be sufficient to maintain nonprofit mail rates at their current levels.

Assumes a $3.3 billion 1984 program level for new FmHA rural housing loans, the same amount of new loans provided by 1983 appropriations.

Assumes $318 million of new SBA direct business loans in 1984.

Assumes $668 million for new Section 202 Housing for the elderly or handicapped loans in 1984, which will support an estimated 14,000 new housing units.

Assumes 1984 loan guarantees levels of $50.9 billion for FHA mortgage insurance commitments and $68.25 billion for GNMA guarantees of mortgage-backed securities.

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 400: TRANSPORTATION

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House passed	28.30	26.15	29.50	27.10	30.40	28.40
Senate passed	27.70	25.90	28.40	26.90	29.20	27.80
Conference agreement	28.00	26.00	28.95	27.00	29.80	28.10

The conference argument includes the following:

Assumes $28 billion in budget authority and $26 billion in outlays for transportation fiscal year 1984 programs.

Assumes $875 million in budget authority in fiscal year 1984 to fully fund mass transit operating assistance as authorized by the Surface Transportation Assistance Act of 1982 (STAA) (P.L. 97-424).

Assumes $13.8 billion in budget authority in fiscal year 1984 for Federal-aid highway construction and repair programs, the amount authorized by the STAA.

Assumes $1 billion for Airport Grants-In-Aid (ADAP), the amount authorized by the STAA.

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 450: COMMUNITY AND REGIONAL DEVELOPMENT

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House passed	8.25	8.55	12.50	10.65	12.45	11.15
Senate passed	6.60	8.10	7.10	8.20	7.10	7.60
Conference agreement:						
Including reserve	6.975	8.225	9.90	9.20	9.90	9.175
Excluding reserve	6.85	8.10	7.30	8.35	7.35	7.80

The conference agreement includes the following:

Assumes $50 million in fiscal year 1984, $100 million in 1985, and $50 million in 1986 for a National Industrial Development Bank initiative. These funds are earmarked and reserved by Congress for subsequent allocation to Committees. The Bank would allow for a guaranteed loan program of $1 billion in 1984 and $3 billion in each of fiscal years 1985 and 1986.

Assumes $75 million in fiscal year 1984 and $2.5 billion for each of fiscal years 1985 and 1986 for an Infrastructure Initiative. These funds are earmarked and reserved by Congress for subsequent allocation to Committees.

Assumes a Community Development Block Grants program of $3.5 billion for each of fiscal years 1984-86.

Assumes an Urban Development Action Grant program of $440 million for each of fiscal years 1984-86.

Assumes an Economic Development Administration program at a level of $168 million for fiscal years 1984 and 1985 and $188 million in fiscal year 1986.

Assumes an Appalachian Regional Development program at a level of $162 million for fiscal years 1984 and 1985 and $142 million in 1986.

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 500: EDUCATION, TRAINING, EMPLOYMENT, AND SOCIAL SERVICES

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House passed	39.15	32.70	33.05	31.15	33.70	32.80
Senate passed	31.80	27.25	28.50	28.40	28.50	28.40
Conference agreement:						
Including economic recovery funds	37.45	31.85	31.30	30.25	31.50	31.05
Excluding economic recovery funds	33.95	28.35	31.30	30.25	31.50	31.05

The Conference agreement includes the following:

$16.10 billion for education and related activities in fiscal year 1984. This is an increase of $2.35 billion over the CBO fiscal year 1984 freeze level and will accommodate inceases in elementary, secondary, vocational and higher education programs.

$10.95 billion for training, employment, and labor services programs, an increase of $1.10 billion over the CBO fiscal year 1984 freeze level. This will accommodate increased funding for the Job Training Partnership Act (JTPA), community services employment for older Americans, the Work Incentive (WIN) program, and labor services activities such as the Bureau of Labor Statistics (BLS).

$8 billion for a community renewal employment program ($4.50 billion in fiscal year 1983 and $3.50 billion in fiscal year 1984) is earmarked for use when an authorization is enacted. These economic recovery funds could provide jobs to between 600,000 and 800,000 long-term unemployed. Since unemployment is not projected to decline below 9 percent until after fiscal year 1984, this would put people to work on necessary community projects.

$7 billion for social services programs, an increase of $0.60 billion over the CBO fiscal year 1984 freeze level. This assumes a $2.80 billion permanent ceiling for the title XX social services program, and increase of $0.30 billion over the fiscal year 1984 ceiling. In addition, this level will accommodate increases for Head Start, child welfare services, vocational rehabilitation, community services, and aging program.

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 550: HEALTH

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House Passed	96.25	96.00	104.50	106.55	117.30	115.35
Senate Passed [1]	94.149	93.049	105.124	103.524	116.949	112.849
Conference Agreement [1]						
Including reserve	34.10	34.00	37.45	37.05	38.50	37.95
Excluding reserve	32.10	32.00	35.80	35.40	38.50	37.95

[1] The Social Security Amendments of 1983 directed that social security programs, including, medicare, be identified separately in the budget. As a result, the conference agreement establishes a new function for Medicare, Function 570: Medical Insurance. For presentation purposes, the above table combines the Senate-passed Function 550: Health and Function 570: Medical Insurance. The Social Security Amendments of 1983 established a separate function for medicare. In order to determine a conference agreement comparable to the House and Senate levels, the totals for functions 550 and 570 must be combined as follows:

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
Including reserves	96.60	94.60	108.30	105.65	119.70	114.10
Excluding reserves	94.60	92.60	106.60	104.00	119.70	114.10

The conference agreement includes the following:

$200 million is assumed for a health program for low-income pregnant women and young children. This funding level would provide health care for women and children up to one year of age from families with incomes below 55 percent of the poverty level. Assistance would be available nationally for poor pregnant women not now covered by state medicaid programs and post-natal health care for their children.

$2 billion is assumed for a new program to provide health insurance and benefits for unemployed workers and their families. These funds are reserved by Congress for subsequent allocation when an authorization is provided. The allocation for this item is $350 million in authority and outlays in fiscal year 1983 and $2 billion in fiscal year 1984, and $1.65 in budget authority and outlays in fiscal year 1985.

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 570: MEDICAL INSURANCE

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House passed	Programs funded in function 550: Health					
Senate passed	61.40	60.30	69.40	68.30	79.10	75.60
Conference agreement [1]	62.50	60.60	70.85	68.60	81.20	76.15

[1] The Social Security Amendments of 1983 directed that social security programs, including medicare, be identified separately in the budget. As a result, the conference agreement establishes a new function for Medicare, Function 570: Medical Insurance.

The conference agreement includes the following:

Medicare reductions totalling $400 million are assumed for 1984, and $1.70 billion over the next three years, 1984-86. The conferees assume that the reforms to achieve these savings would not include reductions in services to beneficiaries or increases in beneficiary cost sharing. It is assumed that the savings would be obtained from improved cost controls on providers of services.

EXPLANATION OF CONFERENCE AGREEMENTS, FUNCTION 600: INCOME SECURITY

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House passed	310.60	284.70	332.70	296.80	354.05	313.20
Senate passed [1]	300.80	280.40	322.20	292.70	342.50	308.20
Conference agreement: [1]						
Including reserve	126.75	104.30	129.80	104.25	134.15	107.45
Excluding reserve	124.80	102.35	129.35	103.80	133.70	107.00

[1] The Social Security Amendments of 1983 established a separate function for the social security program. For presentation purposes, the above table combines the Senate-passed Function 600: Income Security and Function 650: Social Security. In order to determine a conference agreement comparable to the House and Senate levels, the conference agreement levels for Functions 600 and 650 must be combined as follows:

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
Including reserve	302.75	280.70	326.20	291.55	347.15	307.15
Excluding reserve	300.80	278.75	325.75	291.10	346.70	306.70

The conference agreement includes the following:

$1.50 in budget authority and outlays in fiscal year 1984 is assumed for the extension of Federal supplemental benefits for the long-term unemployed. These funds are reserved by Congress for subsequent allocation to committees for use when the program is extended.

$450 million in budget authority and outlays in fiscal year 1984 is reserved by Congress for subsequent allocation to committees to increase benefits or expand eligibility for the food stamp program. This increased funding is maintained in fiscal years 1985 and 1986.

Additional funding of $450 million in budget authority and outlays would be provided for the child nutrition and WIC programs in fiscal years 1984–86.

The conference agreement assumes that cost-of-living adjustments for the civil service retirement, foreign service retirement, federal employee compensation, and black lung programs will be delayed until January. Savings of $300 million in fiscal year 1984 and $1.65 billion in fiscal years 1985–86 would occur from this delay.

Additional funding of $100 million in fiscal year 1984 and $200 million in fiscal years 1985 and 1986 is assumed for the Aid to Families with Dependent Children (AFDC) program. Additional monies could be used to reverse many of the anti-work policies enacted in the past two years.

An increase of $150 million annually in fiscal years 1984–86 is assumed for the low-income energy assistance program.

Additional receipts of $150 million in fiscal year 1984 and $200 million in fiscal years 1985–86 are assumed to accrue to the Pension Benefit Guaranty Corporation through enactment of the President's proposed premium increase for single-employer pension plans.

$9.6 billion in budget authority and $10.4 billion in outlays is assumed for assisted housing programs in fiscal year 1984. Of this amount, $1.45 billion in budget authority and outlays is assumed to be used to subsidize the operation of public housing projects.

Additional funding of $92 million for fiscal years 1984–86 is assumed for training under the Trade Adjustment Assistance Act.

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 650: SOCIAL SECURITY

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House passed	Program funded in function 600: Income security					
Senate passed	174.90	176.40	194.80	187.30	211.20	199.70
Conference agreement [1]	176.00	176.40	196.40	187.30	213.00	199.70

[1] The Social Security Amendments of 1983 directed that social security programs be identified separately in the budget. As a result, the conference agreement establishes a new function for social security.

There were no policy differences between the House and Senate with regard to this function. Both Houses assumed the Social Security Amendments, which now have been enacted into law.

The Senate included a COLA adjusted of 3.5 percent based upon more recent data than was available to the House when it approved a resolution with a 4.1 percent COLA. The conferees adopted the Senate assumptions for the COLA.

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 700: VETERANS BENEFITS AND SERVICES

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House passed	26.00	25.55	26.40	26.00	27.00	26.50
Senate passed	25.70	25.60	26.70	26.30	27.20	26.60
Conference agreement:						
Including reserve	25.70	25.60	26.60	26.10	27.00	26.50
Excluding reserve	25.55	25.45	26.45	25.95	27.00	26.50

The conference agreement includes the following:

A net of $176 million to fund a 3.5 percent cost-of-living adjustment (COLA) in compensation benefits in April 1984. The agreement assumes that subsequent annual COLAs will be payable in January.

$11 million in new entitlement authority for proposed legislation to compensate veterans for certain agent orange-related disabilities and compensation for a temporary disability rating while hospitalized.

A shift of $264 million in VA construction funds from fiscal year 1984 to a fiscal year 1983.

$150 million in budget authority and outlays in fiscal year 1984 is reserved by Congress for subsequent allocation to committees for veterans' emergency job training legislation. Funding at this level is also included for fiscal year 1985.

Reconciliation outlays of $226 million in fiscal year 1984, $138 million in fiscal year 1985, and $140 million in fiscal year 1986.

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 750: ADMINISTRATION OF JUSTICE

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House passed	5.60	5.50	5.55	5.50	5.45	5.45
Senate passed	6.00	6.00	5.80	5.90	5.90	5.80
Conference agreement	5.85	5.85	5.65	5.75	5.75	5.65

The conference agreement includes the following:

$5.85 billion in total budget authority and outlays in fiscal year 1984.

$296 million in budget authority is assumed for the Legal Services Corporation in 1984; this amount is consistent with the House/reported appropriation.

$3.40 billion in budget authority is assumed in fiscal year 1984 for law enforcement activities which allows a $350 million increase above fiscal year 1983 for efforts to combat organized crime and illegal drug trafficking and to increase border patrol capability by the Immigration and Naturalization Service.

$0.15 billion in budget authority is assumed in fiscal year 1984 for a new justice assistance grant program which is consistent with House-passed authorizing legislation (H.R. 2175).

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 800: GENERAL GOVERNMENT

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House passed	5.80	6.05	6.20	6.10	6.30	6.25
Senate passed	5.70	5.70	6.00	5.80	6.20	5.90
Conference agreement	5.60	5.60	6.00	5.80	6.20	5.90

The conference agreement includes the following:

$1.25 billion is assumed for the Legislative Branch in 1984, about the same as the 1983 funding.

$103 million is assumed for the Executive Office of the President in 1984, about the same as the 1983 funding.

$3.30 billion is assumed for the Internal Revenue Service in 1984, an amount which would support improvements in tax processing, examinations, and collections.

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 850: GENERAL PURPOSE FISCAL ASSISTANCE

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	BA	0	BA	0	BA	0
House passed	7.60	7.60	7.45	7.50	7.60	7.60
Senate passed	7.10	7.00	7.20	7.10	7.50	7.50
Conference agreement	7.25	7.15	7.10	7.10	7.20	7.20

The conference agreement includes the following:

$5,017 million for each of the fiscal years 1984–86 is assumed for General Revenue Sharing. This represents a $450 million increase in budget authority over the current level of $4,567.

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 900: NET INTEREST

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House passed	96.15	96.15	103.40	103.40	105.65	105.65
Senate passed	95.90	95.90	104.20	104.20	107.00	107.00
Conference agreement:						
Including reserve	98.00	98.00	104.50	104.50	107.20	107.20
Excluding reserve	97.10	97.10	103.10	103.10	105.50	105.50

The conference agreement includes the following:

Updating of economic assumptions, to reflect recent higher levels of interest rates, which raised estimated interest outlays in Fiscal Year 1984.

Adjustment for the effect of all conference revenue and outlay agreements on deficits, debt, and debt service.

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 920: ALLOWANCES

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House passed	1.20	1.25	2.50	2.65	3.85	4.10
Senate passed	.60	.60	1.90	2.00	3.20	3.40

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 920: ALLOWANCES—Continued

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
Conference agreement	.75	.80	2.05	2.20	3.40	3.60

The conference agreement includes the following:

A four percent civilian Federal employee pay raise effective in January in fiscal years 1984, 1985 and 1986, with the assumption that the civilian agencies will absorb 17 percent of the cost of the fiscal year 1984 pay raise, and will absorb $150 million of the cost of the pay raise in fiscal years 1984, 1985 and 1986.

EXPLANATION OF CONFERENCE AGREEMENT, FUNCTION 950: UNDISTRIBUTED OFFSETTING RECEIPTS

[In billions of dollars]

	Fiscal year 1984		Fiscal year 1985		Fiscal year 1986	
	Budget authority	Outlays	Budget authority	Outlays	Budget authority	Outlays
House passed	−17.35	−17.35	−18.75	−18.75	−23.55	−23.55
Senate passed	−18.10	−18.10	−19.00	−19.00	−23.80	−23.80
Conference agreement	−18.05	−18.05	−18.90	−18.90	−23.75	−23.75

The conference agreement includes the following:

Assumes receipts from leases of Outer Continental Shelf of $9.4 billion and surplus land sales of $0.15 billion.

The SPEAKER pro tempore. The gentleman from Oklahoma (Mr. JONES) has consumed 9 minutes.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, at the outset let me just mention something that I think was overlooked a little bit earlier when we heard all the loud talking from the majority leader about the tax bill. You know, there were 133 members of his party who voted for the tax bill that he was condemning so loudly, which he seemed to conveniently overlook.

With regard to this budget, let me say this budget, if adhered to, would return us to the tax and spending era of the Carter administration. It would put a hold on our effort to strengthen our defenses from its anemic stature gained through 4 years of neglect under the Carter years.

During the last 2½ years we have shown the world that we could put our economic house in order and lead the free world out of a worldwide recession.

Our allies are looking to us, as are the American people, to continue our steady and proper course.

Let me say that what we do here today will have a lot of do with whether or not we maintain that course. Certainly our allies do not want us to turn back. The American people do not want us to turn back.

I know there has been a lot of rhetoric here today, probably a year early, because the campaign officially does not start until next year. Still, we have to look at some economic news that apparently our Democratic friends want to ignore and say does not exist.

What has been happening? What has been happening during the last 2½ years? Let us refresh our memories.

When the Carter administration left office we had a prime interest rate of 21.5 percent. Today we have a prime interest rate of 10.5 percent. Which do you like? Which do the American people like?

Once again they have been able to buy homes. The automobile market is booming. They are putting people back to work in my district producing cars. They are doing the same thing in Detroit.

Do we want to shut that off? I think not.

Inflation. You do not even hear anything about inflation anymore. But 2½ years ago we heard about it every time we turned around. Everybody was being affected by inflation.

It was 12.4 percent out of everybody's pocket whether he was the poorest person on the block or the richest, 12.4 percent being eaten up by inflation. For the first 6 months of this year inflation is down to 3 percent.

Do we want to return to 12.4-percent inflation? We can do it by returning to those spend and spend and tax and tax policies of the past.

I do not think we want to do that. I do not think the American people want us to do that.

That economic news that our friends on the right seem to want to forget is that the Index of Economic Indicators rose 1.1 percent in April, up for the 10th consecutive month. Most economists expect the recovery to be significant through at least 1983 and 1984.

Unemployment is still a problem but it is coming down. It dropped 10 percent in May. Since December 1982 more than 800,000 more individuals have been employed in this country. The unemployment rate for auto workers in May was 14.3 percent, down over 10 points from its November 1982 peak of 24.9 percent.

Which do we prefer: tax the people to death so that they cannot buy cars, or do we want to leave a little bit for them so that they can buy something to put people back to work the American way, through the free, private enterprise system?

There is particularly strong growth in the construction, manufacturing, and service industries. Oh, yes, here is something that would be good news to everybody if they have not already realized it. Tax freedom day now falls 6 days earlier than in 1981, taking place on May 2.

Inflation, as I have mentioned, has made a significant drop.

But housing starts showed a 64-percent gain in 1 single year, which shows a strong recovery in this particular industry.

The productivity in the nonfarm area showed its biggest jump since the first quarter of 1981 in the manufacturing sector, largely because of new investments in plant modernization and expansion.

Industrial output is up.

Disposable personal income after inflation is up 0.7 percent over a year ago.

Our gross national product is up.

New factory orders rose 2.1 percent in April, the fifth increase in 6 months.

Durable goods are up 3.8 percent after a 3.2-percent increase in March, and nondefense capital goods orders rose 11.7 percent in April following a March increase of 4.5 percent.

Orders for household goods rose 4.7 percent in April, and they have surged 15.5 percent since December.

Machinery orders have increased 3.7 percent.

S&L's reported continued deposit gains which have reflected in a healthy pace of mortgage lending.

During April deposits exceeded withdrawals by $4.42 billion. New loan commitments took their highest level ever recorded for the month of April at $10.1 billion.

My friends, that is progress. Oh, yes, we would like to have greater progress than that, but that is a lot more than it was under the Carter administration and the policies that we were following at that particular time.

Even in this Democrat budget, and I mention Democrat budget because I have alluded to the fact that we have a Republican Senate, but the budget that passed the Senate passed with 29 Democrat votes and only 21 Republican votes, and PETE DOMENICI, the chairman of the committee, had to switch his vote in order to pass it.

Even our Democratic friends concede that the President's economic plan is working when they revise their economic assumptions upward and beyond even the administration's projections of a few months ago.

□ 1320

In the next breath, however, they complain that the plan is not working and should be scrapped in favor of the Carter plan of tax and spend, tax and spend. Let us look at those economic indicators for just a second and they are the ones that were used by the conference committee.

Our nominal GNP projections for 1983 are up to 7.6 percent. Even from the House-passed resolution of 6.8 percent. Projected into 1984, up to 10 percent. The real GNP, the percent change of annual increase, the House-passed resolution, 2 percent, in this conference committee report for 1983 it is 2.8 percent. In 1984 the projection in the House as it passed this resolution was 4.7 percent. They now project 5.1-percent growth.

The CPI, percent of change in the House-passed resolution for 1983, 4.5 percent; but in this conference agreement for 1983, they are saying that CPI will fall to 3.5 percent and that is real progress, and they have to admit it, on that important inflation indicator.

And in 1984, they project it to be 5 percent.

As I said before, the only troublesome part about all of this is that we have not gotten all our people back to work, but they are going back to work gradually and we hope that that continues.

Let us also look at the matter of reducing spending, something most of the people of this country want.

You know, I do not get any letters from people saying they want to increase spending at the Federal level. I have not gotten any of those lately.

But in this resolution before us we increase nondefense spending by $23 billion over that requested by the President.

On the matter of taxes for 1984, $12 billion more in new taxes. Now, we might just as well face this one squarely. We soon will take up the tax matter. There is not anybody in this room familiar with what is involved who will say candidly that that $6 billion is going to go into the Treasury, because it is not going to become law. So, $12 billion in new taxes is mandated in this resolution through reconciliation. Now, where are you going to get it? $15 billion mandated new taxes for the next year. And $46 billion in new taxes mandated through reconciliation for the next year. That is $73 billion in new taxes being mandated by reconciliation in this resolution.

Now, I do not know how many thinking economists would advocate new taxes for more spending at a time when you are trying to get out of a recession.

How does this resolution accommodate all the spending in addition to raising taxes? Now you guessed it, you guessed it, all you have to do is to take a look at the resolution itself and you will find that they are putting it on the backs of the next generation and the next generation by increasing the level of the national debt.

Now, get these figures clearly because they are spelled right out in the resolution: The level of the public debt for fiscal year 1983 would be $1,389,200,000,000. For fiscal year 1984, $1,607,450,000,000; and in fiscal year 1985, $1,804,000,000; 1986, $1,993,750,000,000. That is in the resolution that you are asked to vote on here today. It is in there.

Oh, I know, there has not been much said about it, but that is right in the resolution.

We are all going to hear the Democratic rhetoric about the deficit, how it has increased under this administration. But let me say you are not going to hear one word from the right about all the Democratic programs which have added to that deficit. This administration has not been bringing request after request for new programs, to add to the deficit. No.

They have been attempting to slow the growth of this Government. But in every appropriation bill that will come through here now with the exception of defense, you are going to find more and more spending. And how many votes are you going to have against those appropriation bills? Well, they are going to be saying, "We need this, we need that, we cannot cut back."

That is how you get in trouble.

This conference report embodies a real gimmick not heretofore used to reduce the deficit figures.

Oh, I know it is probably going to be said they used it back in Muskie's day but in a different way. It places some $5.3 billion in 1983 and $8.5 billion in 1984 in a so-called reserve fund to be tapped upon the passage of certain legislation.

The proponents of this fund are calling it a contingency fund. Other people are calling it a slush fund or a "hideaway" fund which probably is more appropriate because that is what they are attempting to do, they are attempting to hide it from being placed in the deficit where it belongs.

Certainly we do not want to start this precedent, and it is a precedent.

I know they will hold up that Muskie matter, but that money was included in the deficit. If it is a good idea, putting $8.5 billion in 1984 in this hideaway fund and $5.3 billion in 1983, if that is such a good idea, we ought to hide more. As a matter of fact, we ought to balance the budget by hiding it all.

Mr. JONES of Oklahoma, Mr. Speaker, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from Oklahoma.

Mr. JONES of Oklahoma. Mr. Speaker, I just wanted to correct a misimpression that this is a precedent, this idea of a reserve fund.

In 1976, under the leadership of Senator Muskie and Senator Henry Bellmon, this concept was begun and this reserve fund, as is shown in Senate Concurrent Resolution 32, which I have here in my hand, also does not increase to the deficit unless the funds in the reserve fund are authorized.

So, it is not a precedent. It is building on the concept that was established by Senators Muskie and Bellmon.

Mr. LATTA. Let me say to my good friend and chairman, I had alluded to that fact that he would be saying that. I disagree with it completely because back when Mr. Muskie was chairman of that committee, and I have a copy of the report; it was in the deficit, that money was in the allowance section.

Let me read you page 9 of that report of the 94th Congress, it is 94-1108, if you care to take a look at it. It is in the conference report on allowances on page 9.

This is the pertinent language:

> The conference substitute provides budget authority of $2.85 billion and outlays of $1.15 billion. These amounts include $2.05 billion in budget authority and $350 million in outlays, which are reserved only for jobs programs, including accelerated public works, countercyclical assistance, public service employment, small business assistance or such other temporary job stimulus program that the Congress may enact. The balance of funds in this function covers the amounts requested by the President for pay increases for civilian agencies pending congressional review of the definitive pay proposal to be submitted by the President later this year.

□ 1330

If the chairman will look on down to the functional totals he will find those amounts are in the conference report and they show up in the deficit.

Mr. JONES of Oklahoma. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from Oklahoma.

Mr. JONES of Oklahoma. I thank the gentleman for yielding.

That is in the year 1976 and I would say the gentleman is accurate in reading from that conference report. But what I had reference to was the year before when this concept was begun by Senators Muskie and Bellmon in House Congressional Resolution 32, and I read to the gentleman from page 2 of that bill.

Number 4. The recommended level of Federal revenues under existing law is $297,800,000 and if certain provisions of the Federal Tax Reduction Act of 1975 are extended to 1976, and additional taxes on energy and enacted, the level of Federal revenues would be $295,800,000.

This particular document shows that the year before that when this concept of a reserve fund was established, that the Senate did have two levels: One that affected the deficit only if the bill was authorized and passed; and the other showed what the deficit would be without this reserve fund.

So it has been used twice before. Once it was represented totally in the deficit. Once it was represented in two ways.

Mr. LATTA. Well, let me say if it was used in that manner by Senator Muskie, he slipped one by us.

And I do not compliment him for slipping it by us.

Mr. LUNGREN. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from California.

Mr. LUNGREN. I thank the gentleman for yielding.

The distinguished chairman of the Budget Committee has suggested that the moneys within the reserve program can only be utilized upon legislation from the authorizing committee. However, page 21 of the conference report reveals a large dispute on that because it says that these moneys can be used "upon the enactment of any legislation referred to in subsection A which requires an appropriation,"—that would be the authorizing legislation—"or upon enactment of an appropriation for such purpose before the authorizing legislation is enacted." A plain reading of this suggests that in fact it would not take a specific authorization bill but rather could be slipped into an appropriations bill. Thus, this reserve account is not as sacrosanct as has been stated on the floor or publicly described at the conference itself.

Mr. LATTA. I want to thank the gentleman for his comments.

Mr. Speaker, let me say in conclusion that if we permit such budgetary gimmickry to pass, we might as well forget all about the usefulness which remains of this budget process. And there will be less and less restraint on spending as more and more is placed in a reserve fund every year.

Let me just say something about saving the process and also the need for a budget resolution. First, it was not until 1974 that we came forth with this process. Prior to that time we got by without it. We adopted the process because we thought it could reduce spending. With the exception of 2 years, we have not made much progress in slowing the growth of spending. We are not doing it in this resolution. But if the resolution passes in its present form, we will have to rely on Presidential vetoes to reduce spending in 1984.

As for the "save the process" argument, let me point out that we voted down resolutions in the past and have come back with new resolutions and we can do it again.

So it follows that we do not have to pass this particular resolution to "save the process."

So I urge my colleagues to vote against the resolution so that we can bring you a resolution which spends less, taxes less, and protects the gains we have made in rebuilding our defenses.

Mr. Speaker, I reserve the balance of my time.

Mr. JONES of Oklahoma. Mr. Speaker, I yield such time as he may consume to the gentleman from California (Mr. FAZIO), a distinguished member of the committee.

Mr. FAZIO. Mr. Speaker, I rise in support of the conference report.

If I could, I would like to engage my chairman in a colloquy regarding the reserve fund and its impact on the appropriations process.

I understand that the resolution reserved from allocation to committees at this time, particularly the Committee on Appropriations, amounts assumed necessary to fund certain phase 2 and 3 economic recovery programs which are not yet enacted into law.

Mr. JONES of Oklahoma. That is correct.

Mr. FAZIO. Is it correct that upon enactment of the authorizing legislation for one of these assumed initiatives, the amount assumed in the resolution for that program, but not yet allocated, would be allocated to the Committee on Appropriatons at that time?

Mr. JONES of Oklahoma. Yes, the Committee on the Budget will submit on the first legislative day following enactment of such legislation a report to the House reflecting the allocation from the reserve fund to the Committee on Appropriations.

Mr. FAZIO. I would like to clarify that once the allocation to the Appropriations Committee from the reserve fund is triggered, upon enactment of the authorizing legislation, the Committee on Appropriations is not procedurally restrained in its decisionmaking process as to how programs should be funded and is not required to file a new section 302(b) report.

Mr. JONES of Oklahoma. The gentleman is again correct. Yes, the intent of the managers in establishing the reserve fund is for the budget resolution not to prejudice the enactment and funding of the phase 2 and 3 recovery programs. Nothing in the resolution would direct, limit or affect the Appropriations Committee's decision on funding those programs. But if the Appropriations Committee decides to fund any of those initiatives, such funding would not be hindered by the terms of this resolution. Committees would not be required to file revised section 302(b) reports.

Mr. FAZIO. I appreciate the gentleman's comments and I would like to thank him for the sensitivity with which he has protected the prerogatives of the Appropriations Committee in this regard.

Mr. JONES of Oklahoma. I thank the gentleman. As he well knows this was an unusual circumstance as it was before the conference in 1975 and 1976. This is not a practice that we would hope to continue unless we found ourselves in a most unique circumstance as we did this year.

Mr. FAZIO. I am sure we all concur in those remarks.

Mr. JONES of Oklahoma. I thank the gentleman.

Mr. FAZIO. Mr. Speaker, budgets, like beauty, are in the eyes of the beholder. And indeed, the opinions about this budget resolution run from "a decent compromise, all things considered," to Presidential proclamations of "totally unacceptable" and threats of the veto pen being filled and ready to go.

Yes, in view of the fact that this resolution produces lower deficits than the President's proposed budget, why the sound and fury issuing forth from the White House? Because the President does not like the mix. He does not like the fact that Congress, in heeding his oft stated axiom, "you don't solve a problem by throwing money at it" refused to give him every penny he requested for the defense budget.

But take a look at this resolution, it really does not represent a radical departure from the policies and priorities of the White House. The defense side of the ledger still gets favored treatment, while the domestic programs do not keep pace with inflation. Federal expenditures are due to rise $46 billion. Of this increase, $26 billion

will go to defense. Our domestic programs will be increased by less than 4 percent, somewhat lower than the expected rate of inflation. Thus, these programs virtually stand still, while defense gets in real terms, a 5-percent boost.

Looking at this another way, the overall budget compromise allows a 5.7-percent increase in Federal spending, while the Pentagon will get 12 percent. Thus, nondefense portion of the budget goes up 3.4 percent.

One must wonder why the President so vehemently opposes this resolution. Cannot our national security be maintained at the levels that both parties in the Congress felt was adequate? Surely it can.

On the domestic front, the House added $30 billion in social programs and the conference agreement allows for a $22 billion increase. Of that amount, $8 billion has been put in a "reserve fund" pending the authorization of the programs involved.

Thus, we effectively have added $14 billion to the domestic side and subtracted $11 billion from the defense budget. In a budget of $859 billion for fiscal year 1984, these amounts hardly seem worthy of such Presidential outrage. It is a conservative budget and if one looks beneath the rhetoric, that becomes evident.

We cannot allow the American public to be deceived by the manner in which the White House is framing this debate. What the President has succeeded in doing is mixing the use of terms. When he speaks of defense, he says that the Congress only allowed a 5-percent growth in "real terms." But when he speaks of domestic programs, and talks about his "freeze" on spending, he never points out that what his freeze means is a real cut of 4 to 5 percent due to inflation. Thus, he is camouflaging the full scope of his defense requests and his continuing assault on domestic programs. As an example, this budget provides only a 3.1-percent increase in ongoing community and regional development programs, education, training, employment, social services, health, medical insurance, welfare, social security, and veterans benefits.

This Nation is faced with major problems of getting deficits down in order to boost this economy and by getting people back to work and productivity up. This is not an easy task, nor is it one that can be accomplished overnight. Controlling spending without hampering national security or denying the American public needed assistance can be accomplished if we work together and not against each other. This resolution is the product of a bipartisan compromise. Merely because the President has not this year been able to control the process is not a sufficient reason to cast it aside.

Mr. JONES of Oklahoma. Mr. Speaker, I yield such time as he may consume to the gentleman from Minnesota (Mr. PENNY).

Mr. PENNY. Mr. Speaker, I rise in support of the budget resolution and commend the work of the Members of this House in arriving at that compromise.

Mr. Speaker, the third year tax cut is scheduled to take effect next week. When Congress passed this tax cut, Americans were, at the same time, promised a balanced budget by 1984.

In January of this year the President presented his budget for fiscal year 1984 which included a deficit of $190 billion. It was clear we were going to have to borrow money to give this year's tax cut.

A few days ago a House/Senate conference committee reached bipartisan agreement on a budget resolution. They have called for a balanced approach to reduce future deficits and work toward a balanced budget. They have recommended restraint on domestic spending, limiting the growth of the military budget to 10 percent, and raising some new revenue. This recommended new revenue for fiscal year 1984 is more than matched by reductions in domestic spending from current levels and reductions from the President's request for military spending. This bipartisian budget deserves our support.

Where do we get the new revenue called for by the budget? I believe capping the third year tax cut makes the most sense. This tax proposal would leave in place a full 10 percent tax cut for over 90 percent of American taxpayers. All taxpayers would still receive up to a $720 tax cut. But capping tax cuts at $720 would help us reduce the deficit by over $6 billion. We can achieve the revenue called for in the budget by limiting additional tax cuts for the wealthiest in America. It not only makes sense, it is fair.

Mr. JONES of Oklahoma. Mr. Speaker, I yield such time as he may consume to the gentleman from Maryland (Mr. MITCHELL).

Mr. MITCHELL. Mr. Speaker, I rise in support of the conference report on House Concurrent Resolution 91, the first concurrent budget resolution for fiscal year 1984. Both Houses of Congress have reached a consensus that this report represents the most palatable compromise with respect to spending and revenue targets.

It is imperative that we move ahead and adopt House Concurrent Resolution 91 since the measure also represents a statement that the Congress will maintain certain budget priorities and make valiant attempts to start on the path to massive deficit reductions. This particular budget resolution, provides a change to restore some stability to the heinous cuts which have been proposed by the administration. In the past 2 years, we have witnessed the virtual destruction of our basic domestic programs due to the President's dogmatic adherence to a philosophy which defines the primary role of the Government as providing for the national defense. In the face of continuing high unemployment, unacceptable interest rates, and a painfully slow economic recovery, which is questionable at best, the Congress has a responsibility to restore order and to recommit to the priorities which represent a true investment in the future of our economy.

The conference agreement before you today represents this responsibility. The targets include initiatives to provide jobs for the long-term unemployed. The resolution also includes a program to provide health insurance and benefits for unemployed workers and their families, as well as, an extension of Federal supplemental compensation benefits for the long-term unemployed in fiscal year 1984.

The resolution before us today also takes a viable step in promoting the essential coordination of monetary and fiscal policies. The measure recognizes the critical need to move aggressively in reducing the deficit so that undue pressures on monetary policy might be eased. In fact, the conference agreement provides for a deficit of $179.3 billion in fiscal year 1984 and for a steadily declining deficit over the following 2 years, reaching a deficit level of $130.8 billion in fiscal year 1986. Estimates confirm that this figure will be at least $42 billion lower than the deficit projections in the Reagan budget.

Admittedly, the occasion is rare when I can stand in this House and support a budget resolution. Often we have acquiesced to merely rubberstamping many of the President's budget recommendations. This is not the case with the present resolution. It has incorporated a budget deficit projection of $179.3 billion, restored some semblance of stability to domestic priority programs, and emphasized the dire need for a tightened coordination between fiscal and monetary policies. I emphatically urge the adoption of this conference agreement.

Mr. JONES of Oklahoma. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. Mr. Speaker, as the chairman knows, I have been concerned about the medicare provisions of the budget resolution conference report. I would like to engage in a colloquy with the gentleman very briefly.

It is my understanding that none of the reductions in these programs shall come from increased premiums or increased cost sharings to the beneficiaries or through reductions in services; in other words, can the gentleman

assure me that the thrust of the recommendations that the Budget Committee has made will not come from out of pocket expenses for the elderly, disabled, and the poor.

Mr. JONES of Oklahoma. I thank the gentlewoman for her concern in this regard and she has been in the forefront of protecting those who are the beneficiaries of medicare and elderly and retired citizens.

This medicare savings was first put in the Senate resolution and they assumed they would be achieved mostly by putting some sort of a limitation on the growth of physicians' fees, doctors' fees.

□ 1340

This was discussed very thoroughly in the budget conference, and language was placed in the statement of the managers, which I will quote:

It is the intent of the conferees that none of the savings directed to be achieved for the medicare program shall come from provisions to increase costs to beneficiaries or from reductions in services to beneficiaries. Rather, savings are to be obtained from improved control on providers of service.

And, very clearly, I think that meets the concerns the gentlewoman has. Obviously, this will be a part of reconciliation, it will be handled by the committees involved; but this is clearly the intent of the conferees.

Ms. OAKAR. I thank the chairman for yielding to me.

Mr. McCURDY. Mr. Speaker, will the gentleman yield?

Mr. JONES of Oklahoma. I yield to the gentleman from Oklahoma.

Mr. McCURDY. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of the conference report on the budget and to commend the chairman, the gentleman from Oklahoma (Mr. JONES), for the remarkable job that he has done and the job that the conferees have done in getting an agreement on this budget.

I have seen and understand some of the pressures and dynamics involved in both bodies trying to achieve a budget that could be supported and that could pass, and I think the gentleman has done an outstanding job. I am not sure there would be many in this body that have the capability, the understanding, and patience to work with so many differing positions and beliefs and ideologies to come up with a broad guideline that most of us can support.

Again, I want to commend the gentleman because I think he has done an excellent job. The gentleman is a credit to the Nation, expecially to the State of Oklahoma. I think the people in the First District of Oklahoma are pleased and should be very proud of the dean of our delegation. I look forward to working with the chairman toward taking the first step and later steps in reducing the deficits and bringing back fiscal responsibility in this country.

Mr. JONES of Oklahoma. Mr. Speaker, I thank the gentleman for his kind remarks, and I intend to be involved in the debate on the tax bill which follows the budget resolution, but I want to especially commend the gentleman from Oklahoma (Mr. McCURDY) for the amendment that he will offer to that bill. That amendment, which clearly spells out that the revenues to be gained from that tax bill should go to lowering that deficit and reducing the spending, is an amendment which will be very, very helpful in actually implementing this budget agreement.

Budget conferences are only the first step. You actually have to enforce them in the reconciliation bills, in the appropriations bills, and in the other actions we take. The amendment of the gentleman from Oklahoma will be enormously helpful in making sure that enforcement and that deficit reduction effort is actually achieved.

Mr. McCURDY. I thank the gentleman and I look forward to working with him.

Mr. ROEMER. Mr. speaker, will the gentleman yield?

Mr. JONES of Oklahoma. I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding, and I do want to compliment the gentleman and his committee and the conference committee for the work they have done. It is a significant improvement, I think, my personal opinion, on the budget we passed out of the House. Lower, more realistic taxes, I think that is healthy. A reasonable expenditure of money for military defense, I think that is necessary in the country.

My questions have to do with some of the spending in the bill. I have three quick questions, if the gentleman will yield. They are under the broad category of community and regional development programs, as explained in a fact sheet I got this morning.

No. 1, this report says that the conference agreement provides a little over $5 billion in funding for the general revenue sharing program for each of fiscal years 1984 through 1986, and that this represents $450 million over the current level. That is about a 10-percent increase in general revenue sharing. Is that true? And if we vote for this conference report, are we voting for that kind of increase in revenue sharing?

Mr. JONES of Oklahoma. By adopting this conference report you are not voting for that increase. The increase will actually be voted on when the general revenue sharing bill comes to the floor.

But here is the situation we faced: General revenue sharing has to be extended. It expires at the end of this year. The House and the other body have not acted on that yet. The committee in the House by a vote of 37 to 2 increased the general revenue sharing $800 million over the current level. That bill is pending and will come before the floor. The other body has not acted on it, so our choice in the increase over the present level was zero to $800 million, and we settled at a $450 million level. So that will be the parameters when it is considered in this and the other body.

Mr. ROEMER. I appreciate the gentleman's explanation. That helps me.

To read the report further, it says, in point 2: The conference agreement provides $75 million in fiscal year 1984 and $2.5 billion each year, 1985, 1986, for an infrastructure initiative, which is entirely a House initiative, this report says, proudly.

I do not feel that pride, but what is an infrastructure initiative of over $5 billion in the next 3 years?

Mr. JONES of Oklahoma. This is also in the reserve fund. As part of phase 2 and phase 3 recovery, one of the recommendations is that a mostly public works approach be taken to rebuild the deteriorating infrastructure of the United States, not only roads and highways, but transportation systems, water and sewer systems, and systems of that nature. That bill, too, has not come to the floor of the House or to the Senate. Essentially what we have done here is to put this in the reserve fund. If that is authorized and signed by the President, then funds can be released to the Appropriations Committee. But if it is not authorized, it will not be spent for any other purpose.

Mr. ROEMER. Would the gentleman agree that the $5 billion is in the reserve fund, not in the basic spending levels that you have set in the conference report? Is that in the 302 moneys, or is that a separate account, so to speak?

Mr. JONES of Oklahoma. The reserve fund will not be released as part of the 302 allocations, what we call crosswalking, to the Appropriations Committee, unless the authorizing legislation is passed by both Houses and signed by the President.

Mr. ROEMER. I thank the gentleman.

I have one final question along the same lines, and perhaps it will be the same answer. But to read further, it says the conference agreement provides $50 million in fiscal year 1984, $100 in fiscal year 1985, and $50 million in 1986 for a national industrial development bank.

Now, as the gentleman knows, I am on the Banking Committee. On this particular subcommittee we have had

extensive hearings. We have come to no conclusion either as to the need for such a bank or, if there is a need, how to structure it. Yet I see several hundreds of millions of dollars outlined here.

Would the gentleman explain that to us?

Mr. JONES of Oklahoma. The national industrial development bank will fall into the same category as the infrastructure initiative that we just discussed. This will be in the reserve fund. This was generally contemplated by those who were pushing this concept as part of the phase 3 recovery program. It is a concept designed to provide a source of capital to revitalize the basic industrial structure of the United States. I recognize that the concept has not been translated into any kind of a law or legislative proposal yet, as far as I know. Therefore, that money will not be spent unless and until it actually is put into authorizing legislation, passed both the House and the Senate and signed by the President.

Mr. ROEMER. Finally, is it the chairman's position that a vote for this conference report is not in fact a vote for any or all of these additional spending programs, as so proudly outlined in this factsheet?

Mr. JONES of Oklahoma. The gentleman is correct.

As I pointed out in my opening remarks, this concept of the reserve fund enables those Members who are pushing consideration of these programs an opportunity within the confines of the Budget Act to have their proposals be considered.

But for those who were concerned that this sum of money could be used for other purposes that already now exist and thus add to the deficit irrespective of the recovery initiatives, that would be prevented in the reserve fund concept.

This was the best way we could find to deal with the situation that had not yet been settled in either the House or the Senate. So as the gentleman well knows, voting for a budget conference report is voting on limitations. It does not require that you vote for every piece in there, whether it is defense, foreign aid, or domestic programs, but it does set limitations.

Mr. ROEMER. I thank the gentleman.

□ 1350

Mr. LATTA. Mr. Speaker, I yield myself 1 minute.

I listened to the colloquy between the chairman and the gentleman from Louisiana, and I would like to get the attention of both of the gentlemen at this time.

In answer to the question propounded by the gentleman from Louisiana about the reserve fund, the chairman not only once, but a couple different times, stated that we would have to have this legislation authorized and signed into law. Well, the conference report disputes that. Let me read from the conference report on page 21.

> Upon the enactment of any legislation referred to in subsection (a) which requires an appropriation, or upon enactment of an appropriation for such purpose before the authorizing legislation is enacted, * * *

Now, that clearly says we can do it through the appropriation process.

The SPEAKER pro tempore (Mr. FOLEY). The time of the gentleman from Ohio (Mr. LATTA) has expired.

Mr. LATTA. Mr. Speaker, I yield myself 1 additional minute.

Mr. PANETTA. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from California.

Mr. PANETTA. I thank the gentleman for yielding.

Mr. Speaker, if the gentleman will read this, it says, "Upon enactment of an appropriation." The basic reason for this provision was because, in fact, there is a precedent where the Committee on Appropriations has appropriated for programs that have not been authorized. But the money is not released until there is passage of that appropriations bill by the House, by the Senate, and signed by the President. That is the reality we are dealing with.

Mr. LATTA. Mr. Speaker, if I may reclaim my time, that is not what the chairman said. He said a bill authorized by this Congress and signed into law.

What I am pointing out is that we can do the same thing under this language through the appropriation bill. There is no question about it. It is right there in black and white.

And let me say also that it has been called to my attention that the document that we were working from over there has been changed from the time it left the conference until it got into this report, and that might be confusing the chairman.

Mr. ROEMER. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I would be happy to yield to the gentleman from Louisiana.

The SPEAKER pro tempore. The time of the gentleman from Ohio (Mr. LATTA) has expired.

Mr. LATTA. Mr. Speaker, I yield myself 1 additional minute.

Mr. ROEMER. I thank the gentleman for yielding.

For the record, and in truth, is the gentleman saying that the chairman of our Budget Committee is in any way misleading when he makes the case that the reserve fund moneys are not automatically spent; that they require direct action by the House, the Senate, and a signature by the President of the United States?

That is what I heard the chairman say. Is the gentleman taking a different position than that?

Mr. LATTA. I am just reading what the conference report says, and let it speak for itself.

Mr. ROEMER. Well, I wish the gentleman would speak to the question. Is the gentleman taking a different position than the chairman of the Budget Committee?

Mr. LATTA. I am taking the position, if I may reclaim my time, right here that it states specifically in this conference report on page 21 that there are two ways of doing it, and the word "or" has been inserted, and he can do it on an appropriation bill or he can do it through an authorizing bill, as the chairman has indicated.

Mr. JONES of Oklahoma. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I would be happy to yield to the gentleman from Oklahoma.

Mr. JONES of Oklahoma. The gentleman may not have been at the conference at the time this particular situation was discussed. As I recall, it came in connection with the math/science initiatives, and essentially what we had there was a situation——

The SPEAKER pro tempore. The time of the gentleman from Ohio (Mr. LATTA) has expired.

Mr. LATTA. Mr. Speaker, I guess we are running out of time. Let me say that I will yield myself 30 seconds. If the gentleman wants to explain it further, he can do it on his own time.

Mr. JONES of Oklahoma. No. My statement still stands, Mr. LATTA, and I do not need to explain it any further.

Mr. LATTA. Mr. Speaker, all we have to do is to look at the conference report, read the language, and I think most people can understand that language. It is very clear. There are two ways of doing it. So we do not want to mislead anybody and to state anything other than what is in that conference report.

Mr. Speaker, I yield 5 minutes to the gentleman from Texas (Mr. GRAMM).

Mr. GRAMM. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in opposition to this budget proposal, and I would like to begin by setting the record straight.

We have two different changes that have been made which make it very difficult to compare what the President has proposed and what the conference committee has reported. First of all, the committee changed the economic assumptions and lowered the deficit by $14 billion. But we are dealing with the same economy, and we need to apply the same assumptions, as our chairman has said over and over in the past.

Second, the committee has come up with a contingency fund proposal which says, "If you spend it, it is

spent; if you do not spend it, it is not spent." I think everybody knows what that means.

Let us look at the part of the budget that is binding, let us look at the same assumptions and under the same scoring process and see what this budget does relative to the budget proposed by the President.

First of all, this budget raises taxes in the binding part of the budget $10 billion above the level recommended by President Reagan. Some people think taxes ought to be raised. I am not one of them, but some people think we ought to raise taxes.

It proposes cutting defense $12 billion below President Reagan's recommended level. There are some people who think we ought to cut defense. Again, I do not happen to be one of them. I want a prudent control on defense growth, but I do not think we ought to slash defense.

Finally, it raises the deficit by $13 billion above the level recommended by President Reagan.

Now wait a minute. If we raise taxes by $10 billion, that is supposed to lower the deficit. If we cut defense by $12 billion, that is supposed to lower the deficit. But yet the deficit in the part of the budget that is binding is up $13 billion.

What happened? What happened was the committee did not raise taxes to lower the deficit and it did not cut defense to lower the deficit. It raised taxes, cut defense, and raised the deficit to fund $29 billion worth of new spending add ons.

So if Members vote for this budget, they are voting to raise taxes, to slash defense, to raise the deficit so we can go on spending as usual here in Washington.

Mr. ROEMER. Mr. Speaker, will the gentleman yield?

Mr. GRAMM. I will be happy to yield at the conclusion of my remarks.

What we are doing here is asking that we return to the policies of the 1960's and 1970's, that we return to the policies of cutting defense, raising taxes, raising the deficit, so that we can go on spending as usual here in Washington. And what a great paradox it is now that our effort to control spending in the last 2 years is now bearing fruit. The economy is recovering; the inflation rate has collapsed; interest rates have been cut in half, 800,000 people have gone to work since January. If we can sustain this recovery, we can put 5 million more people to work in the next 3 years.

Does anybody believe that we are going to sustain the recovery by raising taxes and raising the deficit so we can go on spending as usual? This is not an economic document. This is a political document which says to every special interest group in America that the national Democratic Party cares more about every special interest prospending group in America than it does about the working people and the people who would like to be working.

This is an election year document that unfortunately is going to affect real people who are out there waiting to go back to work. It is going to offset the gains of the last 2 years, and I urge my colleagues to defeat this budget so that we might go back to the drawing board and put together a budget that does, indeed, control spending and that does lower the deficit.

Mr. ROEMER. Mr. Speaker, will the gentleman yield?

Mr. GRAMM. I would be happy to yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding.

Two questions quickly: One is on the deficit figure that the gentleman from Texas used. We have been told that the conference report yields a lower deficit than the budget that passed the House a couple months ago. I believe that is true. The gentleman has come up with a new statistic and says that the President's budget, if it had been adopted, would have yielded an even lower deficit.

Mr. GRAMM. Let me respond to the gentleman by saying that when you convert to the same economic assumptions and use the same scoring, the deficit in this budget is $8 billion higher than the President's proposal in fiscal year 1984, $5 billion above in 1983 revisions. And $8 billion plus $5 billion is $13 billion. So this budget raises the deficit in the area of the budget which is binding. This budget does not raise taxes to lower the deficit. This budget does not cut defense to lower the deficit. This budget raises taxes, cuts defense, raises the deficit, all so we can go on spending here as usual here in Washington.

We have an election year choice, 1 year early: We can vote to show we care more about every prospending special interest group in the country than we do about the people who want to go to work or we can vote to sustain the recovery. If you want to raise taxes, cut defense, and raise the deficit so we can go on spending, vote for this budget. If you do not want to do those things, vote against this budget so we can go back to the drawing board.

□ 1400

Mr. LATTA. Mr. Speaker, I yield 5 minutes to the gentleman from Texas (Mr. LOEFFLER).

Mr. LOEFFLER. Mr. Speaker, I thank the gentleman for yielding this time to me, and I rise in strong opposition to this budget conference report.

I might just continue the discussion that was just terminated between the gentleman from Texas (Mr. GRAMM) and the gentleman from Louisiana (Mr. ROEMER). I have in my hands now a document that is approximately 1½ hours old. It is the most recent and authoritative analysis by the Congressional Budget Office, and it addresses the deficit numbers the gentleman was asking about in a different way than what he asked our colleague and friend, the gentleman from Texas (Mr. GRAMM).

The bottom line by the Congressional Budget Office, comparing the President's budget request with this conference budget resolution before us, is that the adjusted deficit for the President's budget request would be $170.8 billion in fiscal year 1984, and if this budget resolution is agreed to by the conferees—most of the conferees, I should say—it is $179.3 billion. So there is approximately a $10 billion difference; an add on of $10 billion by this conference report before us.

Mr. ROEMER. Mr. Speaker, will the gentleman yield?

Mr. LOEFFLER. Mr. Speaker, in addition, I wish to say to my friend, the gentleman from Louisiana, that this is using the same economic assumptions, in order that the apples and oranges of the past can be compared as a common grapefruit.

Mr. ROEMER. Mr. Speaker, will the gentleman yield?

Mr. LOEFFLER. I am happy to yield to the gentleman from Louisiana.

Mr. ROEMER. Mr. Speaker, I will limit it to that point. That is the deficit, and I appreciate the figures of the gentleman from Texas.

I will ask if this $179 billion deficit figure in the conference report includes the reserve or excludes the reserve?

Mr. LOEFFLER. It includes the reserve, consistent with the language in the conference report.

Mr. ROEMER. So what would those figures be, excluding the reserve? Does the gentleman have that?

Mr. LOEFFLER. If we exclude the reserve, we are talking about something in the range of a billion dollars-plus over what the President's request was.

Mr. ROEMER. But would the gentleman agree that excluding the reserve the figures are the same?

Mr. LOEFFLER. The Congressional Budget Office includes the reserve in spending.

Mr. ROEMER. Mr. Speaker, I thank the gentleman from Texas (Mr. LOEFFLER).

Mr. LOEFFLER. Mr. Speaker, I would like to address another item that is involved in this budget resolution, and that is if this budget is designed to reassure the business community and the financial markets on the question of the resolve of Congress to set its fiscal house in order, let me assure the Members of this body that it has failed miserably. Tax increases cannot produce lower interest rates. Additional taxes crowd productive dol-

lars out of the economy in the same way that higher deficits do.

So if certain Members believe they can raise taxes to reduce the deficit with a commensurate GNP-neutral effect as opposed to an outright reduction in Federal spending, that is just not true.

Some have argued that a combination of tax increases and spending reductions would lower the deficit enough to reduce interest rates. I question this equation unless a serious and realistic effort to restrain excessive spending, not simply by gutting our national defense capabilities, is made. Financial markets will not be fooled into thinking that deficits are being brought under control.

In addition, Mr. Speaker, the recovery that is currently ongoing depends in large part on consumer spending, for consumer spending accounts for between 60 and 65 percent of the demand for goods and services. This basically is a great element in achieving new, lasting, and real jobs as we are now in the process of reducing unemployment. If Congress intrudes on the third year 10 percent personal income tax reduction in any way—and we will be looking at that later today—it will in effect stifle economic recovery by preventing increased consumer spending and by disallowing sustained and solid recovery.

Mr. Speaker, there is no question, then, that we are looking at a situation that calls for massive tax increases, and just in the unlikely event that the tax increase bill that we will be considering later today would become law over the objections of the President and many of us on this floor, there would still be a need for an additional $6 billion to be raised for fiscal year 1984, and over the 3-year projection between fiscal year 1984 and fiscal year 1986, we would need to raise $73 billion in taxes over and above the existing law that we know today.

My question to this body and to the American people for their own determination is this: What segment or segments of our society will be asked to shoulder this back-breaking tax burden? Will if come from a specific industry? Will it come from everyone across the board in the form of a surtax? No one knows. The American people have been taxed to death. We simply cannot afford additional taxes.

Mr. Speaker, I urge my colleagues to defeat this conference report, and I thank the gentleman from Ohio (Mr. LATTA), for his distinguished leadership in this area.

Mr. JONES of Oklahoma. Mr. Speaker, I yield 2 minutes to the gentleman from New Mexico (Mr. RICHARDSON).

Mr. RICHARDSON. Mr. Speaker, I rise in support of the conference report on the first concurrent budget resolution, although I have some problems in the spending area that I wish to point out.

I felt the 4-percent real increase in defense spending provided for in the House-passed budget resolution was generous. The House plan would have strengthened America's defense in a prudent, effective, and responsible manner. But the 5-percent increase in defense spending provided in the conference committee report is a bit excessive. I will admit it is certainly better than the President's proposal for 10 percent growth in the Pentagon budget. But giving the Pentagon $270 billion next year as the conference report budget calls for will only foster the waste we all hate to see without effectively strengthening our national security. I think my colleagues will agree you cannot solve a problem by throwing money at it.

Mr. Speaker, we continuously hear calls for more responsible Federal spending and for lower Federal deficits. The House took action to reduce these unconscionable deficits that threaten to choke off economic recovery. The House-passed budget would produce a deficit $5 billion lower than the conference budget in fiscal year 1984 and $15 billion lower than the conference budget in fiscal year 1985.

Mr. Speaker, domestic programs really took it on the chin in the conference budget. Domestic spending in the conference budget is $6½ billion less than the House budget called for. Medicare, food stamps, child nutrition programs, programs designed to protect and assist those Americans who have been left behind in this cruel recession were all slashed. Necessary community and regional development expenditures were cut by more than $1 billion. Even in the face of reports that our Nation is facing a severe crisis in education the conference budget contains almost $2 billion less for education and employment programs than the House-passed budget.

Yet, I still must vote in favor of the conference report because we must not let the budget process collapse. Admittedly the budget process has not been taken very seriously during the past 2½ years, as the record budget deficits during the Reagan administration show.

But if Congress is unable to pass a budget resolution, however imperfect, the budget process will fall apart, we will be blamed for being unable to discipline ourselves and we will be lambasted by a President who wants more defense, less for domestic spending and who cares not in the least about the record deficits he wants to pile up year after year.

The President has asked for fiscal responsibility and we can give him just that by passing the budget resolution. But it is the President who threatens to walk away from the budget process and veto tax and spending bills. It was the President who produced a budget with deep domestic spending cuts and a deficit approaching $200 billion as far as the eye could see. If this is not fiscal irresponsibility, I do not know what is. Members of the President's own party rejected his budget as totally unrealistic and too harsh on the poor. But the President's eyes remain closed.

Congress must pass a budget and demonstrate to the American people that we are not the irresponsible ones. That blame belongs at the other end of Pennsylvania Avenue.

Mr. LATTA. Mr. Speaker, I yield 3 minutes to the gentleman from Michigan (Mr. PURSELL).

Mr. PURSELL. Mr. Speaker, first I want to congratulate the Budget Committee for its work in a difficult process. Even though I disagree with the result, the process is critically important to this Congress.

Mr. Speaker, when the Governor of Michigan proposed earlier this year sizable tax increases and only marginal deficit reductions as a way of addressing Michigan's fiscal crisis, I issued a statement summarizing my concern. I cautioned the Governor and the Michigan Legislature that "Michigan cannot tax itself into prosperity." Much to my regret, the conference on the first budget resolution has chosen the same unwise path of increases in taxes, spending, and deficits.

At a time when the Nation is experiencing signs of economic recovery, I believe it is a serious mistake to increase taxes.

In almost every respect, this conference report offers the wrong solution for the Nations problems. An additional $73 billion in taxes over the next 3 years, $12 billion alone in fiscal year 1984, is proposed by this budget resolution. Most objectionable of all of the provisions is the assumption that the third year of the tax cut is to be capped; $6 billion cannot be removed from the pockets of the American taxpayers at a point when consumer spending is just beginning to accelerate. Deficits cannot be reduced simply by raising taxes. Unfortunately, this is the path chosen by the conference report.

For every dollar of increased taxes, the conference report requires only 16 cents in reduced spending. That is $73 billion of new taxes and only $12 billion in reductions. This is less than one-half of 1 percent of what the Federal Government will spend over the next 3 years. That is hardly restraining the growth of Federal spending.

Mr. Speaker, economic prosperity does not spring forth from tax increases and fiscal responsibility is not fostered by raising Federal deficits. Therefore this Nation—like Michigan—cannot tax itself into prosperity.

I urge defeat of this conference report.

□ 1410

Mr. JONES of Oklahoma. Mr. Speaker, I yield 1 minute to the gentleman from Michigan (Mr. TRAXLER).

Mr. TRAXLER. Mr. Speaker, I thank the gentleman for yielding.

I rise in strong support for the budget resolution.

My distinguished colleague, the previous speaker, the gentleman from Michigan, and my good friend, failed to tell the committee that the facts of the matter in Michigan were that the Democratic Governor there inherited the situation from his Republican predecessor in which the State was nearly a billion dollars in debt and was faced with absolute bankruptcy.

Governor Blanchard and the legislature acted courageously to protect our State from the horrendous possibilities of school closing, payless paydays, and a black mark that would have blemished our good State's name.

Fortunately, courage and sensibility carried the day in the face of those who would have continued a policy which would ultimately have seen great schools like the University of Michigan at Ann Arbor, which the gentleman represents, closed.

We have similar situations not unlike that in Michigan present in this Federal Government, with a President that insists upon running deficits which in 4 years will equal that of 200 years of his predecessors.

The SPEAKER pro tempore. The time of the gentleman has expired.

Does the gentlewoman seek recognition?

Mrs. MARTIN of Illinois. Mr. Speaker, could the Chair inform us how much time each side of the aisle has remaining?

The SPEAKER pro tempore. The gentleman from Oklahoma has 35 minutes left and the gentleman from Ohio has 21½ minutes left.

Mrs. MARTIN of Illinois. Then we will allow the other side of the aisle to catch up.

Mr. JONES of Oklahoma. Does the gentlewoman want to yield back her time?

Mrs. MARTIN of Illinois. Mr. Speaker, I am reserving the balance of my time.

Mr. JONES of Oklahoma. Our side just spoke. If the gentlewoman does not want to use her time and have her side go forward, the gentlewoman can reserve her time and we can reserve ours and we can dispense with the rest of the debate.

Mrs. MARTIN of Illinois. Mr. Speaker, may I ask the outstanding chairman, the gentleman from Oklahoma, will he then yield that time to us?

Well, we will reserve our time for now and await the gentleman's decision.

PARLIAMENTARY INQUIRY

Mr. JONES of Oklahoma. Mr. Speaker, I would like to state a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. JONES of Oklahoma. Mr. Speaker, if we reserve our time, is the previous question then in order?

The SPEAKER pro tempore. Will the gentleman restate the question?

Mr. JONES of Oklahoma. The gentlewoman has reserved her time. If we reserve our time, is the previous question then in order?

The SPEAKER pro tempore. If neither side yields time, the Chair will entertain a motion for the previous question from the manager of the motion.

PARLIAMENTARY INQUIRY

Mr. SHUSTER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. SHUSTER. Mr. Speaker, if not the rules of the House, is it not the tradition of the House that the side with the most time remaining takes the floor?

The SPEAKER pro tempore. That is one variable. Alternating from side to side is another tradition of the House.

Mrs. MARTIN of Illinois. Mr. Speaker, I yield myself 30 seconds.

Mr. Speaker, this 30 seconds will just be on one level of a bipartisan thank you.

I have always respected the political acumen of the majority and never expected to receive a gift, such as we are being given today. A tax increase and a ludicrous budget on a platter are being given to my party, to be used not just this year, but next. We are extraordinarily grateful on this side, although a little surprised that those kinds of judgments could have been made. But we will happily use that tax increase to show the American people what the parties stand for.

Mr. JONES of Oklahoma. Mr. Speaker, I yield myself 30 seconds just to point out to the gentlewoman that the tax bill is the next bill to be considered. We are on the budget conference report right now. As far as the debate is concerned, we have been alternating back and forth. The fact that the ranking minority member used 22 minutes as one speaker is beyond my control.

Mr. Speaker, I yield 1 minute to the gentleman from Montana (Mr. WILLIAMS).

Mr. WILLIAMS of Montana. Mr. Speaker, as a member of the House Budget Committee, I join my colleagues in urging adoption of the conference report on the first budget resolution. This budget is a definite change from past practice.

For openers, the conference agreement reduces the deficit by at least $48.2 billion and potentially $66 billion lower than the deficit in the President's budget.

While reducing the deficit, this budget will create jobs if the Congress follows through and enacts programs which are provided for in the reserve fund. The agreement provides for $6.060 billion in budget authority and $5.350 billion in outlays in fiscal year 1983, and $8.325 billion in budget authority and $8.525 billion in outlays in fiscal year 1984. Programs funded are primarily new initiatives to alleviate the effects of the recession and to promote economic recovery. Included are: loan foreclosure relief for farmers, foreclosure relief for the unemployed, public works, national industrial development bank, job programs, health insurance for the unemployed, extension of unemployment benefits, expanded eligibility for food stamps, and veterans' job training.

Funds will be allocated to committees when the above programs become authorized.

Specifically, the conference agreement provides $4.5 billion in budget authority for fiscal year 1983 and $3.5 billion in budget authority in fiscal year 1984 for a new jobs program in the reserve fund, which could provide jobs to 600,000 to 800,000 long-term unemployed persons. The budget provides $4.564 billion in budget authority in fiscal year 1984 for job training under the Job Training Partnership Act (JTPA) as well as $3.611 billion for forward funding of this program. JTPA passed the 97th Congress and was embraced by President Reagan as his program.

The conference agreement on the first budget resolution for fiscal year 1984 provides $16.10 billion in budget authority and $14.85 billion in outlays for education programs. This reflects an even compromise with the Senate and provides for an increase of $0.8 billion above the current level of funding including:

A $613 million increase for compensatory education;

A $496 million increase for student financial assistance for higher education;

A $325 million increase for a new math-science initiative;

A $97 million increase for vocational and adult education; and

A $50 million increase in education for the handicapped.

The first budget resolution for fiscal year 1984 provides $430 million in budget authority and $214 million in outlays for a math-science education initiative. This House has passed H.R. 1310, which authorizes $425 million for scholarships, grants, teacher training, research, and other initiatives to enhance the quality of math and science education in the country.

Why do we need these jobs now?

In May 1983, 11.2 million American workers were unemployed, for an overall national unemployment of 10.1 percent. Despite a drop in unemployment since its peak in December 1982 at 10.8 percent, the current rate is still the highest of any unemployment rate between the years of 1940 and 1982. In addition to the number of workers officially counted as unemployed, an additional 2 million people also are jobless but have given up hope of finding work. These discouraged workers are no longer counted among the officially unemployed. Among those people who are currently working, about 6 million are forced to work part time because they cannot find full-time employment.

Unemployment among blacks in May 1983 stood at 20.6 percent. The overall youth unemployment rate in May was 23 percent. Among black youth, the May 1983 jobless rate was 48.2 percent. Virtually one of every two black teenagers is actively seeking but unable to find a job.

The recent drop in unemployment has not resulted in a comparable increase in the number of people who are finding jobs. Since December 1982, the portion of civilian workers who are unemployed has dropped from 10.8 to 10.1 percent. However, at the same time, the total number of civilians in the labor force also has dropped, from 111,129,000 to 110,749,000. Therefore, the drop in unemployment has occurred, not because more people are finding jobs, but because the labor force itself is shrinking as more people give up hope of finding work.

Unemployment declines since December 1982 have not equally benefited all sectors of the work force. While joblessness has dropped slightly for adult whites and black men, the unemployment rate among black women aged 20 and over has actually increased since December 1982, rising from 16.5 to 17.1 percent in May 1983.

Despite the drop in the overall unemployment rate since December, the number of people who are long-term unemployed has continued to climb sharply. In December 1982, when unemployment is considered to have peaked, 38.8 percent of the unemployed had been jobless for at least 15 weeks, and 21.3 percent of the unemployed had been idle at least 27 weeks. In May 1983, the portion of unemployed remaining jobless for at least 15 weeks had climbed to 41 percent and those jobless for at least 27 weeks had increased to 25.3 percent. Meanwhile, the average number of weeks of unemployment in December 1982 was 18; by May 1983, the average duration of unemployment had increased to 20.4 weeks. As a result, the total number of weeks of unemployment in May 1983 was higher than in December 1982, despite a drop in the unemployment rate.

The Joint Economic Committee has released data which show the severity of unemployment in May 1983 is the worst of any time since 1948, despite the recent drop in the overall unemployment rate. In May 1983, 11.2 million people were unemployed for an average of 20.4 weeks, for a total number of weeks of unemployment of 228 million. By contrast, when unemployment peaked in December 1982, 12 million people were out of work for an average of 18 weeks, for a total number of weeks for unemployment of 216 million. Meanwhile, in June 1981, the month before the current recession began, 7.7 million people were unemployed an average of 14.2 weeks, for a total number of weeks of unemployment of 109 million.

Although most economic forecasters agree that recovery may be beginning, even the most optimistic concede that recovery will be very slow-paced compared to recoveries from previous postwar recessions. Most forecasters do not anticipate that unemployment will drop below an average of 9 percent until after 1984. Unemployment is not expected to reach its prerecession level until after 1988 at the earliest, according to several forecasters including the Congressional Budget Office.

After most of the postwar recessions, unemployment during the recovery phase has been higher than after the previous recession. In the peak month of the 1969–73 business cycle, unemployment stood at 4.8 percent. In the peak month of the 1980–81 cycle, unemployment was 7.2 percent. Meanwhile, unemployment during the 1981–83 recession appears to have peaked at 10.8 percent. Even with a sustained recovery, unemployment is not expected to reach its prerecession level of 7.3 percent in June 1981 until after 1988 at the earliest.

In March 1983, the unemployment rate in 22 States was higher than the national average. In all but eight States, unemployment had climbed between March 1982 and March 1983.

Of a total 243 metropolitan areas, unemployment rates in 183 had risen between March 1982 and March 1983. As of March 1983, 94 metropolitan areas had jobless rates above the national average.

Bureau of Labor Statistics Commissioner Janet Norwood recently told a group of business writers that "Economic recovery alone will not be enough for certain groups of workers. Without additional help, blacks, women, youth and displaced workers will be left behind," she said.

Congress in March 1983 provided $4.6 billion in an emergency supplemental jobs appropriations bill—Public Law 98-8. However, this measure primarily speeded up already planned spending for a variety of existing Federal programs with no guarantee that the additional funding be used to create jobs. At best, the money is expected to create between 300,000 and 400,000 jobs, many of which will not be full-year jobs. Further, most of the employment that will be created will be on public works projects, primarily assisting unemployed construction workers. Meanwhile, women and minorities, who respectively comprise 41.5 percent and 29 percent of the unemployed, comprise only 1.3 percent and 7.3 percent of construction workers.

Within days of signing the emergency jobs supplemental appropriation, the administration announced plans to propose a 50-percent reduction in outlays for programs included in the measure between now and 1988.

I urge my colleagues to support this budget compromise. It meets our national compass and makes fairness once again a national goal.

Mrs. MARTIN of Illinois. Mr. Speaker, I yield 3 minutes to the ranking minority member of the Ways and Means Committee, the gentleman from New York (Mr. CONABLE).

Mr. CONABLE. Mr. Speaker, we have had a great deal of talk here today and a great many figures of various sorts thrown around. I must say, there seems to be very little agreement.

I think it is fairly clear that whatever the variables may be, that we are going to wind up with a deficit of close to $182 billion, if you assume that withholding is repealed, and I have to assume that given the state of that legislation in the two Houses of the Congress.

It is important to understand when people talk about the necessity of preserving the budget process that the budget process has been desirable for this body. Before the early 1970's, we had no legislative budget as such. The procedure was brought into place when a coalition of liberals and conservatives, each for their own reasons, decided that it was desirable that we not do whatever lovely thing we wanted to do whenever we wanted to do it, but instead have some set of priorities which we could use and fall back on if we disagreed with the priorities the President had expressed in his Executive budget.

I think any objective observer would have to acknowledge that the empirical evidence produced by our legislative budget process does not indicate that it has been a smashing success, at least in fiscal terms. Since the early 1970's, we have, in fact, had more supplemental appropriations and bigger deficits than we had before. I do not think that is the fault of the budget process. It is the harvest of Great Society programs passed during the late 1960's when we built in demand for governmental services and converted many appropriations to entitlements.

That started a spending avalanche down the hillside.

What I am saying, Mr. Speaker, is that I would prefer to have a budget, if we can have it; but when the end product of that budget process is a deficit of $182 billion, I think there is serious question whether it is worth the price we are paying.

□ 1420

I do not believe if we fail to get a budget this year the budget process will disappear permanently. Presumably we will continue to try to work out legislative priorities which will express the collective wisdom of this body.

I think it is entirely possible we might wish to make the budget process a more effective process if this year it proves to be a failure. But clearly fiscal policy transcends any particular procedure and it is my hope that my colleagues will decide not to pay the price they are being asked to pay for a conference report which bears such bitter fruit.

I urge the defeat of the conference report.

Mr. JONES of Oklahoma. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. DOWNEY), a distinguished member of the committee.

Mr. DOWNEY of New York. Two years ago, of course, Mr. Chairman, the President embraced the budget process because it served his political and economic ends, and this Congress swallowed, whole, his version of fiscal alchemy, and we are left in the condition we are today.

Ronald Reagan said that the recession was not his and I think it is only fair to say neither is the recovery. The dynamism of this economy is such that it is recovering despite these disastrous fiscal policies.

But the Members of the House and the Members of the other body have decided that they, unlike the President, are not going to play politics, they are going to try and forge some sort of an agreement that has as its deficit a deficit even below that of President "Borrow."

I want to point out in particular in the area of military spending the fact that some tough choices are on the horizon. We have been lavish in the needs of the military. From the period 1981 through 1983 we provided for a growth rate of some 32 percent. What we will be providing now is a growth rate from fiscal year 1984 through 1986 of 15 percent. We will be spending cumulatively over this period $895 billion on the military.

Despite that, and that is certainly not a starvation figure, we are going to have to make some tough choices in R&D and procurement because in those accounts we have seen the most dramatic growth. In fiscal year 1980 we spent $49 billion and in those two accounts in 1984 we will be spending $123 billion, an increase of some 105 percent.

We are going to have to make some decisions on weapons systems we do not think we need if we are going to comply with the 5-percent real growth figure. If we do not do that, we will cut spares, and parts, and ammunition, and do all of the things that the President accused President Carter of doing in 1980.

I do not think we want to do that. I think we want to provide for a strong military, but it is going to require us making decisions on some weapons systems we want and others that we do not need.

Mrs. MARTIN of Illinois. Mr. Speaker, I yield 2 minutes to the gentlewoman from Maryland (Mrs. HOLT).

Mrs. HOLT. Mr. Speaker, if, indeed, the House of Representatives votes to approve the two measures before us today, the taxpayers will remember this as a day of shame for this country.

First comes the 1984 budget conference report, which calls for tax increases of $73 billion over 3 years to support more spending on an assortment of domestic programs. The gentleman from Texas pointed out that there is no reduction in spending from the tax increase—no reduction in the deficit.

Next comes the legislation to put a $700 cap on the amount of relief available to any taxpayer from the scheduled July 1 reduction of tax rates. Consider this the first installment of the tax increases that the budget conferees have in mind.

During my more than 10 years in Congress, I have seldom seen a day in which middle-income taxpayers were threatened with such abuse.

I would remind my colleagues that the budget is not terribly out of balance for lack of tax revenues. It is out of balance because of the recent recession and because of a long history of congressional extravagance in spending.

It is spending that is the problem. Every economist who has come before the Joint Economic Committee says we have to curb spending, we must do it. It was the reckless spending of the 1970's that created the double-digit inflation and rising tax burden that ultimately crushed the economy with 3 consecutive recession years in 1980, 1981, and 1982.

In the past 2 years, with strong and effective leadership from the President, we have laid the foundation for economic growth. Spending has been restrained, the inflation rate has dropped to the lowest level in 10 years, and taxes have been cut.

We are in the sixth month of economic recovery, and current estimates indicate that real GNP will have grown at an annual rate of 6.6 percent in the second quarter of 1983.

The prospects are excellent for strong and sustainable economic growth in the months and years ahead if Congress does not wreck the recovery with a new eruption of spending and taxes.

The 10-percent cut in tax rates due July 1 is extremely important to continue and strengthen the economic recovery, but the House majority leadership is today proposing to reduce that needed relief.

It is a proposal that is an assault on middle-income families.

Anybody who is concerned about the unemployment problem will vote against this budget and the tax bill. They would both erode consumer purchasing power and limit the ability of people to save and invest for productive economic growth.

The unemployment rate has dropped from 10.8 percent in December to 10 percent in May, and will continue to fall if we continue on the course of economic growth. It would be a tragic error to return to the failed policies of the 1970's represented by the two bills before us today.

I urge a vote against the budget resolution.

Mr. JONES of Oklahoma. Mr. Speaker, I yield 4 minutes to the gentleman from California (Mr. PANETTA), the distinguished chairman of the Reconciliation Task Force of the Budget Committee.

Mr. PANETTA. Mr. Speaker, first of all I want to commend the chairman of the committee and all of the other members who participated in the conference, both on this side and in the other body, for the hard work and dedication they put into this budget resolution.

Budget resolutions are, by their very nature, difficult, challenging, and controversial, and this resolution is no different. It is a tough vote to support this resolution, but I also think it is the right vote.

It is the right vote institutionally, because it implements the budget process and, very frankly, this is the only game in town.

The President has literally walked away from the budget process and now proposes a nonpolicy of vetoes, of chaos, of constant confrontation. His budget was dead on arrival here.

I find it rather interesting that Members are now using CBO figures to compare it to the President's budget when no one, no one offered the President's budget in committee or on the floor, at any time, on either side of the aisle and, indeed, his budget was rejected unanimously by the Senate Budget Committee.

So in that vacuum, what do we do? The Congress has a responsibility under the budget process to develop a

budget framework and to try to implement a process that retains some semblance of fiscal discipline within the institution.

This is also a right vote economically for the country. We are all interested in seeing a sustained, long-term economic recovery. There is no one here who is against that.

We see signs of economic recovery now, and that is good. But everyone knows that we will not sustain a long-term recovery with the size deficits that we are running, and the deficits are immense.

The last 2 years we have enacted the President's budgets. We have endorsed the budgets proposed from the minority side of the aisle. And yet today we are running for 1983 a $203 billion deficit—the largest in history.

We cannot control those deficits if we are going to use a double standard. You cannot pump a trillion dollars into defense and you cannot cut taxes by a trillion dollars and expect that that is going to help you balance the budget or reduce deficits.

No; we do not support a position of tax, tax, tax, spend, spend, spend. Neither do we support a position of borrow, borrow, borrow, spend, spend, spend. That is exactly what the administration is doing now.

The American people do not want either policy.

This resolution is not a return to the 1950's, the 1960's, or the 1970's. It is a return to some kind of commonsense approach that retains some degree of fairness in trying to balance the burden in reducing those deficits.

So we have reduced the growth in defense from 10 to 5 percent—5 percent I might say real growth above inflation. We have tried to restrain the growth in entitlements in this budget resolution. For the first time we limit cost-of-living indexes for all retirement programs for 6 months. We are taking a small step in the right direction there.

We are also in this budget trying to repair the human damage that has resulted from the recession we have been through.

□ 1430

We cannot disregard the need to do that, to try to repair that damage. And we are trying to enforce some targets on spending, through the enforcement mechanisms built into this budget, we are trying to reduce those deficits over the outyears.

This is what the budget is all about. Fair-weather budgeteers who come and go, depending on whether their particular item is in here or not, can walk away from this budget, that is fine. But if we have a degree of responsibility in our soul, we have an obligation to do what is right, for the Congress, for the country, and for the American people. And it is for those reasons that I urge an aye vote on this budget resolution.

Mrs. MARTIN of Illinois. Mr. Speaker, I yield 3 minutes to the distinguished member of the committee, the gentleman from New York (Mr. KEMP).

Mr. KEMP. I thank my colleague for yielding.

I would like to remind my friend from California, that the purpose of a budget is not just to reduce deficits. The purpose of a budget is to encourage and enhance the chances for the very recovery that he has talked about in his remarks. If a budget should interfere with recovery by mistaken spending and taxing policies, that discourages economic recovery, the deficit will not go down, it will surely go up, and stagnation will result. A bad budget is worse than no budget at all in this case.

I served on this conference committee and I support a responsible budget process. But I also believe that to lose sight of the substance of the budget document and strive only to retain the process is not responsible, economically or politically. I can remember in June 1980 we had a budget on paper that was in balance. In this first concurrent resolution of 1981 we had $614 billion in revenues and $614 billion in spending.

The prime interest rate at that time was 18.9 percent.

The Federal funds rate targeted by the Federal Reserve Board was 16.4 percent and had been rising since 1979.

The combination of these interest rates and inflation caused the economy to go into a contraction and the result is a deficit now of an estimate of from $180 to $200 billion.

The purpose of the budget is, again, not to just reduce the deficit. Its most important purpose is to create a climate in which we can grow our way out of these deficits and establish the conditions in this country for noninflationary growth and full employment. That has to be our uppermost policy goal.

The deficit we are facing today, is primarily the result of a Federal Reserve induced credit crunch which caused the recession and shot unemployment up from 6 to 10 percent. Get Americans back to work and the deficits will come down.

In 1980 and 1981 when we were debating the budget the deficit was about 2 percent of GNP, today it is over 5 percent of GNP. Why? I happen to believe we have these deficits because interest rates were kept at 15 or 16 percent for 3 or 4 years shutting off housing, shutting off automobile sales, shutting off all the secondary and tertiary industries associated with autos and housing, such as steel, manufacturing and machine tools. These interest rates hurt our exports, and caused a terrible disruption in world trade. Right now we are experiencing an economy that is about $500 billion below its capacity to perform and fuel output.

Ladies and gentlemen, if our economy were performing near its capacity of utilization of factories and we had a 6-percent rate instead of 10 percent, the deficit would be below $50 or $60 billion.

The key to reducing the deficit is not raising taxes. Instead, it is passing a budget that does not discourage economic growth. Or, as an alternative, having no budget and allowing the President to go ahead and veto those spending bills that are over the target, and keep in place the tax policy necessary to sustain our economic recovery.

The gentleman from California pointed to a trillion-dollar tax cut. Let us look a moment at that trillion-dollar tax cut.

While the Economic Recovery Tax Act of 1981 provided $1,138 billion in tax relief over the years 1981-88, after $489 billion of inflation-induced bracket creep, $270 billion of new social security taxes, $281 billion of new taxes in last year's tax bill, $21 billion in new gasoline taxes, the American people are left with a net tax cut of $77 billion—less than $10 billion a year over 8 years.

Passage of this budget would completely wipe out what is left of the tax relief passed in 1981.

This budget represents ultimate fiscal irresponsibility, and I cannot support it.

It calls for about $18 billion more in spending—after cutting the defense spending increase to half of the President's request—and $12 billion more in taxes for fiscal year 1984 than the President's budget proposal, yet it has a higher deficit. When the revised economic assumptions are applied to the President's budget, the administration's deficit would be $8.5 billion lower than the deficit contained in the conference substitute.

It raises taxes of $73 billion over the next 3 years.

Raising taxes is the surest way to abort our economic recovery. The arguments made for capping the third year of the tax cut do not hold up. The cap would not affect just the rich but would hit families with gross incomes as low as $40,000 and individuals with incomes as low as $30,000.

While the budget agreement is based on revised economic assumptions which reflect a stronger economic recovery than originally forecast by the CBO, there is no restraint in the degree of spending on domestic programs. Rather, the budget compromise contains a $8.5 billion contingency slush fund for additional recession relief programs. Higher economic growth means that we can lower social

spending without reducing services—with more people working there should be less Government spending in these areas—not more.

The budget significantly cuts our defense budget.

It calls for a $80.2 billion reduction in budget authority when compared with the President's request for fiscal years 1984, 1985, 1986.

This reduction will seriously damage our commitment to rearm America necessitating reductions in the force structure, the readiness and stability of our combat forces, and in our modernization program.

Significant reductions would be required in our naval forces, in the research and development budget, and in weapon systems procurement.

We would lose our momentum in restoring our military capability following years of neglect.

I reject the implication of the resolution language that deficit reductions brought about by tax increases reduces pressure on monetary policy since, in the short run at least, tax increases reduce the pool of available spending.

I also reject the notion in the language on monetary policy that a reduction in budget deficits through spending restraint should be accompanied by faster money growth.

I urge defeat of the budget precisely because of this flawed type of economic thinking that has failed in the past.

Sound monetary policy aimed at stabilizing prices and lowering interest rates while cutting tax rates and spending is the only real way to expand the economy and create jobs without inflation.

Mr. JONES of Oklahoma. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan.

Mr. ALBOSTA. Mr. Speaker, I thank the chairman and the Speaker for the time.

I was just listening with great interest to the gentleman from New York describing why we have precedented deficits in this country and why we should be worried about the large deficits. I can tell you, I am worried about the large deficits and so are my constituents in Michigan.

There are several reasons for the large Federal deficits. Among them, increased defense spending, large tax cuts, unemployment and excessive Government borrowing and spending. Also, I would like to bring up another reason for the large deficits. That is we allow some American companies to relocate and invest in other countries. When this occurs, American dollars flow out of this country resulting in fewer investments, workers are displaced causing higher unemployment and the end result is a suffering economy and higher deficits.

As this body considers today the bipartisan budget resolution now before us, I remind the Members that reducing the soaring deficits should be a top priority. I am encouraged that as a result of this bipartisan effort, this budget deals with the combined problems of mounting deficits and economic recession.

The Nation is now on the brink of economic recovery, a recovery which will affect not only Americans, but the economies throughout the world. The choices we make today could tip the economic balance toward recovery—or toward deeper recession.

The Congress in recent months has acted more swiftly and more decisively in a bipartisan manner in addressing the needs and concerns of this country. A bipartisan coalition made sure that the social security system remained solvent. A bipartisan coalition passed a needed jobs bill which will bring relief to our most depressed regions, shore up our crumbling highways, and buy emergency food and shelter for our hungry and homeless.

Now a bipartisan coalition has developed a workable budget resolution for 1984 that not only provides welcomed economic relief, but addresses the problem of high deficits. I urge my colleagues to join me in supporting this bipartisan budget resolution.

Mrs. MARTIN of Illinois. Mr. Speaker, I yield such time as he may consume to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. I thank the gentlewoman for yielding.

Mr. Speaker, I rise in strong opposition to the conference report on the first concurrent budget resolution.

When the Budget Act of 1974 was passed, Congress primary objective was fiscal discipline. The budget process was designed with the objective of using the first concurrent resolution as a tool to set overall spending and revenue targets. These nonbinding limits were to provide guidance to the Appropriations and Authorizations Committees, with the ultimate goal of regaining control of the Federal budget.

The document before us today should be the best example of why Congress has failed at controlling the budget.

This resolution (H. Con. Res. 91) does not control spending. It does not make a serious attempt at controlling the open-ended entitlement programs and discretionary programs. What it does do is take us off the President's economic program—in the early stages of a robust recovery—and return to the pattern of imposing higher taxes on the American people because of our inability to control spending.

Under this bill, our Nation will be faced with a $2 trillion public debt by 1986. The private sector will be burdened with an additional $73 billion in new taxes over the next 3 years. And in 1984 alone, this measure adds another $23 billion in domestic spending programs. In 1985, it adds another $26 billion in domestic expenditures, and in 1986, another $27.2 billion.

For the first time, we have another new element in the budget process—called the reserve fund. These are hidden costs not included in the resolution which are contingent on authorization of individual programs. The reserve fund could add to the budget; $5.3 billion in 1983, $8.5 billion in 1984, $3.4 billion in 1985, and another $2 billion in 1986.

And what is included in this special fund? More jobs bills; new entitlement programs in health insurance for the unemployed; mortgage foreclosure relief for homeowners and farmers; a new national industrial development bank; expanded benefits in food stamps, AFDC, and other current entitlements; more recession relief programs despite the fact that the recession has ended; and a host of other welfare add ons.

On the tax side, this budget proposal directs the Ways and Means Committee to report legislation by July 22, 1983, to raise a total of $73 billion in new tax revenues. Raising taxes at this time, particularly through a $700 limit on the third phase of the tax reductions for middle-income Americans and small businesses, would be the worst thing we could do at this point of the recovery.

The only area where this budget attempts fiscal discipline is at the risk of national security. The President's defense program growth is reduced in half, only 2 years after this Congress agreed our military was in desperate need of modernizing after more than two decades of neglect.

The President has already stated his strong opposition to this budget plan. He has promised to veto individual spending bills that follow this blueprint for economic disaster. And why should he not?

The budget plan before us today is an endorsement of the big Government, social-welfare state formula that brought us high inflation, high taxes, high interest rates, higher deficits and an upheaval in our private economy, which continues to shrink as the Federal budget grabs a bigger piece of our gross national product.

I urge my colleagues to reject this resolution and get to the heart of the problem: Too much spending by Congress.

Mr. JONES of Oklahoma. How many speakers does the gentlewoman have left on her side?

Mrs. MARTIN of Illinois. Four, and it might be five.

Mr. JONES of Oklahoma. We have four. That includes your closing?

Mrs. MARTIN of Illinois. No. That is as far as we know, that is what we

have on the list, which I think was the gentleman's question.

Mr. JONES of Oklahoma. Mr. Speaker, I yield 3 minutes to the gentlewoman from New York (Ms. FERRARO).

Ms. FERRARO. I thank the chairman.

Mr. Speaker, I rise in support of the conference report and I ask unanimous consent to revise and extend my remarks.

Mr. Speaker, I do not know if I quite agree with Senator DOMENICI that this conference agreement is a miracle, but it is the best budget we can get, and I support it. More than past budgets, it is a true product of the congressional budget process, as the Executive tried to take his ball and go home, only to learn that the game could go on without him.

Frankly, I do not like this budget as much as I like the budget we passed in March. The conference agreement does less for victims of the recession, less for women and children, less for the poor. There is less money for education, and more for defense.

On the defense issue, the conference report spends $4.6 billion more in 1984 than the House budget did. I felt—and still feel—that the $21 billion increase over 1983 that we included in the House budget was enough to meet our Nation's security needs. I would have preferred the additional $4.6 billion be spent on domestic programs or used for reducing the deficit.

The deficit in this budget is between $170 billion and $179 billion depending on how much of the phase II jobs and economic recovery program we can enact. The deficit is the result of the Reagan tax and defense policies, and it is far larger than it should be. But without economic recovery and action to restore the revenue base, the deficit problem will continue. In any event, this conference report has much lower deficits, especially in the outyears, than the Reagan budget did.

The House-passed budget made prudent and modest additions in funding for various social programs. I did not view those levels as exclusive, or as some kind of wish list. Taken as a whole, the add-backs we made did not by any means offset the cuts made in the last 2 years by the Reagan administration. Still, this conference agreement reduces the House levels for domestic programs.

Even with the reductions, this is a far better, far more fair, far more compassionate budget than we have had in several years. President Reagan's proposals to make new cuts in social programs that were devastated in the first two Reagan budgets have been soundly and completely rejected. Those few isolated voices which supported the new round of cuts were overwhelmed by a chorus of disapproval from both sides of the aisle on both sides of the Capitol

In this conference report, there is $1.15 billion in new funding for the poor. As I have said many times on this floor, when we talk about the poor in America, we are talking about women and children. The additional funds for food stamps, child nutrition, the WIC program, AFDC, and low-income energy assistance, while less than I would prefer, will help ease the plight of poor women and their children.

I have other reasons as well for supporting the conference report. It provides full funding for mass transit operating assistance, which has now survived three attempts by the administration to eliminate it. It makes room for important initiatives to repair the infrastructure and to establish a National Industrial Development Bank. It increases funding for education, including a new math-science initiative. It offers new medicaid coverage for low-income pregnant women and young children.

Chairman JONES and the members of the conference have worked hard, in the face of long odds, to produce a budget that meets our Nation's most essential needs. We can all quibble with the particulars and the priorities of this budget. But all in all, this is a far better budget conference than we had any reason to hope for last February when President Reagan submitted his now-forgotten budget plan.

As for those who oppose this budget, let me say a few words to them. If you oppose this budget—whether from the left or from the right—because you simply disagree so strongly with its provisions, I must disagree with you, but I respect your position.

If, however, you have decided to vote against the conference report to disrupt the budget process itself, I think you make a serious mistake. I think it is unrealistic, and irresponsible, to scheme and plot against the budget and hope to rescue your pet concerns from the fiscal chaos that will result.

It is ironic that many Members who have taken this second position portray themselves as champions of fiscal discipline and opponents of big deficits. The budget process, with all its problems, remains the best tool that has been devised for keeping track of overall spending and revenue totals. If it has not accomplished all that was hoped for it, it is largely because the system can only work if we are committed to making it work. But in any event, let us not kid ourselves that fiscal responsibility is more likely in the absence of a budget process.

I yield back the balance of my time.

Mrs. MARTIN of Illinois. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. DANNEMEYER).

□ 1440

Mr. DANNEMEYER. Mr. Speaker, I stand in opposition to the conference committee report, not because it taxes too little, but because it spends too much.

This Member from California offered an alternative budget in March of this year, which cut spending by $94 billion to a level of $761 billion for fiscal year 1984. That is a substantial reduction in spending. I think the problem in this country is that we are spending too much, not that we are not taxing too little.

I would like to ask my colleagues on the Democratic side, since you control the Rules Committee on which you have a majority of 2 to 1, why would you decline to make consideration of this budget in order? It would have given each Member in this House a chance to vote, up or down, on cutting spending by $94 billion from what is now being considered by the House.

I have been asking that question since March and I do not understand why you would want to refuse the Members the chance to vote on such a proposal so that every voter next year can figure out where we stand. Why would you not want to have that considered on the floor of the House?

Would the gentleman from Michigan have an answer? Why?

Mr. ALBOSTA. Mr. Speaker, will the gentleman yield?

Mr. DANNEMEYER. I yield to the gentleman from Michigan.

Mr. ALBOSTA. I thank the gentleman for yielding.

Mr. Speaker, I am not going to respond directly to the gentleman's question because I cannot speak for all the Democrats, but let me speak from my own viewpoint.

If, by 1987 or 1988 or 1989, create another trillion dollars of deficit——

Mr. DANNEMEYER. Let me reclaim my time.

Is the gentleman in favor of letting the gentleman from California have an alternative to have the House vote up or down on cutting spending by $94 billion? Is the gentleman in favor of that? May the record show that there are about 20 Democrat Members on the floor of the House and not one of them favor the House voting on a proposal to cut spending by $94 billion.

Mr. ALBOSTA. Mr. Speaker, if the gentleman from California had let me finish my remarks, I would have pointed out to him that if the present Reagan budget policies continue, this country will have an increase in the deficit of $1 trillion before the next 10 years are over. Where is this money going to come from? The funds for the deficit will have to be borrowed and by the time we are through the country could be paying $100 billion more in interest because of these staggering deficits.

This situation must be brought under control before these wild budget policies proposed by this administration ruin our country and mortgage our children's and grandchildren's future. We cannot afford $200 billion plus deficits each year. The budget resolution being considered today, combined with capping the third year of the tax cut for the wealthy, will enable us to take a first step in reducing these enormous deficits without gutting our education, job training and economic development programs—all of which are important if my State of Michigan and the rest of this country is to recover successfully from the recession that has caused double-digit unemployment.

Mr. JONES of Oklahoma. Mr. Speaker, I yield 2 minutes to the gentleman from Colorado (Mr. WIRTH), a very distinguished member of the Budget Committee.

Mr. WIRTH. Mr. Speaker, I want to make three brief points.

One, I have been on the Budget Committee now for 5 years. I have not seen a better managed, better run conference than the one just finished under the chairmanship of our distinghished chairman, the gentleman from Oklahoma (Mr. JONES) and the gentleman from New Mexico, Senator DOMENICI. Against all odds they did a superb job of balancing off what 10 days ago appeared to be inexorable differences—a great tribute to them and that is the best of the process, particularly at a time when the President of the United States has turned his back on what is the most important process in this town.

I want to raise that point of commendation for the two chairmen of the two Budget Committees.

The second point that I would like to make relates to the human needs and safety net programs. We have heard a great deal from the White House about the alleged safety net. This budget allows us to close some of the enormous holes in that safety net particularly in the area of medical care for the unemployed and medical care for children and infants, the CHAP program. It is absolutely essential that we have made that commitment and these are amoung the best investments that we can make.

Finally, I would like to point out that this budget leaves room for a number of the initiatives that I think most people in this country have come to understand; we must make a national commitment to the long-term investments in this economy, in education, in higher education, in our university and training facilities. There is room for that absolutely imperative long-term investment which will allow us, over a period of time, to make the transition from Reaganomics to a more rational program.

I yield the balance of my time.

Mrs. MARTIN of Illinois. Mr. Speaker, I yield 3 minutes to the gentleman from Florida (Mr. MACK).

Mr. MACK. Mr. Speaker, I want to address a couple of points. It seems like the discussion during the last several months about the budget process has been more concerned about getting a budget on time and getting a budget so we will in fact have a process.

My conclusion is that it is more important that we come up with controls on spending, controls on taxing, and controls on the deficit.

It seems to me that what has happened in these last several months is that we have become a slave to the process as opposed to what the bottom line is all about.

The other thing I would like to refer to is taxing. There are many who seem to be saying the problem that we are having in our country today, as far as deficits are concerned, is that we have failed to tax the American public enough.

Let us go back to the 1981 tax cut; $960 billion over a 5-year period. Roughly two-thirds of that cut have been eaten up by bracket creep and increases in social security taxes. In addition, this body passed a tax bill that increased taxes in 1982 by some $229 billion. Then we passed the gasoline tax, another $16 billion increase raised taxes for social security early this year.

The end result is that this body increased taxes by $35 billion since 1981, and now you are going to increase taxes even further, without any real constraint, upon the spending side.

The other interesting thing is that the budget resolution that you passed several weeks ago called for an increase in taxes over and above the President's plan by $114 billion. In addition to that, it cut defense spending by $163 billion, a total of $277 billion, this would be available to reduce deficits.

If someone had come to me and said that is what the money was going to be used for, you would have gotten my attention. But no, you talked about increasing social spending by $181 billion. That is a blueprint for disaster.

And as far as I am concerned, that particular blueprint, a blueprint for disaster is exactly the same blueprint you are attempting to approve today. It is something that I cannot support and I urge a vote against this budget resolution.

Mrs. MARTIN of Illinois. Mr. Speaker, I yield myself 3 minutes.

Mr. Speaker. I think there should often be a spirit of bipartisanship, not for either side to do something that they feel wrong, but walk together, to work together, to achieve something. And I can certainly agree with the letter that came from the Democratic leadership, at least a part of that letter, which I would like to read. It came to the Democrats this morning.

> We cannot in good conscience sit by as long as the Federal Government racks up $200 billion deficits for as far as the eye can see.

I think every Member should agree with that. One should, however, remember the fact that we are the Federal Government. It is not "they," it is not something someone else created and perhaps some of the people who signed this letter were around to help cause some of these deficits. But together we should be working to narrow that deficit.

What indeed do we have here to do that? Well, it has been very popular today to talk about the President's deficit. But if you put both on the same base, you have a President's budget deficit of $170 billion and the conference committee budget deficit of $179.3 billion. So, first of all, the conference deficit is bigger than the President's deficit. Let us get rid of that myth right from the start.

More importantly, that is too high. This was not a conference that took a cut in defense spending and then used that cut in the deficit. Heck with that. They just put it in other new programs and raised taxes on top of it.

That is not what the American people want, Republican or Democrat, from any section of the country.

Now if we had a budget where that defense number came down and stayed there and we did not go ahead and spend more, and if that savings was not put into new programs, but was put into the deficit, and if you did not raise taxes against women, against the middle-class working people of America, then you would indeed have a budget that would cross the best centrist part of this body. It would please liberal and conservative and it would be supported. But that it not what this conference produced.

To argue that the process demands we vote for this resolution is ludicrous. It is as if a person were due to be hung and the jury found out that person was not quilty and then argued, "Hang him anyway, save the process."

Well, let us not hang the American people with this budget. Let us make sure that they can live another day, that they will not be overtaxed and overspent to death, and that Republican and Democrat alike turn aside this facade and get down to work and do what our constituents want us to do.

□ 1450

Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. LUNGREN).

Mr. LUNGREN. Mr. Speaker, we have heard a number of people on the other side of the aisle tell us that we ought to vote for this budget because

of what it does about the deficit problem.

I would just remind my colleagues that the conferees mandate tax increases of approximately $73 million over 3 years, but only cut spending by $12 billion, in other words, a 6-to-1 ratio of tax hikes to spending cuts.

Mr. Speaker, I think at this time it might be good for us to listen to the words of the President of the United States when he said:

> In short, it is a paradoxical truth that tax rates are too high today and tax revenues are too low and the soundest way to raise the revenues in the long run is to cut the rates now. The experience of a number of European countries and Japan have borne this out. This country's own experience with tax reduction in 1954 has borne this out. And the reason is that only full employment can balance the budget, and tax reduction can pave the way to that employment. The purpose of cutting taxes now is not to incur a budget deficit, but to achieve the more prosperous, expanding economy which can bring a budget surplus.

The President went on to say:

> I repeat: our practical choice is not between a tax-cut deficit and a budgetary surplus. It is between two kinds of deficits: a chronic deficit of inertia, as the unwanted result of inadequate revenues and a restricted economy; or a temporary deficit of transition, resulting from a tax cut designed to boost the economy, increase tax revenues, and achieve—and I believe this can be done—a budget surplus. The first type of deficit is a sign of waste and weakness; the second reflects an investment in the future.

Mr. Speaker, those are the words of a President, not President Ronald Reagan, not President Richard Nixon, not President Gerald Ford, but President John F. Kennedy, when, 21 years ago, we were debating on this floor whether we could afford a tax cut or whether deficits would be caused by having a tax cut. John Kennedy told us to be bold. John Kennedy told us that we ought not to fall for the siren song that deficits are caused by tax cuts rather than spending of the Congress and by the recession. We ought to heed the words of John Kennedy and not listen to some of the silliness that we have heard here today.

We ought to vote down this budget.

Mr. JONES of Oklahoma. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania (Mr. GRAY), a very distinguished member of the committee and a most valuable member of the conference committee.

Mr. GRAY. Mr. Speaker, we have been told that we ought to hear the words of John Kennedy. Unfortunately, for the last 2 years that was not the message. What we were told was to listen to the words of Ronald Reagan. And twice those words prevailed in the House and the Senate, with budgets that met the concerns of the President and a tax policy.

And what has happened as a result? Record deficits, unemployment over 10.1 percent; and now we are in a debate as to whether or not this conference report will be accepted.

I am here to urge all of my colleagues to vote for the conference report because we ought to know what this debate is really about and the truth. The truth is that for existing programs the conference report deficit is $169.9 billion, $1,100,000,000 lower than the President's supposed budget deficit. And I say "supposed," because during the whole process in the House, not one Member from the Republican side even dared to offer the President's budget. Why? Because they did not even want to vote for it themselves. And on the Senate side they rejected the President's budget.

So to compare the conference report to a nonexistent President's budget is wrong. But we should look at it and ask, "Does it address unemployment? Does it seek to repair the gaping holes in the safety net for our senior citizens, for our young people and to put people back to work?" and to ask, "Does it rationally approach defense spending by slowing it down to 5 percent real growth?"

There are those of us, even on this side, who do not totally agree with the conference. I would have liked to have seen defense at less than 3 percent. But we are not talking about specific parts. We are talking about a whole, about a budget process. So the choice is clear. What is it we are going to do here?

I urge the Members to vote for the conference report.

Mr. JONES of Oklahoma. Mr. Speaker, I yield such time as he may consume to another distinguished member of both the Budget Committee and the conference committee, the gentleman from Washington (Mr. LOWRY).

Mr. LOWRY of Washington. I thank the chairman for yielding.

Mr. Speaker, I will say to the chairman that many times during the conference committee process many thought that we had lost the budget, and I want to sincerely congratulate the gentleman from Oklahoma, JIM JONES for his leadership, along with the chairman of the Senate committee, in time after time reviving the budget conference. Successful passage of this budget compromise will demonstrate that Congress is committed to a process of budget and control. I think that is very important to our economy.

Mr. Speaker, I am supporting the conference agreement on the 1984 budget. While I do not agree with every aspect of the agreement, this budget changes the policy direction of the last 2 years. A lid is placed on defense spending; relief is provided for the victims of the recession; funding is restored for key domestic programs; and the deficit is reduced.

In defense, I prefer that the level of spending reflect the 1979 NATO target of 3-percent growth. The House budget set a 4-percent target. This agreement sets the spending target for defense at 5 percent. The President proposes an inflation adjusted increase of 10 percent in 1984. Despite the reductions from the President's budget, by 1986 defense spending will total $329 billion in budget authority. That is double the 1980 level of $145.8 billion or a 50-percent increase after inflation. While the targets set in this resolution are too high, this agreement does place a lid on defense spending. The agreement does cut the President's defense budget by $79 billion in budget authority and $48.1 billion in outlays over the 1984–86 period. Without the enactment of this agreement, defense spending will rise to level closer to the President's original request of 10 percent.

On domestic programs, I am very pleased by the achievements of the conference committee. The agreement provides $10.3 billion more than the Senate resolution and $22.3 billion more than the President's request. Relief is provided for the victims of this recession. Despite the optimistic forecast of economic growth and recovery, economic forecasters project that unemployment will be in the 9.5 percent range at the end of 1984. This agreement does provide $8.5 billion in a reserve fund for the enactment of specific programs to aid victims of the recession. These programs include emergency mortgage foreclosure relief; extension of Federal supplemental unemployment benefits for the long-term unemployed; increased food stamp benefits; a community jobs program; and loan foreclosure relief to farmers.

The agreement provides for funding for other key domestic programs. Education is increased by $800 million over current funding levels to provide for compensatory education, math and science, vocational education, student aid, and the handicapped program. Additional funding is provided to the National Science Foundation to increase this Nation's research and development capability. Mass transit operating assistance is fully funded consistent with the Surface Transportation Act of 1982. An infrastructure initiative is recommended. A $200 million funding level is provided for a health program for low-income pregnant women and young children.

The conference agreement does reduce the deficit below the administration's request. With the reserve, the agreement is $42 billion less than the President's request over a 3-year period. The agreement is $5.6 billion under the President with the reserve in 1984. Further, reconciliation which can only happen with budget passage, calls for $85.3 billion in deficit reduction in the next 3 years.

While I am not satisfied with every recommendation, I do believe that this agreement is an important step in changing the priorities of the last several years.

● Mr. FORD of Michigan. Mr. Speaker, I rise in support of the conference report on House Concurrent Resolution 91, the first concurrent budget resolution for fiscal year 1984. I congratulate the conferees on their tireless efforts to achieve a truly bipartisan compromise. A vote for this agreement is not only a vote for this particular budget but also a vote for the continuation of the congressional budget process. We must resist the efforts of the President to thwart the budget process simply because the Congress has refused to approve his budget plan as was the case during his first 2 years in office. This is the only opportunity that the Congress has to take a macroview of Federal spending and we must utilize this occasion to instill fiscal sanity in our overall spending program.

House Concurrent Resolution 91 projects a deficit of $179.3 billion for fiscal year 1984 and a deficit of only $130.8 billion for fiscal year 1986. This is $42 billion less than the deficits included in the Reagan administration's budget request over the 3-year budget period assuming the 10 recession relief reserve programs are enacted. House Concurrent Resolution 91 reduces deficits to more manageable proportions, something which candidate Reagan promised to do but President Reagan has miserably failed to achieve. Lower deficits are critical if interest rates are to remain at a level which will permit a sustained recovery from the current recession.

The conference report requires revenue increases of $12 billion during fiscal year 1984 and $73 billion from fiscal year 1984 through fiscal year 1986. Although this may seem excessive to many observers, it is only $16.6 billion more than the tax increases sought by President Reagan during the same 3-year period. House Concurrent Resolution 91 calls for these additional revenues immediately rather than in 1986 when prospects for recovery may have already been halted by high deficits and interest rates.

In the area of military expenditures, House Concurrent Resolution 91 includes a 5-percent real increase for each of the next 3 fiscal years as opposed to the 10-percent increase sought by the President. The 5-percent increase still provides for a substantial improvement in our Nation's defense capability, but at the same time saves $11.6 billion from the Reagan administration's excessive request in fiscal year 1984 alone. Even under the aggregates of House Concurrent Resolution 91, the level of military expenditures in fiscal year 1986 will be over double the fiscal year 1980 level of $145.8 billion.

In the area of domestic spending, I feel that the conferees have struck an important compromise. The conference report includes spending levels $1.15 billion over the CBO baseline for antipoverty programs such as food stamps, child nutrition, WIC, and AFDC. In addition, the conferees included $200 million for a new and critically needed child health assurance program for low-income pregnant mothers and young children. One of the most crucial aspects of this agreement is the inclusion of all phase II antirecession and economic recovery programs in a reserve fund which will only be tapped if these programs are enacted. This $8.5 billion fund for fiscal year 1984 includes money for such unemployment relief programs as health insurance for the unemployed, extension of unemployment benefits, the community renewal employment program, and foreclosure aid for the unemployed, which has already passed the House. These relief initiatives are of the utmost importance to residents of the 15th District of Michigan. This reserve also earmarks funding for economic recovery programs such as the establishment of a National Industrial Development Bank and job training for veterans.

With respect to education, I am pleased that the budget resolution provides $16.1 billion for education programs. This will enable funding for the education programs to increase by approximately $1.5 billion for fiscal year 1984 compared to fiscal year 1983. A $1.5 billion increase represents a growth of approximately 6 percent in constant dollars. This will enable us to begin the long journey back to restoring the Federal commitment to educational opportunity and educational excellence, which has been under seige and attack by the Reagan administration since its first day in office.

It is important to recall that since fiscal year 1980 funding for the need-based student financial aid programs has declined 23 percent in constant dollars. If social security and veteran's educational benefits are included—and these two programs now in their final stages of phaseout were the largest Federal student-aid programs in fiscal year 1980—Federal student assistance declined 32 percent in constant dollars. In addition, as a result of the policies of this administration, elementary and secondary education programs were cut 15 percent between fiscal year 1980 and fiscal year 1982. The school lunch programs were reduced 35 percent between fiscal year 1981 and fiscal year 1982, and the vocational education programs—programs that prepare people for jobs—were slashed by 15.9 percent between fiscal year 1980 and fiscal year 1982.

We are now seeing the harmful effects of those policies. Approximately 3 million fewer children are receiving federally supported school lunches. The Federal share of excess costs associated with educating handicapped children has dropped from a level of 12.5 percent in fiscal year 1979 to its current level of 8 percent. In the Pell grant program, 350,000 fewer students are receiving awards and 20 percent fewer students received guaranteed student loans in the current school year than in 1981–82.

So while I take comfort in what this budget resolution does for education, it is relatively small comfort. We must do more in the years ahead. Backing the Federal concern for education with resources is an urgent national priority. This Federal concern is the concern for our economic vitality, our national security, and the quality of our life in the future. The education portion of this budget puts us back on the path to recognizing the importance of education to our national well-being. But we are not yet far enough down the path.

I would like to turn for a moment to areas within the jurisdiction of the Post Office and Civil Service Committee.

Here, without question, the work of the House and Senate Budget Committees is far superior to the draconian approach taken by the White House.

Nevertheless, I have some strong misgivings.

For one thing, it is patently unfair to impose a 4-percent cap on the pay of Federal workers for 3 consecutive years—and then to delay that increase for 3 months.

This locks Federal workers into an uncertain future. The fact is that we have no idea what the inflation picture is going to look like in 2 or 3 years. The 4-percent increase would indeed be unfair if we were to find ourselves back in double-digit inflation. I certainly hope we do not. But there are no guarantees. The only guarantee is that if this should happen, those in the Federal work force would be shackled to an unrealistic 4 percent.

The delay is equally troublesome. When the Post Office and Civil Service Committee reports back to meet reconcilation targets, I will look at all the options to restore the pay raise in October.

On the issue of delay, I certainly am not ecstatic with the budget provision that postpones COLA payments for Federal retirees until January of the next 3 years. At least, however, it treats retired Federal workers the same as social security recipients. So there is some measure of equity.

From my vantage point, it is clear that Federal employees have paid

more than their fair share of the budget-cutting burden since Mr. Reagan came into office. And I do not believe a good case can be made for any additional cuts where Federal workers and retirees are concerned.

On the positive side, I want to commend both the House and Senate Budget Committees for rejecting all the unrealistic and reckless cuts proposed in the President's budget, including:

A pay freeze in fiscal year 1984.

No COLA for Federal retirees in fiscal year 1984.

Major increases in Federal workers contributions to CSRS to 9 percent in fiscal year 1984 and to 11 percent in fiscal year 1985.

Further cuts in FEHBP by adoption of a voucher system.

Major reduction in retirement benefits by raising the age to 65 and requiring substantial actuarial reductions for early retirement.

Federal workers already are behind more than 20 percent when compared to the private sector. They have had their pay and benefits cut substantially in the past 3 years. Enough is enough.

I am pleased that the conference report will accomodate a fiscal year 1984 postal appropriation of $879 million. This is the amount necessary to provide much needed postal rate stability to schools, libraries, churches, charities, and other preferred mailers who have incurred onerous rate increases during the past 18 months because of cuts in postal appropriations.

Because of reductions in these appropriations during the past 2 fiscal years, these mailers—many of whom perform the most essential public service tasks in our society—have had to use increasing amounts of their limited funds to pay higher postage costs rather than to pay for performance of their services. According to the Postal Reorganization Act, preferred rate mailers should presently be at step 11 of a 16-step phasing schedule designed to gradually bring preferred rates up to the full rate level. Instead, because of appropriation cuts for fiscal year 1982 and fiscal year 1983, these mailers are now at step 14. Since January 10, 1982, for example, second-class nonprofit mailers—a church bulletin or a veterans' magazine—are paying 69 percent more in postage; the library rate has risen 42 percent; and the third-class rate for a nonprofit fundraising letter has risen 48 percent.

If the President's budget request for fiscal year 1984 were to be followed—he is asking for only $400 million—these rates would climb enormously yet again as of this coming October. For example, the rate for a nonprofit fundraising letter would go up another 77 percent, and the library rate would go up another 55 percent.

In March, the Committee on Post Office and Civil Service voted to recommend to the Budget Committee a level of $879 million for the fiscal year 1984 postal appropriation. Appropriating this amount would have the effect of freezing nonprofit and other preferred rates at step 14 through fiscal year 1984, thus giving these mailers a period of stability and allowing them to adjust their operations to the staggering increases they have suffered already. I am gratified that the House Budget Committee and the full House agreed with our recommendation, and I am extremely pleased that the conferees have returned with the $879 million assumption intact.●

● Mr. WORTLEY. Mr. Speaker, our distinguished former colleague, Albert Gore, Sr., who served so ably in the other body, wrote an article on conference committees. He stated that the House of Representatives, except in rare instances, could be counted on to out-conference its counterpart. The conference report on the first budget resolution bears out his thesis.

The conferees work is, indeed, a tribute to those who would have us stay the course of taxing ourselves to the hilt to accommodate our voracious spending habits. In effect, it is no compromise.

What it is is ingenious. The conferees agreed to establish a special reserve fund. This appears to be an interesting new way of providing even more opportunities for spending while ostensibly keeping the lid on deficits, at least for a while.

The statement of the conferees provides for $8.525 billion in outlays in the reserve fund for seven functions described by some as "high priority" items. To lessen the shock for those of us who do not advocate massive new outlays for programs we can ill afford, this money does not show up on the deficit side of the ledger until the programs are authorized or the available reserve money will be lost. In the words of one of the conferees, the reserve fund is both in and out of the regular budget. Confused? Bear with me just a little longer. For the reserve fund to be activated, does only one body need to authorize the new spending programs? Do both bodies have to agree? The report is unclear. What is clear is that the deficit is bound to surge ever higher because there is no incentive to exert restraint.

How are we to fund these new programs? That question is easier to answer. Congress simply increases taxes. Those who advocate adoption of the conference report stress that the revenues section is much closer to the amount recommended by the other body. That is true, but it makes little sense to me to remove the remaining vestiges of the 1981 tax cut at a time when they are sorely needed.

If the taxes proposed in the conference report were earmarked for reducing the deficit a stronger case might be made for them. However, the conference report does not specify that. On the contrary, the taxes will be used to finance all of those items contained in the special reserve.

The creation of costly new programs with borrowed money is a strange way to preserve the budget process. The American people will see through this clever but flawed attempt to be all things to all people.

For the reasons I have mentioned, I urge my colleagues to join with me and vote against the conference report.●

● Mr. GUNDERSON. Mr. Speaker, in opposing House Concurrent Resolution 91, the first budget resolution for fiscal year 1984, it is tempting to assume a simple partisan posture or a defense spending versus social spending position. I choose to do neither.

Mr. Speaker, there is a more important issue involved in our action today and that is the financial future of our country. This issue bridges partisan politics and guns versus butter debates.

The simple fact is that a vote for House Concurrent Resolution 91 is a vote in favor of a $179.3 billion deficit and an increase in the permanent debt ceiling to $1.607 trillion. Rather than using new taxes and less defense spending to decrease this deficit load, the conferees have chosen to increase social program spending by some $23 billion.

And the President's budget is not any better. Even adjusting for changes in revenues and economic conditions since the beginning of the year, it still carries a deficit of $180.4 billion. Instead of using decreases in domestic spending to cut the deficit, these funds were used to increase defense spending.

In short, Mr. Speaker, both alternatives miss the mark. Clearly, it is time to get back to basics. Let us stop playing one budget program off against another. If we are going to cut spending or increase taxes, let us use the proceeds to reduce the enormous deficit and bring the budget into closer balance.

If we fail to take such remedial budgetary action soon, we threaten to choke off our economic recovery in the short run and our entire economic future in the long run.

I must, therefore, oppose the conference report on House Concurrent Resolution 91.●

● Mr. LAGOMARSINO. Mr. Speaker, I rise in opposition to the conference report on House Concurrent Resolution 91, the budget resolution for fiscal year 1984.

This budget plan, which was drafted without the participation of House Re-

publicans, calls for $12 billion in new taxes in 1984, $73 billion over the next 3 years. It proposes outlays next year of $859 billion. It would produce a deficit of $179 billion, resulting in a public debt level of $1.6 trillion.

Clearly, Mr. Speaker, this is a blueprint for disaster—for the taxpayer, and for the Nation. By requiring new taxes in the midstages of economic recovery, it will drag that recovery down: Perhaps that is the intention of the authors. By refusing to hold down the growth of most Government programs, the authors of this document are robbing the private sector of funds and forcing interest rates to a higher level—again impeding recovery. By retarding the recovery and foreclosing the availability of funds for industrial recovery, this budget will drive unemployment rates back up. It is a cruel and deceiving document on all counts, weakening the economic recovery and our Nation's defenses, dooming hundreds of thousands of workers to continued unemployment, and millions of taxpayers to continued subservience.

I urge a "no" vote.●

● Mr. BIAGGI. Mr. Speaker, I rise in support of the pending conference report to accompany House Concurrent Resolution 91, the first concurrent resolution on the budget for fiscal year 1984. Like many of my colleagues my support is in large part based on the compelling urgency of the situation as compared to total support for all of its provisions.

In the general sense, and I am pleased to note this—the conference report agreement reflects more of the House-passed resolution than the Senate. In my judgment, the House-passed budget resolution was the most enlightened and compassionate budget we have passed since the advent of the current administration.

This conference report responds to two strong public sentiments of the day. The first relates to the concern about cutbacks in critical social programs for the needy. The second relates to the opposition to the continued massive expenditures for defense which have characterized the past several years.

The conference report wisely limits the growth of defense spending to 5 percent, about half of what was proposed in the President's budget. This will permit our Nation to maintain a strong national defense with appropriate modernization of important strategic weapons while not promoting waste. The billions which will be saved by limiting the defense budget can be used not only to provide more funds for social programs but also to help reduce our deficit.

On the issue of deficits, I am also pleased to note the fact that the conference report will actually produce a lower deficit than was even proposed in the President's budget. According to the Budget Committee, in fiscal year 1984 the deficit will be anywhere between $11 and $21 billion lower than that proposed by the President. Obviously there is a need to make a concerted effort to reduce this record deficit but if it is to be done through reductions in Federal spending—then these reductions must be made in an equitable fashion and in a way that does not promote economic hardship for those in need.

Finally in the general overview of this conference report, let me discuss the taxing provisions contained in the legislation. The conference report recommends tax increases of approximately $73 billion over the next 3 years as a means of reducing the budget deficit. The specific taxes will be developed by the Ways and Means Committee and in their deliberations, I hope that fairness will be the rule.

On more specific points, as a senior member of the House Education and Labor Committee, I am highly supportive of the additional $800 million which is being provided over last year's levels to fund a variety of important education programs. These include compensatory education under student financial assistance programs under the Higher Education Act, chapter 1, and a new and vitally important initiative to improve the quality of our math and science instruction in our Nation's schools. The $214 million in outlays provided for this will be used both to train and retrain teachers in these basic courses to insure that we do not widen the basics gap in our elementary and secondary schools. Other funds are provided for vocational and adult education and education for the handicapped.

Another important program which is specifically addressed in this conference report is medicare. We are deeply concerned about the impending deficit crisis affecting medicare. It is expected that the operating deficit could reach $200 billion by 1995. The conference report properly recognizes the fact that expenditures must be reduced. Specifically, the conference report calls for reductions totaling $400 million in fiscal year 1984 and $1.7 billion over 3 years. However, the conferees specifically state that none of these reductions shall come through either reductions in existing benefits or through increases in costs to beneficiaries. Instead and properly so, the conferees urge that the savings be achieved at the provider level. I have long contended, and hearings that I have participated in as a member of the House Aging Committee have consistently shown, that rising costs at the provider level is a primary contributor to the medicare deficit problem. Whether it be hospitals or health care institutions or physician fees, the profits being made from medicare reimbursements are too high. We must insist on cost controls at the provider level. One hopes that much savings can be accomplished through the implementation of the prospective reimbursement provisions of H.R. 1900, the Social Security Reform Act of 1983.

One final thought on medicare. The conferees have spoken quite clearly on the issue of no reductions in benefits or increases in costs. Thus far the two recommendations which appear to have been endorsed by the Social Security Advisory Council call for raising the eligibility age for medicare from 65 to 67 which constitutes a benefit reduction and also a major increase in the part B premium. The course developed in this conference report is the route we should take for medicare reform and not that steered by the Advisory Council.

There are other important increases in funds provided in this resolution which merit our support. There is an additional $1.6 billion in funds for the food stamp program over that proposed in the President's budget. More funds are provided for child nutrition, women and infant care, AFDC, and low-income energy assistance. The conference report assumes and provides for $4.5 billion in fiscal year 1983 and $3.5 billion in fiscal year 1984 for a jobs program. It provides $296 million in funds for the title V employment program for the elderly. Important additional funds are provided for the community development block grant and the urban development block grant program. Happily there are other examples of programs which have gotten new leases on life from this budget.

It is critical that we adopt a budget—and the proposal before us on balance is good. The proposal is as simple as that. In fact, if we fail to adopt this budget we could find ourselves facing additional deficits of more than $85 billion which we will in fact be able to save if we adopt this budget and the accompaning reconciliation instructions.

This conference report will complement not sabotage the heartening economic recovery we are experiencing. Presently the recovery has been characterized by positive statistics. The economic recovery has not yet reached into the homes of the American people. The 11 million unemployed in this Nation are awaiting the recovery. The millions who have seen their food stamps or school lunches cut back or eliminated are awaiting economic recovery. The people who have lost their homes are awaiting economic recovery. This budget conference report is cognizant of the fact that the recovery is underway but slow in reaching all in this Nation. It will aid the recovery through sound fiscal policies but will reestablish our commitment to the poor and needy who have suffered for

the past 2 years. It deserves our support today.●

● Mr. DASCHLE. Mr. Speaker, the choice we face today in voting on the conference report on the first budget resolution for fiscal 1984 is really a very simple one: Do we do the responsible thing by voting for a budget outline to give ourselves and the country a clear signal as to what our actions in the next year are to be, or do we, by defeating this resolution, commit ourselves to a year of economic chaos by closing our eyes to the hard choices that have to be made, and just pretend that if we ignore them, all our problems will go away?

For my part, I intend to choose the first option. I am under no illusions that the budget we have before us is a perfect piece of budgetary planning. Any document that is the result of good faith bipartisan compromise seldom pleases anyone in all its parts. For instance, I am still disturbed by the inordinately high deficits that this budget produces. Similarly, I am disturbed by the fact that little attention is paid to the rising costs of entitlement programs. We as a Congress must act, and must act soon, to revise the system under which COLA's in these programs are determined, and I am disappointed that this resolution does not begin that process. Finally, I am less than satisfied by the inclusion in this resolution of the so-called reserve fund. Frankly, to my mind, this inclusion merely muddies the issue of what the true deficit picture in this resolution is. The one saving grace in this situation is that if these funds, some $8.5 billion, are not used for specific recovery and growth programs, they cannot be used for any other purpose, and thus would be available for deficit reduction. I intend to examine very closely any programs that are to be funded under this reserve fund. At this point in time, I would have to say very frankly that I would prefer to use these funds for deficit reduction purposes, rather than new spending programs.

All that having been said, however, there remain some very good reasons to support this resolution. First, deficits are significantly reduced both in fiscal 1984 and in future years. Compared to present policies now in place, passage of this resolution will result in deficit reductions, excluding possible Reserve funded programs, of $16.9 billion in fiscal 1984 alone. In the years from 1984 through 1986, these deficit reductions will total $124.4 billion. This is no small saving. While the deficits planned for here are still too high, they represent a significant improvement over present policy.

Second, the resolution provides a real 5-percent increase in defense spending. There is no one in this Congress who believes more firmly in a strong national defense than I do, but the incredibly wasteful proposals of the administration to double the size of this large increase with wish list philosophies of weapons procurement are simply not acceptable. We learned a very hard lesson in this country when we destroyed the national consensus for social programs by wastefully throwing money at them without a careful examination of our priorities and real needs. The administration's present position on defense spending threatens to similarly destroy the national consensus for a stronger defense, and I will play no part in such a destruction.

Third, the House and Senate conferees have agreed, in this resolution, on a 3-year total tax increase of $73 billion to reduce long-term deficits when the recovery is well established. This may be the most controversial element of the resolution, and I am sure it will be the object of a great deal of distortion. However, if we look at the facts of the situation, something fairly surprising comes to light. Under the President's proposals, revenue increases in 1986 will result in a total picture of revenues as a percentage of gross national product of 20.2 percent. Under the resolution, revenues as a percentage of GNP in 1986 will be only 19.9 percent. In other words, the resolution before us actually represents a decrease in taxation from the President's proposals. In effect, then, anyone voting against this resolution, and supporting the President's proposals, is calling for an increase of taxes as a percentage of GNP.

Fourth, the reconciliation language of this resolution calls for deficit reductions of $85.3 billion over the next 3 years. Reconciliation will take place only if a budget is passed. In the plainest possible terms, failure to enact a budget this year will result in increased deficits of $85.3 billion over the next 3 years. The abandonment of the budget process will open the floodgates of overspending, without a sensible rein on the spending proclivities of both the administration and the Congress.

Finally, we have been told that the administration does not care if a budget passes. In fact, it would almost prefer that it does not. This is a very curious position to take for an administration which keeps proclaiming loudly, to anyone who will listen, that it is a staunch advocate of fiscal responsibility. An editorial from the June 22, 1983, issue of the Washington Post summarizes this situation very well. In that editorial, which I ask permission to insert into the RECORD at the conclusion of my remarks, the statement is made that the President "apparently sees more political advantage in disrupting congressional attempts to curb the deficit than in providing the leadership for a reasonable compromise." That is a strong charge, and I sincerely hope that it is not, in fact, true. The budgetary process of this Government is too important to be made into a political football, where political advantage, rather than the national good, is the primary motivation.

This resolution, as I have said before, is not perfect. It is the result of a compromise between men of good will who, although they may have differing political parties, and contrasting philosophies, have come together in a spirit of compromise and conciliation to provide a reasoned, moderate budgetary pattern for the coming fiscal year. To reject the results of their labor is to reject a plan that will reduce deficits, provide meaningful increases in defense spending and, in the long run, reduce the percentage of taxes that we ask our citizens to pay. To reject all of these things in favor of cheap political grandstanding is beneath the dignity of this Congress.

I urge my colleagues to do the responsibile thing, and vote for this resolution. At this point I include the following editorial:

[From the Washington Post, June 22, 1983]

BUDGET PROGRESS

"Somewhat of a miracle." That's how Senate Budget Committee Chairman Pete Domenici described the accord reached by budget conferees on Monday night. Perhaps that's an exaggeration, but miraculous things can happen when hardworking legislators sit down in a spirit of comity to work out their differences.

As they move the budget resolution toward passage by the full Congress, congressional leaders will still have to overcome the same obstacle that has impeded progress thus far. That obstacle is the president, who apparently sees more political advantage in disrupting congressional attempts to curb the deficit than in providing the leadership for a reasonable compromise.

Congress has every reason to feel aggrieved by the president's behavior, since the poor choices that it faces—the need to cut spending, raise taxes and still face enormous deficits—are so much the administration's doing. Nor does the president's current position make much substantive sense. For example, on taxes, the resolution calls for $12 billion more in revenues next year than the president's budget. The president says those taxes will hurt the recovery. But it is inconceivable that a $12 billion tax increase will have any negative effect on a $3 trillion economy already fueled by three years of massive deficit spending. It might, however, have the beneficial result of calming the interest rate, which is already showing renewed signs of anxiety over the prospect of uncontrolled future deficits. As for the tax increases proposed for subsequent years, in opposing them the president is essentially contradicting his own budget—or giving further plausibility to the notion that his "standby" taxes were only window dressing to diminish the gargantuan deficits that would otherwise have been evident.

For the military, the resolution would boost annual spending authority to $268.6 billion, an increase of $24 billion. Actual purchases next year would rise still faster because of the huge backlog of weapons

buying authorized in the last few years. If that amount of money is, as White House spokesman Larry Speakes says, "way too low to defend the country," then some major changes in the Pentagon's buying strategy are clearly in order.

The resolution does reject about $12 billion in domestic spending cuts that the president sought. But those cuts had no support in either house or either party. A reserve fund of several billion dollars could also be used for jobless aid, but the president will have the opportunity to veto such aid if Congress decides to authorize it.

The budget conferees deserve much credit for persisting in their efforts to put the federal budget on a sounder course. If those efforts are now stymied, they will at least have made it clear that it is the president, and not Congress, who is uninterested in budget control.●

● Ms. KAPTUR. Mr. Speaker, I rise in support of the bipartisan agreement crafted by the House-Senate budget conference. This budget agreement is a balanced approach to Federal spending. Despite all of the invective we have incurred because of this budget, let us take pride that we recommended a budget with a deficit $48 billion below the one offered by the President in January. While we made the difficult choices, let us remember that the opponents of our work offered asbolutely no alternative and no constructive action. They lay back all of these months when the hard work was being done and only now they speak up and only to come to the aid of a failed program. They have done little more than hurl criticism at us for doing our jobs.

We were able to offer a fair and equitable budget because we had the resolve to cut wasteful defense spending, which is still far too excessive, and the common sense and decency to provide relief for the average taxpayer and the victims of the recession. We are beginning to rectify the unfairness of the Reagan tax giveaway to the privileged. We should be thankful that we have the opportunity to change the course and avoid more social hardship and fiscal dislocation. Let us seize this opportunity on behalf of all the American people.●

● Mr. GIBBONS. Mr. Speaker, I am voting for the conference report on the first concurrent budget for 1984 because I believe this process has delayed consideration of important legislation for far too long. If this resolution is not passed—I do not agree with many of its provisions—but if it is rejected now we will be tied up for the rest of this year in useless debate with no action—action that the country needs. Mr. Speaker, I do not believe that voting for this resolution in any way finds me or any other Member on future action we may take on spending matters or on taxes.●

● Mr. PATTERSON. Mr. Speaker, I rise in support of the bipartisan budget agreement for fiscal year 1984. This agreement, hammered out between representatives of the Republican-controlled Senate and the Democratic-controlled House, was not a total victory for either side, but a major success for both. I am convinced that this is the best agreement we could have achieved. It provides a fair and effective budget for addressing the needs of the American people.

In dollar terms, there is not a great deal of difference between the bipartisan budget totals and the budget supported by the administration. There is, however, a marked shift in spending priorities and a renewed emphasis on reducing the deficit.

We have to reduce Government borrowing if we want reasonable interest rates. That means we have to reduce the gap between spending and taxes. The House and Senate budget compromise reduces some spending, raises some revenues and reduces the overall deficit to $20 billion less than the administration's fiscal year 1984 budget proposal. This is a major victory for the Congress and for the American people. In addition, it restores some of the most worthwhile educational and social programs to their previous funding levels.

The conference committee budget passed by Congress has a steadily declining deficit which will be lowered to $130 billion in fiscal year 1986. Additionally, it directs committees to pass additional deficit-reducing legislation which will total up to $85 billion over the next 3 fiscal years.

The budget compromise restores some of the funding for important domestic programs on a selective basis. It will provide $21.5 billion over the President's proposed budget for targeted recession relief, infant nutrition, and vital research and educational programs. This represents less than a 4-percent increase over present funding—somewhat lower than the expected rate of inflation.

With regard to defense, Congress approved a 5-percent increase after inflation or one-half of the increase in funds the President had proposed. The defense increase will add up to $23 billion in a total military budget of $268.6 billion.

The compromise budget will increase revenues by $12 billion in fiscal year 1984 to partially fund the $46 billion buildup in defense by 1986. This is instead of the $59 billion in standby tax increases that the President has proposed for that year.

The President's $200 billion budget deficit is intolerable, particularly when we were promised that the President would propose a balanced Federal budget by 1984. If the deficit is not checked, interest rates will again rise, choking off any possible economic recovery. The budget compromise approved by Congress is the only viable option for lowering deficits, reducing military spending, and fostering the substained recovery we seek.●

● Mr. WEISS. Mr. Speaker, I want to express my support for the conference report on the First Concurrent Resolution on the Budget for Fiscal Year 1984. This budget resolution makes significant progress in changing the Federal policy directions of the past several years. It begins to correct the grievous errors of Reaganomics. There has been much damage done, but with this resolution, we begin to make the necessary repairs.

First, although still far too large, this resolution would slow the unprecedented and profligate growth in peacetime defense spending that has distorted national priorities and fueled the arms race. Second, it would reduce the deficit below levels projected under the Reagan budget. Third, it makes progress toward restoring the Federal commitment to jobs and training, education, services for the elderly and needy, and the entire range of social programs that contribute to making this a just and humane society.

Further, the creation of an $8 billion reserve fund holds the door open for later approval of new initiatives to provide relief from the recession and to stimulate economic growth. These include mortgage foreclosure relief for the unemployed and for farmers, jobs programs, health insurance for the unemployed, and an extension of unemployment benefits.

Though I support this compromise, I would have preferred the budget that this House passed in March which went even further in scaling back the President's massive military buildup. This agreement provides for 5 percent real growth in budget authority for national defense for each of the next 3 years. The agreement includes $268.6 billion in budget authority for defense—$12 billion less than the $280.5 billion proposed by the President. Over the 3-year period from 1984 to 1986, the conference agreement provides $894.9 billion in budget authority, about $80.4 billion less than the $975.3 billion that the President recommended. The unprecedented growth in defense spending during the past few years has led to waste and abuse in the military, has fueled inflation, and diverted funds from vital human needs.

Furthermore, the growth in defense spending combined with the President's tax cuts was the root cause of the ballooning Federal deficit. The projected deficit under the conference agreement, including the reserve fund, is $170 billion to $179 billion in 1984, depending on whether programs specified in the reserve fund are enacted. This deficit is a staggering sum, yet far less than the $190.2 billion projected under the President's budget. Under the conference agreement, the

deficit would decline steadily, reaching $130.8 billion in fiscal year 1986.

Finally and most importantly, the budget resolution is a first step toward repairing some of the damage wrought by recent administration policy. In the areas of education and jobs training, where the needs are especially urgent, Federal support would be increased. For the groups that have been asked to bear the major burden of the budget cuts—women, children, and minorities—programs would be strengthened.

In the budget category that includes education, employment and social services, for example, budget authority is set at $37.45 billion with the reserve fund, compared to $25.4 billion requested by the administration, and outlays at $31.85 billion, compared to $25.5 billion.

For education and related activities in 1984, the agreement provides $16.1 billion, including an $800 million increase over current spending for compensatory education, student financial assistance, the new math-science education initiative, vocational and adult education, and education for the handicapped.

The $7 billion designated for social services in 1984 assumes increases in the Head Start program, child welfare services, vocational rehabilitation, community services and programs for the aging.

The $10.95 billion for employment and training allows for increases for the Jobs Training Partnership Act, community service employment for older Americans, the work incentive (WIN) program, and labor services such as the Bureau of Labor Statistics.

A small but significant item is the $296 million assumption for the Legal Services Corporation in 1984, an amount that is consistent with the appropriation approved earlier by the House. The administration has repeatedly tried to eliminate this program that insures access to legal services is not limited to the wealthy.

The agreement provides for a total tax increase of $73 billion to reduce long-term deficits. However, by 1986, the tax burden as measured by revenues as a percentage of gross national product, would be no higher than those proposed by the President.

This budget is not a perfect compromise, but it does represent an alternative to the policies of the past 2 years and an effort to achieve a more rational balance between military and domestic spending. Further efforts will be needed by Congress to insure that the progress initiated with this resolution is continued and strengthened.●

Mrs. MARTIN of Illinois. Mr. Speaker, I yield 3 minutes to a distinguished member of the committee, the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Speaker, I have served on the Budget Committee for the last three terms. I was a member of the conference committee which tried to work out an agreement between the differing versions of the House and the Senate.

I am one who has some devotion to the process and believes that a budget resolution is better than no budget resolution, but not unless it proves itself worthy on its own merits.

I regret that I was not able to sign the conference report. The reason that I was not able to sign the conference report is that the conference report was without merit.

It features excessive spending in all respects. It features excessive taxation, particularly in the outyears. And it features an excessive deficit. any Member of this body who can vote for that combination is a braver person than I am today.

First of all, a budget resolution will guarantee us only 4 billion dollars worth of savings in entitlement programs. That is not a worthy tradeoff for $73 billion in extra taxes. There has got to be some kind of limit, Mr. Speaker, on what this Congress decides to spend when this Congress does not have the willingness to raise the funds necessary to support those spending amounts. And, unfortunately, the Congress has never had the willingness to stand up and say: Here is where we are going to stop.

Mr. Speaker, other Members have indicated that the President's budget deficit is higher than the deficit proposed in the budget resolution conference report. Unfortunately, that is an inaccurate statement. The CBO has just furnished information. Using the economic and technical assumptions that the budget conference committee used, the President's deficit is $170.8 billion, which is about $9 billion less than the deficit provided in this resolution.

So anybody who thinks the country is undertaxed and needs more taxes, and anyone who believes that we have not been spending enough and we need to increase our expenditures, and any who believe that our deficits ought to go up a little bit and that our national debt should go up, I would urge those persons to vote for the budget resolution.

□ 1500

Those who have any respect for the taxpayer's dollar, any respect for the growing deficit problem, any respect for the difficulty that high interest rates are going to cause us when the deficits begin to run them up, to those persons I would say join me in voting against the budget resolution.

Your choice is very clear. You are either a spender or a saver. If you vote "aye" you are a spender.

Mr. JONES of Oklahoma. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, we are at the close of this debate on the budget conference. I want to personally thank all of the House conferees who worked so hard for the past 2 weeks to reach this agreement. Some have condemned the budget process, saying it is not working. I think the fact of the matter is that the budget process is working very well, because that process is designed to force Congress to look at our resources and to delineate the hard choices we have to live within those resources.

We know what the choices are. The big question is not the budget process, but whether we have the political courage to implement and enforce that budget process.

In this conference report we have an agreement that is truly bipartisan. It is signed by the majority of Republicans and Democrats on the Senate side, and by all of the Democrats on the House side. It is a conference report, as is pointed out by the Independent Committee for a Responsible Federal Budget, that has deficits lower than the President's deficit. I do not understand why it is even being compared to the President's budget because, as was pointed out, not a single Republican in the House of Representatives even offered the President's budget for consideration in the budget debate of 1983.

In many respects, this budget debate this year has reminded me of my time as a child when we would have a neighborhood sandlot game on a vacant lot. There was one kid who usually had a ball and a bat and more gloves than the others, and there were the other kids who were trying to work out the rules of having a neighborhood sandlot baseball game. Then there was a group of kids who just came and threw rocks and criticized and talked about how they could do it better, but never wanted to enter the game.

We had a situation this year in which the President either wanted to be the pitcher in this game or threatened that he would take his ball and bat and go home. This year there were Republicans and Democrats in the Senate and Democrats in the House who were honestly trying to work some rules of discipline of this budget process and to keep this process alive and keep that discipline working. And then there was a group, unfortunately, in this body from the other side of the aisle who stood on the sides and just threw the rocks and made the criticisms and offered no alternatives.

Mr. LATTA. Mr. Speaker, will the gentleman yield?

Mr. JONES of Oklahoma. I would be happy to yield to the gentleman from Ohio.

Mr. LATTA. Mr. Speaker, just to set the record straight, I am sure the gen-

tleman, if he will reflect on his memory, in committee I offered function by function the President's budget, and it was voted down strictly along party lines, 2 to 1.

Mr. JONES of Oklahoma. Mr. Speaker, the gentleman could have offered the President's budget on the floor of the House. The Democrats made that in order in the rule, and not at any time was the President's budget offered.

So rather than just being one of the critics, being part of those who throw rocks, it seems to me it is time for us to stand up and say we need to preserve some budget discipline. It may not be the best that each one of us could do on our own, but in our form of government it is the best we could achieve. It is a good budget. It is a sound budget. It will help this economic recovery, and without it we are going to have fiscal chaos. I urge my colleagues to vote for this budget conference report.

Mr. WOLPE. Mr. Speaker, will the gentleman yield?

Mr. JONES of Oklahoma. I yield to the gentleman from Michigan.

Mr. WOLPE. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of the conference report. As a member of the House Budget Committee, I am convinced that if we fail to reduce soaring Federal deficits, increased Government intrusion into the credit markets will drive interest rates even higher than they are now. Higher interest rates, in turn, will curtail new investments in job-creating enterprises and threaten any hope of long-lasting economic recovery.

I seriously doubt that anyone is totally satisfied with the conference report before us. However, I would like to commend the conferees for their efforts to reduce the Federal deficit, and moderate the fiscal course that was set in 1981. I particularly believe that Republican Senators DOMENICI, KASSEBAUM, BOSCHWITZ, and GORTON should be commended for their willingness to reject partisan bickering and White House pressure, and to lend their support to the bipartisan compromise before us; I only hope that the same bipartisanship and same political courage will be manifested in this House.

Mr. Speaker, I am very troubled by the President's apparent willingness to stand in the way of progress toward restoring fiscal responsibility.

In 1981, President Reagan claimed that the adoption of his fiscal policies would result in a balanced budget by 1984. The President's fiscal policies were adopted, but the President's 1984 budget proposed a record budget deficit of $188 billion, and Budget Director David Stockman has observed that we face "$200 billion deficits as far as the eye can see."

We have before us a document that was fashioned by House Democrats and Senate Republicans that will reduce the Federal deficit below the President's budget proposal by $40 to $60 billion over the next 3 years. I strongly believe that we must make it clear that we are committed to exercising fiscal discipline by implementing policies that will result in steadily declining—not increasing—future budget deficits.

For this reason, I cannot understand why the President seems to be so intent upon undermining the congressional budget process, which is the only means that is available to enforce fiscal discipline. If we fail to adopt and implement this budget resolution and put the Government on automatic pilot—all existing policies unchanged—we will be adding to the budget deficits over the next 3 years by over $142 billion. The deficit in 1986 alone would be over $216 billion. I submit that deficits of this magnitude are unacceptable. I call upon the President to turn away from narrow partisanship and political confrontation, and to work with the House and Senate—on a bipartisan basis—to insure that our economic recovery is not drowned in a sea of red ink.

Mr. JONES of Oklahoma. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER pro tempore (Mr. MOODY). The question is on the motion offered by the gentleman from Oklahoma (Mr. JONES).

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. JONES of Oklahoma. Mr. Speaker, on that I demand the yeas and nays.

The SPEAKER pro tempore. The gentleman asks for the yeas and nays. All those in favor of taking this vote by the yeas and nays will rise at this time.

A sufficient number. The yeas and nays are ordered.

Mr. JONES of Oklahoma. Mr. Speaker, I make the point of order that a quorum is not present.

PARLIAMENTARY INQUIRY

Mr. GRAMM. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. GRAMM. That request is not timely. The gentleman has asked for the yeas and nays and they had been ordered.

The SPEAKER pro tempore. The yeas and nays had been ordered.

The vote was taken by electronic device, and there were—yeas 239, nays 186, not voting 7, as follows:

NOT VOTING—7

Alexander	Marriott	Thomas (CA)
Erlenborn	Martinez	
Heftel	Smith, Robert	

□ 1520

The Clerk announced the following pairs:

On this vote:

Mr. Alexander for, with Mr. Thomas of California against.

Mr. Heftel of Hawaii for, with Mr. Robert F. Smith against.

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 3135. An act making appropriations for the legislative branch for the fiscal year ending September 30, 1984, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 3135) entitled "An act making appropriations for the legislative branch for the fiscal year ending September 30, 1984, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. D'AMATO, Mr. HATFIELD, Mr. STEVENS, Mr. BUMPERS, Mr. HOLLINGS, and Mr. STENNIS to be the conferees on the part of the Senate.

PERMISSION FOR COMMITTEE ON WAYS AND MEANS TO HAVE UNTIL 5 P.M. FRIDAY, JUNE 24, 1983, TO FILE REPORTS ON H.R. 2769, HOUSE JOINT RESOLUTION 290, AND H.R. 3398

Mr. STARK. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means have until 5 p.m. Friday, June 24, to file its reports to accompany the following three bills:

H.R. 2769. To promote economic revitalization and facilitate expansion of economic opportunities in the Caribbean Basin region;

H.J. Res. 290. To permit free entry into the United States of the personal effects, equipment, and other related articles of foreign participants, officials, and other accredited members of delegations involved in the games of the XXIII Oylmpiad to be held in the United States in 1984; and

H.R. 3398. To change the tariff treatment with respect to certain articles, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. CONABLE. Mr. Speaker, I reserve the right to object. I would like to hear the request again.

Mr. STARK. Mr. Speaker, if the gentleman will yield, it was a unanimous consent request that the Committee on Ways and Means have until 5 p.m. Friday, June 24, to file three reports on the following bills:

H.R. 2769. To promote economic revitalization and facilitate expansion of economic opportunities in the Caribbean Basin region;

H.J. Res. 290. To permit free entry into the United States of the personal effects, equipment, and other related articles of foreign participants, officials, and other accredited members of delegations involved in the games of the XXIII Olympiad to be held in the United States in 1984; and

H.R. 3398. To change the tariff treatment with respect to certain articles, and for other purposes.

Mr. CONABLE. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

LATEST PUBLICATION OF CAPITOL HISTORICAL SOCIETY, "WASHINGTON, PAST AND PRESENT"

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PICKLE. Mr. Speaker, the U.S. Capitol Historical Society has made available for every Member a copy of their latest publication, "Washington, Past and Present," courtesy of the society. Copies are in the Rayburn Room.

I commend the Members to go get their copy and look at it, because it is a very worthwhile publication.

TAX RATE EQUITY ACT OF 1983

The SPEAKER. Pursuant to House Resolution 242 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 1183.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 1183, to amend the Internal Revenue Code of 1954 to limit to $700 the maximum reduction in individual income tax resulting from the third year of the rate cuts enacted by the Economic Recovery Tax Act of 1981, with Mr. HERTEL of Michigan in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 1 hour, and the gentleman from New York (Mr. CONABLE) will be recognized for 1 hour.

The Chair recognizes the gentleman from Illinois (Mr. ROSTENKOWSKI).

Mr. ROSTENKOWSKI. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the Committee on Ways and Means has reported H.R. 1183, with committee amendments, to limit the third installment of the individual tax reductions enacted in the Economic Recovery Tax Act of 1981. In committee, some questioned the timing and the public perception of the so-called cap. No one questioned its benefit to the overall economy. Most of us on the committee opposed the third year back in 1981—and history has proved our reluctance sadly justified.

Two months ago the Office of Management and Budget estimated that the current services deficits will be $226.1 billion for fiscal year 1984, $241.6 billion for fiscal year 1985 and $260.1 billion for fiscal year 1986.

From where I sit, deficits of that magnitude are economic depth charges. We may not feel their full effect this year, or even next. But they will ultimately cripple us if we do not defuse them now.

Tentative signs of economic recovery are welcome. But they should not

allay our legitimate fears that massive deficits will ultimately lead us back to recession. Two hundred billion dollar deficits do not go away because of a rally on the stock market or because projected housing starts are up. Federal borrowing cannot help but stiffen interest rates as private borrowing rises to meet recovery's demands.

Putting a $700 cap on the third year of the tax cut will restrain revenue losses by $6 billion in fiscal year 1984 and $21 billion over the next 3 fiscal years. Alongside the deficit, it is little more than an asterisk on the ledger book. Yet it is a beginning. It is a statement that Congress has begun to grapple with the menace of Federal deficits.

I do not like to raise taxes any more than Ronald Reagan does, I do not know any Democrat who likes to raise taxes. Nor do most Democrats believe that we can reduce the deficit by just raising taxes and cutting defense spending. We on the committee have cut nondefense spending by $81 billion between fiscal year 1982 and fiscal year 1986 and are painfully aware that more must be done.

Yet, to date, the administration has been unwilling to discuss new revenues as a way of addressing either the 1984 or 1985 deficits. I hope that the adoption of a congressional budget will lead to serious discussion with the Treasury Department about the need to restore the revenue base. The administration may not agree with the individual revenue targets in the budget, but the overall long-range revenue needs cannot be disputed.

Today's bill will not alone solve the revenue base problem. But the choice before us today is whether or not we are prepared to slow next year's revenue loss by $6 billion. And if we are, then how is that most fairly done?

Under the rate schedules in the committee's bill, the maximum tax reductions in tax year 1984 would be $720 for joint returns, $637 for single returns and $673 for head-of-households returns. The maximums reductions for the 1983 tax year would be roughly half these amounts. These limits will take effect at $35,200 of taxable income for a joint return—roughly $45,000 of adjusted gross income—and at $28,800 of taxable income on a single return—roughly $35,000 of adjusted gross income.

Let me explain very briefly the distributional effect of the bill:

Of 77 million taxable returns, the cap would affect a little over 8 million—or about 10 percent.

Although about half of those returns affected fall below the $50,000 income line, they account for only 11.3 percent of the bill's revenue.

The remaining 88.7 percent of the revenue increase comes from capping the 4.4 million returns above $50,000 in income.

The cap will affect some joint returns taxpayers at income levels between $30,000 and $45,000 where no deductions are itemized, and even more single taxpayers with incomes in these ranges. But far and away the group most affected by the cap are upper income taxpayers—no matter how our opponents manipulate the statistics.

The committee amendments adopted make technical adjustments to the head-of-household rate schedules contained in the introduced bill and provide relief from estimated tax penalties for 1983 under payments resulting from the changes made in the bill.

Mr. Chairman, if most of us on the committee had our way 2 years ago we would not be facing today's difficult political choice. If we had had our way there would not be a third year of the tax cut. Nor would there be $200 billion deficits. Capping the third year is a modest declaration that both tempers past excesses—and sustains future recovery.

Mr. Chairman, I reserve the balance of my time.

□ 1530

Mr. CONABLE. Mr. Chairman, I yield myself 2 minutes.

Mr. Chairman, H.R. 1183 is a bill which should be defeated. It is bad economic policy, largely because it would raise taxes sharply and thus impede an encouraging recover. It is bad tax policy, primarily because it would create permanent inequities in our voluntary Federal income tax system which already faces credibility problems.

H.R. 1183 also is unjust—very unjust—because it hurts the same groups that already bear an unfairly heavy share of the total tax burden: Middle-income people, especially two-earner families; and small business, particularly family farms.

The bill has been described in a misleading way. Its supporters have called it a $700 cap on the third-year stage of the individual tax rate reductions that were an integral part of the President's economic recovery program. But H.R. 1183 would not achieve that result. It is not a one shot measure. It would result in a permanent change in tax rate schedules, producing leapfrogging tax increases for many income groups not only next year but every year thereafter.

There are a number of additional, extremely important reasons for opposing H.R. 1183 which have been discussed in considerable detail in the dissenting views accompanying the committee report. I will attempt to simply highlight those points in these remarks.

Perhaps the most troubling aspect of this simplistic proposal is that it jeopardizes an economic recovery which is shaping up so nicely with each passing day. The bill before us threatens to dampen the economy's upward movement and cause it either to falter or fall short of its increasingly promising potential. For that reason alone, I am surprised that so many of my colleagues on the other side of the aisle are willing to take the political risks associated with support of this so-called cap.

The Secretary of the Treasury, when he testified on this issue before the Committee on Ways and Means, said the cap would indeed be unhealthy for the blossoming recovery and could have the ultimate effect of boosting our already high deficits and raising anew the specter of inflation. This, of course, would be detrimental to every citizen. It would be particularly harmful, and ironically so, to those on low and fixed incomes who always bear the brunt of rising prices and interest rates.

H.R. 1183 also produces radical inconsistencies and inequities through its marginal rate changes. For example, at the $35,200 income level on a joint return schedule, the marginal rate will change from 28 to 37 percent, an increase of 9 points. At only one other place in the entire schedule does the marginal rate change by as much as 5 points, and in most brackets, there is only a 2- or 3-point change.

Although this so-called cap already is viewed widely as an additional marriage penalty, it adversely affects unmarried taxpayers, too. A roughly comparable rate increase under the proposal would occur in the individual schedule at the $28,800 income level, where the marginal rate would rise by 8 points, from 30 to 38 percent.

The cap imposes even more inequities on middle-income taxpayers when their situation is compared with that of the very wealthy and that of the very poor. One consequence of the bill would be that the percentage tax change for those with incomes under $40,000 would be virtually zero, the percentage tax change for those with income over $200,000 would be 2.5, and the tax change for those with incomes between $50,000 and $200,000 would range from 5 to 7 percent.

Mr. Chairman, many of us who oppose the tax cap on substantive grounds, also are apprehensive about its potential role as a harbinger of even worse propositions. It is not inconceivable that enactment of H.R. 1183 could pave the way for a bid to repeal or delay indexing, which is the taxpayer's best friend in law.

If you dislike this cap, you will really hate any tampering with indexing, which is scheduled to go into effect in 1985. Repealing indexing, or even delaying it, would probably do the American taxpayer more damage than any other change in the Internal Revenue Code. Indexing offers the one best

hope of controlling Government expenditures, because it forces the Congress to vote overtly for tax increases if it wants to spend more money. Without indexing, bracket creep will continue to provide us with automatic, unlegislated tax increases every year, thus perpetuating the most effective form of back door spending.

To review one of the classic examples of the damage that repeal of indexing would do, a family of four, earning $10,000 in 1983 dollars, would pay 47.4 percent more in taxes in 1988.

Of the $6.9 billion which would be raised from repeal of indexing in its first effective year, approximately 77 percent, or $5.3 billion, would come from families earning less than $50,000.

Both indexing and the third-year stage of the President's tax cut are important not only on a macroeconomic basis, but in terms of the positive effects they will have on the lives of low- and middle-income Americans. The reverse also is true, of course. To the extent we undercut either, we will undermine the prospects that our low- and middle-income taxpayers have for prosperity.

The only provision we can do anything about today is the third stage of marginal rate reductions. We should keep that provision in the law, as is.

To do otherwise would invite the wrath of those who keep our Government going: The taxpayers in the great middle income range. We would be treating them unfairly, and their wrath would be justified.

They will not be fooled, Mr. Chairman. They will see this ploy for precisely what it is—a tax increase, a permanent tax increase that will hit them hard every year from now on.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 5 minutes to the gentleman from New Jersey (Mr. GUARINI).

Mr. GUARINI. Mr. Chairman, I rise in support of H.R. 1138, a bill to cap the third year of the tax cut at $700.

Back in April of last year, 1982, this bill was dropped in a hopper as it was then already obvious to many of us that we would be heading for disastrous deficits.

It is extremely important that we make a strong effort at this point to reduce the enormous deficits that are now confronting Congress. In an era of $200 billion shortfalls, this bill is a test of our national resolve for getting the deficits down and keeping them down. And while it is true that this bill will only go part way toward reducing our deficits, $6 billion in fiscal year 1984 and $38 billion over the next 5 years, we must make a real beginning.

We are all aware that there is a widespread concern that the Reagan deficits will choke off a sustained economic recovery by keeping interest rates high. Responsible solutions, and H.R. 1183 is one of them, must be considered.

Is there any fairer or more appropriate or more painless way to raise necessary and needed revenues?

□ 1540

The budget we just passed calls for $12 billion in new revenues and this is a most promising and likely place for us to raise those moneys. The concern about high U.S. deficits is shared not just by many of us in Congress, but also by leading world financial institutions.

Only recently the Bank for International Settlements in Basle, Switzerland, which is deeply troubled over the disastrous state of the world economy, called upon the United States to set its financial house in order. The BIS termed the high U.S. interest rates seriously damaging to the world economy and stated that the principal responsibility for lowering these rates clearly falls upon the U.S. authority and squarely upon the shoulders of those in charge of our fiscal policy here in the United States.

The report concludes that concerted action on the part of the United States to reduce interest rates, and reducing deficits is an important part of the effort, would have a salutory effect in Japan, West Germany, and Great Britain. This, in turn, would provide much needed relief to the debt-ridden economies of the rest of the world.

It is important to note that the focus of this report is not on a solution 2 years down the road, as advocated by the administration in accepting budget deficits of $200 billion in each of the next 2 years, a call was issued for America to act now before the fragile U.S. economic recovery falters and before there is a second wave of crises amongst Third World nations that are already in deep trouble.

Having made these observations, I would like to commend my colleagues who are concerned over struggles of working families and needy people during these times of unemployment. But I particularly would like to address my remarks to the 10 percent of the taxpayers that are concerned with this particular bill, for they will be affected in some measure.

A great responsibility for leadership in this Nation rests upon those of you who share significantly in our Nation's blessings and our future. It is your leadership, your sense of social responsibility and social conscience which are needed today.

There is a great show of concern, and it has been shown from the other side, about a tax cut being taken away. In fact, everybody in this select group will receive at least a $700 tax break in this coming year. Already, you, the selected few, have benefited greatly from changes in ERTA, the Economic Recovery Tax Act. We have reduced the capital gains of 28 to 20 percent, which you are able to benefit from. We have reduced the top marginal rate, the marginal rate, from 70 percent to 50 percent. Not to mention liberalization that we have given in forms of tax credits and accelerated depreciation. These changes have been to the benefit of those few who are in this 10 percent category.

Today, our foremost national priority should be reduction of the unparalleled Federal deficits caused by this administration's policies.

Without a national strategy, a national resolve, a national purpose that we will do everything possible as a top priority to stop the massive hemorrhaging from happening in our economy today, we will not succeed in lowering our deficits. We now have a $1.3 trillion debt ceiling.

The CHAIRMAN. The time of the gentleman has expired.

Mr. ROSTENKOWSKI. I yield an additional 2 minutes to the gentleman from New Jersey (Mr. GUARINI).

Mr. GUARINI. We must put an end to borrowing to have short-term economic recovery which will only obligate our children and their progeny. We cannot continue to borrow and borrow and have deficits on top of deficits. We must make a beginning and the time to do so is now. Let us start by voting for this bill and returning $38 billion to our Treasury.

I urge all of you to support H.R. 1183. Your vote now counts because this is a first step toward responsible, sane fiscal policy for our country.

Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. GUARINI. I yield to the gentleman from New York.

Mr. KEMP. How did the gentleman vote on the repeal of withholding of taxes on savings and dividends?

Mr. GUARINI. On savings and dividends, I voted for it, because I believed——

Mr. KEMP. That was responsible and now this is irresponsible?

Mr. GUARINI. I think it was necessary because we needed capital formation and I think we had to do everything we could to get savings in our country.

Mr. KEMP. The gentleman has answered the question for everybody to hear.

Mr. COURTER. Will the gentleman yield?

Mr. GUARINI. I yield to the gentleman.

Mr. COURTER. I had the opportunity to go through some calculations and I calculated, that if this proposal is passed that New Jerseyites alone in 1983 will pay an additional $255 million of taxes. That is one-quarter of a billion dollars of additional taxes from one State, our State of New Jersey.

I wonder if the gentleman would reply as to whether that is good economics and whether it is also good for the State of New Jersey.

Mr. GUARINI. I think it is good for the country and what is good for the country is good for the State of New Jersey. Everybody must be called on in time of crisis to make some sacrifice; if there are those in New Jersey who are in the upper 10 percent of our bracket have to pay, if a few of them do come from New Jersey, as they do from the other 50 States, so be it.

These are times of crisis and these are times people should be called upon to make a sacrifice.

Mr. COURTER. If the gentleman will yield further, most of the income will be coming from small businesses, 90 percent of this money comes from small businesses, not wealthy individuals.

Mr. GUARINI. That will be aruged and contested later.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 5 minutes to the gentleman from Florida (Mr. PEPPER).

Mr. PEPPER. Mr. Chairman, in a little colloquy this morning I asked the question how would a citizen taxpayer who had an income of $1 million a year be affected by this proposed legislation? My respected friend, Mr. GRAMM, stated as I understood him that that person would not be affected at all, adversely or otherwise.

So, I called up Mrs. Alice Rivlin, head of the CBO, and she wrote me the letter which I have in my hand which I would like to read:

CONGRESSIONAL
BUDGET OFFICE,
Washington, D.C., June 23, 1983.

Hon. CLAUDE PEPPER,
Chairman, Committee on Rules, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: In response to your question, a taxpayer with a million dollars of income (earned or unearned) filing a joint return with two dependents would have his tax cut reduced by $3,736.00 if the cap is imposed.

The attached table shows other income levels and types of returns.

Sincerely,

ALICE M. RIVLIN,
Director.

So, as I said this morning, the purpose of this bill is simply to limit to $720 the amount of benefit that a taxpayer can derive from the Reagan tax reduction program of 1981. It is just as simple as that.

Mr. CONABLE. Mr. Chairman, will the gentleman yield?

Mr. PEPPER. I yield to the gentleman from New York.

Mr. CONABLE. The point is, of course it will increase taxes for a millionaire, but it will increase taxes for a millionaire percentagewise much less than it will for a person between $35,000 and $100,000. In other words, it hits the middle class particularly hard. Millionaires, the wealthier they are, pay a smaller proportion of their income in additional taxes under this proposal than middle-class folks do.

Mr. PEPPER. Excuse me just a minute.

May I respond to my friend from New York. I have here the table prepared by the CBO, it says, "Taxation and Accounting Comparison of Federal Individual Income Tax Burdens Under 1984, Present Law and Under the $700 Cap Proposal." And that shows that the first time there is a change in the case of the type of taxpayer that I described occurs when he reaches either $45,000 or $50,000. So, this does not begin to change anybody, according to this that I am going to put in the RECORD when we go back in the House, until you get up to $45,000 or $50,000. And, of course, as I am informed, maybe I am in error, but I have the figures that one-half of the people of this country make less than $20,000 a year.

So, while we understand that $50,000 is not an awful lot of money nowadays, at the same time it is an awful lot of money to an awful lot of people in this country.

The table is as follows:

TABLE 3.—COMPARISON OF FEDERAL INDIVIDUAL INCOME TAX BURDENS UNDER 1984 PRESENT LAW AND UNDER THE $700 CAP PROPOSAL [1]

	Tax liability														
	1. Single, no dependents			2. Joint, no dependents			3. Joint, 2 dependents			4. Joint, 2-earner, no dependents			5. Joint, 2-earner, 2 dependents

[1] Expanded income equals adjusted gross income plus excluded capital gains and various other tax preference items less investment interest to the extent of investment income.
[2] Total includes married filing separate returns that are not listed elsewhere.
[3] Percentage distribution in parentheses.
[4] Less than 0.1.

□ 1550

Mr. CONABLE. Mr. Chairman, I yield such time as he may consume to the gentleman from Colorado (Mr. KRAMER).

Mr. KRAMER. Mr. Chairman, I rise in opposition to this legislation.

Mr. Chairman, whether some on the other side of the aisle like it or not, the economy is on the way to a brisk and stable recovery. Whether they admit to it or not, fundamental to this recovery is the historic tax relief package Congress passed in 1981. And whether they know it or not, tearing down that fundamental tax relief by capping the third year of the tax cut would seriously jeopardize this recovery—a recovery that the American people have been promised, and one that they have personally sacrificed to attain. I believe we should follow the adage that, if it is not broken, then do not fix it. If you make a promise, do not renege on it. Mr. Chairman, this $700 tax cap does both by attempting to fix a problem that does not exist, and bringing into question this Congress ability to keep its promises. It is a cruel hoax.

You see, there seems to be a misperception around here that big deficits come from too little taxes, and that the solution is simply to raise more revenue. Let me just say for the record, big deficits come from out of control spending. The conference report on the budget which passed this House today would raise the debt ceiling to $1.614 trillion and indicates clearly that Congress is not serious about controlling spending. We can increase taxes all we want, but if we continue to spend more than we take in, we are never going to close the deficit gap. It is that simple.

Mr. Chairman, calling the $700 cap on the third year of the tax cut a "cap on the rich" is a cruel hoax and an insult to the hundreds of small business proprietors and the estimated 4 million Americans who will be impacted most by this tax hike. Mr. Chairman, America's small businesses employ three out of every four workers in this country and lead the way in job creation. But, Mr. Chairman, 86 percent of them file individual tax returns. Any tax hike, and especially this tax cap will tie the hands of small business owners, limit their ability to grow and prosper, to increase the Nation's productivity, and most importantly, to put people back to work.

This tax cap is bad news. Families with two wage earners making between $35,000 and $45,000 will shoulder this increase almost entirely. Two loyal Americans putting in long hours, maybe at a small shop they own, and bringing home a paycheck totaling $35,000 for the year are hard working taxpayers who are trying hard to save for retirement, for their children's educations, for a home, or maybe—if things go pretty well—a deserved vacation.

But most of all, Mr. Chairman, they are Americans pleading for a return to fiscal sanity and responsibility, for control of excessive Federal spending which crowds out their personal spending choices and fuels inflation that threatens the value of their retirement nest eggs and strikes at the heart of every American's dream of a better life for his or her children. Yes Mr. Chairman, calling the cap a tax on the rich, and implying that everyone's wages belong to the Government and only by its good graces does it allow you to keep them, is indeed a cruel hoax.

Mr. CONABLE. Mr. Chairman, I yield 3 minutes to the gentleman from Tennessee (Mr. DUNCAN).

Mr. COURTER. Mr. Chairman, will the gentleman yield?

Mr. DUNCAN. I yield to the gentleman from New Jersey.

Mr. COURTER. Mr. Chairman, I rise in opposition to this middle-class ripoff.

Mr. Chairman, New Jersey taxpayers will pay over a quarter of a billion dollars in higher taxes this year if the Democratic plan to limit the 1983 tax cut installment becomes law.

Despite the rhetoric to the contrary, this is a tax increase that hits hard at the middle class and small businesses, it is senseless economic policy.

At a time when a national economic recovery is clearly gathering steam, the last thing New Jersey needs is a $255 million tax increase.

This $700 cap is an extra tax on the middle class, it will raise taxes for families with gross incomes as low as $39,250, and individuals with incomes as low as $31,350. And since 86 percent of small businesses pay taxes as individuals, not corporations, they will get a tax increase, too.

This proposal will do little to soak the rich, who got their tax relief when the top rates was lowered from 70 to 50 percent in January 1982. To suggest otherwise is sheer demagoguery.

Sponsors of this bill tell us that we need a tax increase to reduce the deficit. But it is overspending, not undertaxing, that is our main problem. The Government will collect $142 billion more in taxes in 1984 than it did in 1980, and the deficit will be higher—the problem is that spending is growing far faster than taxes.

Mr. DUNCAN. Mr. Chairman, I oppose H.R. 1183 because it is a bill which unfairly provides tax increases on millions of Americans, especially two-earner couples earning relatively modest amounts of income. These increases would impose particularly severe burdens on farmers and small, independent businessmen and women across the country.

I would remind my colleagues that the Economic Recovery Tax Act of 1981 provided long-needed tax relief for these same groups of farmers and small independent businessmen and women, both in the form of individual rate reductions and through other provisions. The effect of this bill would be to take back some of those benefits in a most unfair manner.

A fact which is little understood by most people is that the bill retroactively increases the tax liability which these taxpayers must pay. An increase in taxes at this juncture is most inequitable because farmers and small businessmen must make plans for growth at least 1 or 2 years in advance. The planning obviously involves taking into account their future tax liabilities with respect to income they will earn. This bill would unfairly change the rules of the game while it is still being played—midway through a year in a manner which prevents

them from making other, offsetting tax decisions.

In addition, according to testimony by Treasury Secretary Regan, this change could very well cause the economic recovery, which is well underway, to stall or come to a complete stop. If this were to occur, the impact on small businessmen and farmers would be devastating because they are among the people who are most hurt by high inflation and high interest rates.

The economic recovery has been successful thus far in reducing both the high inflation and the high interest rates that were inherited from the prior administration. Risking, through this bill, a return to those high interest rates and high inflation levels, is irresponsible and should be avoided at all cost.

I urge every Member of this House to vote against H.R. 1183 because it could jeopardize the very livelihood of small business people and farmers across the country.

Mr. CONABLE. Mr. Chairman, I yield 3 minutes to the gentleman from Illinois (Mr. PHILIP M. CRANE).

Mr. PHILIP M. CRANE. Mr. Chairman, under the guise of the old radical "soak the rich" rhetoric that used to prevail in this body a generation ago, once more we are listening to some of the stale, same old arguments and they come from essentially the same radical quarters that obviously believe in the old ideology of tax and spend.

The irony in this particular proposal, which represents almost a $38 billion tax increase over the next 5 years—and do not be confused about what this is all about, it is a tax increase—the irony is it comes right on the heels of the vote we had on the budget resolution. It is apparent the radicals still believe in spending and believe in continuing taxation of the already overtaxed American, who has been suffering from confiscatory levels of taxation.

I do not think there is a respectable economist in the country today who supports the idea of massively raising taxes during a time of economic recovery, which we are experiencing right now. And most especially they recognize the foolishness of further taxing the productive middle class in this country, which has been ravaged over the past several years, because of inflation and the inability to enjoy the protection provided by indexation, which the same radical taxers wanted to go after in 1985.

The middle class in this country, with adjusted gross income between $15,000 and $50,000, constitutes 45 percent of our population and at the present time, they are paying 60 percent of our total taxes. And it is that element which the Members who are proposing this cap want to assault.

I urge my colleagues in this body, if you have compassion for hard-working Americans, if you really believe in economic recovery, to reject this insane proposal.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. STARK).

Mr. STARK. Mr. Chairman, in the vociferous debate on the proposed $700 tax cap we can easily become awash in a sea of absolute numbers and lose sight of the fundamental economic question that gave birth to this proposal. Simply put, this country is deeply in debt, and the question before us is not whether Congress should punish the rich or reward them for their excesses. Instead, it is a question of whether Congress should borrow even more to provide a small percentage of the wealthiest Americans with a huge tax break.

The President opposes the tax cap. He believes that we should borrow another $6 billion in deficit spending so that the 5 percent of the population with incomes above about $50,000 may have more than a $700 tax cut.

Without a cap, the very wealthy will have a huge tax cut. For example, the President in 1982 had $741,253 in income and paid $292,616 in Federal taxes. If he earns the same amount in 1983 and has the same deductions, his tax cut will be worth $3,736.

This is sort of like the Biblical parable of the talents the President cited yesterday. The President noted that the man who invested and multiplied his talents, his money, was praised. Under the President's tax policies, the person with a lot of money multiplies his tax break, and the President finds that praiseworthy. But I do not think it good or wise that the rich are getting richer, and the poor are getting poorer, and that the divisions in our society are getting wider.

A Member of Congress with three dependents, and with $69,000 in salary and $6,000 in honoraria, and with typical deductions would get a tax cut of $878 if there is no cap.

I think most of us would be willing to give up $160 of that tax cut to help cut the Nation's awesome deficits. I believe that those who care about the country, about fairness, and about reducing deficits, will all agree.

The cupboard, Mr. Chairman, is bare, and those of us on both sides of the aisle know that all too well. And yet some vigorously argue we should jeopardize our economic recovery simply to provide a largesse to a few. Those who subscribe to the argument that a tax break is a fundamental right, and will mean riches for all, should consider the economic reality behind the few hundred or few thousand dollars that a tax break will mean. In other words, do you think Congress is acting responsibly if it provides a tax break of, say, $600 to a working American family without telling that family that the pressure this break puts on the American debt and the subsequent pressure it ultimately puts on interest rates will threaten economic recovery, will threaten a family's ability to buy a home, to buy a car, to send their children to college? This move to hand out tax dollars desperately needed in the Federal Treasury is a cruel ruse and we should own up to that. Big breaks today could mean 16 percent or higher interest rates tomorrow, meaning a family with a $50,000 mortgage can expect to pay hundreds of dollars a month more in home payments than if that loan were made at a more reasonable rate. But we all know these rates will not remain reasonable if the Government continues to add to its debt and must compete for additional funds in the private market to finance that debt. Something is going to give, and we all know it is going to be those middle-class American families, who some Members of this House want to give a minor tax break today, so they can pay through the nose tomorrow.

Let us not be cruel to the American public. Let us not tell them this is merely an issue of whether the American public, rich, or poor, or middle class, gets a few hundred dollars in tax breaks. Let us tell them the whole story. Let us tell them that for a few hundred dollars today they are going to pay a dear and high price tomorrow. I for one am not willing to mortgage the future of our Nation and the health of our economic recovery simply to serve the political expediency and irresponsibility of those who wish to pass out money this country does not have.

Mr. CONABLE. Mr. Chairman, I yield 3 minutes to the gentleman from North Carolina (Mr. MARTIN), a member of the committee.

Mr. MARTIN of North Carolina. Mr. Chairman, I rise in opposition to H.R. 1183. The 1981 tax cut was a fair tax cut because it was proportional to the taxes paid. If you paid half as much in taxes, then you got half as big a tax cut.

Consider this example, if you will. One individual makes $80,000 in income, yet got a tax cut 11 times that of a neighbor earning $20,000 in income. The first individual A makes 4 times the income of B and yet gets 11 times the tax cut. Why is that?

The reason is because A pays 11 times the tax burden of B. If A pays 11 times as much taxes as B, then proportionately A would get 11 times the tax cut as B under the 1981 tax cut, because it was proportional.

After that A still would be paying 11 times as much taxes as B because the tax cut would be proportional. It seems to me that that is fair.

Now what about the wealthiest taxpayers? We have heard a lot about that.

I would say they have already gotten 24 percent of their 25 percent tax cut.

During the debate on the rule, the chairman of the Rules Committee, the gentleman from Florida (Mr. PEPPER) protested that someone with $1 million of gross income would get a $100,000 tax cut. Well, the important lesson for us and it is a lesson why we ought to vote against this bill, is that in the first place that is true only if his tax burden was $400,000. If he paid $400,000 in taxes, then his 25-percent tax cut would be $100,000. So he is getting his proportionate share of the cut in relation to the amount of taxes paid, but the most important thing is related to the most recent statement by the gentleman from Florida, who indicated that under this tax bill, that millionaire is going to have to pay $3,700 more in taxes.

□ 1600

What that means is that that individual has already gotten $96,300 of this $100,000 tax cut. That is 24 percent of his 25 percent. And he got it all in the very first year, not in his third year. He is not waiting on July 1. That individual got his tax cut, nearly in its entirety, in the very first year, thanks to an amendment not offered from this side but an amendment that was offered and engineered by the former Member from Michigan, Mr. Broadhead, a Democrat. It was a Democrat's amendment that gave that millionaire his $96,000 tax cut in the very first year. All this bill does is deprive him of the next $4,000 or so.

Finally, let me say that that millionaire has received that $96,000 tax cut two times already. He got it the first year, he got it last year, he is going to get it again this year, whether this bill passes or not, because he has already gotten that tax cut of $96,000.

So this bill is not going to affect that person. It is going to affect those with incomes between $30,000 and $100,000. It is not going to affect the millionaire by more than a few percent, and therefore, it is an unfair piece of legislation.

Mr. CONABLE. Mr. Chairman, I yield 3 minutes to the gentleman from Ohio (Mr. GRADISON), a valued member of the committee.

Mr. GRADISON. Mr. Chairman, on the merits this tax cap does not make much sense. Across-the-board tax cuts are fair and, until recent weeks, have had the support of a large, bipartisan majority of this body.

Here we are—10 days before the third step of a three-step across-the-board tax cut takes effect—talking about capping the tax cut. Why? Because the Democratic leadership of the House thinks this is a good political issue.

Where were they when the Democratic Party in this House supported a 5-percent across-the-board cut in 1981 without a cap? Where were they when the Democratic Party in this House supported a 10-percent across-the-board cut in 1982 without a cap? Where were they when the Democratic Party in this House initiated and supported a 20-percent reduction in the maximum personal income tax rate? And, where were they when the Democratic Party in this House supported a cut from 28 to 20 percent in the maximum tax on capital gains?

The fact is this is a last-minute, politically motivated proposal divorced from sound, long-term tax policy.

Any analysis of how the tax burden should be shared by different income groups must take into account how that burden is distributed today. The fact is that the upper half of all taxpayers pays 94 percent of all Federal income taxes, the lower half pays 6 percent. The top 10 percent pays over half of all Federal income tax.

Aside from the question of who would pay these extra taxes is the issue of what would be done with the $6 billion it would raise. The public might get the idea from some of the debate that the deficit would be reduced. This simply is not so. The 1984 budget just adopted makes it crystal clear that the proposed tax increases—of which this tax cap is part—would be used to finance higher domestic spending and not to reduce the deficit.

Let us face it. This tax cap issue is simply a diversion. It is not the main show. This bill, which purports to zap the rich, will not become law, and even if it did, would not zap the rich. The real goal of the Democratic leadership is to repeal tax indexing which otherwise will take effect on January 1, 1985, and prevent unlegislated tax increases from going into effect as the insidious result of inflation-induced bracket creep. And who will lose if bracket creep is not stopped and indexing is repealed? Not the rich who already are at the top tax rate and cannot be pushed any higher. It will be the middle class.

And so, I say to my colleagues, Mr. Chairman, give this bill what it deserves—your "no" vote and then let us turn our attention to the larger goal of saving tax indexing, the most important structural tax reform in years, and the great hope of the vast majority of American taxpayers who are in the middle- and lower-income brackets.

ANNOUNCEMENT BY THE CHAIRMAN

The CHAIRMAN. The Chair will advise the visitors in the gallery that there will be no demonstrations.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 5 minutes to the gentleman from California (Mr. MATSUI).

Mr. MATSUI. I thank the gentleman for yielding.

Mr. Chairman, I would just like to draw the attention of some of my colleagues on the other side of the aisle to some comments that they made that perhaps do not quite make some sense.

Now, we all acknowledge that we are not going to have a deficit that is below 2½ percent of GNP in 1985. And, of course, if in fact we do not, the President has indicated that he will propose a standby tax on oil and also a surtax to raise about $46 to $50 billion worth of revenues beginning in October 1985.

We all know that we are going to have to raise taxes in 1985 because of the deficit figures. The defense budget and the tax bill that was pased in 1981 created this problem, basically, along with the recession.

But let me just say that if in fact the President's tax proposal comes into play, people that make $40,000 and less will end up paying 75 percent of the oil tax that the President has proposed. Only 25 percent of that tax will be paid by those people who make $40,000 and above.

Let us take a look at the surtax that the President has proposed as being a fair tax. Those people who make $50,000 and below will end up paying 62 percent of that surtax in 1985, and those people who make $50,000 and above will only pay 38 percent of that tax.

And we all know that we are going to have to impose some kind of tax.

That is the President's tax proposal. The burden is shifted to those people who make under $40,000, whereas the tax cap proposal, the $720 tax cap proposal that we have on our side of the aisle, is such that of the $6 billion raised, only 11 percent of that $6 billion will come from $50,000 wage earners and below; 89 percent of that tax will come from those people who make $50,000 and above.

I think there is a misunderstanding about what middle income people are, in terms of who is going to share the burden of this tax.

Mr. GEKAS. Mr. Chairman, will the gentleman yield?

Mr. MATSUI. I yield to the gentleman from Pennsylvania.

Mr. GEKAS. I am confused about something. Is the gentleman supporting this proposal because the gentleman wants to help the deficit problem by adding $6 billion to our revenues, thereby reducing the deficit? Is that why the gentleman is supporting this proposal?

Mr. MATSUI. Is the gentleman suggesting that we are going to earmark this money and be able to really follow it all the way through the process, the Treasury, and everything else?

Let us not play games with ourselves.

Mr. GEKAS. I am not playing games.

Mr. MATSUI. We passed the budget, a $175 billion deficit. That includes a $12 billion increase in revenues, along with a lot of spending on defense and social programs.

Now, presumably we are going to pick up $6 billion with this cap to reduce that $12 billion. Let us not play games. We can all fool around with accounting numbers. The gentleman knows that and I know that.

Mr. GEKAS. If the gentleman is playing games, he is the only one in this colloquy. I am not playing games.

Mr. MATSUI. Tell me what your problem is.

Mr. GEKAS. I am asking the gentleman if his main intent in supporting this legislation is to reduce the deficit.

Mr. MATSUI. My main intent is to follow the budget resolution that we just passed out of the House, that is, to reduce that $12 billion tax increase proposed by $6 billion.

Mr. GEKAS. Then I ask the gentleman why he is not proposing that the entire third year tax cut be repealed so that the gentleman's first premise of adding $6 billion to the revenues might be enhanced by whatever amount of money the rest of the tax cut would yield.

Mr. MATSUI. Mainly because I believe in Keynesian economics. In order for us to maintain the slight recovery that we have, we must make sure that there is enough money in the economy so that we will increase purchasing power. But you do not need to give it to those people who are making $50,000 and above. They will get $720, and that should be enough for them to keep the purchasing power going.

Let us say this: They are not going to put the money in a saving account, as Don Regan says. What they are going to do is, they are going to put it in unproductive type investments.

Mr. GEKAS. Then the gentleman, if I draw this logically, is endorsing the third-year tax cut that President Reagan proposed and this Congress enacted, except for the proposal here, because it adds to the capabilities of our economy by giving the taxpayers wherewithal by which to pump back into the economy under the Keynesian theory or any other theory.

What the gentleman wants to do is to take some of the money out of this theory, thus pulverizing the economy to that extent.

The CHAIRMAN. The time of the gentleman from California (Mr. MATSUI) has expired.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 1 additional minute to the gentleman from California.

Mr. MATSUI. I hope the gentleman was not suggesting that $6 billion is going to make the economy purr and do a really great job; because if in fact the gentleman thinks that that additional $6 billion we are going to use to reduce the deficit would have made the economy perk up and go at a 7- or 8-percent growth rate, I am afraid that he has not talked to many economists.

Mr. CONABLE. Mr. Chairman, I yield 3 minutes to the gentleman from Louisiana (Mr. MOORE), a member of the committee.

□ 1610

Mr. MOORE. I thank the gentleman for yielding this time to me.

Mr. Chairman, as I said this morning at the beginning of the day's business, this bill, like the one before it, is a mere political act, political exercise, political rnetoric. It is not going to be law, we know that, it is just politics. But it is bad politics.

We are raising taxes permanently, not capping for 1 year at $700 and no more than that amount in reduced taxes one can get back. We are raising taxes permenently and we are not cutting spending along with it. Raising taxes and spending, the same old game all over again.

It is bad politics because it is very unfair to the middle class, the very people we told we were trying to help in 1981. We told them and all Americans we were going to cut their tax rates by 25 percent in 1981, and now 10 days before the final 10 percent goes in, we are telling some of those taxpayers, those in the middle class, "We are sorry, we just cannot do it for you. We are going to take it back."

If we do that, they get absolutely no real reduction in their taxes at all. Bracket creep, the social security tax increases, and gasoline tax increases will see to it they really got no increase at all if they do not get this final 10 percent we are debating taking back from them today. They need the 10 percent to finally get a real tax cut; otherwise, they got no cut at all.

It is bad politics because the middle class once again is getting the biggest tax increase of this permanent tax increase we are debating here today. A joint tax return of a middle-class taxpayer of $35,200 will get a permanent, marginal tax increase of 9 percentage points. That is bigger than any other bracket or group in the tax code; 9 percentage points for a joint taxpayer receiving $35,200 or above. Now, this is more than the proverbial rich that we hear the other side talking about taxing, the $50,000 and above taxpayers. We are not talking about $50,000; we are talking about $35,200 on a joint taxpayers' return getting a 9-percentage-point increase!

It is bad politics because we are continuing to push people into higher tax brackets, and when we get them there, we increase the tax rates in those brackets. In 1960, only 3 percent of the taxpayers in America faced a 30-percent tax bracket. In 1981, 34 percent of the American taxpayers faced that bracket, a tenfold increase. These people in that 30-percent tax bracket are the very people we are raising the tax rates the most on here today, $35,200 and above on a joint taxpayer return gets a 9-percentage-point increase and they are in that bracket. This is the very bracket we have been pushing too many people up and into, they have increased tenfold over the last few years, and would increase their rates now, we got them their 9 percentage points by this action today.

So it is bad politics, really bad politics. We have heard the call for years, "Tax the rich and pay for Government programs." Now we have a new definition of the rich. Tax those who are earning $50,000 and everything is all right, but we find out we are actually taxing people in the middle class, as the tax-and-spenders have always done. Hit them in the neck once again. The rich will not be paying, the poor will not be paying, it is the middle class once again. It is politics, but bad politics.

Mr. CONABLE. Mr. Chairman, I now yield 3 minutes to the gentleman from South Carolina (Mr. CAMPBELL).

Mr. CAMPBELL. I thank the gentleman for yielding this time to me and I rise in opposition to the bill.

Mr. Chairman, we are wasting our time. This is political posturing. This is a phony issue. It is not serious, and the American people should see through it very quickly. However, I think that it is worthwhile if we look at some of the facts.

I was interested when the chairman of the Committee on Rules got up and talked about the amount a person making $1 million would pay. Let us look at it a little differently. Suppose a tax were put on someone that was $99 and that person made $100. That would be a 99-percent tax. But suppose that same $99 tax were put on someone making $100,000. That would be a 0.99 percent tax. That is what this bill does to middle income America; it raises taxes by a higher percentage for the person making $39,000 than it does for a person making $390,000.

Is this the way tax policy should work? I think not. It is not. I do not call this a tax cap. It is a permanent change. As a matter of fact, if one files a joint return, it is $720, on a single return it is $637, and on a head-of-household return it is $673. They are getting at us a little differently, but it is all permanent.

Further, I think that we should recognize that the cause of deficits is not tax cuts, but spending. We started in the early 1960's with a $100 billion Federal budget. We have increased that 900 percent in the last 22 years, and our taxes have gone up at the

same fast growth rate. So all we are talking about is giving us some more money to spend, instead of the taxpayers keeping it to spend for themselves.

This hits Mr. and Mrs. Middle Income Taxpayer, the working man and woman. Four out of five families in America that make over $35,000 have two wage earners—two wage earners. This is the groups that you would raise taxes on if you vote for this bill. This is the same Congress that wanted to give back some of the benefits to the working spouse because we did not think it was right that we were taxing working spouses at the rate we were, and we did something about it. Now, those who support this bill want to raise the rates again on that working couple.

This is not a soak-the-rich bill. It has already been said that the top marginal rate was cut from 70 to 50 percent. We have already cut the capital gains rate. There is no surcharge in here on people making over $100,000 or $200,000. If you wanted to tax the rich, you should have done so; instead you are going after middle-income America.

Forty-eight percent of the people who will be taxed under this bill make less than $50,000 a year as individuals or as couples. Now, if you think making $35,000 or $40,000 a year, with one spouse a policeman and the other a nurse, is a rich American family, then I am going to tell you, you have a distorted view of this country.

Mr. CONABLE. Mr. Chairman, I yield 2 minutes to the gentleman from New Jersey (Mr. RINALDO).

Mr. RINALDO. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in opposition to this bill which reneges on Congress 2-year-old commitment to America's wage earners.

The sponsors claim the $700 tax cap is aimed at the rich. Well, if it is, their aim is bad. About half of all the taxpaying families whose taxes will be raised by this measure earn between $20,000 and $50,000.

Under current law, these middle-income working families are already footing over half of the Government's entire tax bill.

For example, let us look at a blue-collar family of four. The husband earns $25,000 and his working wife makes $11,000. If anyone thinks this family's rich, they're out of touch with reality.

Under this bill, this blue-collar family is looking at a 25-percent increase in marginal tax rates.

Why do the sponsors want to impose more taxes on the backs of those already carrying most of the tax burden of this country?

This bill is not only unfair, but it does not even touch the truly rich. The highest income earners have already had their full tax break in 1981, when the top bracket came down from 70 to 50 percent. To the small extent this measure affects them, we all know they will protect themselves by going back to their lawyers and accountants and tax-sheltered investments.

Mr. Chairman, the major newspapers have seen this tax hike for what it is: A politically motivated attack. The New York Times called it "doubtful economics and rotten policy." The San Diego Union said that "raising taxes now would raise the deficit, not shrink it." And the Washington Post says it is "a gesture, not a reform."

Mr. Chairman, Congress has committed itself by law to a 3-year tax cut plan. The only reason to go back on that commitment would be a national emergency. But the only emergency we have today is the majority party's panic because the economy is strongly recovering, as every indicator shows.

In my district, the city of Elizabeth was suffering from 12.9-percent unemployment in March. I have long since promised my constituents a 25-percent across-the-board tax cut so the economy can generate new jobs and middle-income earners can have much needed tax relief. I feel honorbound to keep my commitment by voting against this tax hike. I urge Members to keep their commitment as well.

□ 1620

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 1 minute to the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. Mr. Chairman, if we are serious about reducing the Federal deficit, then this is good place to start. When the Kemp-Roth plan was rolled out in 1981, I had my doubts about it. I did not like the "locked-in" approach, and I argued, if we had to have such a plan, the third year should be contingent on economic conditions. Now that the recovery is underway, we do not want to jeopardize it by permitting these huge deficits to go unabated. We simply must reduce the deficit if we want a sustained recovery. But to reduce the deficit, we will need a three-pronged strategy that targets defense spending, revenues, and entitlements. In short, Mr. Chairman, with $200 billion deficits, I think capping the third-year tax cut is not only the responsible thing to do, it is what we must do. But this is not all—we must now try to cut spending and control defense spending.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 5 minutes to the gentleman from Massachusetts (Mr. SHANNON).

Mr. SHANNON. Mr. Chairman, I want to thank the chairman of the committee, the gentleman from Illinois (Mr. ROSTENKOWSKI) for yielding this time to me.

I have been sitting here listening to my Republican colleagues get up and defend the middle-class taxpayers, and I have been very, very impressed by their arguments. They keep on pointing out the fact there were some Democratic Members who at one time wanted to drop the top rate from 70 to 50 percent, as if that were a terrible thing. I want to say right now, "any one of you who wants to cosponsor a bill to return that top rate to 70 percent, I will be happy to join with you."

I say to those Members, "you know as well as I do and as well as the American people know that it was your tax program that cut the top rate from 70 to 50 percent." The gentleman from New York knows that in his original Kemp-Roth bill the top rate went from 70 to 50 percent, and now Members come down into the well of the House of Representatives and act as if what they are really concerned about is that middle-income taxpayers are going to get hit by this tax bill.

How many times today have we heard about the two-income families in the $35,000 range? How many of those families with incomes between $30,000 and $40,000 are going to get hit by this $700 cap? I will tell the Members how many. It is 2.6 percent of them.

The Secretary of the Treasury came before the Committee on Ways and Means 2 weeks ago and admitted that 89 percent of the revenues raised under this bill will rest on people who earn over $50,000. Yet, I say to the Members, "You are not willing to admit that. You are not willing to admit that it is your tax policy that has created $200 billion budget deficits. You like to be the party of opposition."

Let me tell my friends something about that: "It is your President, it is your administration, it is your economic policy that has thrown 10 million people out of work in this country, and it is your administration that has created $200 billion budget deficits."

While it would be simple for us to stand here and say we are the party of opposition and say it is not our responsibility, we are not going to do that. The American people know who caused that crisis. We all know that it is not going to be easy to solve that problem.

Let me say that I do not feel comfortable coming into the well in support of any tax increase, but I defy anyone to find a fairer way to pick up the revenues than with this $700 cap.

Mr. KEMP. Mr. Chairman, will the gentleman yield for a question?

Mr. SHANNON. I am happy to yield to the gentleman from New York for a question.

Mr. KEMP. Mr. Chairman, would the gentleman tell us what he thinks has happened to the revenues from people in brackets over 50 percent since the cut in the tax on savings and

Congress lowered the 70 percent rate to 50 percent?

Mr. SHANNON. What has happened in those brackets in terms of what?

Mr. KEMP. In terms of revenue. Has revenue gone down or up in those brackets above 50 percent?

Mr. SHANNON. I would say the revenues have gone down.

Mr. KEMP. Revenues went up, I would say to the gentleman from Massachusetts. Revenues from high income Americans rose from 27 percent of Federal taxes to around 30 percent of Federal revenues.

Mr. SHANNON. Mr. Chairman, if I may reclaim my time, I stood on the floor of the House of Representatives 2 years ago when the gentleman from New York got into a colloquy with the gentleman from Georgia (Mr. LEVITAS). The gentleman from Georgia said at that time, "I am concerned about this third year of the tax cut because I am concerned that the third year of the tax cut is going to result in huge deficits."

Mr. KEMP. We have not had the third year yet.

Mr. SHANNON. And the gentleman from New York got up and said, "Well, I think we need a multiyear tax cut, and I hope you will go along with it; and I want to assure you that this President would not undertake any policy that would leave this country in an economic decline over the next 3 or 4 years."

What I want to say to the gentleman, the author of that policy, is that that policy has resulted in economic decline.

Mr. KEMP. Well, I would disagree.

Mr. Chairman, will the gentleman yield?

Mr. SHANNON. If I may be permitted to finish my statement, let me just say this:

I have seen all these Members come down into the well and talk about how they are really trying to protect the poor and the middle class. The move that they make today would put the Flying Wallendas to shame when it comes to stretching a point about how concerned they are about the poor and the middle class.

But what I cannot get over is that while they talk about the poor and the middle class, their policies always benefit the rich.

We do not want to vote for any tax increase bill, but we are realistic and we are not going to put our heads in the sand. We are not going to let these deficits continue; we are not going to let higher interest rates choke off an economic recovery; we are not going to deny the chance for millions of Americans to go back to work by being fiscally irresponsible.

There are political costs in that, I understand, but I ask the Members on the other side of the aisle to rise above their own rhetoric. I ask them to rise above their own history and try to do something that is fair. Their policies have sapped from our economy two things that the Democratic Party seeks to restore beginning today. They have sapped fairness and they have sapped growth, and we are going to begin on the road back to growth and fairness beginning today.

Mr. CONABLE. Mr. Chairman, I yield 2 minutes to the gentleman from Florida (Mr. BILIRAKIS).

Mr. BILIRAKIS. Mr. Chairman, I rise in opposition to this betrayal of the American taxpayers. Let there be no mistake—this proposed cap on the July 1 tax cut is a working couples' tax increase. And at a time when the economy is making, sure, but fragile, progress toward recovery, the country can ill afford to take more money out of the wallets of working Americans and to undermine the incentives to work and save which the President's tax relief plan has created.

Claims that this third year tax cut benefits only the wealthy are pure nonsense. Almost half of those affected by this cap have incomes under $50,000. It is also interesting to note that a recent Gallup poll showed that 55 percent of all respondents favor putting the tax cut into effect as scheduled and, interestingly, that among respondents with incomes between $15,000 and $25,000, 64 percent support the tax cut. It is the middle class who will be hurt by this cap, just as it has been the middle class who has had to bear the brunt of so many failures by Congress to see beyond the political expediency of spend, spend, spend budget policies that necessitate tax increases.

As a small businessman and member of the Small Business Committee, I am particularly distressed that we would consider a measure which would make it more difficult for this important sector of the economy to grow and prosper. Eighty-six percent of small businesses pay taxes under individual rather than corporate tax schedules and this means that nearly 2.5 million small businesses will see their taxes increased if this $700 cap is approved. Does this say to the Nation's small businessmen and businesswomen—the backbone of our economy and, I believe, the key to recovery—that we want them to suceed? No. It just makes it harder for them to do so.

The problem is not the willingness of the American taxpayers to pay their fair share, but the willingness of the American Congress to make tough choices. I submit that we will never see complete recovery until we have a Congress with the discipline to stop spending taxpayers' money as if it was their own and the wisdom to stop penalizing initiative, hard work, and success as if they were national embarrassments rather than tremendous national resources, of which I, for one, am very proud.

Our constituents cannot afford any more taxes. Let us stand up for their rights and vote this irresponsible increase down.

Mr. CONABLE. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois (Mr. PORTER).

Mr. PORTER. Mr. Chairman, I rise in opposition to this misguided and inequitable bill.

Mr. Chairman, every year this body passes commemorative legislation to designate days, weeks, years, in recognition of outstanding achievements of one group or another. Mr. Chairman, I think this year should be designated "Congressional Irresponsibility Year." This will show the American people that we in the Congress recognize the fact that despite the Reagan administration's valiant attempt to foster a strong and lasting economic recovery, the House Democratic leadership has done all it can to derail the President's train of tax relief measures begun in 1981.

Thankfully, they have failed. But they are now so desperate to keep their hands in the taxpayer's pockets, they are resorting to shaking down the little guy. Let's look at the facts. The House's first concurrent budget resolution called for repeal of the July 1 tax cut and income tax indexing. Failing that, our friends on the other side of the aisle now propose another plan which would cheat the middle class out of their portion of the Kemp-Roth tax reduction by capping the July 1 tax reduction at $700. Although I realize it is difficult for some to break old habits, it is time to teach these old dogs new tricks.

Inflation-induced bracket creep, increased social security, and State taxes, and the August 1982 Federal tax increase have joined to effectively wipe out the first 15 percent of the 1981 tax reduction plan. On July 1, the lower- and middle-income families in the Nation will, for the first time, reap the benefits of a 10-percent across-the-board reductions in their marginal tax rates. Top bracket taxpayers will not receive any relief from the third year of the tax cut on their income above $55,300 for singles and $109,400 for joint filers. Clearly this is a tax reduction that is well timed to coincide with the recovery and well placed to give those who need it most—the lower- and middle-bracket taxpayers—an opportunity to increase their disposable income.

Capping the tax cut at $700 does little to provide "tax equity" between lower and higher income brackets as this bill purports. The cap increases the marginal rates in the middle brackets but would not increase the 50-percent rate that the affluent pay.

Furthermore, the cap would have a serious impact on small businesses, most of which conduct their business as a partnership, sole proprietorship or subchapter S corporation, and are therefore taxed as individuals. Small business has suffered enough during these past years of congressional fiscal folly. Let us not beat them down again just as the benefits of a stronger economy come their way.

Let us end our preoccupation with the revenue side of the fiscal equation. Responsible spending reductions in both defense and social spending must be achieved if we are to reduce the projected $200 billion deficit. Let us defeat this inequitable "tax equity" legislation and join together in what must be our common goal: to promote economic recovery by means of a responsible budget and a reasonable fiscal policy.

Mr. Chairman, this proposal won't soak the rich, but it could dampen our economy recovery. It won't lower the deficit either. It will merely soothe the consciences of those among us who cannot seem to control their impulses to spend with reckless abandon.

Mr. CONABLE. Mr. Chairman, I yield such time as he may consume to the gentleman from New York (Mr. LENT).

Mr. LENT. Mr. Chairman, as one who voted for the 3-year, 25-percent across-the-board tax cut in 1981, I am opposed to any tampering with the third year 10-percent tax cut. This bill, H.R. 1183, may be long on political appeal, but it fails under the light of close scrutiny. It is essential that Congress curb spending to reduce the deficit, but capping the tax cut will have a negligible effect on the deficit while the economic stimulus to be provided by the full 10-percent cut will give a needed boost to our burgeoning economic recovery.

I question those who maintain that this cap only affects the wealthy. Or those who claim that a $700 cap will have a negligible effect on those making less than $50,000 a year. Tables released by the U.S. Treasury Department demonstrate clearly that the cap on the third year would actually mean a tax rate increase of more than 10 percent on millions of American middle-income families and small businesses earning between $35,000 and $45,000 a year. It will have little or no effect on the wealthy in brackets in excess of $109,000 a year. The cap would take away 39.9 percent of the scheduled July 1, rate reduction for those in the $35,000 to $45,000 bracket. Families in this bracket, many with both adults working, constitute a substantial share of my Long Island constituency. Supporters of H.R. 1183 may consider this group "wealthy," but I strongly disagree. In many cases such families have college-age children and are facing the ever mounting costs of higher education. They need the relief offered by the third year tax cut, and the cap in this legislation is a definite threat to them.

It is also important to realize that 86 percent of all small businesses pay only personal income taxes. A third year cap would result in higher taxes on small business at a time when we are looking to these businesses to create new jobs in the economy.

Therefore, I strongly urge that the House not tamper with a successful tax cut enacted only 2 years ago. The Reagan tax cut has been an effective tool for economic recovery. Our economy is rebounding dramatically right now. Inflation dropped to an annual rate of 3.9 percent in 1982—down from the 12.4-percent rate of 1980. The prime interest rate has dropped to 10.5 percent this year—down dramatically from the 21.5-percent level of January 1981, a decline of more than one-half. As the Wall Street Journal noted in the June 9 edition, capital spending increased in the first quarter of 1983 for the first time since the third quarter of 1981. Factory orders for durable goods, a reliable gage for future capital investment, climbed in the first quarter of this year, and the backlog of new durable goods orders increased in April for the first time in 2 years. It is obvious that the 1981 Reagan tax cut has made available investment funds which have contributed significantly to these favorable developments.

If Congress will concentrate on reducing Federal spending and resist the temptation to tinker with the tax cut, the hard-pressed middle-income taxpayer will get a well-deserved break and economic recovery will continue.

Mr. Chairman, I urge the defeat of H.R. 1183.

Mr. CONABLE. Mr. Chairman, I yield 1 minute to the gentleman from Florida (Mr. MCCOLLUM).

Mr. MCCOLLUM. Mr. Chairman, I have been listening today to the argument that raising taxes is necessary to solve the deficit problem. I think that raising taxes is just as bad as borrowing is in terms of what the Federal Government does. Borrowing to cover our deficits and borrowing to cover the entire public debt of this Nation is a drain on the amount of available dollars in this country for private citizens and private businesses to use. Taxes are a similar drain.

There are statistics that show that the United States absorbs between 50 and 70 percent of all the available money in this country every year. This absorption is the reason why we have so much pressure tending to result in higher inflation and higher interest rates. Until the Federal Government reduces spending, until we quit borrowing so much money, and until we quit increasing taxes we are not going to see long-term economic health in this country, and here we see the Democratic Party and its leadership today advocating increased taxes to solve deficits. That is the same thing the Democratic Party has advocated all along, and that is greater tax-and-spend policies which results in the economic decline of our country.

□ 1630

Mr. CONABLE. Mr. Chairman, I yield 2 minutes to the gentleman from Idaho (Mr. CRAIG).

Mr. CRAIG. Mr. Chairman, it is truly amazing to me, that the Democratic leadership could make such a proposal, especially now. After this House gave itself a raise and the Senate last week raised its pay, we are now going to say to the middle-income wage earner—too bad, you do not need that tax cut.

What is also particularly funny to me is, the Democratic National Congressional Committee chose to send out a news release saying, my position on capping the tax cut was cold turkey. In fact my position does not help the middle-income taxpayer and I say bunk.

The Democratic Congressional Committee and Speaker O'NEILL would have us believe that only the wealthy would be affected. Well the wealth of this Nation comes from the majority of working people and the facts say, they will suffer by this so-called tax cut cap proposal.

The cap strikes directly at over 2.5 million small businesses, 8.1 million taxpayers who will have their taxes increased on an average of $654 and 350,000 family farms. Eighty-six percent of all small businesses pay only personal income taxes. This tax cut strikes at the heart of small business and we must remember, small firms with 500 or fewer employees accounted for 60 percent of the 2.8 million jobs created in the United States.

Something I would like to also see is, Speaker O'NEILL go to my farmers and explain why raising their taxes is a good idea. Why did this Congress enact the payment-in-kind program to help the farmer weather the recession and now, when the economy is starting to show some strength and retail sales are up, Speaker O'NEILL and his tax-dollar-thirsty bunch want to raise their taxes? It is hard to conceive how they can go around purporting they are the party of the people, when at every turn, all we hear is raise taxes, raise taxes. Not once have they suggested reducing an out-of-control budget they always succumb to the easy way, which is raise taxes. It is like planting a seed before you plow the field.

The capping of the tax cut would drive a tremendous wedge between the tax brackets faced by middle-income taxpayers. Even with the full 25-per-

cent tax cut, few middle-income families are scheduled to receive a net tax reduction. A family of four with 1982 income of $40,000 for instance, will pay $52 in additional taxes this year as compared to 1980 tax rates. This increase results from bracket creep and Carter administration payroll tax hikes. The Democrat tax cut cap, coupled with new social security tax increases, the gasoline tax, and provisions of the 1982 tax bill would make this net tax increase much, much sharper.

Something the proponents of the tax cut cap never bring out is the fact, in fiscal year 1982, the first full year in which the top marginal tax rate was lowered from 70 to 50 percent, upper income taxpayers paid a larger percentage of total income taxes. The third installment of the tax cut is not targeted to the high-income tax group but toward the middle-income taxpayer; what the ultimate effect could be is a reduction of the tax revenues collected from the top.

Overspending, not undertaxing has been the problem of the past 20 years. In every instance, the big spenders solution is to raise taxes. A great example is the budget passed on March 23 which calls for increasing by $120 billion over 3 years. Some of the suggestions to raise this revenue called for the repeal or delay of indexing; capping the mortgage interest deduction; eliminating the deductions for State and local sales taxes, and of course, capping the tax cut scheduled for July. Not once in the budget or the Democratic Study Group's list of suggestions was their mention of reducing Government spending. It seems the thirst of the big spenders increases as they are tempted with more revenues.

As the signs of recovery are strengthening, threatening it by taking away needed dollars for the purchase of goods and services is ludicrous. Hopefully, my colleagues will see the error of the tax cut cap and vote it down resoundly.

Mr. DREIER of California. Mr. Chairman, will the gentleman yield?

Mr. CRAIG. I yield to the gentleman from California.

Mr. DREIER of California. Mr. Chairman, I thank my friend for yielding.

The issue of fairness has been brought up, not only from the Speaker, but from the gentleman from Massachusetts. I think we have to face that issue of fairness in realizing that in 1981 we promised the American people they were going to have a 3-year program. Let us not be unfair to them. Let us maintain that tax cut.

Recently the Commerce Department released figures which showed that the effective tax rate—that is, taxes as a percentage of earned income—will have fallen from a high of 24.3 percent in the third quarter of 1981 to a projected 22.3 percent at the end of 1983. Needless to say, this year end projection includes the full July tax cut, not the so-called fair cut the leadership is offering.

I do not think it is necessary to repeat the statistical arguments you have heard about the merits of this proposal. I would, however, like to talk about the Commerce Department's statistics, which no one is disputing.

The declining tax rate is, of course, good news for the average American taxpayer, but the effective rate is still well above the 20 to 21 percent of the early seventies. In other words, the inflation-induced bracket creep of those years has not been erased.

Today we are considering a tax increase. We promised tax relief to all Americans in 1981, and by capping the July tax cut we will be going back on that promise. This tax increase will fall on middle-income taxpayers, even the majority has conceded that fact. In a few months, I have little doubt that we will be asked to repeal indexing—in doing so, we will be hitting the American taxpayer with yet another tax increase. On top of that, as many as 15 States will be raising their taxes in the coming year.

What this means, Mr. Chairman, is that middle- and low-income taxpayers—who were battered by inflation-caused tax increases in the seventies—are about to be taken for another ride. Today is just the first step, but it is one that the American taxpayer is not likely to forget.

Mr. CONABLE. Mr. Chairman, I yield such time as he may consume to the gentleman from Arizona (Mr. RUDD).

Mr. RUDD. Mr. Chairman, if the Tax Rate Equity Act of 1983, H.R. 1183, is an example of the type of fairness issue the leadership of this body hopes to pin on our President and his policies, then perhaps we ought to let the donkey pin its own tail.

This bill is an attempt to play politics with the third year, 10-percent tax cut by imposing a limit of $700 per return. This action would affect approximately 8.1 million individual income tax returns this year, and its proponents hope to raise an additional $6 billion in taxes which they allege will be used to offset the deficit.

The backers of this tax increase have labeled it as a fairness issue, that it taxes only the rich, and that it promotes fairness in the tax system.

These arguments are nonsensical, and I counter them with the view that a tax cap would cause great harm to our recovering economy and would penalize primarily middle-income earners and small businesses.

This tax cap does not just affect the third year of the tax cut as its proponents have implied. This would cause a permanent change in the tax rate schedules, thus resulting in higher taxes not only next year but every year thereafter.

Who would be affected by the $700 tax cut limit? According to Treasury Department data, almost half of the 8.1 million tax returns facing a tax increase under this bill would involve two-earner married couples. About half of the total would have incomes less than $50,000 a year. Some single taxpayers who do not itemize would be included in this category, even though they earn no more than $30,000 of gross income.

The typical tax increase for 8.1 million tax returns under this proposal would be $654. This is $654 less consumption power for millions of middle-income earners, not wealthy individuals. Since the top tax rate has already been lowered to 50 percent—a change which actually brought in more revenues from the upper income group—the tax cap would have almost no effect for those who earn in excess of $109,000.

Small businesses would be a target of this tax cut limit. Of all small businesses, 86 percent pay their taxes on individual returns, thus leaving the vast majority of these small firms the primary victims of this tax increase.

Raising taxes in this manner will not reduce the deficit. It only paves the way for more domestic spending programs, as called for in the budget resolution. Moreover, the supporters of this tax hike have rejected offers to include mandatory spending reductions linked to corresponding revenue increases.

Proponents of this measure have no interest in reducing the deficit; their goal is to find a way to offset a wave of new spending proposals. Having failed at attempts to repeal the third year, 10-percent tax cut, this $700 tax cap is a last-ditch effort to scuttle the primary thrust of the President's economic recovery program.

The news of the last several months is virtually unanimous in showing an improved economy well beyond earlier expectations. GNP went up a dramatic 6.6 percent in the second quarter; leading economic indicators continue to rise; inflation has been dramatically reduced; interest rates are down; unemployment continues to drop; personal income is up, and all signs point to a robust recovery. Let us not impede this recovery with a tax increase aimed at middle America.

The President's economic program is working, it is succeeding, and we should reject this effort to reverse the many positive changes resulting from this sound economic course.

Congress should defeat this bill and return to the real problem of uncontrolled Federal spending.

Mr. CONABLE. Mr. Chairman, I yield 2 minutes to the gentleman from Indiana (Mr. COATS).

Mr. COATS. Mr. Chairman, in the brief time that I have, I would like to outline the three basic reasons why I cannot support this so-called fairness tax cap.

First, I think everybody in this room knows that it is absolutely the worst economic policy imaginable to raise taxes at the beginning stages of a recovery. There is not an economist, liberal or conservative, Democratic or Republican, that would advocate raising taxes right at the beginning of an economic recovery.

Second, the tax cap impacts on the very segments of society that are most critical to this economic recovery, our farmers, our independent businessmen, the small businessman that pays individual taxes and files an individual return, are the very elements that are employing people across this country and offer the best hope for new jobs and economic recovery.

Third, if any of us thought for 1 second that $1 of the taxes that would be raised from this so-called fairness tax cap would go to reduce the deficit, or that it would be tied to the reduction of $1 in spending, then I think we might take a look at it; but we all know in this room that it will not go for this purpose. It will simply go to fuel more domestic spending.

For those reasons, I think all of us should oppose this so-called tax cap that is being offered here and we should vote no on this question.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 1 minute to the gentleman from Ohio (Mr. LUKEN).

Mr. LUKEN. I thank the chairman for yielding.

Mr. Chairman, I believe I represent my constituents in making the following brief statement. I think the controlling fact here is that we are facing deficits of about $180 billion in the next year or so, as the ranking minority member of the Ways and Means Committee said earlier in the budget debate.

We have greater deficits under the President's proposals because of two things. One is greater military outlays, and second, his insistence on the tax cut.

Therefore, the fact is, we are financing a tax cut with borrowed money. Uncle Sam is going to have to borrow the money, more money to add to the $1.3 trillion national debt.

I have had very few constituents ask me for an additional tax cut in these times of deficits and increasing national debt; but they tell me they are worried. They are worried about the deficits and this is a fair way to attack it.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 2 minutes to the gentleman from Missouri (Mr. GEPHARDT).

Mr. GEPHARDT. Mr. Chairman, there are two points I want to make today. First, there has been a lot of talk on the floor today that this bill is just a political exercise, that is is not going anywhere.

I would like to remind the Members that we have now passed a budget that calls for $73 billion of tax revenue in the next 3 years.

I would ask you if there is a fairer way to raise this revenue than what we are talking about here. If this bill passes, the Ways and Means Committee can go into conference with the Senate Finance Committee and about $20 billion of that $73 billion can be in this bill; so I do not think it is an unreal exercise. I think it is very real.

Second, I ask you what fairer way there is to raise the revenue? If you look at this chart, you will see that Kemp-Roth, with the effect of inflation and the social security tax increase, not only does not give people below $50,000 a tax decrease, they had a tax increase over the last 3 years; but people $50,000 and above got pretty substantial tax decreases.

So is it not fair to go to that group if we are going to raise revenue?

There is only one other proposal I know of that has been made in this budget exercise; that is, the Reagan tax increase proposal, the surtax, and the oil tax. In the surtax, under $50,000 the Reagan proposal puts 62 percent of that tax increase on their backs and 38 percent on people over $50,000 and the oil tax, 75 percent of it goes to people under $40,000 and only 25 percent to people who are over $40,000 a year.

If you want the Reagan tax increase proposal, then you should vote against this and vote for that and really put some more taxes on people under $50,000; but if you want to do it in the fairest possible way, this is the last train out of the station. This tax decrease goes into effect in July and this is the best way to raise the revenue that everybody in the country realizes we have got to raise in order to change the deficit path.

Mr. CONABLE. Mr. Chairman, I yield 2 minutes to the gentleman from Virginia (Mr. PARRIS).

Mr. PARRIS. Mr. Chairman, in the debate on the rule on the tax increase on middle-class Americans earlier today, I pointed out several examples of the objectionable features of this legislation as it applies to the average people who are my constituents and who I am privileged to represent.

I appreciate the time in this debate to add several additional thoughts to that list. I am sure it is difficult for people watching this debate to follow all of the numbers and all of the percentages and to keep track of marginal rates and brackets. But if you reduce this issue to fairly simple terms, it is easy to understand the general problem with this legislation. Let me give you a couple examples of that.

This bill would create a tremendous difference between the tax brackets faced by middle-income taxpayers. Income up to $29,900 is taxed at rates no higher than 25 percent, while above $35,200, the rates are 37 percent or more. That is a 12 percent difference in approximately a $5,000-income range and, therefore, the tax rate for those middle-class individuals above $35,000 is 50 percent higher than the tax rate of a level of about $30,000. According to the Labor Department the Washington Metropolitan Standard Statistical Area median adjusted income for married couples is $35,594, almost exaclty where the majority would increase the tax rates by almost 30 percent under this bill.

So we are not talking about the wealthy. We are not taxing the rich. We are drastically increasing the tax on the middle average working married couple in this community—and that means average Federal employee.

This is a permanent tax increase, most of which would be paid by taxpayers whose only fault is that they are neither rich nor poor, but somewhere in between.

I ask my Democrat colleagues: Will they cap the tax cut on capital gains? Will they cap the tax cut on interest and dividends, where many of the wealthy get most of their income? Will they cap the tax cut on large businesses? The answer is, of course, not. Yet, they propose to raise taxes on families who earn only $15,000 in 1970 dollars, adjusted for inflation. These are the people who would get hit the hardest with this tax.

This is a raid on your wallet and your pocketbook. It is unnecessary and unfair and I hope it will be defeated.

Mr. CONABLE. Mr. Chairman, I yield 2 minutes to the gentleman from Nebraska (Mr. DAUB).

Mr. CHANDLER. Mr. Chairman, will the gentleman yield?

Mr. DAUB. I yield to the gentleman from Washington.

Mr. CHANDLER. Mr. Chairman, as a new Member of Congress, I cannot in good conscience silently watch my colleagues pass a tax cap today that would both penalize the middle class and run the risk of slowing our economic recovery.

We will hear a lot of political talk today that the cap will only hurt the rich, but the truth of the matter is that a tax cap would hit squarely on the middle class. Almost half of those affected by the proposed tax cap have incomes under $50,000.

We should also consider the impact this cap would have on the economically important small business sector. About 2½ million small businesses, including 350,000 family farms, would in effect be subject to a tax increase under the proposed cap because they file personal, not corporate, tax returns.

We should also be concerned that the cap will negate important reforms that were made just 2 years ago in the so-called marriage tax.

While, I am pleased to see concern in this Chamber about reducing deficits, I feel that a cap on the tax cut will only provide greater incentive for Congress to find new ways to spend taxpayers' dollars. I am 100-percent committed to reducing the deficit, but I am convinced, and I know my constituents agree, that the way to do it is by reducing Government spending, not by cutting off tax relief.

We have been reading a lot of good news lately about economic recovery. Inflation has dropped. The gross national product is up. Unemployment rates are slowly going down. I do not think we want to be responsible for reversing this gradual improvement by tampering with the 3-year tax cut program passed in 1981.

If the House makes the mistake today of passing the tax cap, I will stand firmly behind the President's promised veto.

Mr. DAUB. Mr. Chairman, I do not rise often, but indeed today is a historic day in my view in the House of Representatives. By attempting to limit the July tax cut and urging a budget on this House that calls for $12 billion in new taxes, the Democratic leadership has sought to raise taxes twice in the same day.

The Democratic leadership in the House is scared to death of economic recovery. By sabotaging it they hope to gain political advantage over the President.

This double-barreled blast at the American economy will destroy jobs and while by every standard the July tax cut is expected to fuel consumer recovery, Democratic political strategy stands ready to abort this recovery by taking money from the people and turning it over to Government.

Limiting the July tax cut does not favor the rich, but it is a permanent tax increase on middle-income families. The Democratic tax increase proposal also adversely impacts on small businesses and family farms.

The budget compromise increased the tax rate for the next 3 years by a total revenue aggregate of $77 billion and at the same time increased the spending rate at an aggregate of $73 billion. I call that economic insanity.

The surest way to end economic recovery is to increase taxes and to increase spending. Clearly it is the wrong medicine to cure our problems unless you want Americans to fall back into economic depression. I think we ought to call this effort today a band-aid cure for a belly wound.

Think about some things first. We are raising the threshold of spending. We are raising the threshold of taxes. That propels the deficit. It does not solve the deficit problem; $73 billion in increased spending versus $77 billion in increased taxes over the next 3 years does not cure the deficit. The deficit in part will be propelled and grow even larger than we fear at this time.

It does one thing, my colleagues, that I think is the worst of all. What we need more than spending and what we need more than taxes is long-term borrowable money at stable rates. Without savings by individuals who have jobs, there will be no capital formed for borrowing. That will put America back to work. This will give our people a chance for real gain—an economy with real growth.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 2 minutes to the gentleman from New York (Mr. McHUGH).

Mr. SHARP. Mr. Chairman, will be gentleman yield?

Mr. McHUGH. I yield to the gentleman from Indiana.

Mr. SHARP. Mr. Chairman, I rise in support of the McCurdy amendment and the legislation before us today. Although much of the discussion on limiting the third year tax cut to $700 has been focused properly on the fairness of this action, I believe the debate should also be centered on the effect on the Federal deficit.

The President projects that deficits in 1984 will be $189 billion, $194 billion in 1985 and $148 billion in 1986. These projections are staggering and everyone agrees that they must be controlled. Placing a $700 limit on the third year tax cut will produce $6.2 billion in revenue in fiscal year 1984 an estimated $20.8 billion between fiscal years 1984–86—a total of $27 billion. The President's budget calls for "contingency taxes" in fiscal year 1986, which he estimates will raise $46 billion. He suggested imposing a surcharge on individual and corporate income taxes and a $5 per barrel tax on oil. While Secretary of the Treasury Regan claims that contingency taxes will not be necessary until 1986 because the budget deficits will be under control, I do not share his optimism. So far, the deficits have only been increasing. The administration is openly admitting that revenues must be raised. So why does the administration support raising taxes in 1985, when we now face a $529 billion deficit through fiscal year 1986?

One of the valid concerns among those who oppose limiting the tax cut is that the additional revenue may only be used to finance large spending programs. I believe the bill contains an essential element, which expresses the sense of the Congress that any revenue gained by limiting the tax cut should be used to reduce Federal budget deficits. This is reinforced by the McCurdy amendment, which I strongly support, which calls for a dollar-for-dollar matching of expenditure cuts for the increased revenue. Raising revenue must be balanced with reductions in spending. Although the Congress has succeeded in slowing the rate of Government spending, we have not done enough. I do not believe we are taking an irresponsible step by making changes in our fiscal policy, when clearly the deficits are out of control.

As long as deficits remain excessive, interest rates will remain too high. The economic recovery can too easily be jeopardized. Reducing the Federal deficit is clearly necessary.

Lawrence Chimerine, chairman and chief economist of Chase Econometrics recently stated in his article in the New York Times:

> To the extent that capping helps reduce expected deficits and eases concerns in financial markets, lower interest rates that may result would further stimulate the economy. Moreover, a cap would begin to reverse the process that in recent years has shifted a much larger part of the nation's tax burden onto middle and lower incomes families.

In fact, taxpayers with incomes under $20,000 have not received any real tax cuts. Their tax burden has increased, when taking the effects of inflation and increases in social security payroll taxes into account.

A couple with two children and an adjusted gross income of $30,000 will receive a tax cut of $360 in 1984, regardless of a cap. But if this couple had an income of $75,000, they would receive $1,598 in 1984, if the full tax cut was implemented. If the couple earned $150,000, they would receive $3,981, if the tax cut was not limited. In light of these examples, the case of unfairness in limiting the tax cut becomes very weak. We are not talking about hitting those who can barely make ends meet, we are talking about persons who, in many cases, have already received a large share of the tax reductions under the 1981 tax act.

All taxpayers will receive a new tax cut in July. Only 10 percent of all taxpayers will be affected by the cap. The other 90 percent of the taxpayers will receive the full amount of the tax cuts enacted by the Economic Recovery Tax Act of 1981. Of the revenues generated by the cap, 89 percent of it would be paid by taxpayers with incomes above $50,000 a year.

I believe the Congress must control Federal spending and moderate tax policies so that all taxpayers can benefit from an improved economic program.

Mr. McHUGH. Mr. Chairman, I would have thought that the proponents of the President's economic program would have approached this debate with a bit more humility. It was not very long ago that they told us that if we only passed the President's economic program that we would soon have an economic boom,

an economic boom that would benefit all segments of our society.

Did we get that economic boom? Of course we did not. Any objective observer can see that we got the worst recession, the worst unemployment, since the 1930's.

The proponents of the President's economic program told us not long ago that if we only passed the President's program we would have a balanced budget in fiscal year 1984. Did we get a balanced budget? Of course not. We are now looking at a deficit of over $200 billion.

My purpose today is not so much to point the finger of blame, because that does not solve any problems. However, it is terribly important that at this stage we recognize that the President's economic program has not worked, despite the good faith of the President in offering it.

If we are serious about responsible government, if we are serious about a sustained economic recovery, we must adjust the President's program and this bill represents a modest, indeed an exceedingly modest, adjustment. It would raise $6 billion in tax revenue, not by a new tax as our Republican colleagues have suggested, but by postponing a small portion of the third permanent tax cut inherent in the President's economic plan.

I think that this is an exceedingly modest step toward reducing budget deficits. It does so by looking to those people who have gotten the lion's share of the tax breaks in the first 2 years of the President's tax program. Is that too much to ask of those people who have benefited most from the President's tax program?

I do not think so, and I do not think the people whom we are asking to make this modest sacrifice think it is too much either.

I do not know what your constituents say to you back home, but mine say "Please get the deficits and the interest rates down. We can wait for further tax relief until the economy is back on its feet. I urge my colleagues to support this measure.

Mr. CONABLE. Mr. Chairman, I yield 3 minutes to the gentleman from New York (Mr. GREEN).

Mr. GREEN. I thank my colleague from New York for yielding time to me.

Mr. Chairman, the fact that we can seriously be considering this measure on the floor of the House today shows how badly inflation has warped our perception of economic reality.

Let us look at what the earnings that are covered by this bill would have been in 1967 dollars. I pick 1967 because, of course, that is the start of the current series of the Consumer Price Index for all urban consumers.

An income of $40,000 today in 1967 dollars would be $13,536. An income of $50,000 would be $16,920. An income of $60,000 would be $20,305.

In 1967 would anyone have thought that someone earning $13,536, or $16,920, or $20,305 was a malefactor of great wealth who should be the target of a punitive tax bill? Of course not.

But now, with inflation, the proponents of this bill preceive those families as the plutocracy of America.

What nonsense. And yet those are the people you are going after in this tax bill.

I think one other comparison is most interesting, because we in this House have a very different perception when it comes to shoveling out the subsidies as opposed to taking the dollars out of the taxpayers' pockets. We run a guaranteed student loan program. People are eligible for federally subsidized loans in that program up to $75,000 a year.

I fought hard to prevent a cut in that ceiling. There were some on the other side of the aisle who opposed having any income cap on that program.

Yet the same people who under that program are deemed in need of Federal subsidy are, we are told today, so wealthy that they should have to pay a major increase in marginal tax rates.

Mr. Chairman, it is obvious that inflation has destroyed the sense of economic reality of the Democratic Party. I urge my colleagues to look through those inflated income numbers to the reality of the purchasing power of the families this bill attacks, and to defeat this ill-conceived measure.

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield?

Mr. GREEN. I am happy to yield to the gentleman.

Mr. LAGOMARSINO. I want to commend the gentleman for his statement.

Mr. Chairman, I rise in opposition to H.R. 1183. This bill, so misleadingly named the "Tax Rate Equity Act of 1984," is a wolf in Democratic clothing.

It could more aptly be called the "Economic Disaster Plan for 1984," or the "Tax Reneging Act of 1984." For this is the bill that revokes the tax cut made by this body just 2 years ago as part of the Economic Recovery Act.

That recovery is now well underway. The index of leading economic indicators rose 1.1 percent in April, up for the 10th consecutive month. Productivity is running at a 4.7 percent rate this year, up from the minus 0.9 percent of 1979. Industrial output for April was up 2.1 percent, compared to minus 3.6 percent for 1980, the last year of the Carter administration. Housing starts are up 64 percent this year over last, compared to a 26 percent drop in 1980. And disposable personal income, after inflation, rose 1.1 percent during the first quarter, compared to a drop of 0.9 percent in 1980. The stock market is up over 400 points since 1980. And all of this has been accomplished without rekindling the fires of inflation. In fact, the cost of living rose only 4 percent over the last year, compared to the 12.4 percent rate of 1980.

An important part of that economic recovery was the 25 percent personal income tax rate cut enacted by this body 2 years ago. Combined with restraints in Government spending, it has meant millions of dollars more in disposable income for Americans. Money which was spent for American products or invested as savings in American companies. It has fueled the economic recovery and helped lift some of the burden of Government from the shoulders of American taxpayers. The third phase of that tax cut, the final 10 percent cut in tax brackets, is due to take effect just 8 days from now, on July 1.

Now along comes the Democratic leadership of the House with this bill saying we should adjust the tax rate. "Cap" is the word they use. In the interest of equity.

Yet what will this cap really do? It is aimed directly at two classes of taxpayers: The middle-income wage-earner and the small businessman. The Democrats know that high-income taxpayers have already received their cut—the maximum rate dropped from 70 percent to 50 percent 2 years ago. Low-income wage-earners have already had the floor raised, so many of them pay little or no taxes. The middle-income taxpayer is the only group left, and this bill drives a wedge right through the middle of the tax brackets. Under this bill, income up to $29,900 is taxed at rates no higher than 25 percent. But income above the $35,200 level—per family—would be subject to rates of 37 percent or more—a gap of 50 percent. In other words, under this bill, a family with an income of about $35,000 would wind up paying 50 percent more in taxes than at $30,000. This is aimed directly at the working couples, and in essence amounts to a marriage tax. It could conceivably even lead a couple to seek a divorce for tax purposes. And this considered equity? Good social policy?

Equally damaging, Mr. Chairman, is the effect which this bill will have on small business. Most small business owners, unlike large coporations, file individual income tax returns. And much income from a small business is routinely reinvested in the business. This bill would tax those dollars away, depriving small business of the capital it needs to grow and survive. It will cause lay-offs of employees and the cancellation of plans to expand and create new jobs. And it would dry up the discretionary power of middle income taxpayers to invest in savings, which also creates jobs. In short, Mr.

Chairman, this bill, the Tax Equality Act of 1984, will cause taxes to increase, penalize working couples, and damage the health of thousands of small businesses, causing unemployment, misery and resentment. I can only conclude that that is what the leadership of this House wants.

If you oppose these results, I urge a "no" vote on this bill.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield such time as he may consume to the gentleman from Michigan (Mr. ALBOSTA).

Mr. ALBOSTA. Mr. Chairman, today, we have a critical choice to make. Do we continue to accept rising deficits and do nothing? Or do we make the tough decisions that are expected of us and begin to work to reduce that portion of the $200 billion deficit we are all so worried about by capping the third year of the tax cut?

Earlier this year, I posed this question to my constituents in the 10th Congressional District in Michigan. Should the third year of the scheduled income tax cut be postponed for those earning more than $50,000 until the Federal budget is balanced? Over 63 percent of my constituents who responded said yes.

My constituents and I know the importance of lowering the highest deficit in this Nation's history. I am committed to doing what I can to see that this is achieved.

The only fairway to make progress against the rising deficit is to adopt the $720 tax cap. It will reduce deficits by $22 billion over the next 3 years and raise one-half of the additional revenues called for in the 1984 budget. Some oppose this measure claiming this tax change is not the solution to the problem of high deficits. They are correct that it is not the only solution, but I would argue that it is an important part of the solution, an important step that must be taken.

Along with the issue of deficits, there is a second question, and that is the issue of fairness. Should those in the upper income groups, who have enjoyed the greatest benefit from the first 2 years of the tax cut, again receive a disproportionate share of the third year tax cut when our economy cannot afford it? Certainly not.

To illustrate the point, a family of four with an income of $200,000 will get a tax cut of 15 percent more than the family earning $25,000. What more is there to say about fairness?

It is time we stand up for the majority of Americans who go to work everyday, pay for their children's education, and form the backbone of America. Too often we have seen the Congress cater to the special interest groups to the detriment of the low- and middle-income taxpayer, by providing tax relief for the wealthy.

Today, we can take a giant step forward by supporting the $720 tax cap and thus, restoring equity and justness in our tax system for millions of Americans.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 2 minutes to the gentleman from Ohio (Mr. PEASE).

Mr. PEASE. Mr. Chairman, today we debate the merits of placing a cap on the third year of the tax cut. I want to point out an irony brought to mind by the recent appearance of Treasury Secretary Regan before the Ways and Means Committee. Just 9 days ago, Mr. Regan testified before my colleagues that the administration does not plan to take any action on the tax side of the Federal budget to reduce the huge deficit we are expecting in fiscal year 1984.

In 1981, as I recollect, President Reagan and his highest ranking adviser responsible for providing revenue to operate the Government were far more creative in creating "tax incentives" for the wealthy than they are 2 years later in finding equitable tax increases for a country that desperately needs to gain control over skyrocketing deficits. I find it personally repugnant that Secretary Regan appeared before the Ways and Means Committee with virtually no proposal to address the deficit problem as it concerns revenue.

I would ask Mssrs. Reagan and Regan what is going to happen to interest rates if this deficit is not brought under control—permanently and expeditiously. A tight monetary policy cannot forever hold the line for an administration that takes from the poor to shower tax cuts and tax shelters upon the wealthy. The $700 cap will recapture some of the excessive cuts given to the highest income taxpayers while preserving the cuts for those in the middle and lower income range who need them most. Almost 89 percent of the tax burden of the $700 cap would fall on persons earning over $50,000 and this group would be contributing almost $22 billion through fiscal year 1986 of the $73 billion required by the conference report to the budget resolution.

I am pleased to stand before you today to support the cap and to support a House Democratic Party that is showing considerable leadership in finding an equitable and viable proposal to reduce the deficit. We may be offering our necks to a Republican Party that is only too happy to find an axe in honor of the upcoming 1984 campaigns. However, I believe the American taxpayer is well qualified to understand the meaning of tax equity and will remember the fairness of the Democratic proposal.

Can Reagan turn the fairness issue on its head regarding the $700 cap? If not, it will not be for lack of trying. Although Secretary Regan opposes the cap because he says, "It will hit squarely at our great middle income class," the truth is quite the reverse as we have seen.

Rather than recapture part of the $6,872 tax reduction for a family of four making $100,000 or more in fiscal year 1984, Secretary Regan would prefer to support a tax increase in 1985 on domestic and imported oil and a 5-percent surcharge on individual and corporate taxes—both of which would hit hardest at middle and lower income families.

According to the administration, efforts to reduce the size of the projected deficits—$226 billion, $241 billion, and $260 billion in fiscal years 1984, 1985 and 1986, respectively—should not be directed toward those reaping the greatest advantage from the 1981 tax cuts. Rather, the millions of Americans earning less than $30,000—who are the vast majority of taxpayers and, coincidentally, who experienced net tax increases from the so-called Reagan tax cuts, should be willing to pay the 5-percent surcharge.

If the taxes of all Americans are increased by 5 percent, the greatest number of taxpayers will suffer further tax increases while the 1981 tax cuts of the wealthiest taxpayers will remain intact but somewhat diminished.

For example, according to Citizens for Tax Justice, in 1984 when the Reagan tax cuts are fully in effect and have been adjusted for inflation and for recent increases in social security taxes at 1981 income levels, a taxpayer earning less than $10,000 will experience a net tax increase of $108. The 5-percent surcharge will push this individual further into the hole while the average taxpayer earning over $200,000 will receive a net tax cut of $15,000 even after the 5-percent surcharge is applied. This estimate of the tax cut for the over-$200,000 individual is virtually doubled if the effects of various savings and business "incentives" are included.

Turning to the other half of President Reagan's proposed contingency taxes, it is not difficult to anticipate the effect of an increase in energy taxes on moderate- and low-income families. Analyses of the consumption patterns of all families by income demonstrate exactly what commonsense would say. In the case of new taxes on energy to heat homes, the new tax would place the heaviest burden on those families with the least elasticity in their income—those for whom the necessities of life require the greatest amount of their disposable income. The effect of the new tax on families purchasing gasoline would fall heavily, again, on lower income families—if they are fortunate enough to own a car.

Thus, it appears that we Democrats are tilting against a Republican administration committed to a two-track

course. The first is to oppose the $700 cap which would see 88.7 percent of the burden fall on those earning over $50,000 annually. The second is to support a surtax and crude oil tax which will impose most of the burden on taxpayers earning less than $50,000 per year.

Is that fair? If in 1984 President Reagan can convince Americans that it is, we will know that the age of doublespeak truly has arrived.

□ 1650

Mr. CONABLE. Mr. Chairman, I yield such time as he may consume to the gentleman from Wisconsin (Mr. GUNDERSON).

Mr. GUNDERSON. Mr. Chairman, I must add my voice to those who have already spoken in opposition to H.R. 1183, the so-called Tax Rate Equity Act. The facts are that, as presently structured, the cap proposed by this legislation is hardly equitable.

Quite frankly, Mr. Chairman, I and many of my colleagues who oppose H.R. 1183 today could support a cap on the third year of 1981 individual income tax rate reductions if that limitation were simply aimed at preventing the wealthy of this country from receiving a windfall and if the revenue received from the cap were truly used for deficit reduction. H.R. 1183 fails on both counts.

First of all, H.R. 1183 will affect many taxpayers who are far from wealthy. In reality, only 9 percent of those who will have their tax reduction capped by H.R. 1183 have incomes in excess of $100,000. Forty-eight percent have incomes less than $50,000 and 43 percent have incomes between $50,000 and $100,000.

Further, Mr. Chairman, this really is not a cap on the third year of the tax cut; rather, it is a permanent increase in the marginal income tax rates for these individuals and families.

And let us just take a brief look at what will happen to a two-earner couple making $35,200. Currently, that couple's maximum marginal income tax rate is 28 percent. If H.R. 1183 becomes law, that maximum rate becomes 37 percent—that is a 30-percent increase.

In short, the vast majority of those affected by H.R. 1183 are members of the middle class who are already overburdened by the structure of our current Federal income tax system.

This will have a particularly dramatic effect on two-earner couples, small businessmen, and family farmers. In fact, present estimates are that the cap will impact on 2.5 million small businessmen and 350,000 family farmers in our country.

Second, Mr. Chairman, I believe that there is a growing perception in our country that, because of the cuts made in individual income tax rates in 1981, Federal revenues are decreasing annually. That is not accurate.

Estimated Federal revenues for the current fiscal year are in the $600 billion range. At the time the budget was prepared, Federal revenues for fiscal year 1984 were estimated to approach $650 billion; now, both CBO and OMB have indicated fiscal year 1984 receipts are more likely to be in the area of $665 billion.

Clearly, despite the reductions in individual income tax rates, Federal revenues continue to increase. This is in part due to improving economic conditions and in part due to the $35.3 billion tax increase we passed last year in the Tax Equity and Fiscal Responsibility Act for fiscal year 1984.

However, as in the past, the deficit problem remains because of the increasing rate of Federal spending. These statistics again demonstrate that the remedy for deficit spending is not only greater Federal revenues, but reducing the rate of increase in Federal spending.

I have said on many occasions, Mr. Chairman, that I would be willing to support some type of cap on the third year of the tax cut if it were part of a package designed to reduce the enormous budget deficits we face now and in the future. The facts are, however, that the context in which we consider H.R. 1183 assures that whatever revenue is raised by its cap will either go for additional domestic spending or greater defense spending, depending on who prevails on the budget.

That is why my good friend, the gentleman from Oklahoma (Mr. MCCURDY), presented the Speaker with a letter signed by 79 of our colleagues on his side of the aisle that referred to the tax cap as "flawed policy" if it is not accompanied by a corresponding limit on Federal spending.

And it is, indeed, unfortunate that the Rules Committee has seen fit to water down this amendment by considering the nonenactment of future legislation which has been provided for as a contingency in the budget as a "dollar-for-dollar" cut in Federal spending to accompany the increased revenue. Accordingly, the amendment has become nothing more than a budgetary illusion.

These budgetary considerations in conjunction with the adverse impact the cap will have on millions of middle-class taxpayers leave well-reasoned Congressmen concerned with the fiscal future of our country with no choice but to oppose H.R. 1183.

Mr. CONABLE. Mr. Chairman, I yield 1 minute to the gentleman from Ohio (Mr. MCEWEN).

Mr. MCEWEN. Mr. Chairman, a moment ago a Member rose on this floor and stated that either you tax and spend or you borrow and spend and that it was the intention of those on this side of the aisle to borrow and spend by supporting a tax cut for all working Americans.

Well, I believe that is one of the most convoluted thought processes I have ever encountered. The idea that a working man and woman get up in the morning, go to work, receive a paycheck, and then if Uncle Sam does not take it from his pocket and spend it, that somehow or another he has to borrow it to allow that wage earner to keep his money. That in summation shows the distortion of this entire issue by those who are simply looking for an opportunity to reach into the workingman's pocket to spend more money in an attempt to secure more votes.

Mr. CONABLE. Mr. Chairman, I yield 1 minute to the gentleman from Pennsylvania (Mr. WALKER).

Mr. WALKER. Mr. Chairman, an economic recovery is underway. The bill before us is a callous, calculated, political effort to undermine that economic recovery. The leadership of the Democratic Party has looked around and seen an economic recovery taking place and they know that a good economy will doom Democratic political prospects in 1984.

So, what the Democrats have done is launched a full-scale attack on the centerpiece of that economic recovery, the tax cut, and they have done so in the most unfair way possible because they designed a program that even goes so far as to protect the super rich in this country. It used to be that even when we disagreed on issues, we could be confident that each side was putting their country ahead of politics.

The effort to destroy the tax cut is purely and simply a case of politics above all else.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 2 minutes to the gentleman from Oklahoma (Mr. WATKINS).

Mr. WATKINS. Mr. Chairman, I stand in support of the McCurdy amendment but also would like to address a couple of facts that have been brought to my attention that should be addressed. Those on the other side who have talked about placing a cap or ceiling on the tax as unfair. The question should be asked: "Who has Ronald Reagan taxed?" One, the little waitresses at the little truckstops and cafes having to pay 8 percent and withheld from their food sale even if they did not receive 8 percent tips. They are trying to reach the minimum wage but they are having to pay a tax at a time when the President reduces the tax on the wealthiest in this country.

Also it is President Reagan's withholding tax on people who have a savings account, that is a tax pushed through Congress by the President of the United States, on the lowest income people in the United States.

The 5-cent tax on gasoline is President Reagan's tax that every working man, woman, and child has to pay when they pull up to the gas station. They have to realize that 5 cents they are paying on that gallon of gas is a tax from Ronald Reagan who said that that working person had to pay that additional tax, not the wealthy. The little truckdriver's taxes in my district, pushed by President Reagan, have been increased 1,000 percent. The little truckdriver whether he moves his truck or not with a load of grain or cattle, last year paid $200 tax on his truck. Under this, President Ronald Reagan's tax, the little truckdriver's taxes were increased to $2,500, a 1,000-percent increase.

Now you say, the $720 that is being capped, that is a pretty good return for most of my people. In fact, the maximum return for 98 percent of the people in my district, would be that $720—more than 75 percent of my people feel the tax should be capped.

I yield back the balance of my time.

Mr. CONABLE. Mr. Chairman, I yield 3 minutes to the gentleman from Texas (Mr. GRAMM).

Mr. GRAMM. Mr. Chairman, I would like to make two points.

First of all, I guess whether people are rich or not depends on your point of view.

I have heard my colleagues, especially those over on the right-hand side of the aisle, get up and talk about how we are going to tax the rich. But, in fact, we are going to raise taxes not on the rich but on that couple where the husband and wife both work; that middle-income couple making $35,200 a year. We are going to raise that couple's marginal tax rate by 9 percent.

The majority of my colleagues last year voted to give Members of Congress a raise of $9,000 because they thought we were on hardship pay here at $60,000 a year. I voted against it. And when we gave Congress its big tax break last year, a tax break we went back and took away, the justification was that it was hard to live on $60,000 a year.

Now, we are going to take back a tax break for a married, working couple making $35,200 a year, when we think Members of Congress are living on hardship pay at $69,000 a year, and it seems to be something does not jibe about that claim.

But the major point, Mr. Chairman, I want to make is, despite all the rhetoric about raising taxes to lower the deficit, the last vote cast in this House was a vote to raise the deficit by $13 billion over the level recommended by President Reagan.

So, do not fool yourself in saying you are raising taxes to deal with the deficit.

You are raising taxes to fund $29 billion of new add-on spending.

So, in reality as we have heard so many times, this is a return to the tax-and-spend policies of the 1960's and 1970's. And I submit that the American people are not going to be fooled.

If you voted for the budget we just adopted you voted to raise the deficit and to raise taxes to fund new spending. And if you vote to raise taxes on middle-income, two-income-earner families here, you are not voting to raise their taxes to lower the deficit, you are voting to raise their taxes to fund new spending programs.

That is the reality of the choice here today.

I thank the gentleman.

Mr. MATSUI. Mr. Chairman, I yield 1 minute to the gentleman from Maryland (Mr. MITCHELL).

Mr. MITCHELL. Mr. Chairman, I do rise in support of the Tax Equity Act but I rise primarily to express some concern and, really, surprise about the reaction on this side of the aisle.

Suddenly, you are the great protectors of the little people and that is quite a transformation.

Your President's policies, that you followed without any hesitation, ravaged the poor people of this country, and yet today you are the great protectors of them. You ravaged the sense of security of senior citizens of this country, cutting medicaid. You plundered the aspirations of middle-class Americans in this country. For those who wanted to send their children to college you denied student loans, cut them. You have pillaged or attempted to pillage the future of young children in this country. You supported a $300 million reduction in nutrition programs. So, I am just so grateful for this transformation, let us hope it lasts awhile. Let us vote this Tax Equity Act, it is right, it is fair, it is just.

Mr. Chairman, I rise in support of Congressman FRANK GUARINI's bill, H.R. 1183, the Tax Rate Equity Act. My colleague's legislation provides the Congress with the opportunity to mitigate the disastrous effects of the ill-conceived Economic Recovery Tax Act of 1981 (ERTA).

Since the inauguration, the Reagan administration has attacked social programs. For example, in his fiscal year 1984 budget, President Reagan attempted to implement real cuts of $750 million in food stamps, $750 million in aid to families with dependant children, $300 million in child nutrition, and $300 million in medicaid.

The President's desire to spread despair and pessimism throughout low-income communities was not appeased with the emasculation of domestic programs. As a result, President Reagan coerced the Congress into passing the Economic Recovery Tax Act of 1981. The blatant inequity of this law becomes evident when one realizes that, once the effects of inflation and social security tax increases are taken into account, individuals with inomes over $100,000 receive substantial tax reductions, while individuals with incomes under $20,000 end up with a tax increase.

Corporations have also been the undeserved beneficiaries of the 1981 Economic Recovery Tax Act. Some estimates have indicated that corporations will receive tax breaks totaling $143 billion over the period from fiscal year 1983 to fiscal year 1986.

Congressman GUARINI's bill attempts to inject a vestige of equality by limiting the amount of tax reductions. The Tax Rate Equity Act establishes a cap of roughly $700 on the maximum reduction in income taxes resulting from the third installment of the tax cuts enacted by ERTA. Consequently, this bill will produce revenues of $6.2 billion in fiscal year 1984 and $38.8 billion over the 6-year period from fiscal year 1983 through fiscal year 1988.

Although increased Federal revenues are important, the Tax Rate Equity Act's redistribution of the tax burden is its most appealing allure. H.R. 1183 allows 90 percent of all the taxpayers to receive the scheduled tax cut in full. Only 10 percent of the tax paying population will have their tax cut reduced; in other words, of the revenue raised by the bill, 89 percent would come from taxpayers with incomes above $50,000.

Although H.R. 1183 does not repeal the third installment of the tax cuts enacted by ERTA, it does attempt to lessen the disproportinate flow of benefits to upper income individuals. Hopefully, the Tax Rate Equity Act will be the first step which will lead eventually to the complete redistribution of the tax burden to those who can afford it: the affluent. Consequently, I urge my colleagues to support the passage of H.R. 1183.

□ 1700

Mr. CONABLE. Mr. Chairman, I yield 2 minutes to the gentlewoman from California (Ms. FIEDLER).

Ms. FIEDLER. Mr. Chairman, if you have even considered improved economic equity issues for women through child care tax credits or pension reform, how can you possibly consider voting for this particular bill when it specifically targets women who are out working and trying to improve the quality of life for their family?

Huge numbers of women are working wives, out of absolute economic necessity. They sacrifice an immense amount in that they shoulder the burden for their families as well as their work.

Information from the Census Bureau in 1981 says that all families with two wage earners had an median

annual income of $27,000. Therefore, 50 percent of the working class couples are above the $27,000 range. It is going to be this group which is badly hurt as a result of this bill.

I urge my colleagues to vote against this bill.

Mr. MATSUI. Mr. Chairman, I yield 2 minutes to the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. Mr. Chairman, I am pleased to rise in support of H.R. 1183, the tax cap bill, and to participate in this debate which should be called "True Confessions in Tax Land." I say that because it is this debate over limiting the tax giveaway to the Nation's rich which has taught us so very, very much about Ronald Reagan's tax policy.

True Confession No. 1: The Chamber of Commerce has written to us, asking that we not touch the Reagan plan because—and I am quoting—"for many people this tax cut represents their first real tax cut." That is quite a confession coming from the folks who gave us "year 1" and "year 2" of Reaganomics. If for many people this is their first real tax cut, where did the billions in tax breaks that we enacted in 1981 and 1982 go?

True Confession No. 2 comes from the Great Simplifier himself: President Reagan confessed just how out of touch he is with the people of this country when—at a $1,000-a-head fundraising dinner—he told us that a cap which affected those with incomes of $50,000 or more would hurt "middle- and lower-income" taxpayers. Of course, only the top 5 percent of the Nation's taxpayers make more than $50,000 a year, but I guess that the "top 5 percent" is the middle when it comes to Reaganomics, or Republican fundraising dinners.

True Confession No. 3 comes from Treasury Secretary Regan, who warns us that the President will be unhappy if we tamper with his tax cut. Truer words were never spoken, for the tax plan we are reviewing truly is the President's tax plan. After all, he got a $91,000 tax break on his 1982 return as a result of these policies. And to think that we would dare to limit the additional tax break—above and beyond the one the President will take again in 1983—to a lowly $700. Shame on us, we are told by Secretary Regan.

I say, to the contrary, shame on you, Mr. President. Shame on you for suggesting that your tax plan, without a cap, is fair for the middle class when it gives 30 times more relief to those making $200,000 than to those making $20,000. Shame on you, Mr. President, for opposing this measure to reduce the deficit and restore some of the equity you took out of the tax system.

Capping the tax cut achieves many of our major aims. First, it preserves the full tax relief that middle-class families have coming to them. Second, it limits the now unlimited tax giveaway that Ronald Reagan wants for those who do not need such relief. Third, it would save billions of dollars in needless additional deficits. Finally, support for the cap demonstrates the commitment we have to fairness for all Americans.

The $700 tax cap would reduce the deficit by $38 billion over the next 5 years. For my colleagues who say that this is a mere pittance, I would like to point out that $38 billion is enough to build six coast-to-coast interstate highways over the time the bill is in effect, with $2 billion in spare change left over. The savings would be significant.

A $700 tax cap would preserve the full tax cut for 90 percent of all Americans. It would not affect families with incomes of $45,000 or less. Only the 10 percent of our taxpayers with incomes over this amount—the Nation's wealthiest taxpayers—would be affected. And even these person would still receive a tax cut, though it would be limited at the $700 level.

Mr. Chairman, it seems ludicrous to suggest, as Ronald Reagan has, that the Federal Government should borrow $38 billion more to give an unlimited tax break to the Nation's wealthiest taxpayers. These people were the chief beneficiaries of the 1981 and 1982 Reagan cuts, and do not need an uncontrolled, additional break in 1983 and beyond.

A tax cap saves the tax cut for those who need it, and saves the Treasury billions of dollars. Our support for such a cap in the House demonstrates that we are committed to tax relief for working class families and economic fairness for all Americans.

Mr. CONABLE. Mr. Chairman, I yield 3 minutes to the gentleman from Minnesota (Mr. FRENZEL), a distinguished member of the committee.

Mr. FRENZEL. Mr. Chairman, this country has a graduated income tax system. Most of the Members of this body would support that graduated income tax system. I now notice that a number of Members on the other side of the aisle woud like to reduce the top rate. I think that is a commendable instinct on their part.

Two years ago we decided that we would vote an across-the-board tax rate for individual income taxpayers in this country. Now, that was not a new concept, because 3 years before, in 1978, we had also voted an across-the-board income tax cut for all individual taxpayers.

The only difference was that at that time in 1978 we had a Democrat House, a Democrat Senate, and a Democrat President.

Now, however, in 1983, our leadership, the Speaker and his friends, have decided that that was wrong. That those two acts and previous acts in this country of across-the-board tax cuts were unfair. Nobody has explained exactly why they were unfair, or why such a large majority of the House voted for them and thought they were fair at the time, but as of today, they have been declared unfair.

I suppose that means they were unfair in 1981, unfair in 1978, and unfair back in the early sixties as well.

Well, they are not unfair as far as I am concerned. We are confronted today with a permanent tax increase, not a cap. We are asked to renege on a promise that we made to the taxpayers of the United States in 1981. And after we made that promise, we soaked them with scheduled social security tax increases, increased social security tax, gas taxes, and bracket creep, so that most of the people who would like to receive a tax cut and who thought they should have had one in the last 2 years, have not even had a reduction in taxes yet.

In addition, we are establishing a new marriage tax, for this tax increase falls most heavily on the two-earner families, particularly families in which the female spouse is only recently working and receiving—we hope—a fair wage in the marketplace. So this tax increase will take most of her improvements away from her.

As I say, Mr. Chairman, it is not fair. In this Congress we always go for the taxpayer. We never try to limit spending. That is what our constituents want us to do.

This $6 billion assault on the deficit will do us no good. It is bad tax policy, it will not save one dime from the budget adopted by the mistaken spenders a few minutes ago. It should be defeated. Even if it passes this body, it will be defeated.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 1 minute to the gentlewoman from Ohio (Ms. KAPTUR).

Ms. KAPTUR. Mr. Chairman, today the House will have an opportunity to restore fairness and equity to our tax system. We can begin this process by reining in the massive tax giveaway to the wealthy which has been the hallmark of the Reagan tax program begun 2 years ago.

Let me offer an example of how this program has worked thus far: A family with a $100,000 income has had its tax liability reduced by $3,454. On the other hand, a family earning $20,000 received annual tax relief in the amount of only $300. Is this fair? Is this equitable? Is this in the spirit of the 16th amendment to the U.S. Constitution, ratified 70 years ago, which instituted the Federal progressive income tax system?

Unless we act today, we will compound the mistakes of the last 2 years. A family with income over $100,000 would get a further tax reduction of $2,368, while the family earning $20,000 will receive its "windfall" of $164. It is time to make an adjustment

on behalf of the average taxpayer who, contrary to the belief of President Reagan, is earning $20,000 not $50,000. For 2 years we have watched a program live up to not one of its vaunted promises—at least not any of those made public at the time the program was sold to the American people. The working people of this Nation deserve a tax break. Instead, they have received higher State and local taxes, higher social security taxes, and a reduced standard of living. They have shouldered the burden of a failed program and they have carried the wealthy. It is time we lighten the load for them.

This tax giveaway must be capped for the wealthy 10 percent of the population. The President would like us to believe that this action will increase taxes. It will not. It simply caps the tax break for the wealthy.

This action will help us get a small handle on the massive deficit we have accumulated over the past 2 years. The President inherited a deficit of nearly $40 billion and has swollen it to over $200 billion. He has done this by championing a program which has as its components: the most severe recession since the Great Depression; an opening of the Federal Treasury to the very wealthy; and an unprecedented level of defense spending. A leader of his own party originally called the President's program a riverboat gamble. One look at its disastrous results tells us that the gamble has not paid off.

The President may try to pass on the responsibility for the deficit crisis to the Democratic Party. But the facts do not support his contention. We should not sit back and accept the buck he is trying to pass. I have watched my colleagues on the other side of the aisle, those most vociferously touting us as the party which likes to tax, tax, tax, spend, spend, spend. I have watched them fight the deletion of any funding whatsoever from the defense authorization bill and now they are fighting the capping of the tax giveaway. We have watched severe cuts in programs for working people and the needy. This is forgotten by my colleagues on the other side of the aisle. Those that oppose the capping of the third year of the tax cut and oppose cutting defense spending somehow do not want to define the financial support for the wealthy and continued procurement of Defense Department waste as spending. Mr. Chairman, spending is spending and I do not think the American people will be fooled.

If we do not act on the deficit, economic recovery will be weak and unsustainable. The middle class will continue to be burdened with high interest rates and unemployment. I disagree with Secretary Regan's contention that deficits have no adverse effect on the economy. We cannot afford to borrow more money at high interest rates to give the most privileged members of our society another tax windfall this year. In the name of fairness, deficit control, and fiscal responsibility, we must cap the third year of the tax cut.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 2 minutes to the gentleman from New Mexico (Mr. RICHARDSON).

Mr. RICHARDSON. Mr. Chairman, I rise in strong support of H.R. 1183, the Tax Equity Act of 1983.

As my colleagues know, in 1981 Congress enacted the Economic Recovery Tax Act. The President hailed the law as the greatest across-the-board tax cut for individuals in history. The supply side business tax cuts were supposed to encourage investment and business expansion. Everyone waited for the supply side economic miracle to happen. But it never occurred.

The President's individual tax cut program was across the board in name only. But, in fact, Mr. Speaker, the Reagan tax cut was a bonanza for the well-to-do and a nightmare for middle- and lower-income taxpayers. The maximum tax rate was cut from 70 to 50 percent. Benefiting only the wealthiest taxpayers. If you happen to earn above $200,000 a year, your taxes would be reduced by more than 15 percent and your tax cut would total roughly $60,000 over the 3-year period. This is more than the average worker will earn over the same 3-year period. If, however, you are among the 80 percent of American taxpayers who earn less than $30,000, your tax rates went up under this so-called across-the-board tax cut.

The 1981 Tax Act did not stop with individual tax cuts—larger businesses also enjoyed huge tax reductions. Many companies have actually enjoyed an effective tax rate of zero during the past 2 years. But their leftover tax breaks did not go to waste—they simply sold them to another company. These business tax breaks discouraged productive investments in labor-intensive industries and encouraged unproductive business ventures. About the only industry that grew and prospered as a result of the Reagan tax act was the tax shelter industry.

Mr. Chairman, it is ironic that the 1984 tax law was named the Economic Recovery Tax Act. Because it was these tax cuts for the privileged few combined with massive increases in defense spending that resulted in record-breaking Federal deficits and an economic downturn the likes of which had not been seen since the Great Depression.

Members of the President's own party realized the dangers of the 1981 tax law and forced him to accept a tax increase of almost $100 billion in 1982. While many of the business tax gifts were taken back, the unfair individual tax cuts were left intact. As a result, we continue to face Federal deficits approaching $200 billion a year which threaten to choke off any economic recovery.

We must take action now to reduce the Federal deficit and to restore some semblance of equity to the tax system. I strongly support H.R. 1183, which is an important first step toward achieving these two goals.

Limiting the third year of tax cut to $720 for those who file joint returns and $637 for single taxpayers will reduce the deficit by $6.2 billion in fiscal year 1984 and $30.8 billion over the 6-year period from fiscal year 1983 through fiscal year 1988. The tax cap will only affect a single taxpayer earning above roughly $36,000 and a family of four with an income in excess of $46,500.

Mr. Chairman, we have heard a great deal of rhetoric about this proposal which simply is not true. First, the President and others have said this plan will hurt the middle class. The new Republican math seems awfully strange to me; 89 percent of all the revenues raised by this measure will be paid by taxpayers with incomes above $50,000. In my home State of New Mexico, the average worker earns a little over $15,000 a year and will still receive his or her full tax cut under the tax cap plan. In fact, 90 percent of all taxpayers will get their full tax reduction. I guess those who support the President's tax policies think you are a member of the middle class if you earn $60,000 or $70,000 a year. I resent this notion and I think the American people resent being misled.

Second, the tax rate equity act is not a tax increase which threatens economic recovery. Capping the tax cut at roughly $700 would simply scale back the tax cut for the most wealthy. Everyone would still enjoy a tax reduction. Under the $700 tax cap plan, tax reductions totaling $24 billion will go into effect in July increasing purchasing power and helping stimulate the economy. But continuing high deficits, which the President used to warn us about, truly threaten the recovery. These recordbreaking deficits will keep interest rates far too high and will absorb most of the funds available for investment.

Finally, reducing domestic spending is not enough to substantially lower the deficit. It sounds attractive, but it will not work. This is evidenced by looking at the President's own budget proposal. Although he would cut domestic spending by $120 billion over the next 2 years, his budget will still produce a whopping $189 billion deficit in fiscal year 1984 and $194 billion in fiscal year 1985. Certainly we should reduce unwarranted Government spending, but it is time to stop

asking the Nation's needy and less fortunate to pay for the President's economic failures and excessive tax breaks for the rich. The poor, the elderly, the small businessmen, the family farmer, Hispanics, and other minorities all have suffered too much for too long.

Mr. Chairman, capping the third year of the tax cut is a fair and compassionate way of reducing the staggering Federal deficit without further harsh budget cuts. Do we really want to be a nation that awards billions of dollars in tax breaks to our most affluent citizens and then turn around and tell our poor schoolchildren that we do not have enough money to furnish them with a nutritious lunch? Do we want to tell our native Americans that we cannot afford their health and education programs? Do we want to tell our senior citizens they will have to pay more for their health care? Do we really want to tell the unemployed that they will simply have to learn to do without basic human services and job retraining? I hope my colleagues and our President will agree this is not what America stands for and I urge them to strongly support H.R. 1183.

□ 1710

Mr. CONABLE. Mr. Chairman, I yield 2 minutes to the gentleman from Kansas (Mr. ROBERTS).

Mr. ROBERTS. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in strong opposition to this so-called tax cap. I am not a member of the Committee on the Budget and I am not a member of the Committee on Ways and Means. I do not intend to stand up here and talk as an expert on tax legislation. I want to talk about this alleged public support for doing away with the third year of the tax cut, or capping the tax cut.

I suggest that those people who want to ride that horse had better start to check his teeth. Here we have the Speaker and the majority leadership actually trying to play the role of Robin Hood, if you will; taking from the rich and supposedly putting some $6 billion in a small cigar box, hiding it over here behind the Speaker's chair, and then delivering it to the Department of the Treasury and, that is how we are going to actually reduce the deficit.

Well, now, sold that way, I should believe it, but I took my own poll out in western Kansas where I have 58 counties, and in town hall meeting after town hall meeting, I asked folks, "How many of you people would be willing to forego that third year of the tax cut or put a cap on it in order to reduce the deficit?" And about half the people raised their hands; grudgingly, but they raised their hands.

Then I said, "Keep them up folks. I want you to keep them up, because in order to actually reduce the deficit, you are going to have to pay billions more in taxes. Now how many of you want to do that?" Some of the hands went down.

Then the next question: "Given the fact that this Congress is already some $50 billion over last year's budget, some $10 billion over last year's spending levels, and has shown no restraint whatsoever, no restraint on any spending bill here to date, how many of you want to ride that horse and go down that road again?" All the hands came down.

Then there was a pause and some hands came back up and said, "What taxes are you talking about? How are they going to raise this revenue so we can get there from here?"

One of the tax proposals affecting farm country is, yes, we are going to study repeal of farm and small business, estate tax reform, that reform that took us over 4 years to get passed. At that point, Mr. Speaker, there was not a hand showing. And, as one stockman put it, this horse has been rode hard and put up wet.

The CHAIRMAN. The Chair will state that the gentleman from New York (Mr. CONABLE) has 13 minutes remaining, and the gentleman from Illinois (Mr. ROSTENKOWSKI) has 14 minutes remaining.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 2 minutes to the gentleman from Kansas (Mr. SLATTERY).

Mr. SLATTERY. I thank the gentleman for yielding this time to me.

Mr. Chairman, I have not been around here nearly as long as some of my colleagues, and certainly not as long as my colleague, the gentleman from Kansas, who preceded me. Frankly, I do not know whether that is an advantage or disadvantage as we analyze legislation like H.R. 1183.

But there is one thing that I do know, and that is that the people of this country are people of courage and people of commonsense. They understand that it defies commonsense to cut taxes as we face $200 billion deficits. This may be good politics, but it is fiscally irresponsible. They understand that we should not return to the policy of tax and spend, but they also understand that we should not continue the policy of spend and borrow, spend and borrow.

The people of this country want us to have the courage to pay for our spending. Whether it is military spending or social spending, they want us to have the guts to pay for it.

The people of this country understand that the possibility of doubling our national debt in less than 10 years is frightening. The people of this country also understand and are confused about how people of commonsense can stand by and watch this happen.

I also believe the people of this country understand that if we are as serious about reducing deficits as they want us to be, there is only one way to do it: We must reduce spending and delay tax cuts. If we are unwilling to do both, then we better be willing to accept the responsibility for $200 billion deficits that will force up interest rates and will choke off the economic recovery and, in my judgment, threaten the economic stability of the Western world.

I will add that I have already voted against billions of dollars in spending and will continue to do so. But that will not be enough. Delay of the cuts, coupled with spending reductions, is the only way to reduce enormous deficits and begin to move toward that day when we can burn our Nation's credit card.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 1 minute to the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. I thank the gentleman for yielding this time to me.

Mr. Chairman, today the House has an opportunity to strike a blow for fiscal responsibility and true tax equity.

By passing H.R. 1183, we can continue the process of undoing the mess created by the enactment of the so-called Economic Recovery Tax Act of 1981, that hodgepodge of special interest tax breaks and unfair tax reductions which have sent our Federal deficits over $200 billion.

In 1981, I stood with an outvoted minority in opposing the 1981 Tax Act. I was convinced that the tax reductions were unfair; I knew that the Treasury and the economy could not tolerate the resulting revenue losses: Estimated at $507 billion from fiscal years 1984 through 1986, and over $1.1 trillion during the period 1982 through 1988. The Tax Equity Act which we passed last year will restore only about a quarter of that revenue loss.

In 1982, a bipartisan majority in the House and Senate joined with President Reagan to pass the Tax Equity Act. Despite my differences with the President's overall economic and tax policies, I worked for enactment of that tax bill because it was desperately needed; it was responsible legislation which closed a number of tax loopholes; and it reduced—at least in part—the revenue drain from the 1981 Tax Act. Many of us on this side of the aisle put party differences aside in supporting the Tax Equity Act. The act incorporated sound economic and tax policies; the economic recovery, such as it is since last summer is due in large part to our passage of that measure.

Nevertheless, the gross inequities of the 1981 act are still law. By 1986, corporate taxes will contribute only 6.6 percent of Federal revenues. In 1980,

corporations contributed 12.5 percent of Federal revenues.

Today, we can take a step beyond last year's tax bill and make another midcourse correction on tax policy by passing H.R. 1183. H.R. 1183 is not the major overhaul of the 1981 act which the Nation needs. It is however, far better than no action. It will cut revenue losses by $6.2 billion in fiscal 1984, and by a total of $38.8 billion in the 6-year period 1983-88.

The Tax Rate Equity Act of 1983 changes to tax rate schedules set by the 1981 Tax Act by establishing a cap of approximately $700 on the maximum reduction resulting from the third year of the tax cuts enacted in 1981. The maximum tax reduction would be $720 for married taxpayers filing jointly, $673 for unmarried taxpayers filing as heads of households, and $637 for single taxpayers.

Every person who earns enough to pay taxes will be taxed less under this bill. The difference between H.R. 1183 and the 1981 tax bill is that those taxpayers who got a disproportionately large slice of the 1981 tax cut will get less for this one. This bill would still insure most Americans the full tax reduction on July 1; but comparatively, it will do more for those Americans who have not yet received their fair share of the 1981 tax provisions.

Ninety percent of taxpayers would receive the July 1 tax cut in full; the remaining 10 percent would receive reductions up to the cap, in addition to keeping the benefits which they have already received.

The Joint Committee on Taxation estimates the 98 percent of the revenue generated by this bill will come from taxpayers with incomes above $40,000. In fact, 42 percent of the revenue generated by this bill will come from taxpayers with incomes greater than $100,000.

The cap would reduce tax cuts for a married couple with two children with income of above $46,000, and $35,714 for a single taxpayer.

This legislation is equitable in that it would shift slightly the benefits of this tax reduction to middle- and low-income taxpayers.

H.R. 1183 is not drastic legislation. It will not give the American people the equitable tax system which they deserve, nor will it end the disastrously high deficit levels. Much more far-reaching tax reform is needed to achieve that goal.

I cosponsored H.R. 1183 earlier this year. I cosponsored similar legislation in the last Congress. I am proud to have done so, and proud that the House is voting on it today.

I urge my colleagues, both Republican and Democratic, with whom I joined last year in passing the Tax Equity Act, to join with me and other supporters of H.R. 1183 in the same bipartisan spirit.

H.R. 1183, the Tax Rate Equity Act of 1983, is not a tax increase bill. Every taxpayer will still receive a tax reduction on July 1. The issues are fairness and fiscal responsibility. To those of my colleagues who are concerned about the unfairness of the 1981 Tax Act, I say vote "yea." H.R. 1183 will make that act a little fairer to the people we represent here. To those of my colleagues concerned about the size of the Federal deficits, I say vote "yea." H.R. 1183 will cut significantly revenue losses. To those of my colleagues who share my concern for both fairness and fiscal responsibility, I say that a yea vote is doubly blessed.

I urge the House to pass H.R. 1183 by an overwhelming margin so as to encourage our Senate colleagues to join with us in sending H.R. 1183 to the White House.

Mr. CONABLE. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania (Mr. RITTER).

Mr. RITTER. I thank the gentleman for yielding this time to me.

Ladies and gentlemen, the Tax Rate Equity Act of 1983 should read "The Financial Disincentive Acts of 1983." The tax cut "cap" is a madcap. Why? If we look at the creation of new jobs, if we look at the creation of new products, of new processes, of high technology, where are they coming from? They are coming from precisely the income range, the middle-income range, that is being attacked by this so-called Equity Act.

We are applying disincentives to the very innovators and entrepreneurs that we are looking to to pull us out of low productivity, low savings and investment and flagging competitive edge. We are giving them a signal that says, "Do not work harder. Do not leave corporate America and go out on your own because if you want to make it big on your own in this country, you are going to have to jump this big new hurdle." "Surprise Mr. or Mrs. Inventor, we have just changed the rules of the game." Permanently.

The Democrats are telling the most productive people in the American society that they cannot get ahead, that they should be punished. The impact on our overall economic picture is enormous. The people who will provide the new innovations, the new jobs and economic growth are saddled with this madcap.

Mr. CONABLE. Mr. Chairman, I yield 1 minute to the gentleman from Missouri (Mr. EMERSON).

Mr. EMERSON. I thank the gentleman for yielding this time to me.

Mr. Chairman, I tried to engage the chairman of the Rural Caucus in a colloquy, but could not get him to yield. I just wanted to ask the chairman of the Rural Caucus if the farmers and smallbusiness people of rural and smalltown Oklahoma are really that different from rural and smalltown Missouri? Do his farmers and small business people really want to go back to the practice of his widow or heirs having to sell the family farm to pay estate taxes? If he is for this bill, that is what will happen.

□ 1720

Mr. CONABLE. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from New York (Mr. KEMP).

Mr. KEMP. Mr. Chairman, I just wanted to make the point that this debate is almost the flip side of the debate that was held in this Chamber in 1963 and 1964. At that time the Democratic Party offered, under the leadership of President John F. Kennedy, 25 to 30 percent across-the-board permanent reduction in income tax rates on each and every American. That was opposed by the Republican conservatives because they thought it would increase the deficits and lead to a recession. All the arguments were exactly the reverse of what we are hearing today. I am glad to see my party arguing the case for another round of tax rate reductions.

The gentleman from California (Mr. LUNGREN) has earlier quoted former President Kennedy as saying:

> The purpose of cutting taxes, is not to create a deficit; but to increase investment, employment and the prospects for a balanced budget.

Indeed, Mr. Chairman, those cuts in the tax rates in 1964 eventually passed under President Johnson led to more revenue and helped bring unemployment down from 6 to 4 percent. The deficit went down, and we balanced the budget in 1965.

Everything is not perfect today obviously, but we are in the foothills of economic recovery. We want to expand that recovery and bring down unemployment from 10 percent to 5 percent and 4 percent. We need full employment in America and price stability, that is our goal.

Incidentally, the Speaker of the House, the distinguished gentleman from Massachusetts, voted for that 30-percent across-the-board tax cut in 1964. So did the chairman of the Rules Committee. the gentleman from Florida (Mr. PEPPER). So did the chairman of the Ways and Means Committee, the gentleman from Illinois (Mr. ROSTENKOWSKI). It was fair then, and our cut was fair in 1981, because the Kemp-Roth bill was based on the 1964 tax cut.

I am sorry and disappointed that this debate has become so partisan. There was bipartisan support for cutting all rates, lowering the top rate and cutting capital gains rates. These were cosponsored by the gentleman from Oklahoma (Mr. JONES), the gentleman from Illinois (Mr. ROSTENKOW-

SKI), the gentleman from New York (Mr. CONABLE), and many, many more. There were friends on both sides of the aisle who cosponsored lower rates and now all of a sudden they want to do a mea culpa and apologize or criticize those earlier actions that are helping lead a recovery. Savings, investment, venture capital and income are all rising.

We should not be raising taxes right now, we should be advancing another round of tax rate cuts.

In 1978, we cut the top rate on capital gains from 49 percent down to, I believe, 28 percent. It went down to 20 percent in 1981. We cut the corporate tax rate in 1978, and as the gentleman from Minnesota (Mr. BILL FRENZEL) pointed out, we lowered the personal rates or adjusted all the brackets across the board in 1978, and in 1981 we followed on the principle that if we are going to cut taxes, we should do it across the board. We lowered the 70-percent bracket to 50 percent and as I said earlier, revenues went up and are helping finance the cuts in the lower brackets.

I think there is only one Member in this whole Chamber who wants to go back to a tax system as inefficient as the previous tax system, and that is the gentleman from Massachusetts (Mr. SHANNON). He thinks we should go back to a 70-percent rate. I could not get any time at that point to go into a debate with him, but I would point out to my colleagues that by cutting the brackets from 70 percent to 50 percent, revenues from wealthy Americans have gone up by 16 percent from 1981 to 1983. The tax on the high incomes has actually gone up as revenues rose by 16 percent from 1981 to 1983. High tax rates discourage earning taxable income and encourage tax shelters.

As the gentleman from New York (Mr. CONABLE) pointed out, this is not a cap; this is a permanent change in the Tax Code, because if you have about $31,000 of taxable income and you are single, in effect your tax bracket will jump from the 28-percent marginal tax rate to the 37-percent marginal tax rate. That is a 30-percent increase in the marginal tax rate on the next dollar you earn over $31,000 of taxable income if you are a single working man or woman. Mr. Speaker, that is a distortion of the Tax Code and will not help but hinder.

The gentlewoman from California (Ms. FIEDLER) pointed out that this so-called cap reimposes the marriage penalty. In effect, we are taxing married women who go to work to maintain their standard of living. It seems to me that this is not fairness, and it is not equity.

Incidentally, a $10,000 income compared to a $50,000 income, the $50,000 income actually gets a tax cut that is proportionately the same. Now, the Members who will follow me will say, "Well, the dollars are higher." They are higher because the $50,000 income pays 25 times as much tax as a person earning $10,000. So if we cut the rates across the board, obviously the dollar tax cut is higher but fairness and equity are not endangered. All rates are too high.

Mr. Chairman, in 1964 the rates were cut by 30 percent, and, as I said, that was supported by the distinguished Speaker, the gentleman from Massachusetts, who now says that the cut in the tax rate is unfair under this President. Now, it seems to me that what was good for this country in 1964 and what was good for this country in 1978 is still good for this country in 1983.

Mr. Chairman, the way to reduce deficits is to make the economy grow. We should not interfere with an economic recovery, and I ask the Members to vote down the tax increase that would place a surtax on middle-income Americans at the wrong time and in the wrong way.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 2 minutes to the gentleman from Georgia (Mr. ROWLAND).

Mr. ROWLAND. Mr. Chairman, I do not believe that we are going to reach any agreement today on whether or not H.R. 1183 raises taxes or limits cuts, but I believe we are all in agreement on the need to reduce the budget deficit.

I rise in support of the amendment offered by the gentleman from Oklahoma to link the level of the third-year tax cuts with the ability of the Congress to reduce spending by the same amount.

I certainly do not support taking money out of the pockets of the American taxpayer to use for increased Government spending, but neither do I support offering exorbitant tax breaks when we are facing a $200 billion deficit.

When the 3-year tax reductions were proposed in 1981, the assumption was that the economy would improve, the budget would be balanced, and the Government could afford to give the taxpayers some relief.

We have seen our deficit go from $57.9 billion at the beginning of this administration, and two tax cuts later, it is approaching $200 billion.

There is simply no logic in giving taxpayers a few more dollars to spend in a sick economy, when the Government's efforts to cover the deficit are keeping interest rates artificially high.

There has also been no evidence to indicate that the tax reductions of 1982 have resulted in any increased spending or saving by those who benefited.

Most of those individuals in the $50,000 to $100,000 income bracket will not experience significant changes in their lifestyles with the additional 10-percent tax cut.

The point is, however, that we must be equitable in the distribution of the burden of financing our Government. Although many here say that to cap the tax cut will mainly affect those taxpayers under $50,000.

Perhaps this is true, in absolute numbers of people—for a rather obvious reason. The majority of the population falls into this category.

But the fact remains that 89 percent of the revenue generated by the cap will come from those making over $50,000.

Are these the middle-income Americans we are trying to protect? If demographics are of any importance in this discussion, and I think they are, I would like to point out that in my district, less than 3 percent of the population earn more than $50,000, and the average income is around $16,000.

Approximately 88 percent of my district will not be affected in any way by the most liberal estimates. This 88-percent figure is quite generous, because the assumptions upon which it is based are that all of my constituents are single, have no dependents, and do not itemize on their tax returns.

In talking with the people of the eighth district, I have been told time and time again that individuals are willing to forgo the third year tax cut completely, but only if the additional revenue is applied toward the deficit.

This legislation does not seek the repeal of the tax cut, but a fair compromise that the American people can live with, if the deficit is reduced by the same $6.2 billion that will be generated.

But I am still concerned that a faulty perception exists that Congress is voting to increase the taxes of every working American, and this is just not true.

If there is a smokescreen to hide behind in this issue, it is one of protecting the wealthy of this country to the detriment of the middle- and-lower income people.

Now is the time, if the Members of this body are sincere in their commitment to lower the deficit, to vote for the McCurdy amendment and for final passage of H.R. 1183.

These actions are indicative of a desire to do more than pay lipservice to reducing the budget deficit. I urge my colleagues to take this opportunity to show their true concern over our Nation's overall economic health.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 1 minute to the gentleman from California (Mr. LEHMAN).

Mr. LEHMAN of California. Mr. Chairman, during his campaign for the Presidency, Ronald Reagan presented himself as a magician who would do the impossible for the American people. Mr. Reagan pledged to

make the Federal budget deficit disappear while also reducing Americans' taxes by 25 percent.

In 1981, the Congress helped President Reagan reduce taxes by passing his 3-year tax cut. Thus far the President has failed to "pull a rabbit out of his hat" and reign in the Federal budget deficit. Rather than reduce the deficit, the President has proposed a 1984 Federal budget with the largest deficit in history.

Well, Mr. President, the magic show is over. Your mirrors and trap doors and creative financing have all been exposed. Your potion of voodoo economics has poisoned our economy. Your attempt to mesmerize the average American into believing that the third year of your tax cut is anything but a windfall for wealthy America has failed.

This measure will only affect the wealthiest 10 percent of America's citizens by limiting their windfall from the third year of the tax cut to $700. The remaining 90 percent of Americans will be unaffected by the bill. In the process, we will reduce the Federal budget deficit by $6 billion; $12 billion if the McCurdy amendment is passed.

It may not be as grand a feat as President Reagan originally claimed he would perform, but it represents a major step toward restoring equity to our tax codes while reigning in the Federal budget deficit as well.

It is for these reasons that I urge my colleagues to join me in supporting H.R. 1183.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield 1 minute to the gentleman from Wisconsin (Mr. MOODY).

Mr. MOODY. Mr. Chairman, I will not reiterate the facts and figures regarding the fairness issue or the equity issue of the tax cap. Those have been pointed out. The gentleman from Missouri (Mr. GEPHARDT) and the gentleman from Massachusetts (Mr. SHANNON), along with others, have pointed out that there is no fairer way to get the $6 billion in revenues. The President's proposals of gasoline taxes, surcharges, excise taxes, and stand-by taxes are far less fair in terms of their incidence by income grouping.

But I do want to comment to my colleagues on the issue of why we should indeed raise taxes in a recovery. That "Don't raise taxes in a recovery" has been the repeated cry this afternoon by the Republican side of the aisle. They claim that it would be disastrous to raise taxes during a recovery.

Tax cuts, Mr. Chairman, do not by themselves spur recovery. We have seen the longest and the most severe period of recession in this country's history take place during the same period of time as we have had the most massive tax cuts in our history. We have seen that tax cuts by themselves do not lead to recovery.

What does lead to recovery is lower interest rates. Lower interest rates are the key to economic recovery. Those interest rates, while lower right now, are on a knife's edge, and they are going to go up and go up very fast once the recovery begins to take hold and private and public borrowing collide, as they are bound to do.

This tax cut cap is as fair as any other way of raising $6 billion, far fairer than the Reagan proposals.

But just as importantly, this tax cut cap is a first step in reducing the deficit, lowering interest rates, and spurring—rather than impeding—the recovery.

● Mr. BORSKI. Mr. Chairman, today we are considering one of the most important pieces of legislation to come before this House, the Tax Rate Equity Act of 1983.

Let us be clear. This legislation is not an attempt by Democrats to raise taxes. It is not a tax increase.

It is an effort to get rid of basic unfairness in this administration's tax policies. To send this administration a message that its reliance on working class Americans to carry the tax burden is unacceptable.

When this administration came into office, we were promised across-the-board tax relief for all Americans. But the 3-year tax cuts have meant little or nothing for most of us. Only the wealthy have benefited.

After inflation, social security tax increases and other tax hikes are considered, taxpayers earnings less than $10,000 will have their tax bills increased by 22 percent compared with 1980. Similarly, families earning $10,000 to $15,000 will face tax increases of 7 percent and those earning between $15,000 and $20,000 will pay 2 percent more.

But for those Americans making more than $200,000 this administration's tax program is a windfall. It gives them a $60,000 tax break during the 3-year period.

We need a more equitable and sensible tax program.

H.R. 1183 marks a good beginning. It limits the final installment of the 3-year tax cuts to a maximum of $720 per joint return. It shifts the tax burden to those who can most afford it, the upper 10 percent of all taxpayers.

This bill preserves the full tax cut which middle-class families expect to get under present law; 90 percent of all taxpayers will receive exactly the same tax reduction as they would under the administration's program.

What this bill does is to make it clear to the American people that we care who carries the tax burden. That we reject tax cuts which favor the wealthy at the expense of working class Americans.

A good example is this administration's program for a family of four. A family of four with an income of $100,000 will get back over $2,000 in the final tax cut. While the same family of four with an income of $20,000 will get back only $164.

That kind of disparity is unjustified. That kind of disparity must be eliminated.

It has been nearly 2 years since the 3-year tax cuts went into effect. The administration promised economic prosperity.

Instead, we have experienced the most dramatic surge in Federal deficits in this Nation's history, deficits which have kept interest rates high and employment low, deficits which have forced State and local governments to raise taxes to make up for lost Federal moneys.

My own State of Pennsylvania has lost almost $260 million in Federal aid since 1981. Faced with an estimated $500 million deficit for next fiscal year, the worst budgetary outlook for Pennsylvania since 1970, the legislature is likely to raise taxes, taxes which working men and women will have to pay.

And the city of Philadelphia is in the same sad condition. City taxes on wage earners and business will have risen by 15 percent by 1984. Personal property taxes will have gone up by 21 percent and real property transfer taxes will have increased by 150 percent. These tax increases are driving business and investment from the city and shrinking the city's tax base even further.

It took the Government of the United States more than 192 years to run up a debt of $1 trillion. Unless we act now, the Congressional Budget Office estimates that it will take the Reagan administration less than a decade to double that amount.

Without imposing any new taxes on the American people, H.R. 1183 will give the U.S. Treasury an infusion of $37 billion by 1988. It will put this country back on the road to fiscal integrity and sustained economic recovery. It is an essential step in restoring fairness to the American tax system.

• My colleagues, let us not miss this opportunity to show the American people our commitment to tax equity and financial commonsense.

I urge you to join me in supporting H.R. 1183.●

● Mr. SHELBY. I rise in opposition to H.R. 1183, the so-called Tax Rate Equity Act placing a cap of approximately $700 on the third installment of tax cuts provided by the Economic Recovery Tax Act of 1981.

It is distressing to see the leadership have to resort to such ill-conceived measures as this in a blatant and inevitably futile attempt to scramble aboard the train of economic recovery. There has been no more ludicrous an effort so far in this Congress to repre-

sent a proposal as doing one thing when, in point of fact, it does precisely another.

In this case, the supporters of the Tax Rate Equity Act, in keeping with their incessant cries of "this administration's policies are weighted toward the rich," propose to reduce somewhat the disproportionate share of the tax cuts enjoyed by the upper-income groups—all for the cause of promoting fairness. Instead of inflicting pain upon those fat cats this bill aims to harm, nearly half of the taxpayers who face a tax increase as a result of the bill are below the $50,000 income level. Can you really call a two-earner family with income of $39,000, two children about to enter college and a mortgage to pay, wealthy. Certainly not—they are the fiber that keeps this country strong, the middle class, and they are going to be soaked again by a spending-hungry Congress.

We are simply not willing to take ourselves by the neck in Congress and confront the real reasons we have such unacceptably high deficits in this Nation—we have allowed our Federal budget to grow almost completely out of control. I say almost because I still believe there is a broad, rational consensus in this Congress to get a handle on Government spending, and not continue to disguise our problems by claiming we tax our citizens too little.

Mr. Speaker, nearly 80 Members of your own party signed a letter regarding the situation of our staggering mega-deficits and the most fiscally responsible way to address that all-encompassing concern. As one who signed that letter, I joined my colleagues in supporting an eminently superior approach to reduce the deficit—tackling and pinning down uncontrolled spending. To take the course set before us today and cap the third year of the tax cut, without an accompanying cap on spending is, as syndicated columnist R. Emmett Tyrell, Jr., calls it: "Robin Hood" economics and should be resoundly defeated as the fairy tale it is.●

● Mrs. SCHNEIDER. Mr. Chairman, I rise in opposition to H.R. 1183, legislation to cap the third installment of the Tax Reduction Act of 1981. I do so reluctantly, because there is little question that revenues are needed to close the deficit. Unfortunately, though, the majority is not dealing with the real problems in our tax system.

There is a reason that Rhode Islanders favored the 1981 personal cut by a 19-to-1 margin, and it is that individuals of low- and moderate-income pay a disproportionate amount of taxes collected by the Government, while corporations and extremely wealthy individuals can take advantage of numerous breaks and end up paying a very small percentage of our country's tax collections. Therefore, it is a small wonder that Rhode Islanders and other Americans so heartily supported a direct, across-the-board reduction in their tax rates for a change.

The Democratic majority claims to have taken this attempt at equity a step further. But have they? Let us take a look at the facts:

In response to Democratic requests, the 1981 bill contained a 50-percent cap on individual tax rates. Therefore, this so-called cap means nothing for the wealthy, but instead places a $6 billion burden on married two-earner couples and others in the broad middle-income groups who are struggling to make it.

This is not tax reform. Tax reform is getting the IRS off the backs of the average American wage earner and onto interests which do not pay their fair share. In this country, we have a progressive tax system—meaning that if you make more, you pay more. Unfortunately, huge loopholes, deductions, tax shelters, and other income diversions have ridiculed the very concept—meaning that profitable corporations and wealthy individuals end up having, in effect, lower tax rates that those making less and living only on their salaries.

Of the 8 million returns which will be affected by this legislation, about one-half are two earner couples, which includes those making close to but less than $20,000 per year each.

For example, what about the machinist at our Quonset Point or Groton facilities, in my area, who makes $19,500 per year, and his wife, a teacher, who makes $19,000 per year. Together, they make $38,500, but this bill would increase their tax liability by 9 percent. I say let us catch a few tax dodgers and close a few loopholes instead.

Since individuals make up the vast majority of the tax base, it only makes sense to make up new revenue in other ways—but the Democratic majority will not hear of it. For example, why not:

Enforce the windfall profits tax better, and collect billions over the next few years?

Repeal expensing of intangible drilling costs and collect $15 billion from oil companies over the next 5 years?

Mr. Chairman, this type of legislation is not a sensible way of dealing with problems. I ran for office because I was exasperated with what seemed like band-aid solutions to problems, instead of going after their causes. This bill only exacerbates the situation of individuals having to pay more than a fair share of Federal revenues.

During the past few years, I have repeatedly said that I would vote for repeal of the third year of the tax bill altogether if that was necessary for economic recovery. Fortunately, our economy is expanding at a high rate and unemployment is edging down. Now is exactly the time we should be looking at long-range tax reform, not business-as-usual. Some day, we may be back in position to have to raise individual taxes to deal with economic problems, and I for one will have the courage to do so. But I am not ready, in an expanding economy, to put the squeeze on two-earner families and individuals making incomes in the moderate $20,000 range when reform will raise the revenues from those who should have been paying all along.●

● Mr. BROWN of California. Mr. Chairman, since this administration entered office 2½ years ago, it has asked middle- and lower-income Americans to make tremendous sacrifices in order to institute an untested economic theory. Overall, it has cut $223 billion in programmed domestic spending for the years between 1983 and 1986. It has cut student loans, school lunch subsidies, aid to families with dependent children, and other vital programs.

Upper income groups must now be asked to forgo a part of the benefits they are scheduled to receive. Until now, this group has benefited the most from the Reagan policies. Despite all the rhetoric, the combined effect of the 25-percent tax cut, offsetting tax increases, and higher social security taxes has actually increased the tax burden for those earning under $30,000—and the less one makes the more burdensome it is. Those earning under $10,000 a year are paying taxes 22 percent higher than before these policies were implemented. However, those earning over $30,000 have received a net benefit of between 1 to 15 percent in lower taxes. It is time for those who have received the most benefits to share some of those benefits.

Today we have before us a proposal, the Tax Rate Equity Act, which would limit the scheduled July 1 tax cut to roughly $700. Everyone would still receive a much deserved tax cut; those earning under $30,000 would not be affected, and those earning between $30,000 and $40,000 would only be minimally affected. But for those earning above $50,000 some sacrifices would be asked. The tax cap is expected to produce revenues of $6.2 billion in fiscal year 1984, and $38.8 billion over the 6-year period from fiscal year 1983 through fiscal year 1988. Sixty percent of this revenue would come from those earning over $75,000, 29 percent from those earning between $50,000 to $75,000 and 11 percent for those earning under $50,000. This proposal truly asks of those who can afford it.

The budget compromise worked out earlier this week by the House and Senate has a Federal deficit of $170 billion. While the $6.2 billion in increased revenues from this cap will not

substantially reduce the deficit, it will make two statements: one, that Congress is serious about coming to terms with a deficit caused in part by the implementation in 1981 of the Economic Recovery Tax Act (ERTA), and exacerbated by a long and deep recession; two, that the sacrifices which will need to be made to reduce the deficit will be made by everyone, not just those who can least afford it.

I encourage my colleagues in the House, and those in the other body, to support this measure. And I encourage the President to look beyond partisan and Presidential politics, and toward methods to reduce the deficit with fairness and justice for all.●

● Mr. FAUNTROY. Mr. Chairman, I rise in support of H.R. 1183, the Tax Equity Act of 1983. As the Members know, this bill would place a cap of approximately $700 on the amount of tax reduction individual taxpayers would receive under the third year of the 1981 tax cut. This proposal is both fair and necessary, as we in the Congressional Black Caucus recognized when we included it in our alternative budgets.

It is fair because it would partially offset the inequities of the Reagan-Kemp-Roth tax cuts which gave the rich large reductions in their taxes and small or modest reductions to everyone else. It would mean that families with approximately $45,000 in adjusted gross income and individuals with approximately $35,000 in adjusted gross income would still receive the full amount of the tax cut, while those with incomes above these amounts would still receive a tax cut of $700, but not the excessive tax cuts they would otherwise receive.

This bill is necessary because it would partially offset the large revenue losses and enormous deficits created by the Reagan program. At a time when deficits are projected to rise to more than $200 billion, this measure will help to reduce those deficits by $6.2 billion in fiscal year 1984, $7.1 billion in fiscal year 1985, and $7.6 billion in fiscal year 1986. This is not of course sufficient to eliminate those deficits, but it is a necessary step we must take toward that goal.

For those Members who are concerned that this proposal will stifle the recovery, let me say this. The recovery we are now experiencing is being and will be lead by consumer spending, not by the business investment envisaged by the Reagan program. When the subcommittee which I chair—the Subcommittee on Domestic Monetary Policy of the Banking Committee—held hearings last month on risks to the recovery, a number of prominent economists warned that the recovery would be jeopardized if consumers saved instead of spending. These economists cited several reasons why consumers might be more inclined to save, including the high real interest rates brought about in part by this administration's deficits, and "the tax law changes (which) have shifted the distribution of after-tax income to upper-income households, who tend to save at high rates."

To get the most stimulus to consumer spending from this year's tax cut, several of these economists specifically recommended capping the third-year tax cut, both to help bring down interest rates and to distribute more of the after-tax income to the lower income families who will spend it now, when we need consumer spending. So, I think there is firm evidence that this proposal would not only not impede recovery, but might actually make the recovery stronger and more sustainable.

STATEMENT BY SANDRA SHABER, PH. D., DIRECTOR OF CONSUMER ECONOMICS, CHASE ECONOMETRICS, PRESENTED TO SUBCOMMITTEE ON DOMESTIC MONETARY POLICY

It is an honor to be here this morning to present my views. My remarks today will focus on the role of consumer spending in a continuing recovery, with particular emphasis on the issue of high interest rates. The views and forecasts I present are not necessarily those of the Chase Manhattan Bank, N.A., the parent company of Chase Econometrics/Interactive Data Corporation.

SUMMARY

Although an economic recovery is now well underway, growth has been slow thus far and promises to remain so in the period ahead. The chief problem is persistently high real rates of interest, which are likely to have lingering adverse effects on business investment, foreign trade, housing, state and local government spending, and consumer demand. Assuming that rates ease slightly in the period ahead, the economy is expected to continue modest recovery. However, a rebound in interest rates, most likely stemming from a more restrictive monetary policy and/or pressures on credit markets from expected or actual growth in the federal deficit, would clearly jeopardize recovery in the U.S. and abroad.

With most other components of final demand likely to remain weak in the near-term, a sustained economic recovery depends upon expanded consumer spending. Demand, in fact, has improved in recent months and stronger income gains should provide further stimulus in the period ahead. Nevertheless, high interest rates cloud the prospects for consumer spending, as well as for economic growth generally. Apart from their effects in dampening the growth of output, employment, and income—and thus living standards, high rates discourage credit purchases, especially in such key markets as housing and autos. Further, high rates add to the array of incentives to save and, even at current levels, could divert more income from spending to saving at a time when stronger spending is vital to economic recovery. A sustained surge in interest rates would compound these problems and cause additional damage to consumer spending by reducing the value of financial assets.

Although nominal interest rates have fallen from four to six percentage points during the past year, they remain extremely high in real terms. The major reason, especially in the case of longer-term rates, appears to be uncertainty over the course of monetary and fiscal policy and, especially, the fear that soaring deficits will drive up interest rates if the Fed monetizes the debt, or rekindle inflation if continued strong growth in the money supply is permitted. Although the declines in mortgage and auto loan rates roughly correspond to the fall in other long-term rates, other consumer finance rates have been considerably more resistant to downward pressures. Consumer loans generally are treated as long-term credit and are subject to the same factors that have kept other long rates high; in addition, consumer credit is viewed as riskier and more costly to handle than business credit. But these conditions have been compounded by bank deregulation, by the declining importance of nonprice mechanisms for allocating scarce credit, and by the costs associated with the many new high-yield financial instruments available to households. The high rates charged by retailers for revolving credit reflect similar circumstances—the emergence of a new financial environment characterized by fears of renewed inflation, and the greater risks of consumer lending.

Recent surveys suggest that consumers perceive credit conditions as improved compared to last year, and only a small fraction report that they are postponing purchases because of high interest rates. Apparently, mortgage and auto rates are the most significant to the public, and declines in nominal rates are more important than the level of real rates. Further, consumers seem to adjust to varying credit conditions and evaluate them in terms of other economic factors, principally trends in income and employment.

Since concern over the federal deficit in the years ahead is a major factor keeping interest rates high, measures to reduce the size of these deficits are essential to assuring a sustained economic recovery. Reducing the deficits, which are most worrisome once recovery is well underway, will require both spending cuts and tax increases. These steps, however, should prevent any further shift in the distribution of after-tax income to upper-income groups who tend to save large fractions of income. What is needed now is stronger final demand in order to sustain recovery, stimulate business investment, and so promote productivity and economic growth in the years ahead.

RECENT ECONOMIC TRENDS

One after another, indicators released during the past several weeks confirm that an economic recovery is well underway. Initially, the stimulus came primarily from less liquidation of inventories after record cutbacks last year, a rebound in housing, and small increases in consumer spending; more recently, industrial production has risen and there have been further gains in consumer spending. Despite the welcome news, however, growth thus far has been slow and is likely to continue at a modest pace compared to previous recovery periods. The principal factor dampening this recovery is persistently high real interest rates which will have lingering effects on sensitive sectors including business investment, foreign trade, state and local government expenditures, housing, and consumer spending. Even this modest outlook, however, assumes that interest rates ease slightly during the year ahead. On the other hand, a sharp rebound in rates—a development which would most likely stem from a retightening of monetary policy and/or pressures on credit

markets from expected or actual increases in the federal deficit—would choke off recovery in the U.S. and most likely curtail growth internationally.

Since most other components of final demand are likely to remain weak during most of this year, a sustained recovery is dependent on growth in consumer spending. Consumer demand has, in fact, improved in recent months after considerable sluggishness early in the year (see Figure 1). And, after a considerable period of caution on the part of both households and lending institutions, consumer credit demand is rising, reflecting increasing purchases of autos and other durable goods (see Figure 2). In addition, there are good grounds for expecting a further expansion in consumer spending, especially in the second half of the year:

Tax refunds in the current quarter, the mid-year cuts in personal tax rates, modest job growth, and moderate inflation will boost real income growth significantly in the period ahead.

Consumer confidence has risen considerably, reflecting public perceptions that economic conditions are continuing to improve.

Installment debt remains modest, with the debt-to-income ratio now down to levels prevailing in the mid-1970s.

The stock and bond market rallies have significantly increased the value of financial assets, at least for middle- to upper-income households (see Figure 3). This increase will stimulate some additional spending and, just as important, lessen the likelihood of a jump in the personal saving rate.

A sustained increase in prevailing interest rates, however, would significantly weaken even the modest expansion in demand now expected, both by reducing credit purchases and by increasing the attractiveness of personal saving.

INTEREST RATES AND CONSUMER SPENDING

Although continuing growth in consumer spending is most closely related to gains in real income, especially wages and salaries, interest rates remain an important factor. On balance, a slight downward trend in interest rates is likely to permit a moderate rise in expenditures, although—as will be discussed in more detail below—there is a significant possibility that these levels are high enough to drive up the personal saving rate once income growth strengthens. Apart from their effects through another downward spiral of output, employment, and income, a new surge in interest rates would have serious adverse effects on consumer demand, especially in such key sectors as autos, housing, and household-related durable goods. Further, a likely rise in saving and a drop once again in the value of financial assets would aggravate the effects on demand.

Recent surveys provide evidence of several interesting relationships between interest rate trends and consumer attitudes. Despite the fact that interest rates remain high in both real and nominal terms compared to historical averages, large numbers of consumers mention the availability of lower rates as a reason for greater optimism. This reaction suggests that: (1) Changes in nominal rates are more important than real rates to spending decisions; (2) Consumers adjust to new rate levels and evaluate them in the context of such other factors as jobs and income; (3) Mortgage and auto loan rates must be most significant to consumers since these are the only types of consumer credit for which rates have fallen significantly since last year. It may be also be the case that, given the volatility of interest rates generally in recent years, consumers do not expect further declines and, in fact, may fear that rates will rise once again. In any event, fewer and fewer consumers are now reporting that they are postponing credit purchases because of high interest rates.

A RISE AHEAD IN THE PERSONAL SAVING RATE?

The personal saving rate, which averaged a fairly low 5.9 percent in the first quarter, has declined steadily since mid-1982 when the second phase of the personal income tax reductions became effective (see Figure 4). It was this drop in personal saving, together with the willingness on the part of some consumers to draw upon accumulated assets, which helped finance the growth in spending since last fall, a period of extremely weak growth in real disposable income. This fall in the saving rate when income growth is poor is to be expected. Consumers tend to adjust spending to long-term expectations of income growth and resist the reduction in living standards implied by a period of slower income growth, presumably temporary. As income returns to its trend rate of growth during recovery, the saving rate can be expected to return to some higher, more "normal," level. For a variety of reasons, the increase in the saving rate in the period ahead could be especially large:

Many new incentives for private saving were introduced by the Economic Recovery Tax Act of 1981. Lower marginal tax rates increase the after-tax return to saving and the after-tax cost of borrowing. The Individual Retirement Account (IRA) provisions of the tax law were extended to the entire working population. In addition, the top marginal tax rate on capital gains was reduced.

High real rates of interest, together with the removal of interest-rate ceilings on deposits and the introduction of many new high-yield financial instruments, have broadened saving opportunities for an increased number of households.

According to most studies, the tax law changes have shifted the distribution of after-tax income to upper-income households, who tend to save at high rates.

Many of these changes, of course, were intended explicitly to boost savings, increase the supply of loanable funds, and so stimulate investment, productivity, and economic growth. However, since they are coming into effect in a period of extreme economic slack, it is important to note that their success in increasing saving also dampens consumer spending. To the extent that growth in final demand is depressed, higher savings will have the perverse effect of discouraging fixed investment and weakening future growth in productivity and output.

A modest recovery this year will generate growth in real disposable income at a 4 percent annual rate during the remainder of the year, or 2.5 percent for 1983 as a whole. These income gains, together with the assumption that the personal saving rate will rise only moderately in the months ahead—to about 6.4 percent of disposable income in mid-year and slightly lower by the end of the year—implies that real consumption will increase at about a 3 percent annual rate in the current quarter and about 4 percent in the second half. The result would be a 3 percent increase in real expenditures this year and about 4 percent in 1984 and 1985. A sharper and sustained increase in the personal saving rate—toward 7 percent or higher—would result in significantly less growth in consumer demand and a significantly weaker recovery. This development, a major forecast risk even with the assumption that interest rates ease both nominally and in real terms in the period ahead, becomes a more significant possibility should interest rates rise.

WHY ARE CONSUMER FINANCE RATES STILL HIGH?

Most consumer lending, including auto and personal loans, is treated as long-term credit and follows a similar pattern, although consumer credit rates are somewhat higher because of greater risks and higher processing costs. To the extent that uncertainty over public policy and fears of rebounding rates and renewed inflation are keeping real long-term rates high, they are affecting consumer interest rates in much the same way. Thus mortgage rates have fallen about four percentage points since the peaks reached in 1981, while rates on new car loans have fallen about five percentage points during the same period. These declines are similar to the pattern in other credit markets: Long-term corporate bond rates and utility bond rates have also fallen about five percentage points, while three-year Treasury bonds have declined about six percentage points.

The situation is quite different with respect to other types of consumer lending, where rates have remained in the 16 percent to 18 percent range and even higher. For many commercial banks and savings and loan institutions, the upward pressure on consumer credit rates appears to stem in large part from deregulation and the emergence of high-yield private deposit instruments. These new deposits can be drawn down quickly and are especially vulnerable to the rebounding interest rates associated with volatile credit conditions. The higher costs and risks associated with these deposits, it is argued, require higher charges for consumer credit. The tendency in recent years for the states to remove or raise interest rate ceilings on consumer credit adds to the pressure. In earlier years, very little credit would have been available to households during periods of tight money and credit. Under deregulation, credit, including household credit, is allocated through the price mechanism of higher interest rates. The revolving credit rates charged by retailers have also remained high, apparently reflecting an adjustment to a new financial environment and high inflation. For many years, these rates were determined largely by marketing considerations and remained fairly stable despite changes in prevailing rates or in price trends. That era appears to have ended. Now not only do credit operations seem to be handled separately, but retailers argue that they must cover the processing costs of revolving credit associated with these customers who do pay within the normal thirty-day period.

POLICY RECOMMENDATIONS

Even with an economic recovery, the federal deficit will continue to rise in the years ahead and will remain extremely high relative to GNP, total credit available, and net savings. This trend reflects the fact that the combination of tax cuts and increases in military spending, most of which have yet to come, will far offset cuts in nondefense spending, much of which has already occurred. These rising deficits, particularly during a period of recovery and rising credit demand, may keep interest rates too high to permit satisfactory economic growth or may even precipitate another recession. This pressure on rates from rising deficits will stem from either the direct effect of greater Treasury borrowing, assuming the Fed does

not fully accommodate this borrowing, or from accelerated inflation, if it is financed by continuing rapid growth in the money supply. There is some evidence to suggest that anticipation of either of these developments is already serving to keep long-term interest rates higher than they might otherwise be in view of depressed economic conditions and the Fed's apparent shift to a less restrictive monetary stance.

The Administration's recent budget proposals recognize the problems posed by the impending deficits and offer various proposals designed to narrow the gap. It may be necessary, however, to adopt additional measures to reduce the size of projected deficits once economic recovery is well established. These steps would include cuts in both defense and nondefense spending and tax increases, either in the form of scaling back currently scheduled tax cuts or enacting new tax measures. While is it desirable to retain the stimulus from a modest increase in the deficit while the recovery is in its early stages and key sectors remain extremely depressed, soaring deficits during a period of growth and rising credit demand are not necessarily more stimulative and may, in fact, prove self-defeating if they drive up interest rates or create inflationary pressures.

Measures taken to reduce fiscal imbalances in the years ahead should take into consideration the distributional effects. In practice, this means avoiding additional increases in Social Security or excise taxes, which tend to be regressive, in favor of adjustments in personal income taxes at the upper end of the income distribution. Apart from issues of equity, this approach would lessen the trend toward redistributing after-tax income to groups with a high propensity to save at a time when stimulating demand and economic growth would seem to be the paramount goals of public policy. Many other savings incentives would remain and, in any event, weak final demand rather than the lack of available credit seems to be the major obstacle now to stronger business investment. This approach also implies that further cuts in social programs aimed at lower-income groups should be modest until the economy is stronger; thus, the focus of spending cuts should be in defense and in entitlement programs.

In sum, growth in consumer spending is expected to help sustain a modest economic recovery in the period ahead. Nevertheless, high interest rates cloud the prospects for recovery and a sustained increase in rates would likely bring economic growth to a halt. Avoiding the threat of a rebound in rates requires a shift in the policy mix toward a more restrictive fiscal policy and a somewhat more accommodative monetary policy. These measures should be aimed at stimulating final demand in order to encourage business investment and thus promote sustained economic growth.

TABLE 1—FORECAST SUMMARY MAJOR ECONOMIC INDICATORS

[Percent change]

	1980	1981	1982	1983	1984
Gross national product	8.9	11.6	4.1	7.4	10.1
GNP in 1972 dollars	−0.4	1.9	−1.7	2.6	4.5
Total consumption, 1972 dollars	0.3	1.8	1.0	3.0	4.2
Fixed nonresidential investment, 1972 dollars	−2.3	3.5	−3.6	−4.8	0.7

Prime commercial bank rate	15.3	18.9	14.9	10.2	9.4

TABLE 2.—MAJOR FORECAST ASSUMPTIONS

Forecast assumptions

Taxes. The personal tax cut scheduled for July 1983 will be capped at between $500 to $700 per taxpayer.

Government Spending. Federal expenditures (NIPA basis) will equal $817 billion and $874 billion in fiscal years 1983 and 1984. These estimates include reductions in entitlement programs, other nondefense expenditures, and the military buildup, totaling about $7 billion in 1983 and $25 billion in 1984, including the recently enacted Social Security benefits.

Money Supply Growth (M1) will average 9.8 and 6.8 percent during the next two years.

Interest Rates will trend slightly downward during the remainder of the forecast period. The rate on 90-day Treasury bills will average 7.7 percent and 7.1 percent in 1983 and 1984, respectively.

Oil Prices will fall by 10.4 percent in 1983 and another 0.4 percent in 1984.

Food Prices will rise by 3.1 percent in 1983 and 5.1 percent in 1984.

International Economic Activity will improve moderately during the forecast period in response to increased stimulative measures and stronger exports. The dollar will decline slowly relative to most currencies.

Forecast risks

Negative

Economic Stagnation until late 1983, caused by weak consumer spending, additional corporate cost-cutting actions, and financial failures.

A Rebound in Interest Rates During Mid-1983 caused by Fed tightening, a more rapid acceleration in inflation, or rising Treasury borrowing.

A Faster Rise in Inflation in 1984 and 1985 caused by a sharper rebound in oil and other commodity prices and/or an acceleration in wage demands.

Positive

A Sharper Decline in Inflation and Interest Rates, reflecting increased monetary accommodation by the Federal Reserve Board.

More Rapid Inventory Rebuilding, reflecting relatively low stocks in many industries.

More Rapid Investment Spending, reflecting the increased tax incentive for investment and the overstatement of capacity due to economic obsolescence.●

● Mr. FORD of Michigan. Mr. Chairman, I firmly believe the third installment of the tax cut to take effect on July 1 should be limited so that no taxpayer receives more than $700. Therefore, I will be voting for H.R. 1183. Under this proposal everyone will get a tax cut on July 1. The issue is how much of a tax cut.

Capping the third-year tax cut at $720 is fair, reasonable, and makes good economic sense. The $720 cap will have little or no adverse impact on middle or lower income groups. Its only effect will be on those upper-income groups with incomes over $45,000 per year. If Congress passes this legislation, we will save about $6 billion over the next year and a total of $20 billion over 3 years. This savings will come from the wealthiest 5 percent of our society.

The residents of the 15th Congressional District know and understand that the effect of a cap would be negligible or nonexistent if their incomes are below $45,000. It is clear to them that those individuals affected do not need any additional relief since most of them pay very little in taxes, and in some cases, none at all. On the other hand, by granting the tax cut to middle- and low-income Americans, we will help the ailing economy while still providing the necessary social programs to the needy.

Mr. Chairman, we cannot rely upon nor accept further massive cuts in Federal spending to correct deficit problems. There is no question that there is a need to cut back on the incredible expansion of military expenditures and the budget resolutions in both Houses recognize that. But the Reagan administration is determined to further destroy the social programs and to make uncontrolled Federal spending the scapegoat. At this time let me reiterate my support for a reduction in the tax giveaway scheduled for July 1, and my support for H.R. 1182.●

● Mr. FIELDS. Mr. Chairman, I rise in strong opposition to the passage of H.R. 1183, the so-called tax rate equity act of 1983.

While everyone in this chamber recognizes that this legislation will never beome law, it is regrettable that we are even engaged in this political charade.

At a time, when we should be encouraging the growth of our economy, H.R. 1183 offers the American people a bitter, heavy dose of a bad medicine that will undermine our economic recovery.

While we have heard a great deal of rhetoric during this debate on the need to "soak the rich" by increasing taxes on wealthy Americans, I would remind my colleagues that this legislation will have little or no effect on Americans earning more than $50,000 a year who are already in the top 50-percent tax bracket.

Instead, this bill will, Mr. Chairman, significantly increase taxes on middle-class Americans and small businesses which are the economic backbone of our country.

By way of example, I would like to illustrate for my colleagues how this $700 cap will unfairly penalize millions of Americans.

Example 1. A married couple consisting of a Channelview police officer who earns $23,260 and a registered

nurse earning $20,960 would have received a tax reduction in 1984 of $917 if they did not itemize their deductions. Instead, the cap would result in a loss of $197 that they would otherwise spend on consumption or save.

Example 2. A secretary earning $13,950 married to a chemical engineer earning $36,120 would jointly have a 1984 tax reduction of $1,179 if the couple did not itemize deductions. The cap would cut this reduction back by $459. If the couple did itemize an average amount of deductions on their tax return then the cutback in their scheduled tax reductions would amount to a tax hike of $134 compared with present law.

Example 3. Two Baytown public schoolteachers, each earning $20,670, would have $83 lopped off their tax reduction.

Example 4. A single person who earns $32,500 as a sales manager or as a Federal Government worker and who does not itemize deductions would have his 1984 tax cut pared back by $108.

Mr. Chairman, from these examples, it is obvious that we are not talking about taxing wealthy individuals but hard-working, taxpaying, middle-class Americans who deserve to keep their full 10 percent tax cut which this body overwhelmingly approved in August 1981.

In addition, it is important to remember that only 14 percent of all small businesses in this Nation pay corporate income tax. The remaining 86 percent that are partnerships, sole proprietorships, or small corporations electing to be taxed as individuals pay only the individual income tax. Overall, nearly 2½ million small businesses, including 350,000 family farms, would have their taxes significantly increased by the $700 cap.

Once again, at a time, when we should be encouraging economic growth, it troubles me that this Congress would even consider this major impediment to that growth.

While corporate America may get the news headlines, small business comprises 97 percent of our Nation's business enterprises. It is responsible for half of our gross national product. It is the undisputed leader in job creation and technological innovation. Directly or indirectly, small business affects the lives and livelihood of more than 100 million Americans.

In my judgment, our Nation's small businesses are leading us down the road to economic prosperity and now is not the time to cripple this vital sector of our economy by capping their desperately needed tax reductions.

Finally, we have heard repeatedly that we need new revenues to balance our Federal budget. While I could not agree more on the need to eliminate Federal deficits and to restore fiscal sanity to our Government, the problem is not one of undertaxation but of overspending.

There seems to be no end to the glutinous appetite of the Federal Government nor the willingness of this body to consistently feed that hunger.

I would point out the Federal spending is now 25 percent of our gross national product, as compared to an average of 21 percent of the GNP in the 1970's. While taxes are now 19 percent of the GNP, as compared with approximately the same level they were in the 1970's.

Mr. Chairman, if I thought for a second that the $6 billion to be raised under this bill would be used to reduce our national debt, then I believe I would give serious consideration to supporting this proposal. Unfortunately, each of us knows, that not one dime of this money would be used to reduce the debt but would be spent on new or existing Federal programs.

Mr. Chairman, I, therefore, urge my colleagues to join with me in soundly defeating H.R. 1183.●

● Mr. COYNE. Mr. Chairman, the administration would have us believe that limiting the third year of the tax cut would somehow hurt working people.

The measure now before us, the Tax Rate Equity Act, would raise 89 percent of its revenue from people with incomes of $50,000 or more.

Let us consider for a moment how this would break down in my own district, the 14th District of Pennsylvania. This district includes the city of Pittsburgh, a city of working people if ever there was one.

According to the 1980 census, about 3 percent of the households in the 14th District have incomes over $50,000. Of the 26,840 black families in the district, only 349, or 1.3 percent, have incomes over that amount.

The overwhelming number of people in the 14th Congressional District would be able to keep their tax break if we adopt H.R. 1183. Repealing it for people in the upper income brackets is necessary because of a harsh fiscal reality. We have a Federal deficit, brought about by this administration's economic policies, which exceeds $200 billion. We simply cannot afford to finance that tax break by adding to the deficit.

If the administration is interested in directing its heretofore latent concern for working people in a more useful area, I would suggest that it act on unemployment. In the Pittsburgh area, the unemployment rate is 16 percent. According to the State Department of Labor, 55,000 Pennsylvanians will exhaust their unemployment benefits in the next month. This is roughly triple the current monthly average. Thousands of Pennsylvanians will soon be in the position of having no job and no unemployment benefits. I do not believe that continuing a tax break for people in the upper-income brackets is high on the agenda of those without work or without benefits. Nor should preserving this tax break for the affluent be on our agenda during a period of crisis for the unemployed.

I urge a "Yes" vote on H.R. 1183. Passage of this measure will be an important step toward lowering the deficit, and, I hope, the beginning of a process to aid the unemployed.●

● Mr. IRELAND. Mr. Chairman, I do not wish to take issue with those that say a family earning over $50,000 is wealthy. That is a matter of personal interpretation. However, I do wish to point out that it is not only individuals and families that pay at the tax rate that some wish to adjust, but also 85 percent of the small businesses in this country. What they are proposing would penalize that segment of the private sector that employs more than half of this Nation's work force. Small businesses are the most labor-intensive element in this Nation's commerce and industry and the source of an estimated 70 percent of new jobs that are created.

Let us look at it this way, Mr. Chairman, the benefits derived from the tax cut that was promised 2 years ago will allow small businesses to put more money back into the economy through investment, capital formation, and perhaps most importantly, through jobs.

This is a far better way to sustain our budding economic recovery than to further tax the pocketbook and initiative of our people, turn the proceeds over to the inefficient Government bureaucracy, and hope that centrally planned programs and targeted grants will somehow save the day.

History and statistics prove that small business can perform this essential economic task and that central Government cannot. This ill-advised attempt to limit a tax cut that small businesses have been planning on for 2 years could well affect their ability to expand—and hire.

I hope my colleagues will remember that this tax cut is not putting dollars in the pocket of a rich man, but in the paycheck of a working man. Small business is the lifeblood of this country—and they certainly do not need this kind of a tourniquet.●

● Mr. SENSENBRENNER. Mr. Chairman, today we are being asked to vote on a proposal which threatens the economic recovery which is now underway.

Capping the third-year tax cut is clearly bad economic policy. Timing, always a paramount consideration in decisionmaking, has obviously been ignored by the Democratic leadership, who is responsible for advancing this legislation. The most recent economic indicators are encouraging, with both

incomes and spending on the rise. To sustain this economic growth, we must contend with the burgeoning deficits, but few economists will advise that taking money out of the economy is a viable approach. Tax increases are incompatible with our ultimate objective of strengthening the economy. Those of us familiar with the workings of Washington must acknowledge that increasing taxes merely translates into more wasteful spending.

President Reagan's decisive victory on ERTA was indicative of the plan's attractiveness to all taxpayers. Unfortunately, social security tax increases, TEFRA, bracket creep, and increased gasoline taxes have literally negated the 15-percent tax cut taxpayers have received to date under ERTA. To minimize the gain from the final tax cut will, therefore, not only stifle the economy, but will essentially make ERTA meaningless for the vast majority of middle-income taxpayers. Without the relief of a full 10-percent tax cut, there will be no incentive for individuals to save and invest. It is these two transactions that enhance economic growth. The resulting economic activity will produce the tax revenues needed to reduce the budget deficit.●

● Mr. DASCHLE. Mr. Chairman, only 4 months ago, when we were on this same floor debating the first budget resolution, we heard a lot of scare stories, designed to wave the partisan political flag and mislead the public about what was happening. Among other things, we heard that the passage of that resolution would result in the repeal of estate tax schedules, repeal of indexing, and complete repeal of the third year of the tax cut, the first year in which low- and middle-income wage earners would finally begin to get at least a little bit of the tax relief that the administration's program had shoveled out to the rich.

Well, here we are, a few months later. At the time of that first debate, on March 23, I said the following:

> Please do not be misled by the speculation that the passage of this resolution will mandate either the repeal of the third year of the tax cut, or the repeal of indexing. This resolution makes it very clear that it is in the province of the Ways and Means Committee to determine where this revenue comes from—and we will have a chance for a separate vote on any proposal they produce.

Today, despite the earlier misleading tactics of the opponents of fiscal responsibility, we do, indeed, have an opportunity to vote on a proposal from the Ways and Means Committee. And, again, despite the cries of "wolf" from those who would rather divide by controversy than unite in the common good, we are not discussing the repeal of the revised estate tax schedule, a revision I have long supported. Nor are we discussing the repeal of indexing which, in my opinion, is the one element of the terribly misnamed "Economic Recovery Act" which does, in fact, give a break to the low- and middle-income wage earner. We are not even discussing a total and outright repeal of the third year of the tax cut which, as I said before, finally lets wage earners making below $50,000 a year get some tax relief. Not one of those scare stories, widely circulated in national and local media by the opponents of sensible budgetary practices, has come true.

That is not to say, of course, that all of the above items were not, at one time or the other, topics of discussion among Members of the House and even Ways and Means Committee members. When you are facing annual budget deficits of $200 billion a year for as far as the eye can see, an administration that will not relent on its wish list philosophy of weapons procurement, and a recession-battered economy that has caused record business failures, double-digit unemployment, and persistently high true interest rates, there is a natural desire to at least consider any and every possibility of stopping the deficit hemorrhage that threatens any future economic recovery. It is a tribute, I think, that reason and moderation prevailed in these discussions. Frankly, had the bill before us called for the repeal of estate tax schedule revisions, tax indexing, or a complete repeal of the third year of the tax cut, I could not have supported it. These are matters of equity and fairness that belong in our tax structure, and I will oppose any attempts to remove them.

Instead, what we have before us today is a reasoned, sensible approach to the economic problems that presently face us. It is not, in and of itself, a panacea. Passage of this bill will not, unfortunately, bring the Federal budget into balance. That is a fight that we will have to wage with different weapons, including a balanced budget constitutional amendment which badly needs passing. What this bill does do is to put us on the road to reestablishing fairness and equity in the Tax Code, while at the same time beginning the arduous process of chipping away at the record deficits that the present administration, ignoring its campaign promises, has brought us.

More specifically, H.R. 1183 reduces the budget deficit in fiscal 1984 by $6.2 billion, and, over the following 5 years, further reduces the deficit by $37.9 billion, for a total of $44.1 billion. I am further encouraged by the preliminary language of the bill, which makes it clear that these revenues are to be used for deficit reduction, and not for new spending programs. It is my full intention to see that the spirit of that language is carried out in specific pieces of legislation.

These deficit reductions are made through capping the third year of the tax cut at $720. Essentially, this leaves totally untouched 90 percent of all tax forms filed every year. In other words, 9 out of 10 taxpayers will not be affected at all by this legislation. Those who are affected will not have their complete tax break under the third year done away with. It will simply be capped at $720, over and above the tax reductions they have already received in the first 2 years of the administration program. And let us not delude ourselves. Those people fortunate to make over $50,000 per year in taxable income have done very, very well under the first 2 years of the tax cut. If the third year is not capped, they will do even better. For example, the income group earning over $200,000 per year will have had their taxes reduced by a full 15 percent through 1984. Those earning between $100,000 and $200,000 per year will see a reduction of a full 8 percent. On the other hand, those taxpayers who make less than $10,000 per year, after inflation and other administration sponsored tax increases are taken into account, will have had their tax burdens increased by 22 percent, and those taxpayers making between $10,000 and $15,000 will have seen tax increases of 7 percent. People between $20,000 and $50,000 are, essentially, simply breaking even.

The benefits of the supposed across-the-board tax cuts have, we can see from these figures, gone primarily to those at the upper end of the income scale. H.R. 1183 attempts to install some sense of equity to the current tax structure, not by adding new taxes, but by limiting new tax decreases to those who have benefited most from prior ones. By so doing, it also points out to the financial community that the Congress is indeed serious about making reductions in the Federal deficit which, if left unchecked, will continue to foster high interest rates and seriously damage the possibility of a strong and sustained economic recovery.

For these reasons—a simple matter of equity, the need for deficit-reducing revenues, and as a signal to the financial community—H.R. 1183 should be passed. And in case some of my colleagues on the other side of the aisle who have voted consistently, as I have done, against increases in our own pay, need another reason to vote for this bill, I would offer for their consideration this point. If you vote against this bill, you are voting for a tax break for yourself, contributing to the Federal deficit, and penalizing low- and middle-income taxpayers across the country. "Tax and spend" has rightly been discredited as a way of operating the Federal Government. However, we appear to have replaced it with an even more ludicrous concept, that of "borrow and spend." H.R. 1183 gives us a chance to back away from this

disastrous borrow and spend philosophy, which mortgages our grandchildren's future for the sake of raids on the Treasury to line the pockets of the wealthy.

I urge my colleagues to vote for H.R. 1183.●

● Mr. DENNY SMITH. Mr. Chairman, one cannot help but be optimistic about the economic signs. The index of leading economic indicators continues to show consecutive monthly increases, factory orders are up, and more people are finding jobs. All signs point to a strong economic recovery.

It is this backdrop of good economic signs that makes today's debate on whether to make these permanent rate changes so insane. Eight days before the tax rate cut is to take effect, we are talking about changing everything. We need that tax rate cut now, more than we ever did, to insure that economic recovery is stronger and longer lasting.

Supporters set the stage for this vote by talking about the fairness issue. But who are the rich that supporters of this bill talk about? They are not the rich; they belong to the middle class. Many of those affected by this cap make less than $50,000 a year.

The U.S. Department of the Treasury estimates 2½ million small businessmen are affected by these rate changes, including 350,000 small farms. Working married couples are especially hard hit. Just 2 years ago we were asked to eliminate the marriage tax penalty. Inflation had forced many spouses to find jobs outside the home to supplement family incomes. Unfortunately, they found the Federal Government penalized them with higher taxes for wanting to stay ahead of inflation. This legislation would eliminate the gains we made in eliminating this unfair tax burden on married couples.

Remember the debate over the congressional pay raise last year? Many in this body argued they could not make ends meet on $60,662 a year. With kids in college and house payments to make, they needed a raise. Now some of the same Members are talking about capping the tax rate cut for people who earn much less than what a Member of Congress makes. After the debate on the pay raise, how can any Member of this body say the people who will be affected by the rate changes are rich?

Supporters of these tax rate changes have a point when they talk about fairness, but it has nothing to do with rich versus poor; it has to do with how unfair this proposal is to the American taxpayer. Congress listens to every special interest group wanting more money. Who here listens to the average taxpayer who does not want more of his salary going to the profligate Federal Treasury?

This legislation is really unfair to the small businessman. He has already made many of his business decisions and forecasts based on the expectation of the tax rate cut. His payroll schedule is already in place to give his employees the tax rate cut Congress promised them. Now some in this body want to confuse matters. It will take the Internal Revenue Service 8 weeks or more to distribute new withholding schedules if this legislation passes, and even longer for employers to incorporate the changes into their accounting systems.

This legislation is also unfair to small farmers, many who are barely hanging on during one of the worst recessions to hit agriculture. This legislation is unfair to working couples, many who are trying to save for a new home or for their children's education. This bill reeks of unfairness; it is nothing more than a political fraud.

A day like today epitomizes why I ran for Congress on a platform of less taxes and less spending. Congress continues to debate budget bills that are too costly and tax bills that take more out of the pockets of hard-working Americans. The taxpayers are sick of the business as usual in Congress.

It is shocking to think the Federal Goverment borrows between 25 and 35 cents out of every dollar it spends. This frightening behavior, caused by excessive Government spending, is eroding what hope we have for our future, our children's future, and even our freedom. We do not need new taxes; we need the courage to spend less. Let us not take it out on the middle class because we have not the guts to make the spending cuts needed.

I urge my colleagues to vote against this bad legislation.●

● Mr. BEDELL. Mr. Chairman, I rise in support of H.R. 1183, the Tax Rate Equity Act of 1983, and urge its passage. This measure, which would limit the July 1 tax rate reduction to $720 per taxpayer, has a dual purpose.

First and foremost, it would inject a modicum of fairness into the administration's excessive 1981 tax cut, which, as we discovered from Mr. Stockman's Atlantic interview, was specifically designed to grant the lion's share of the benefits to the wealthy. This group already has realized very handsome returns from the first 2 years, including the immediate reduction in the maximum marginal tax rate from 70 to 50 percent, liberalized accelerated depreciation allowances, and a reduction in the capital gains rate from 28 to 20 percent, among other benefits. This same group will experience a definite net tax reduction even after taking into account the increases attributed to inflation and social security taxes.

On the other hand, those making under $30,000 will experience a net tax increase taking into account the same factors. It is bad economics and it is bad public policy when the effect of the Reagan rate cuts, after accounting for inflation and social security tax increases, is to provide a net 15-percent rate reduction to those making over $200,000 and a net 22-percent increase to those making less than $10,000.

Mr. Chairman, I must strongly emphasize that H.R. 1183 will not raise taxes. It merely limits the July 1 tax cuts to $720 per couple filing a joint return. The net effect of this action is that approximately 90 percent of the taxpayers will not experience a reduction in their tax cuts while roughly 10 percent will only have their tax cut limited to no more than $720. In other words, those making under $50,000 a year and filing a joint return generally will receive the full scheduled reduction.

The second reason I am supporting H.R. 1183 is that it will aid our efforts to stem the flow of red ink in an equitable manner. With deficits hovering around $200 billion a year, we absolutely must take action to reduce their burden on the economy and improve our prospects for sustained recovery. The cause of these record deficits, as I have maintained since the passage of the President's economic package in 1981, is the irresponsible drain on the Treasury due to the supply-side tax cuts and the massive military buildup. I fail to see how we can cut taxes primarily for wealthy individuals and corporations by $881 billion from fiscal year 1982 through fiscal year 1988 and increase military spending to $1.6 trillion and expect to achieve any sort of budget balance.

H.R. 1183 would reduce the deficit by $6.2 billion in fiscal year 1984. And I am pleased to stress that it contains language expressing the sense of the Congress that the revenue gained as a result should be used to reduce the deficit. Coupled with the reconciliation instructions from the first budget resolution providing for further spending reductions, this tax cap reinforces Congress determination to address the deficit crisis.

Mr. Chairman, the Tax Rate Equity Act, without raising taxes or repealing the third year of the tax cut, will help bring balance and equity to the supply-side distortions and reduce the deficit at the same time, and I urge its passage.●

● Mr. SCHAEFER. Mr. Chairman, over the last year or so, we have begun to see the effects of a modest but healthy shift of economic clout from the Federal Government back to individual citizens through the tax cut package. I have begun to enjoy reading my morning paper again because every day there is more good news about our economy—recovery is under way.

The economic recovery program has essentially eradicated inflation. Just a few years ago under the Carter administration, inflation was running at an annual rate of about 12.4 percent. This meant that unless workers received a pay raise of 12.4 percent, they actually would lose ground in terms of real take home pay adjusted for inflation. For those on a fixed income, such as many of our elderly citizens, this meant incredible hardship. Presently, inflation for the first 5 months of the year is at about 3 percent.

Interest rates have dropped dramatically. The prime rate was 10.5 percent at the beginning of June. In 1980, just before the new administration took office, the prime interest rate was 21.5 percent. We have all seen the kind of damage high interest rates can do to American business, most noticeably the housing and automobile industries. I know many people in the Sixth Congressional District of Colorado who just could not afford to purchase a home, a car or any other product with such a high loan. Lower interest rates are helping to recharge our economy.

Spurred by the drop in interest rates, the housing industry is making a comeback. Housing starts in April were up 64 percent from last year. In the month of May, housing starts were up 19 percent from the previous month. This means more jobs for the unemployed.

The Nation's productivity is increasing. Greater emphasis on American innovation and ingenuity is helping us make the adjustment to a modern high-tech economic base, in which man-hours are being used more efficiently and workers are more productive on the job. This is a very important development, since international competition has come on fast and tough. This will help keep—and perhaps recreate—American jobs in supercompetitive markets like the auto industry.

The list goes on—almost every sign says we are headed in the right direction. We have reduced taxes and provided more incentive in our society for citizens to be productive and creative participants in our free market system—and it is working. Yet, today we are gathered here to discuss ways to return to higher taxes even though this flies in the face of commonsense and all the conclusions we can draw from current economic evidence.

The proposal before us, a $700 cap on this year's tax cut, is very poorly designed.

First, it purports to take money from the rich to give to the poor. But the truly rich, people making over $100,000 per year, are barely touched by the cap. Only 9 percent of the people affected by this cap earn over $110,000. It is the middle- and upper-middle-income taxpayers beneath that amount that bear the brunt of this ill-advised proposal. The rich received their tax reduction when the maximum marginal tax rate was reduced from 70 to 50 percent. The third year of the tax cut would benefit the middle-income taxpayer, and they are the ones who would be hurt by this cap.

Second, this proposal is a cap on the first real tax reduction that middle-income earners will receive. Increased social security taxes, the implementation of the 5-cent Federal gas tax, and bracket creep, combined with State and local tax increases—the burden for which falls chiefly on the middle class—have eliminated real tax reductions for most persons. Middle America continues to pay the bills for the Government. It is wrong and it is unfair and it has got to stop somewhere. I refuse to be part of unfair tax increases on middle-income taxpayers.

Third, the tax cap hits hard at families with incomes under $50,000. For instance, families with incomes as low as $39,250 who do not itemize their taxes would be hit by this cap. Adjusting for inflation, that family would have earned only $15,000 in 1970. Many middle-income individuals would also feel the bite of this proposed cap—an individual earning an income of $12,000 in 1970 would, after adjusting for inflation, be expected to pay additional taxes under this so-called cap on the rich.

Recently, the Secretary of the Treasury, Donald Regan, provided examples for the House Ways and Means Committee of the kind of people who would be forced to pay up under the tax cap. He uses the estimated 1984 average wage for the professions mentioned:

A married couple consisting of a police officer who earns $23,260 and a registered nurse earning $20,960 would have received a tax reduction in 1984 of $917 if they did not itemize their deductions. Instead, the cap would result in a loss of $197.

A secretary earning $13,950 married to a chemical engineer earning $36,120 would jointly have a 1984 tax reduction of $1,179 if the couple did not itemize deductions. The cap would cut this reduction back by $459.

Compare these examples of families with two income earners trying to improve their standard of living to that of a taxpayer with a taxable income of $300,000 per year, who would face only a 2-percent increase in his tax liability.

Fourth, the cap would further distort the middle-income tax brackets, increasing their marginal rates, and discouraging middle-income earners from working harder and attempting to increase their income. Marginal tax rates have been cut by 15 percent, with another 10 percent scheduled for July 2. The intent of these reductions is to provide incentives that will increase productivity and encourage savings. The cap would cause an abnormal jump in marginal rates to occur at the $35,000 to $45,000 range. The marginal rate for married couples would jump from 30 percent at $35,000 to 44 percent at $45,800 and, for singles, the marginal rates would increase from 36 percent at $30,000 to 50 percent at $41,500.

Last, but certainly not least, this cap indirectly slaps the unemployed in the face, because it adds to the tax burden and cripples the potential of the Nation's fastest growing employer, small business. Eighty-six percent of America's small businesses operate as partnerships, sole proprietorships, or are otherwise taxed as individuals. From 1979–81, small businesses with fewer than 500 employees accounted for over 1½ million new jobs, 60 percent of all jobs created in the economy. This tax cap would increase taxes for 2.4 million small businesses, including 350,000 family farms.

Already, this Congress has considered several proposals to help the Nation's farmers, so we are all well aware of their problems. I certainly do not think that a tax hike is among the solutions to these problems.

As a member of the Small Business Committee, I have a special concern for small businesses. Much work has gone into providing incentives and opportunities for the Nation's small businessmen and women, and it has paid off in new jobs and innovative business practices. When we hurt these people, we hurt the whole Nation and especially the unemployed.

This proposal is misguided. Capping this year's tax cut would slow the progress we have made toward providing citizens and small business owners with incentives to take a chance on a new job or venture, to work harder and to achieve more.

While proponents admit that this cap will raise revenue to cover only about 3 percent of the budget deficit, they do not mention the untold damage it could do to the economic recovery that is well underway. We must find ways to reduce the budget deficits, but the answer is to eliminate wasteful and unnecessary spending—not to penalize taxpayers.

The tax program is working. We have returned a small but incentive-producing amount of economic clout to private citizens, and we have relearned the lesson that free enterprise and the efforts of many individuals together—not big government—make this Nation great.

The tax cap is not in the best interest of America and should be defeated.●

● Mr. WOLF. Mr. Chairman, I rise in opposition to H.R. 1183, Tax Rate Equity Act of 1983, which places a cap on the July 1 tax cut. The individual

tax rate reduction of 10 percent scheduled to take effect on July 1 will complete the 3-year, 25-percent, across-the-board income tax rate reduction passed in the Economic Recovery Tax Act of 1981.

I have consistently opposed legislation imposing additional taxes on the incomes of Americans. Having supported the Economic Recovery Tax Act of 1981, I am opposed to efforts now to nullify the most important of the three installments—the third year's 10-percent reduction.

I oppose the effort to cap the tax cut at $720 for three reason:

A tax increase now is poorly timed. Two days ago, the Commerce Department reported that the U.S. economy is expanding at a strong 6.6-percent inflation adjusted annual rate this quarter, the strongest since the first quarter of 1981. The economy is showing signs of a recovery much stronger than earlier predicted. Now is not the time to turn back or change course.

Second, I am opposed to this cap because it will impact on America's middle class. For 3 years, these Americans have waited to enjoy the benefits of a real tax cut—the July 1983, 10-percent rate decrease. Businesses and the more wealthy taxpayers have already received the bulk of their ERTA tax cut in the first 2 years' installments. Middle income taxpayers, however, still have an average of 38 percent of the total balance due them.

Even though the intent of the cap may be to penalize those wage earners above the $50,000 income level, the cap will impact all wage brackets because such a cap is really a tax increase. For example, families with income levels between $20,000 and $30,000 could have their income tax cut reduced by $135. Those with incomes between $30,000 and $40,000 would have a reduction of $111 and those affected with incomes between $40,000 and $50,000 will see their income tax cut reduced by $182. Of particular concern to me is the figure not mentioned here—a single wage earner supporting a spouse and family or the sole wage earner, head of household earning between $40,000 and $50,000 will be losing $357 a year with the $700 tax cap.

Finally, I believe Congress has neither fully recognized nor understood the impact that policies of the past year have had on the small business community. Not only did the Tax Equity and Fiscal Responsibility Act of 1982 take its toll on the small businessperson, but the social security taxes imposed in the March social security reform package will cause additional hardship for the very individuals our economy needs for creating jobs and employment opportunities for the Nation's unemployed. We cannot continue to overlook the small business community in our rush to shore up the budget with revenue increases. Tax increases have not solved the problem of a growing deficit in the past, and I do not believe that such increases are the solution now.

This is not the time to impose additional tax burdens on working Americans and I urge my colleagues to reject this denial of tax relief to the overwhelming majority of our citizens.●

● Mr. LOWERY of California. Mr. Chairman, the House of Representatives is considering H.R. 1183, to cap the third year of the personal income tax cut. I oppose enactment of this legislation, and, according to a recent poll conducted by the National Journal, so do most of our constituents

According to the June 11 National Journal poll, 55 percent of the respondents believe that the third year of the personal income tax cut should go into effect as scheduled. Additionally, while 21 percent of the respondents wanted taxes raised to reduce the budget deficit, over three times that number, 68 percent, would prefer cutting spending to achieve that goal.

Therefore, if the House is to be truly representative, we should vote down this ill-disguised tax increase. Our constituents want to keep the tax cut that they have been promised and that they have been counting on. They want to keep the money that they have worked for—to spend or to save as they, not the Federal Government, see fit. And the message is equally clear with regard to the deficit. Our constituents want us to cut spending, not raise taxes. They want us to balance the budget on the backs of the bureaucrats, not the taxpayers.

Mr. Chairman, the views of our constituents have also been reflected in newspaper editorials across the country. I would like to take this opportunity to commend the attention of my colleagues to a particularly insightful editorial on this issue that appeared recently in my hometown newspaper, the San Diego Union.

[From the San Diego Union, June 13, 1983]

TIP'S TAX CUT CAP

Tip O'Neill has a new way to help along the economic recovery and produce a growing, prosperous America: Raise taxes. Tip wants a cap on the third year of the Reagan tax cut, a cap that will prevent anyone from getting a break of more than $700 when the cut takes effect in July. This, Tip says, will both soak the rich and narrow the federal deficit. And if you believe that, you believe that yellow rain in Afghanistan is being caused by bee droppings.

Actually, the third year of the tax cut is nicely balanced to begin with, as our chart shows. Capping the cut at $700 would begin to affect "wealthy" people at about $36,000 of income, raising the marginal tax rate in that bracket by 25 percent. The cap would hit bigger earners even harder on paper, but as we all know, the wealthy have plenty of alternatives. Snatching at the latest tax cut would simply send them back to the accountants and lawyers and sheltered investments out of which Reaganomics seeks to entice them. That's of negligible concern to the rich, but it's of great concern to the economy, which needs all the savings and productive investment it can get.

Incidentally, "the wealthy" will still be required to fork over half their declared income to the federal government even with the third Reagan cut.

Oddly enough, it has been Ronald Reagan, who expresses little interest in socking it to the rich, who's come up with the best way to sock it to 'em: Cut their taxes. For all the scorn and derision it has attracted, the supply-side thesis—that cutting high tax rates would attract increased revenues—appears to have worked. When the top rate of taxation on personal income dropped to 50 percent from 70 percent in 1982, conventional economists, including Reagan's own experts at the Treasury and the budget office, predicted that tax collections from the wealthy would decline sharply. Actually, rather than paying less, top-rate taxpayers paid $10 billion more in 1982. Their share of total federal income tax revenues rose to 27 percent, from 25 percent in 1981, despite the recession.

It seems that at the lower rate, these people took money out of non-taxable shelters and put more of it to work making profits. The wealthy declared more income; the federal government collected more taxes; the economy generated more capital for jobs and expanded production than would otherwise have been the case. Conversely, raising taxes now would raise the deficit, not shrink it. The best answer to red ink continues to be economic growth, not lower incentives to produce.

The logic of all this has escaped Speaker O'Neill, but it may have reached a few of his colleagues. Reports are that a substantial number of Democrats will vote no if Tip's cut-rate tax rate cut cap makes it to the floor of the House. It seems that even sound economic policy trickles down eventually.●

● Mr. PATTERSON. Mr. Chairman, I rise in support of H.R. 1183, a bill which puts a $700 cap on the tax cut scheduled to go into effect July 1. I am glad that we have a tax cut going into effect on July 1. I know that some Members would prefer that there not be a tax cut this year. But I think we need one. I voted for the tax cut and I still strongly support it.

I also voted for the cap on the tax cut for higher income taxpayers. I believe the cap, allowing taxpayers to receive up to $700 for the third year of the tax cut makes the tax cut workable and fair. The cap protects the full tax cut for nearly all taxpayers in the United States with incomes under $50,000 a year. For people with incomes over $50,000, there is still a tax cut, but it is limited to $700 in the third year, which is smaller than the cut would be without any cap.

What will be the effect of the tax cut with and without the tax cap? First of all, every taxpayer will still receive an additional cut in taxes come July 1. The higher income—those with more than $100,000 income—will simply receive a smaller cut than planned.

First, the proposed cap will have no effect on taxpayers making less than $47,000 per year.

Second, for those making between $50,000 and $100,000, the average annual benefit from the 3 years of tax cuts would be $4,000 without the cap and $2,700 with it.

Third, for those making between $100,000 and $200,000, the average benefit would be $8,500 without the cap and $6,400 with it.

Fourth, for those with incomes above $200,000, the average tax cut would only be reduced from $27,000 to $24,200.

What these figures mean is that 90 percent of all taxpayers would receive the scheduled tax cut in full and only 10 percent, the wealthiest taxpayers, would have their tax cut reduced.

Finally, we must apply the revenues gained under the cap directly to reducing the deficit, as required by the McCurdy amendment—which I voted for and strongly supported. We will actually reduce the Federal deficit by over $6 billion. That ought to bring down interest rates to the benefit of the richest taxpayers as well as all the rest of us.

The action we have taken saves the tax cut. It makes it more fair. It makes it workable. The cap makes the tax cut possible while making a reduction in the deficit possible. Without the cap, I am not sure the tax cut will be saved in the years to come.

I know the people in my district want their tax cut. They also want to see the deficit come down. I share their desires and I am pledged to bring that deficit down. That is why I have supported many spending reductions proposed by Congress and by the administration. But I think we all realize that budget cuts can only go so far in a dangerous world where our military might has to be kept strong and in a compassionate country where the sick and elderly get the help they deserve.

Despite the massive cuts which have already taken place in social programs, the deficit is still growing. The deficit is not tolerable. And to get it to a tolerable level, we are going to have to find it within ourselves in Congress to restrain the tax cuts we want to pass just as we have to restrain ourselves on spending bills. The tax cut cap is the most equitable way to do this. The gas taxes, excise taxes, surcharges, and standby taxes proposed by the administration are less fair ways of raising revenue and I have opposed them all. Instead of nickle and diming the people and sneaking an extra little tax on everything they do, I think it is far better to be straightforward, cap the tax cut openly in a way everyone can see and understand, and bring that deficit down now.●

● Mr. WEISS. Mr. Chairman, two realities compel me to support the $700 cap on the third year of President Reagan's tax cut.

The first reality is the Federal deficit, which under President Reagan's guidance has ballooned at a rate unknown to any previous administration. The deficit left behind by President Carter, the identical deficit then-candidate Reagan held responsible for all of our economic woes, was $57 billion. The deficit at the end of fiscal year 1983 will total $210 billion.

The $700 cap, in a fair and responsible manner, makes sorely needed revenue available to reduce these frightening debts. It accomplishes this not by increasing taxes, but by reducing the scheduled tax cuts of those who can easily do without the extra allowances.

The cap would generate $22 billion over 3 years. The bill we are voting on today contains language advocating that the revenue be used to reduce the deficit instead of funding new programs or new spending.

Until this vote, I believed my Republican colleagues would have applauded such fiscally responsible action. But after all the damning rhetoric, fallaciously blaming today's spiraling deficits on past Democratic policies, the Republicans in this Chamber have mysteriously abandoned their cries for a balanced budget.

Instead they find themselves defending a tax cut that will favor the rich at the expense of every other economic class. This is the second reality I want to address: The gross and insensitive inequity on which the Reagan tax program is founded.

Mr. Reagan truly behaves like an inverted Robin Hood. No manipulation of statistics is required to demonstrate he is taking funds from programs benefiting the poor and middle classes to enrich the already healthy bank accounts of an elite few. Of the billions of dollars drained from Federal revenues by the first year of the tax cut in 1981, 35 percent represented reduced taxes for the 5 percent of Americans who earn the highest incomes. When President Reagan ends his term in 1984, his tax and budget policies will have taken $20 billion away from households with incomes of $10,000 or less and will have added $64 billion to the after-tax income of those making $80,000 per year or more.

Let no one doubt who are the true profiteers of this third year tax cut. Without the $700 cap, a family of four with an income of $200,000 is scheduled to receive $4,366. A family of four earning $25,000 would receive all of $268. In other words, household *A* earns 6 times as much as household *B* but will receive a tax cut 15 times as great.

The $700 cap partially corrects this imbalance by taking $9 of every $10 it generates from the 5 percent most wealthy. Eighty-nine percent of the new revenues would be derived from those earning more than $50,000 per year; no revenue would be derived from those earning under $35,000.

This, of course, is contrary to the factual distortions that have permitted the President and my Republican colleagues here today to argue the $700 cap constitutes a tax increase that would hurt the middle class. But I will leave it to the opposition to explain its perverted logic. The truth is quite different.

The $700 cap would still provide every taxpayer a tax cut. The wealthy citizens of the United States—those who need never worry about the prospect of unemployment, who need never wonder how they will afford 4 years' college tuition, who need never squeeze their paycheck to meet a monthly home mortgage payment—would still receive a $700 decrease in taxes. This is in addition to the substantial reductions they received during President Reagan's first 2 years of tax cutting. Even those whose incomes place them just above the threshold would be mildly affected. For example, a family of four earning $50,000 would receive only $128 less than the $828 cut they are presently scheduled to receive.

Mr. Chairman, a burgeoning deficit and an unfair tax structure are of concern to a great many Americans. Embodied in the $700 tax cap proposal is a responsible effort by the Congress to grapple with those realities. I urge adoption of the cap.●

□ 1730

Mr. ROSTENKOWSKI. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

□ 1740

The CHAIRMAN. 390 Members have answered to their names, a quorum is present, and the Committee will resume its business.

The gentleman from Illinois (Mr. ROSTENKOWSKI) has 7 minutes of time remaining, and the gentleman from New York (Mr. CONABLE) has 5 minutes of time remaining.

Mr. CONABLE. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Michigan (Mr. VANDER JAGT).

□ 1750

Mr. VANDER JAGT. Mr. Chairman, I would like to commend and thank the distinguished Speaker of the House of Representatives for bringing to the floor of the House this legislation which has so completely united the minority this afternoon. When the voters realize what indeed is in it, that it will provide a big majority of middle income taxpaying Americans with tax increases, they will react with righteous indignation against the unfairness, the inequity, the injustice that reeks from every page of this misdirected, misguided, and mislabeled permanent tax increase on the backs of the American people.

If we had a truth-in-packaging parliamentary rule this bill would be ruled out of order. The bill claims to put a one-time cap on the third year of the tax cut. It does not. It is a permanent tax increase. The bill claims to hit at the very rich. It does not. It hits at the middle income working couples all across this land. The bill aims at those earning over $50,000 a year; it does not hit them. Millions of those who are affected earn far less than that.

And even if the bill were as advertised, it would be the worst possible economic medicine at the worst possible time.

These are precisely the dollars that we need for the investment and the savings and the big ticket consumer purchases to fuel an expanding economy, to provide growth and jobs.

We have a terrific jobs program going in America today, one of the best we have ever had; it added 376,000 additional jobs to the workforce just last month. That jobs program is called economic recovery. And now is no time to snuff out the blooming of that economic recovery.

But some are so enamored by the political attractiveness of the proposal that they are blinded to its economic consequences. And I suppose there is a political attractiveness if the people stop at the headlines and do not really realize what indeed is in the bill because the bill can be paraded as "There goes President Reagan and those Republicans trying to defend the very rich, while we Democrats are sallying forth to sock it to the very rich."

There is one thing wrong with that. There is one thing very wrong with that. The heart of the bill misses the very rich all together.

For anybody who has read the bill, there is no $700 cap, no $700 limitation written in here. The drafters of the legislation tried to achieve that result by raising the tax rates. There is one problem: The very rich are already in the top bracket of 50 percent; you cannot push them any higher than they already are and this bill does not do it. They might as well walk off scot free.

Now, I think the proponents were sincere when they aimed at those earning over $50,000, but 48 percent of those they actually hit were earning under $50,000. That is how bad the aim actually is.

That family that is earning $35,200 has their marginal tax rate increased by 30 percent, the highest jump in the entire Internal Revenue Code.

Now, I believe that a family with a husband earning $18,000, a spouse who goes out to earn an additional $17,200, in order to pay college tuition and make mortgage payments, is not going to take too kindly to a Congressman who with his vote this afternoon goes to that family and says, "Sorry, you are too rich, you do not deserve to keep the desperately needed tax relief and we are going to snatch it away from you 8 days before it is scheduled to go into effect."

I do not think that family is going to think that it is fair when a Congressman with his vote this afternoon says to that family, "Sorry, you are too rich, but any extra dollars that you earn, your tax rate goes up 30 percent, but for any extra dollars earned by the family earning over $162,000 a year, we do not raise the rate at all."

That is not equity, that is not justice.

If you really believe in fairness and equity this bill cries out for a loud "No" vote.

This legislation is a blueprint not only for economic disaster; this legislation is a blueprint for the political disaster that would be so richly deserved by those who would foist an unfair, permanent tax increase on people who cannot afford to pay it at exactly the wrong time.

Mr. ROSTENKOWSKI. Mr. Chairman, I yield such time as he may consume or the balance of the time to the

majority leader, the gentleman from Texas (Mr. WRIGHT).

Mr. WRIGHT. Mr. Chairman, there are two very good reasons why this bill ought to be passed today. The first is that it reduced the deficit by $6.8 billion in the coming today. The second is that it restores a semblance of fairness to the tortured Tax Code through which revenues have been drained by the Reagan tax policies as through a leaky sieve into the pockets of the favored few of this country.

Mr. Reagan preaches piously about deficits; but the fact of the matter is that his tax cuts for the wealthy, the biggest in history, have created the biggest deficits in history. The President's own budget office estimates that his 1981 tax cut, most of it for the most affluent, will cost the government $609 billion by 1986. In other words, it will add $609 billion to the deficits.

According to Secretary Regan in testimony given before our Budget Committee, that tax cut of 1981 will drain $135 billion away from the Treasury this fiscal year and add $135 billion to the deficit that now reaches $210 billion this fiscal year. It is the Reagan deficit.

The Joint Committee on Taxation reports that 35 percent of this enormous loss will flow directly into the pockets of the wealthiest 5 percent of America's citizens, those who need the tax cut the least.

This bill would not recover one penny of the windfall that has already gone to the fortunate few. It simply places a reasonable limit upon the future drain of the Government's resources into their already-swollen private bank accounts.

It has been stated repeatedly by people on the Republican side that this bill will not get a penny from the biggest income Americans, and that a $1 million taxpayer would get off scot free. Well, that is not what Alice Rivlin says.

CLAUDE PEPPER, hearing that charge, wrote a letter today and asked Mrs. Rivlin, Director of the Congressional Budget Office, exactly what would happen to a $1 million income taxpayer as a result of this cap. I have her reply in my hand. She said, "Mr. Chairman, in response to your question, a taxpayer with a million dollars of income, filing a joint return with two dependents would have his tax cut reduced by $3,736 if the cap is imposed."

In other words, he would have gotten an additional tax cut of $4,400 absent this bill; now he is going to get a tax cut of $700 additional this year instead if this bill is enacted.

Mr. Reagan came to office promising a balanced budget by 1984. Do you remember that? Well, precisely because he got his way in 1981 and 1982 and at least partly because of his favored tax treatment for the wealthiest few, the Reagan deficit in 1983 will be $210 billion. That is more than three times higher than the highest deficit ever suffered under any previous administration.

If Jimmy Carter had presided over a $210 billion deficit, there would have been cries for his impeachment.

This huge deficit is the result of the policy of spend and spend, borrow and borrow, and pay and pay in tax windfalls to the wealthy few.

In 1980, Ronald Reagan blamed all of our economic woes upon the Carter deficit. Do you remember that? Well, that deficit was about $57 billion. And now, having personally engineered a deficit in 1 year which exceeds all of the deficits of the total 4 years of the Carter administration, Mr. Reagan threatens to veto any bill that would reduce his enormous deficit by $6 or $7 billion.

Today, Mr. Reagan is speaking of his new-found concern for the middle-income and the low-income taxpayers. But his words have a hollow ring. It is just exactly like his new-found concern for public education, after his personal efforts in the last 3 years to rob public education of billions of dollars of its needed funding.

□ 1800

His deeds speak louder than his words. Let us show you just how concerned Mr. Reagan is about the middle-income taxpayer. Last August he asked over televison for increased taxes on that middle-income taxpayer's telephone bill, on his airline fare, on his gallon on gasoline, and on the medical bills that are paid by the indigent. And now he wants an extra standby surtax on the tax that this middle-income taxpayer pays. All those taxes are paid by middle- and low-income taxpayers. But Mr. Reagan threatens to veto any bill that puts any ceiling at all on the additional windfall tax cuts for the wealthiest 5 percent. That is the measure of his concern.

The Reagan administration has set in motion the most retrogressive redistribution of wealth in America's history. From the pockets of the poorest into the coffers of the richest.

In 4 years, the Reagan tax and budget changes will take $20 billion away from households with incomes of $10,000 and less and they will add $64 billion to the after-tax income of those making $80,000 a year and more.

Mr. Reagan may consider people in the $80,000 a year income moderate- or low-income taxpayers. The average taxpayer does not consider them such.

Mr. Reagan, himself, is reported to have saved $90,000 on his taxes last year because of the 1981 act.

Well, in this bill today, we finally say, "Enough." I do not think it is a cheap shot to refer to the effects of the 1981 tax cut upon those in Mr. Reagan's personal income range. I confess to my colleagues personally that it has meant money to me, it has meant a lower tax liability for me—and probably for all of us here in this Chamber today. But after all, let us face it. Are we the average taxpayers, are we typical of that average taxpayer for whom Mr. Reagan's heart purportedly bleeds? Why, of course we are not. We are not exactly typical of the people who must plow their hard earned money back into this economy if we are to have a percolate-up action that will start this economy moving again. Those are the people who deserve a tax cut, the low and moderate income taxpayers, not the people at the top of the economic pyramid.

So today, in passing this bill, we take a first step away from the dangerous precipice of trickle-down economics. We make a modest beginning on deficit reduction and we restore a modicum of fairness to the badly ravaged Code of Taxation. I ask you to join me in taking that step today.

The CHAIRMAN. All time for general debate has expired.

Pursuant to the rule, the bill is considered as having been read for amendment under the 5-minute rule. No amendments are in order except the following amendments, which shall not be subject to amendment:

First, the amendments recommended by the Committee on Ways and Means printed in the bill; and

Second, the amendment printed in the CONGRESSIONAL RECORD of June 22, 1983, by, and if offered by, Representative MCCURDY, and said amendment shall be debatable for not to exceed 30 minutes, to be equally divided and controlled by Representative MCCURDY and a Member opposed thereto.

The text of the bill, H.R. 1183, is as follows:

H.R. 1183

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Tax Rate Equity Act of 1983".

SEC. 2. LIMITATION ON REDUCTION IN INDIVIDUAL INCOME TAX.

(a) JOINT RETURNS, ETC.—Paragraphs (2) and (3) of section 1(a) of the Internal Revenue Code of 1954 (relating to married individuals filing joint returns and surviving spouses) are amended to read as follows:

"(2) FOR TAXABLE YEARS BEGINNING IN 1983.—

"If taxable income is:	The tax is:
Not over $3,400	No tax.
Over $3,400 but not over $5,500.	11% of excess over $3,400.
Over $5,500 but not over $7,600.	$231, plus 13% of excess over $5,500.
Over $7,600 but not over $11,900.	$504, plus 15% of excess over $7,600.
Over $11,900 but not over $16,000.	$1,149, plus 17% of excess over $11,900.
Over $16,000 but not over $20,200.	$1,846, plus 19% of excess over $16,000.

"If taxable income is:	The tax is:
Over $20,200 but not over $24,600.	$2,644 plus 23% of excess over $20,200.
Over $24,600 but not over $29,900.	$3,656, plus 26% of excess over $24,600.
Over $29,900 but not over $35,200.	$5,034, plus 30% of excess over $29,900.
Over $35,200 but not over $45,800.	$6,624, plus 37% of excess over $35,200.
Over $45,800 but not over $60,000.	$10,546, plus 42% of excess over $45,800.
Over $60,000 but not over $85,600.	$16,510, plus 46% of excess over $60,000.
Over $85,600	$28,286, plus 50% of excess over $85,600.

"(3) FOR TAXABLE YEARS BEGINNING AFTER 1983.—

"If taxable income is:	The tax is:
Not over $3,400	No tax.
Over $3,400 but not over $5,500.	11% of excess over $3,400.
Over $5,500 but not over $7,600.	$231, plus 12% of excess over $5,500.
Over $7,600 but not over $11,900.	$483, plus 14% of excess over $7,600.
Over $11,900 but not over $16,000.	$1,085, plus 16% of excess over $11,900.
Over $16,000 but not over $20,200.	$1,741, plus 18% of excess over $16,000.
Over $20,200 but not over $24,600.	$2,497 plus 22% of excess over $20,200.
Over $24,600 but not over $29,900.	$3,465, plus 25% of excess over $24,600.
Over $29,900 but not over $35,200.	$4,790, plus 28% of excess over $29,900.
Over $35,200 but not over $45,800.	$6,274, plus 37% of excess over $35,200.
Over $45,800 but not over $60,000.	$10,196, plus 42% of excess over $45,800.
Over $60,000 but not over $85,600.	$16,160, plus 46% of excess over $60,000.
Over $85,600	$27,936, plus 50% of excess over $85,600."

(b) HEAD OF HOUSEHOLD.—Paragraphs (2) and (3) of section 1(b) of such Code (relating to heads of households) are amended to read as follows:

"(2) FOR TAXABLE YEARS BEGINNING IN 1983.—

"If taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $4,400.	11% of excess over $2,300.
Over $4,400 but not over $6,500.	$231, plus 13% of excess over $4,400.
Over $6,500 but not over $8,700.	$504, plus 15% of excess over $6,500.
Over $8,700 but not over $11,800.	$834, plus 18% of excess over $8,700.
Over $11,800 but not over $15,000.	$1,392, plus 19% of excess over $11,800.
Over $15,000 but not over $18,200.	$2,000, plus 21% of excess over $15,000.
Over $18,200 but not over $23,500.	$2,672, plus 25% of excess over $18,200.
Over $23,500 but not over $28,800.	$3,997, plus 29% of excess over $23,500.
Over $28,800 but not over $34,100.	$5,534, plus 36% of excess over $28,800.
Over $34,100 but not over $44,700.	$7,442, plus 39% of excess over $34,100.
Over $44,700 but not over $60,600.	$11,576, plus 46% of excess over $44,700.
Over $60,600	$18,890, plus 50% of excess over $60,600

"(3) FOR TAXABLE YEARS BEGINNING AFTER 1983.—

"If taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $4,400.	11% of excess over $2,300.
Over $4,400 but not over $6,500.	$231, plus 12% of excess over $4,400.
Over $6,500 but not over $8,700.	$483, plus 14% of excess over $6,500.
Over $8,700 but not over $11,800.	$791, plus 17% of excess over $8,700.
Over $11,800 but not over $15,000.	$1,318, plus 18% of excess over $11,800.
Over $15,000 but not over $18,200.	$1,894, plus 20% of excess over $15,000.
Over $18,200 but not over $23,500.	$2,534, plus 24% of excess over $18,200.
Over $23,500 but not over $28,800.	$3,896, plus 26% of excess over $23,500.
Over $28,800 but not over $34,100.	$5,290, plus 36% of excess over $28,800.
Over $34,100 but not over $44,700.	$7,198, plus 39% of excess over $34,100.
Over $44,700 but not over $60,600.	$11,332, plus 46% of excess over $44,700.
Over $60,600	$18,646, plus 50% of excess over $60,600."

(c) UNMARRIED INDIVIDUALS.—Paragraphs (2) and (3) of section 1(c) of such Code (relating to certain unmarried individuals) are amended to read as follows:

"(2) FOR TAXABLE YEARS BEGINNING IN 1983.—

"If taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $3,400.	11% of excess over $2,300.
Over $3,400 but not over $4,400.	$121, plus 13% of excess over $3,400.
Over $4,400 but not over $8,500.	$251, plus 15% of excess over $4,400.
Over $8,500 but not over $10,800.	$866, plus 17% of excess over $8,500.
Over $10,800 but not over $12,900..	$1,257, plus 19% of excess over $10,800.
Over $12,900 but not over $15,000..	$1,656, plus 21% of excess over $12,900.
Over $15,000 but not over $18,200..	$2,097, plus 24% of excess over $15,000.
Over $18,200 but not over $23,500..	$2,865, plus 28% of excess over $18,200.
Over $23,500 but not over $28,800..	$4,349, plus 32% of excess over $23,500.
Over $28,800 but not over $34,100..	$6,045, plus 38% of excess over $28,800.
Over $34,100 but not over $41,500..	$8,059, plus 42% of excess over $34,100.
Over $41,500 but not over $55,300..	$11,167, plus 47% of excess over $41,500.
Over $55,300	$17,653, plus 50% of excess over $55,300.

"(3) FOR TAXABLE YEARS BEGINNING AFTER 1983.—

"If taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $3,400.	11% of excess over $2,300.
Over $3,400 but not over $4,400.	$121, plus 12% of excess over $3,400.
Over $4,400 but not over $6,500.	$241, plus 14% of excess over $4,400.
Over $6,500 but not over $8,500.	$535, plus 15% of excess over $6,500.
Over $8,500 but not over $10,800.	$835, plus 16% of excess over $8,500.
Over $10,800 but not over $12,900.	$1,203 plus 18% of excess over $10,800.
Over $12,900 but not over $15,000.	$1,581 plus 20% of excess over $12,900.
Over $15,000 but not over $18,200.	$2,001 plus 23% of excess over $15,000.
Over $18,200 but not over $23,500.	$2,737 plus 26% of excess over $18,200.
Over $23,500 but not over $28,800.	$4,115 plus 30% of excess over $23,500.
Over $28,800 but not over $34,100.	$5,705 plus 38% of excess over 28,800.
Over $34,100 but not over $41,500.	$7,719 plus 42% of excess over 34,100.
Over $41,500 but not over $55,300.	$10,627 plus 47% of excess over $41,500.
Over $55,300	$17,313 plus 50% of excess over $55.300."

(d) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—Paragraphs (2) and (3) of section 1(d) of such Code (relating to married individuals filing separate returns) are amended to read as follows:

"(2) FOR TAXABLE YEARS BEGINNING IN 1983.—

"If taxable income is:	The tax is:
Not over $1,700	No tax.
Over $1,700 but not over $2,750.	11% of excess over $1,700.
Over $2,700 but not over $3,800.	$115,50, plus 13% of excess over 2,750.
Over $3,800 but not over $5,950.	$252, plus 15% of excess over $3,800.
Over $5,950 but not over $8,000.	$574.50, plus 17% of excess over $5,950.
Over $8,000 but not over $10,100.	$923, plus 19% of excess over $8,000.
Over $10,100 but not over $12,300.	$1,322, plus 23% of excess over $10,100.
Over $12,300 but not over $14,950.	$1,828 plus 26% of excess over $10,100.
Over $14,950 but not over $17,600.	$2,517 plus 30% of excess over $14,950.
Over $17,600 but not over $22,900.	$3,312 plus 37% of excess over $17,600.
Over $22,900 but not over $30,000.	$5,273 plus 42% of excess over $22,900.
Over $300,000 but not over $42,800.	$8,255, plus 46% of excess over $30,000.
Over $42,800	$14,143 plus 50% of excess over $42,800.

"(3) FOR TAXABLE YEARS BEGINNING AFTER 1983.—

"If taxable income is:	The tax is:
Not over $1,700	No tax.
Over $1,700 but not over $2,750.	11% of excess over $1,700.
Over $2,750 but not over $3,800.	$115.50, plus 12% of excess over $2,750.
Over $3,800 but not over $5,950.	$241.50, plus 14% of excess over $3,800.
Over $5,950 but not over $8,000.	$542.50, plus 16% of excess over $5,950.
Over $8,000 but not over $10,100.	$870.50, plus 18% of excess over $8,000.
Over $10,100 but not over $12,300.	$1,248.50, plus 22% of excess over $10,100.
Over $12,300 but not over $14,950.	$1,732.50, plus 25% of excess over $12,300.
Over $14,950 but not over $17,600.	$2,395, plus 28% of excess over $14,950.
Over $17,600 but not over $22,900.	$3,137, plus 37% of excess over $17,600.
Over $22,900 but not over $30,000.	$5,098, plus 42% of excess over $22,900.
Over $30,000 but not over $42,800.	$8,080, plus 46% of excess over $30,000."
Over $42,800	$13,968, plus 50% of excess over $42,800."

(e) ESTATES AND TRUSTS.—Paragraphs (2) and (3) of section 1(e) of such Code (relating to estates and trusts) are amended to read as follows:

"(2) FOR TAXABLE YEARS BEGINNING IN 1983.—

"If taxable income is:	The tax is:
Not over $1,050	11% of taxable income.
Over $1,050 but not over $2,100.	$115.50, plus 13% of excess over $1,050.
Over $2,100 but not over $4,250.	$252, plus 15% of excess over $2,100.
Over $4,250 but not over $6,300.	$574.50, plus 17% of excess over $4,250.
Over $6,300 but not over $8,400.	$923, plus 19% of excess over $6,300.
Over $8,400 but not over $10,600.	$1,322, plus 23% of excess over $8,000.
Over $10,600 but not over $13,250.	$1,828, plus 26% of excess over $10,600.
Over $13,250 but not over $15,900.	$2,517, plus 30% of excess over $13,250.
Over $15,900 but not over $21,200.	$3,312, plus 37% of excess over $15,900.
Over $21,200 but not over $28,300.	$5,273, plus 42% of excess over $21,200.
Over $28,300 but not over $41,100.	$8,255, plus 46% of excess over $28,300.
Over $41,100	$14,143, plus 50% of excess over $41,100.

"(3) FOR TAXABLE YEARS BEGINNING AFTER 1983.—

"If taxable income is:	The tax is:
Not over $1,050	11% of taxable income.
Over $1,050 but not over $2,100.	$115.50, plus 12% of excess over $1,050.
Over $2,100 but not over $4,250.	$241.50, plus 14% of excess over $2,100.
Over $4,250 but not over $6,300.	$542.50, plus 16% of excess over $4,250.

"If taxable income is:	The tax is:
Over $6,300 but not over $8,400.	$870.50, plus 18% of excess over $6,300.
Over $8,400 but not over $10,600.	$1,248.50, plus 22% of excess over $8,000.
Over $10,600 but not over $13,250.	$1,732.50, plus 25% of excess over $10,600.
Over $13,250 but not over $15,900.	$2,395, plus 28% of excess over $13,250.
Over $15,900 but not over $21,200.	$3,137, plus 37% of excess over $15,900.
Over $21,200 but not over $28,300.	$5,098, plus 42% of excess over $21,200.
Over $28,300 but not over $41,100.	$8,080, plus 46% of excess over $28,300.
Over $41,100	$13,968, plus 50% of excess over $41,100."

(f) TECHNICAL AMENDMENTS.—

(1) SECTION 21 NOT TO APPLY.—

(A) Subsection (d) of section 21 of such Code (relating to effect of changes) is amended by inserting ", section 2 of the Tax Rate Equity Act of 1983," after "Tax Act of 1981".

(B) The subsection heading for subsection (d) of section 21 of such Code is amended by inserting "OR TAX RATE EQUITY ACT OF 1983" after "TAX ACT OF 1981".

(2) WITHHOLDING.—Paragraph (3) of section 3402(a) of such Code (relating to income tax collected at source) is amended by adding at the end thereof the following new sentence:

"Notwithstanding subparagraph (B), the Secretary shall take into account the amendments made by section 2 of the Tax Rate Equity Act of 1983."

(g) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to taxable years beginning after December 31, 1982.

(2) WITHHOLDING AMENDMENT.—The amendment made by paragraph (2) of subsection (f) shall apply to remuneration paid after June 30, 1983.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the first committee amendment.

The Clerk proceeded to read the first committee amendment.

Mr. ROSTENKOWSKI (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendments be considered en bloc, and that they be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The committee amendments are as follows:

Committee amendments: On page 2, after line 5, insert the following:

SEC. 2. REVENUE GAINED FROM CAP TO BE USED TO REDUCE FEDERAL DEFICITS.

Whereas projected Federal deficits threaten to abort economic recovery for all Americans, and

Whereas the need to reduce these deficits is one of the paramount issues facing this Congress:

It is the sense of the Congress that—

(1) the revenue gained from a cap on the third year of the individual tax rate cut be applied to a reduction in Federal deficits, and

(2) the Budget Committees apply the revenue gained from such cap to reduce deficit projections.

Page 2, line 18, strike out "SEC. 2." and insert in lieu thereof "SEC. 3.".

Page 3, in the table immediately following line 2, strike out "$20,286" and insert in lieu thereof "$28,286".

Page 4, strike out line 1 and all that follows down through the end of the table preceding line 1 on page 5 and insert in lieu thereof the following:

(b) HEAD OF HOUSEHOLD.—Paragaphs (2) and (3) of section 1(b) of such Code (relating to heads of households) are amended to read as follows:

"(2) FOR TAXABLE YEARS BEGINNING IN 1983.—

"If taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $4,400.	11% of excess over $2,300.
Over $4,400 but not over $6,500.	$231, plus 13% of excess over $4,400.
Over $6,500 but not over $8,700.	$504, plus 15% of excess over $6,500.
Over $8,700 but not over $11,800.	$834, plus 18% of excess over $8,700.
Over $11,800 but not over $15,000.	$1,392, plus 19% of excess over $11,800.
Over $15,000 but not over $18,200.	$2,000, plus 21% of excess over $15,000.
Over $18,200 but not over $23,500.	$2,672, plus 25% of excess over $18,200.
Over $23,500 but not over $28,800.	$3,997, plus 29% of excess over $23,500.
Over $28,800 but not over $30,000.	$5,534, plus 34% of excess over $28,800.
Over $30,000 but not over $34,100.	$5,942, plus 36% of excess over $30,000.
Over $34,100 but not over $44,700.	$7,418, plus 39% of excess over $34,100.
Over $44,700 but not over $60,000.	$11,552, plus 46% of excess over $44,700.
Over $60,000	$18,866, plus 50% of excess over $60,600.

"(3) FOR TAXABLE YEARS BEGINNING AFTER 1983.—

"If taxable income is:	The tax is:
Not over $2,300	No tax.
Over $2,300 but not over $4,400.	11% of excess over $2,300.
Over $4,400 but not over $6,500.	$231, plus 12% of excess over $4,400.
Over $6,500 but not over $8,700.	$483, plus 14% of excess over $6,500.
Over $8,700 but not over $11,800.	$791, plus 17% of excess over $8,700.
Over $11,800 but not over $15,000.	$1,318, plus 18% of excess over $11,800.
Over $15,000 but not over $18,200.	$1,894, plus 20% of excess over $15,000.
Over $18,200 but not over $23,500.	$2,534, plus 24% of excess over $18,200.
Over $23,500 but not over $28,800.	$3,806, plus 28% of excess over $23,500.
Over $28,800 but not over $30,000.	$5,290, plus 32% of excess over $28,800.
Over $30,000 but not over $34,100.	$5,674, plus 36% of excess over $30,000.
Over $34,100 but not over $44,700.	$7,150, plus 39% of excess over $34,100.
Over $44,700 but not over $60,600.	$11,284, plus 46% of excess over $44,700.
Over $60,600	$18,598, plus 50% of excess over $60,600."

Page 7, in the table immediate following line 7 of page 6, strike out "$10,627" and insert in lieu thereof "$10,827".

Page 7, in the table immediately following line 6—

(1) strike out "$2,700" and insert in lieu thereof "$2,750", and

(2) strike out "$10,100" in portion of the table setting forth the tax for taxable income over $12,300 but not over $14,950 and insert in lieu thereof "$12,300".

Page 9, in the table immediately preceding line 1, strike out "$8,000" and insert in lieu thereof "$8,400."

Page 9, in the table immediately following line 2, strike out "$8,000" and insert in lieu thereof "$8,400."

Page 10, line 1, strike out "section 2" and insert in lieu thereof "section 3."

Page 10, beginning in line 12, strike out "section 2" and insert in lieu thereof "section 3."

Page 10, after line 21, insert the following:

(3) ESTIMATED TAX.—No addition to the tax shall be made under section 6654 of the Internal Revenue Code of 1954 (relating to failure by individual to pay estimated income tax) with respect to any underpayment for a taxable year beginning during 1983 to the extent such underpayment was created or increased by the amendment made by this section.

The CHAIRMAN. The question is on the committee amendments.

The committeee amendments were agreed to.

AMENDMENT OFFERED BY MR. M'CURDY

Mr. McCURDY. Mr. Chairman, I offer an amendment.

The CHAIRMAN. Is this the amendment made in order by the rule?

Mr. McCURDY. It is, Mr. Chairman.

The Clerk read as follows:

Amendment offered by Mr. MCCURDY: Add the following new section at the end of the bill:

The changes in the individual income tax contained in this Act will be accompanied by a dollar-for-dollar reduction in outlays in fiscal year 1984, by an amount which is at least equal to the revenue projected to be collected from these changes in the individual income tax.

The CHAIRMAN. Under the rule, the gentleman from Oklahoma (Mr. MCCURDY) will be recognized for 15 minutes.

Is the gentleman from New York (Mr. CONABLE) opposed to the amendment?

Mr. CONABLE. I am opposed to the amendment, Mr. Chairman.

The CHAIRMAN. The gentleman from New York (Mr. CONABLE) will be recognized for 15 minutes in opposition.

Mr. McCURDY. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I believe that my amendment is a step in the right direction. I believe it is necessary to keep the heat on. I believe it is a tool to enforce the budget and a tool to impose discipline.

Mr. Chairman, I am amazed at the reaction of my colleagues on the other side of the aisle, by their actions on the budget and their statements today on the taxes.

I have reached the point where I believe the Republicans in this body are beyond redemption. All we have heard today is a trial run on the 1984 campaign theme. Is it not amazing how shameless they are by now defending the concept that deficits are a good thing, that there is nothing wrong with an unbalanced budget, and deficits of $200 billion.

Treasury Secretary Regan said in May of 1983, "I will offer a prize to anyone who can show me the connec-

tion between high interest rates and high deficits." For shame.

Is that what my Republican colleagues are saying to the folks back home?

In 1980, then candidate Ronald Reagan said:

> Mr. Carter is acting as if he had not been in charge for the past 3½ years. As if someone else ran up nearly $200 billion in red ink, as if someone else was responsible for the largest deficit in American history. And as if someone else was predicting a budget deficit for this fiscal year of $30 billion or more.

That was in 1980. Yet in 1983 President Reagan submitted a budget with nearly $200 billion in deficits. The President apparently sees more political advantage in disrupting congressional attempts to curb the deficit than in providing the leadership for a reasonable compromise.

Mr. Chairman, the Republicans in this administration have defaulted on the deficit question. The Reagan budget was not even offered in the House. Yet it appears that they want to use the budget when it is acceptable to them, but ignore it when they do not like it. They want to accept the credit, but shift the blame.

House Resolution 1183 is not an ideal vehicle for long overdue fiscal policy reforms. I am convinced, however, that the time has come to establish that tax increases must be linked to spending cuts if we are ever to reduce the looming deficits that threaten our Nation's future.

□ 1810

The Ways and Means bill already contains language in the preamble expressing the sense of the Congress that revenues should be applied to the deficit, and I can commend my colleague, the gentleman from North Dakota (Mr. DORGAN) for that preamble.

My amendment, however, doubles the deficit-cutting impact of the proposed cap. Let me read again the language of the amendment so that there is no mistake:

> The changes in the individual income tax contained in this Act will be accompanied by dollar-for-dollar reduction in outlays in fiscal year 1984 by an amount which is at least equal to the revenue projected to be collected by these changes in the individual income tax.

Mr. Chairman, there is no absolute guarantee that the reductions will be made, but I pledge my commitment to enforcing the provisions of this amendment. If my colleagues want to go home and continue to talk about controlling spending and reducing deficits, then I believe they should seriously consider this amendment.

Mr. MONTGOMERY. Mr. Chairman, will the gentleman yield?

Mr. McCURDY. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. I thank the gentleman for yielding.

Mr. Chairman. I want to commend the gentleman for this amendment. We who do not like big deficits, if I understand your amendment, there is a possibility under your amendment, if adopted, that we could reduce the deficit by cutting back on outlay spending by $6 billion.

Mr. McCURDY. The gentleman is correct.

Mr. MONTGOMERY. It makes a lot of sense to me. I have been around here for years saying we have got to cut back on spending, and your amendment fits right in my philosophy. I commend the gentleman for his amendment.

Mr. McCURDY. I thank the gentleman for his support.

Mr. Chairman, may I inquire as to how much time is remaining?

The CHAIRMAN. The gentleman from Oklahoma (Mr. McCURDY) has 10 minutes remaining at this time.

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. McCURDY. I will yield to the gentleman for Oklahoma.

Mr. ENGLISH. I thank the gentleman for yielding.

Mr. Chairman, I, too, would like to join in commending the gentleman from Oklahoma for his very fine amendment. I think that it certainly makes a great deal of sense. It moves us in the right direction, and I think if we are indeed serious about reducing the deficits, then I think we can take not one small step, but one giant double step today.

Mr. CONABLE. Mr. Chairman, I yield 5 minutes to the gentleman from Georgia (Mr. GINGRICH).

Mr. GINGRICH. I thank the gentleman for yielding this time to me.

Mr. Chairman, on the larger issue of the later vote, I think it is clear the earlier speeches made clear that no conservative can vote for a liberal Democratic tax increase; that despite the rhetoric of the gentleman from Texas, this strikes right at the heart of every conservative's constituency, at working couples, at small businesses, at small farms, at people who save.

But the issue we are discussing now, the proposed amendment, is a different sort of creature. Frankly, there was once an amendment that made some sense. It was offered several days ago by the gentleman from Oklahoma. It was a real amendment. It said we have to cut spending for real, and it listed a number, and it had enforceable provisions, and it went to the Committee on Rules. In the Committee on Rules, the liberal Democratic leadership gutted that amendment. They eviscerated it. They left it without force, without meaning, impotent.

This amendment in its current form has no power, no effect. It is the fig leaf amendment. It is designed to hide behind. It is the excuse Members can use who are afraid to go home and admit openly that they voted for a tax increase.

Once upon a time, a few days ago, there was a real amendment, but the problem with the real amendment, I say to my colleagues who really know better, is that the real amendment would have cut spending, that the real amendment would have forced the majority to decide on priorities, that the real amendment would have led, in fact, to a change in behavior. So the real amendment died, to be replaced with the skeleton, the shadow.

Once upon a time there was an amendment that had a straight, honest, open figure printed in law by which one could measure spending cuts. However, this amendment, in its current form, requires that we rely on the liberal leadership to measure whether or not in fact they have made spending cuts. In effect, in the Committee on Rules, the liberal leadership said, "Trust us. Go ahead and pass the tax increase, which is real and permanent and will be there, and trust us. We will do the best we can." And by the way, I think we can be guaranteed they would certify that they had made the spending cuts, period, because they want the money.

In effect, this amendment would be a loophole, an excuse. This amendment guarantees higher taxes while doing nothing to affect spending. While the original amendment had force, this one has none.

We have heard a lot of rhetoric today, but the discouraging thing is the degree to which this amendment will mislead and confuse the American people. All of us go home to districts in which people say, "Why is Congress a mess? Why does nothing good happen? Why is it so difficult to change things?" This amendment, I think, is a clear, classic example of the politician's art, of fuzzing everything up in such a way that nothing will change, the liberals will get their money, the people will lose money out of their wallets, the Government will grow bigger, but we will all have a good speech.

However, those who do not have the courage to stand openly and take people's money should not hide behind misleading, deceptive and unenforceable, gimmicks. Many liberal Democrats have learned to say the word "deficit." It was fascinating to have half the Democratic side applaud at the majority leader's reference to deficits. They say "deficit" as they walk over to vote for higher spending. They said "deficit" earlier today when they voted for a big spending, big taxing, big deficit budget. They said "deficit" as they vote to raise taxes.

The adoption of the word "deficit" by liberal Democrats is comparable to

the local whiskey dealer deciding he is really concerned about alcoholism and offering to buy everyone in town a drink to discuss it. It is, in fact, a political device to avoid the heat.

But the reality is that this amendment will not cut spending. It is a political excuse to hide from the real fight in this Congress, which is the fight to change fundamental behavior.

Mr. KRAMER. Mr. Chairman, will the gentleman yield?

Mr. GINGRICH. I yield to the gentleman from Colorado.

Mr. KRAMER. I thank the gentleman for yielding.

Mr. Chairman, I would like a clarification, if the gentleman has information, with respect to what we did last summer when we increased taxes by almost $100 billion and, in exchange therefor, agreed to reduce spending by $280 billion. It is my understanding we only really reduced that spending by $53 billion, although we were committed to reduce it by $280 billion. That leaves, by my rough calculation, $220 billion remaining.

Is this amendment an add-on to that commitment, or does it replace that commitment, or is it in lieu thereof?

Mr. GINGRICH. This amendment is worse than the commitment last summer, which failed by 6 to 1 to achieve its purpose. This amendment is worse and it is less enforceable.

Mr. CONABLE. Mr. Chairman, I yield 2 minutes to the gentleman from Texas (Mr. GRAMM).

Mr. GRAMM. I thank the gentleman for yielding.

Mr. Chairman, I voted for a budget last year that claimed $3 in budget cuts for every $1 in tax increases, and I voted for it because it was binding. It was in the budget. We ended up getting 57 cents in cuts for each dollar of taxes. We have an amendment here today that set out a baseline for cuts when it went to Rules. It said that we had to cut $6 billion below a baseline of $849.5 billion. But that baseline was struck from the amendment.

□ 1820

I find myself in a very difficult position. I see a sham that is about to be perpetrated for Members who want to vote for this tax increase but who want to hide from their constituents, Members who talk about deficits but who just voted to raise the deficit by $13 billion above Reagan's level and who have voted against every budget cut for the last 2 years.

I would like to cut spending by $6 billion, but if I vote for this, I am voting to perpetrate a sham that will allow Members to hide from their constituents, and as a result, I am going to vote no on this amendment because it is totally nonbinding and totally phoney. I call on my colleagues to do the same so Members can cast an honest vote around here for a change.

Do we want to raise taxes, or do we not? But let us not claim that we are going to cut spending when we just adopted a budget that raised the deficit by $13 billion. We are not going to go back and vote on that budget again. This amendment is totally meaningless, and it is total window dressing. Every Member of this body knows that, and I think we ought to be honest with the American people.

Mr. ROBERTS. Mr. Chairman, will the gentleman yield?

Mr. GRAMM. I yield to the gentleman from Kansas.

Mr. ROBERTS. Mr. Chairman, I say to the gentleman, "Say it isn't so." I have told some of my friends across the aisle that I might support this, and I suddenly find myself fighting like a missionary being invited to a cannibal's barbeque.

There is no baseline. There is no baseline that is going to add more to the pot, and then the $6 billion would still come out.

Mr. GRAMM. Mr. Chairman, all the gentleman is doing is letting Members off the hook who do not have courage enought to vote for a tax increase they are being pressured to vote for.

Mr. ROBERTS. Mr. Chairman, I thank the gentleman from Texas (Mr. GRAMM).

Mr. CONABLE. Mr. Chairman, may I ask the gentleman from Oklahoma (Mr. MCCURDY) what his intention is with respect to the rest of the time?

We have several other speakers, and I want to have a reasonable arrangement here.

Mr. MCCURDY of Oklahoma. Mr. Chairman, I will inform the gentleman that I have two additional requests for time, one for 1½ minutes, and then I will yield to the Speaker to conclude debate.

Mr. CONABLE. Mr. Chairman, I thank the gentleman.

Under those circumstances, Mr. Chairman, I now yield 3 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FRENZEL. Mr. Chairman, this McCurdy amendment is a very interesting animal.

Yesterday the gentleman from Oklahoma (Mr. MCCURDY) and I went to the Rules Committee, each requesting an amendment to be made in order. The McCurdy amendment would have reduced spending by $6 billion from the nonreserve fund budget number which we just approved of $849.5 billion of spending. My amendment would have reduced $12 billion from that number.

A funny thing happened in the Rules Committee. The Rules Committee almost treated the gentleman from Oklahoma as badly as it treated me. It simply rejected my amendment out of hand, but in the case of the McCurdy amendment it removed its private parts. With major surgery, it has left the McCurdy amendment an empty husk so that the maker of the amendment himself says there is no guarantee that reductions can be made.

So, Mr. Chairman, I say to the Members, "If you believe in the Great Pumpkin or the Tooth Fairy or the Speaker of the House, vote for the McCurdy amendment."

Mr. CONABLE. Mr. Chairman, I now yield 3 minutes to the gentleman from New York (Mr. KEMP).

Mr. KEMP. Mr. Chairman, the gentleman from New York (Mr. GREEN) reminded us of something that is very important earlier today when he suggested that a $50,000 income in 1983 is the equivalent of about a $17,000 income in 1967. That shows the distortion that exists in our society as to who is wealthy and who is poor, or even what is the definition of such terms.

Now, there are two ways to make people equal. We can either make the rick poor or the poor rich. The whole purpose of the American dream, I thought, was to make the poor rich. To be rich is not un-American. But if we take away the opportunity to gain income, to get rewards for production, or to be able to get an incentive for savings or investment or entrepreneurial ability, we in effect will remove from this country not only the wealth of individuals but ultimately the wealth of our country. I do not suggest that to be rich is to just have more creature comforts, to be rich is to have freedom, and hope and opportunity—to be able to buy a home, send your children to college.

There is no way we can help the poor by making America poor, and when we have a too steeply graduated income tax system which only seeks to redistribute income as its sole goal, in effect we make everybody poorer and our Nation impoverished. In such a tax system the harder you work and the more income you produce, the higher your tax bracket. In America for the past 10 or 12 years, as the gentleman from New York (Mr. GREEN) pointed out, you did not need to even work harder or earn more income; you could have stood still and Congress would have inflated you into higher brackets and you might have ended up with a $50,000 income in 1983 with double or triple the tax rate you would have paid on $16,000 in 1967 even though purchasing power was falling.

Now we are saying that it is somehow unfair to reduce everybody's bracket across the board, but yet the very next speaker, our distinguished Speaker, was the one in 1964 who voted to cut tax rates across the board by about 25 or 30 percent. And indeed, if we go back to that debate in 1964, when they cut the tax rates from 91 down to 70 percent, an income of

$400,000 would have received about a $100,000 tax cut over time.

Mr. Chairman, I ask Members to reject the idea of pitting the poor against the rich. I ask them to reject the idea of putting the American people and this debate into the terms of class warfare. We have cut the rates across the board. It seems to be obvious to most Americans that there is a stronger desire for income growth than for redistribution of income.

Mr. Chairman, I ask the Members to reject this amendment, reject the tax surtax bill, and help put the American dream back into this country for all people, rich or poor. Black or white, male or female——

Mr. McCURDY. Mr. Chairman, I yield such time as he may consume to the gentleman from Delaware (Mr. CARPER).

Mr. CARPER. Mr. Chairman, I rise in strong support of Mr. McCURDY's amendment. The Reagan administration's policy of borrow and borrow, spend and spend is as bankrupt as the Democrat's old policy of tax and tax, spend and spend.

The author of this amendment realizes this fact, and I thank him for his leadership in trying to insure that our efforts to reduce our deficits focus at least as much on spending restraint as on increasing revenues.

There are Democrats and Republicans who voted for the compromise budget resolution today who would have preferred, as I would, a resolution setting somewhat lower spending targets than we have adopted. Doubtlessly, some Democrats and Republicans opposed the resolution today because its spending targets were deemed by them to be too high.

By adopting the McCurdy amendment today we have an opportunity to either make a symbolic gesture that is largely window dressing, as some have suggested, or take the first in a series of steps to further reduce America's deficits, if we are truly serious about the intent of this amendment. I hope that we choose the latter course.

For those Members who are not really serious about making the tough decisions to find $6 billion in further spending cuts, I urge you to vote against this amendment and defeat it. For those Members who are serious, as Mr. McCURDY and I are, about moving this country closer to a policy of fiscal sanity, I urge you to support this amendment.

Mr. McCURDY. Mr. Chairman, I yield 1½ minutes to the gentleman from Wisconsin (Mr. MOODY).

Mr. MOODY. Mr. Chairman, why is it that our present colleagues on the Republican side of the aisle are squirming so hard at the McCurdy amendment? I ask that, particularly since they proposed almost an identical amendment in the Rules Committee, except for the 2-4-1 or 1-4-1, which is just a matter of magnitude, not a matter of character.

They are squirming so hard because it puts them in the position of voting against spending cuts. The only fig leaf they are holding out for is a baseline number. Other than that, they love the McCurdy amendment, so they tell us.

What does that baseline mean? What does this loss mean? Nothing. That baseline, Mr. Chairman, is based on a number of economic assumptions. That is not a single number. That is a moving number; it moves every day. It does not make any sense by itself.

This amendment is a strong amendment. It is a meaningful amendment. We are sending ourselves a message on the second budget go-around—and there will be one—that we have to go out and find $6 billion more to cut spending.

Mr. Chairman, this is a meaningful amendment, and I urge its adoption.

Mr. CONABLE. Mr. Chairman, I yield myself the balance of my time.

The CHAIRMAN. The gentleman from New York (Mr. CONABLE) is recognized for 3 minutes.

Mr. CONABLE. Mr. Chairman, the Republicans, in the Rules Committee, did not offer a 2-for-1 amendment. They offered an amendment that called for no tax increases at all, but tried to cut spending, the only way we are going to get the deficit down.

Now, this whole operation is something of a craps game, but when the McCurdy amendment was subjected to surgery in the Rules Committee, it became a floating craps game with loaded dice.

We are not squirming about the McCurdy amendment. We just want to be sure that everybody in this Chamber understands what it really is. It is an opportunity for Members to try to fool somebody, but it is not a very good opportunity because it has no baseline figure. As presented to the Rules Committee, there was a baseline figure in it. But that figure was surgically removed, thus leaving the amendment totally without effect. The amendment still mentions spending cuts, but does not indicate from what point cuts would start.

The amendment is, after that surgery, fully impotent. It has no real meaning.

We just passed a budget that called for a substantial increase in spending and an increase in deficits. So let us not pretend for a minute that if we adopt the McCurdy amendment, there is going to be any turnaround here. In fact, all we are doing is perpetrating a flimflam. Everybody in this room knows it and I hope the American people will see through it.

□ 1830

The time has come to stand up and be counted. Are we really concerned about deficits or do we want to play games?

In fact, we are not going to get deficits under control by raising taxes. We have been doing that for a long, long time, and the deficit is bigger and bigger every year.

So, my friends, let us not pretend anything except that we are engaged in a political exercise here. The opportunity that faces us is once again to reaffirm the faith of the American people in this body and turn down a tax increase which we know will hit the middle class. Everybody in this room wants an excuse like the McCurdy amendment to try to hide behind, but fig leaves are not very good cover.

Mr. EDWARDS of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from Oklahoma.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I thank the gentleman for yielding.

I support tax cuts, but if you call salami a pork chop, it is still salami. This is not a spending cut and I cannot vote for the amendment.

Mr. MOORE. Mr. Chairman, will the gentleman yield?

Mr. CONABLE. I yield to the gentleman from Louisiana.

Mr. MOORE. Mr. Chairman, does the gentleman intend that the House will, in fact, have an opportunity to vote on a real 2-for-1 cut in spending today?

Mr. CONABLE. It is something that we would like to have made in order. That is a possibility.

Mr. MOORE. Through a motion to recommit, I am thinking; does that intend to be offered?

Mr. CONABLE. That may be offered, yes.

Mr. McCURDY. Mr. Chairman, I yield such time as he may consume to the gentleman from Texas (Mr. STENHOLM).

Mr. STENHOLM. Mr. Chairman, I rise in strong support of the sincere efforts of the gentleman from Oklahoma in the purpose for which the amendment was offered.

Mr. McCURDY. Mr. Chairman, I yield such time as he may consume to the gentleman from Texas (Mr. COLEMAN).

Mr. COLEMAN of Texas. Mr. Chairman, I rise in support of the amendment offered by my colleague from Oklahoma, Mr. McCURDY. As a coauthor, I support this amendment because I have consistently told the constituents of the 16th District of Texas that I would come to Washington to both cut taxes and spending simultaneously. That is exactly what this amendment to H.R. 1183 would accomplish.

The opportunity for a national economic recovery is threatened today by everexpanding deficits. Those deficits, approximately $200 billion for fiscal year 1984, will stave off any chance our Nation has for such a recovery. By passing this bill, H.R. 1183, the Tax Rate Equity Act of 1983, $6.1 billion would be saved to offset deficit spending. Additionally, by adding this amendment, such revenue amounts would be matched by additional spending reductions.

This is a sound proposal; this is a fair proposal. By implementing the tax cap, we would not be raising taxes. On the contrary, we would still have a tax cut, but with a modification of the amount of tax reductions for those in the upper-middle and upper-income brackets. This is only fair since persons in those brackets affected have already received the majority of the first two legs of the Economic Recovery Tax Act of 1981. Those in the lower- and middle-income brackets will still receive their full tax cuts. Those in higher tax brackets will also receive a tax cut, not an increase as critics would have you believe, but a smaller tax cut than the Reagan administration wanted.

This amendment is in the spirit of bipartisan effort the President called for at the beginning of this Congress. This amendment would accomplish the goal I set out to accomplish in Washington—to reduce the Federal deficit. This goal will be accomplished by this amendment by cutting tax reductions as well as cutting Federal spending. We cannot continue to finance either tax cuts nor Federal spending with borrowed money. That is not fair to the American people, and I will not support programs that intend to do only one or the other.

Mr. McCURDY. Mr. Chairman, I urge passage of the amendment.

I yield the balance of my time to the distinguished Speaker of the House, the gentleman from Massachusetts (Mr. O'NEILL).

Mr. O'NEILL. Mr. Chairman, I rise in support of the McCurdy amendment and the current legislation before us.

This has been a very interesting day. I have never heard the words "political exercise" used so many times and the words "political sham" used as many times as in the debate on both of these important bills. As you know, the budget passed here. It has gone to the Senate and with the aid of the Republican leader in the Senate, Mr. BAKER, it has also passed the Senate.

So the Republicans in the Senate apparently did not think it was a political exercise and a political sham.

There has been so much talk about the word "politics." Politics is a part of the life of all of us. We are all in politics. There is a big difference between being in politics and the exercise of politics for sham. You do not manufacture issues. Issues are not manufactured in this body. They are created by the people, who on the first Tuesday of every other November go to the polls to vote in the Federal election. They are the ones who create the issues.

The issues in the last election were social security, unemployment, and the tax cut. Together they spelled one thing: fairness. Was there fairness in America?

What were the results of the poll on that day? We lost one Member of the House on this side of the aisle. You lost 27 on that side and the Democrats made a net gain of 26 seats, and it was because of the issue of fairness.

Two years ago, I stood here in this well and opposed the most severe cuts in social programs ever enacted by this body. Those cuts hurt a great number of people. They hurt the working poor. A million people had their AFDC payments either cut or eliminated altogether.

The cuts also hurt families of moderate income. A million college students were forced to accept major cuts in their guaranteed loans and other aids. About 3 percent fewer students are applying for college this year because of the action of the Congress last year.

Thirteen million children were faced with cuts in their school lunches.

Over 40 States were forced to cut their medicaid programs—affecting mothers and children and the elderly.

The sponsors of these cuts justified them on two grounds. First, they promised that the cuts would be fair. All Americans would be asked to sacrifice for the good of the country as a whole. Everyone would have a share of the burden.

Second, they told us that the cuts, harsh as they were, were a necessary way to cut the Federal deficits, a necessary way to bring Government borrowing under control. Cutting social programs would help bring about lower deficits.

Well, we gave the administration its day in court. That is one of the prerogatives of the Speaker, to be able to schedule. We did not hide or duck. The program came to the floor. The Congress adopted that program, the entire program. The social cuts went into effect and millions and millions of Americans soon felt the pain.

But what about the promises that were made? What about the promise that the burden would be shared equally? What about the promise of lower deficits?

Well, let us look at those promises for a moment. First, the promise of equity, the promise of basic fairness. The sad fact is that at the very moment that some Americans were asked to sacrifice, those at the top, those whom you are trying to protect today, were told that they could have it both ways. They could have a tax benefit. It would be good for them and it would be good for the country. They could have greater tax benefits at no cost to the Treasury and no pain to the economy as a whole.

This is not my personal assessment of what happened. This is not just a general public perception of what the Reagan program has done.

The Congressional Budget Office reports—now, this is the Congressional Budget Office—reports that the total effect of the administration's economic policy between 1982 and 1985—listen to this figure—is to take $20.1 billion away from people below $10,000 a year and it gives—it gives $64.6 billion in benefits to those who earn over $80,000 a year.

This massive and unfair shift in the wealth did not result from luck or accident or from mysterious economic forces. It was the result of legislation that was offered on the floor of this House and passed.

Unfortunately for the country, the sacrifices called for in 1981 have not meant lower deficits, but the highest deficits in history. Instead, we have had the highest deficits in history, deficits brought about as a direct result of three factors: the recession, the worst since the 1930's; the highest growth in military spending, and the greatest and most unfair cuts in taxes in the history of this country.

While we were cutting social spending in order to cut the deficit, we were raising the deficit through tax policy and through enormous spending by the Pentagon—to the point that the Director of the Office of Budget and Management has predicted $200-billion-a-year deficits as far as the eye can see.

Today we have an opportunity to address the unmet promises of the last 2 years, the promise of fairness and the promise of lower deficits.

First of all, let us talk about the matter of fairness. That is what last year's election was all about, fairness. Eighty-nine percent of the revenue raised in this bill will come from families with incomes of more than $50,000 a year.

Now, if you think otherwise, you are kidding yourselves, or you do not understand the legislation or you have been given faulty figures.

In other words, $9 out of every $10 raised by this cap will come from the top 5 percent of the people in America, the top 5 percent of the earners in America.

□ 1840

I cannot think of any other tax measure that has done a better job of putting the burden of Federal revenues on those with the greatest financial ability to be able to carry that

burden. They have had it easy for the last 2 years and they should make the sacrifice and they should carry the burden.

Second, it will reduce the deficit by over $20 billion between now and 1986. It will raise this revenue by the fairest means possible, from those with the greatest ability to pay.

Last summer, the House faced a similar opportunity. We were sliding out of control through the worst economic crisis since the 1930's. Fortunately for the country the House acted. We passed a revenue bill, the Rostenkowski-Dole bill, a necessary and a fair revenue measure. Because we acted and showed resolve we convinced the Federal Reserve to loosen up the money supply and to add the monetary stimulus needed to trigger more investment.

This afternoon we face a similar situation. We have before us today a progressive and a fair tax bill that will place a greater part of the burden on those with the greatest resources.

In his budget, the President offered a different approach: The oil tax and an across-the-board surtax. While the President himself calls these "contingency" measures, his own budget assumes enactment of both of these regressive bills.

To me there is no doubt which approach is best for the middle class. The $700 cap takes $9 out of every $10 from the 5 percent at the top. Two-thirds of the administration's proposed tax bill would fall on those who make less than $50,000. That is what the President proposed. And three-quarters of the oil import tax would fall on those who earn less than $40,000 a year.

I urge you to vote for this bill. I urge you to vote for the McCurdy amendment.

Given the options, given the situations, it is by far the fairest thing to do. Most of all, it is a chance to inject a small, necessary dose of equity into the administration's program.

I urge the Members on both sides of the aisle to join me in this small step toward regaining fairness in this country.

The CHAIRMAN. All time has expired.

The question is on the amendment offered by the gentleman from Oklahoma (Mr. McCURDY).

RECORDED VOTE

Mr. McCURDY. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 267, noes 155, not voting 10, as follows:

[Roll No. 216]

NOT VOTING—10

Erlenborn	Leland	Smith, Robert
Gore	Martinez	Thomas (CA)
Heftel	Nielson	
Jacobs	Rose	

□ 1900

The Clerk announced the following pairs:

On this vote:

Mr. Jacobs for, with Mr. Thomas of California against.

Mr. Heftel of Hawaii for, with Mr. Robert F. Smith against.

Mr. SCHUMER changed his vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. HERTEL of Michigan, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 1183), to amend the Internal Revenue Code of 1954 to limit to $700 the maximum reduction in individual income tax resulting from the third year of the rate cuts enacted by the Economic Recovery Tax Act of 1981, pursuant to House Resolution 242, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. The Chair would like to thank the gentleman from

Michigan (Mr. HERTEL). The Chair believes that the gentleman did a marvelous job.

Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. FRENZEL

Mr. FRENZEL. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. FRENZEL. I am, Mr. Speaker.

The SPEAKER. The gentleman qualifies.

The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. FRENZEL moves to recommit the bill, H.R. 1183, to the Committee on Ways and Means with instructions to report the same back forthwith with the following amendment in the nature of a substitute:

On page 1, line 2, strike out all after the enacting clause, and insert in lieu thereof the following:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Spending Reduction Act of 1983."

SEC. 2. REDUCTIONS IN SPENDING.

Legislation shall be enacted before October 1, 1983, which, as certified by the Congressional Budget Office, will reduce outlays in fiscal year 1984 by an amount which achieves spending policy reductions equal to at least $12,000,000,000. For purposes of the preceding sentence, action shall be taken into account only to the extent it will reduce budget authority a sufficient amount to reduce outlays below $852,400,000,000 in fiscal year 1984.

The SPEAKER. The gentleman from Minnesota (Mr. FRENZEL) will be recognized for 5 minutes, and the gentleman from Illinois (Mr. ROSTENKOWSKI) will be recognized for 5 minutes.

Mr. FRENZEL. Mr. Speaker, this is an amendment I tried to move in the Ways and Meams Committee where it was declared out for order. I tried to have it made in order in the Rules Committee, it was not, but now thanks to the adoption of the McCurdy amendment it is in order as a motion to recommit.

This amendment removes the tax increases and mandates a spending cut of $12 billion from the CBO baseline under the economic and technical assumptions agreed to by the conference committee on the budget.

This is not a one-for-one reduction. This is not a one-for-one reduction from no baseline. This is not a two-for-one reduction. This is a 12 to nothing reduction. There is no tax increases in this amendment. There is a $12 billion spending decrease and that decrease is from a known baseline. So that there is some guarantee that it can be achieved. This amendment provides you with a real choice for the first time. If you vote for the motion to recommit, you will vote down the tax increase and you will vote for real spending decreases.

If you do not and vote for the bill, you will have the simple tax increase and the never-never land reduction from no base whatsoever.

This amendment will save a very terrible bill and by voting for it you will be able to redeem yourself and the Congress in the eyes of the people of the United States, the taxpayers. By a single vote you can redeem yourself.

This amendment of mine takes those vital parts of the McCurdy amendment that were left on the floor in the Rules Committee, restores them to the bill and adds additional sinew and muscle to a reduction.

Mr. Speaker, this amendment is a substitute for the bill, the bill which does not have a cap, does not have fairness, does not have a deficit reduction and is not going to pass. But if you will vote for the motion to recommit you will have the clear choice of reducing spending by $12 billion and by seeing that there is no tax increase this year.

I urge my colleagues to vote for the motion to recommit and accept the choice that the taxpayers have thrust upon us, that is, not always try to solve our fiscal problems by raising taxes, but occasionally, once in a while, do a little spending cutting.

I would stress that there is no particular kind of spending that needs to be cut. It can be reduced from any portion of the budget.

Mr. Speaker, I give up. I got better attention up at the Budget Committee, where I was had. And I think by now the House understands the nature of my motion to recommit. It will be a real spending cut and no tax cut.

I urge the adoption of the motion to recommit.

Mr. ROSTENKOWSKI. Mr. Speaker, I rise in opposition to the motion to recommit.

The Members of the House should be made aware of the fact that the motion would only insert a directive with regard to spending, but would also delete the tax cap in its entirety.

I agree with the gentleman from Minnesota, my good friend, that we need to reduce spending as part of any effort. And I look forward to working with the gentleman from Minnesota in implementing as much of the budget resolution as possible in regard to both taxes and spending.

The language of the gentleman from Minnesota does nothing to reduce spending except expressing the hope or an expectation of what might follow.

If we want to reduce the deficit today, we should vote to support the tax cap and then get down to the serious business of working on spending cuts and revenue increases.

I urge a "no" vote on the motion to recommit.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The question was taken; and the Speaker announced that the nays appeared to have it.

Mr. FRENZEL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 181, nays 241, not voting 10, as follows:

[Roll No. 217]

ANSWERED "PRESENT"—1

Hall, Sam

NOT VOTING—11

Corcoran
Erlenborn
Gore
Heftel
Jacobs
Leland
Martinez
Nielson
Rose
Smith, Robert
Thomas (CA)

□ 1940

The Clerk announced the following pairs:

On this vote:

Mr. Jacobs for, with Mr. Thomas of California against.

Mr. Gore for, with Mr. Erlenborn against.

Mr. Leland for, Mr. Sam B. Hall, Jr., against.

Mr. Heftel of Hawaii for, with Mr. Robert F. Smith against.

Mr. YOUNG of Alaska changed his vote from "yea" to "nay."

Mr. SAM B. HALL, JR. Mr. Speaker, I have a live pair with the gentleman from Texas (Mr. LELAND). If he were present, he would have voted "yea." I voted "nay." I withdraw my vote and vote "present."

Mr. SAM B. HALL, JR., changed his vote from "nay" to "present."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill, H.R. 1183.

The SPEAKER pro tempore (Mr. WRIGHT). Is there objection to the request of the gentleman from Texas?

There was no objection.

PERSONAL EXPLANATION

Mrs. ROUKEMA. Mr. Speaker, I was not present during the consideration of H.R. 1492, the bill to establish the Christopher Columbus Quincentennary Jubilee Commission. Official business required my presence in New Jersey. I take this occasion to lend my support to the creation of such an organization, in celebration of the 500th anniversary of the discovery of America.

It is particularly fitting, I think, that we plan to honor the explorer who defied conventional wisdom and those who would set limits on his world at a time when our contemporary Explorer has just left our solar system for worlds beyond. It is appropriate that we plan to celebrate the victory of a man who refused to believe that the world was flat at a time when the *Challenger* shuttle circles our globe far above the oceans which Columbus sailed.

The accomplishments of today are the result of the same courage, the same creativity and the same conviction exemplified by Christopher Columbus.

The Quincentennary Jubilee does not just honor Christopher Columbus' discovery of America. It embodies our own respect and reverence for all who rise to meet the challenges—and so by doing—discover new worlds.

APPOINTMENT OF CONFEREES ON H.R. 3135, LEGISLATIVE BRANCH APPROPRIATIONS, 1984

Mr. OBEY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3135) making appropriations for the legislative branch for the fiscal year ending September 30, 1984, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin? The Chair hears none and, without objection, appoints the following conferees: Messrs. FAZIO, OBEY, MURTHA, TRAXLER, Mrs. BOGGS, and Messrs. HIGHTOWER, WHITTEN, LEWIS of California, CONTE, MYERS, and PORTER.

There was no objection.

CONFERENCE REPORT ON S. 273, EXTENSION OF 8(A) PILOT PROGRAMS

Mr. MITCHELL submitted the following conference report and statement on the Senate bill (S. 273) to amend section 8(a)(1) of the Small Business Act:

CONFERENCE REPORT (H. REPT. No. 98-262)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 273) to amend section 8(a)(1) of the Small Business Act, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

SEC. 1. (a) Clause (B) of the first sentence of section 8(a)(1) of the Small Business Act is amended by striking out ", as shall be designated by the president within 60 days after the effective date of this paragraph," and inserting in lieu thereof "(other than the Department of Defense or any component thereof) as shall be designated by the President,"; and

(b) The designation of an agency pursuant to the amendment made by subsection (a) shall be made not later than sixty days after the date of enactment of this Act.

SEC. 2. The last sentence of section 8(a)(1) of the Small Business Act is amended to read as follows: "No contract may be entered into under subparagraph (B) prior to October 1, 1983 nor after September 30, 1985.".

SEC. 3. The last sentence of section 8(a)(2) is amended to read as follows: "The authority to waive bonds provided in this paragraph (2) may not be exercised prior to October 1, 1983 nor after September 30, 1985.".

Amend the title so as to read: "An Act to amend section 8(a) of the Small Business Act.".

And the House agree to the same.

PARREN J. MITCHELL.
NEAL SMITH.
JOSEPH P. ADDABBO.
RON WYDEN.
DENNIS E. ECKART.
TOM LUKEN.
JOSEPH M. MCDADE.

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 273) to amend section 8(a)(1) of the Small Business Act, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment struck all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment which is a substitute for the Senate bill and the House amendment. The principle differences among the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

1. 8(a) PROCUREMENT PILOT

P.L. 95-507 authorized an 8(a) pilot program which expired September 30, 1980. Under the provisions of the pilot, the President was authorized to select one agency over whom SBA would be given the authority to take procurement contracts for inclusion in SBA's 8(a) program for the development of minority enterprise. The President selected the Department of the Army.

The Senate bill would reopen the pilot program and require the President to select a new agency, other than the Defense Department or a component thereof, within sixty days. The pilot program would expire twenty months after enactment (sixty days for the President to act plus eighteen months for the pilot to operate).

The House amendment also would reopen this pilot program on October 1, 1983 for a period of two years, but would not restrict the authority of the President as to the agency to be selected nor would it require the selection to be done within any particular time frame.

The conference substitute reopens this pilot program on October 1, 1983 and requires the President, within sixty days after enactment, to select a new agency, other than the Defense Department or a component thereof, to participate in the program. The pilot is effective through September 30, 1985.

2. SURETY BOND PILOT

P.L. 95-507 also authorized a surety bond pilot program which expired September 30, 1980. Under this pilot, SBA was authorized to waive surety bond requirements for 8(a)

contractors which are start-up concerns and which have not been participating in the 8(a) program for more than one year. It took SBA more than two years to adopt final regulations. The Agency never granted any waivers.

The Senate bill does not reopen this pilot program.

The House amendment, effective on October 1, 1983, would reopen this pilot program through September 30, 1985.

The conference substitute also reopens this pilot program on October 1, 1983 through September 30, 1985.

The conferees recognize that by its terms the use of this authority will be limited under the eligibility requirements. Under the statute, before any bond requirement is waived, the Administration must determine, among other things, that the 8(a) small business concern is unable to obtain the requisite bond either from a surety company or by using the Administration's guarantee program. Furthermore, the Administration must determine that the contractor has the ability to perform the contract.

On the other hand, the conferees expect that the Administration will take the necessary steps to implement this pilot program and not take any action which would unnecessarily limit potential eligible participants by excluding from entrance into the regular 8(a) program firms which might be eligible for a bond waiver if admitted to the program.

CONFERENCE REPORT ON S. 272, COMMERCE BUSINESS DAILY

Mr. MITCHELL submitted the following conference report and statement on the Senate bill (S. 272) to improve small business access to Federal procurement information:

CONFERENCE REPORT (H. REPT. No. 98-263)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 272) to improve small business access to Federal procurement information, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the House amendment insert the following:

"(a) Section 8(e) of the Small Business Act is amended to read as follows:

"(e)(1) It shall be the duty of the Secretary of Commerce, and the Secretary is hereby empowered, to obtain notice of all proposed competitive and noncompetitive civilian and defense procurement actions of $10,000 and above from any Federal department, establishment or agency (hereinafter in this subsection referred to as 'department') engaged in procurement of property, supplies, and services in the United States; and to publicize such notices in the daily publication Commerce Business Daily, immediately after the necessity for the procurement is established: *Provided,* That nothing in this paragraph shall require publication of such notices with respect to those procurements in which it is determined on a case-by-case basis that (A) the procurement for security reasons is of a classified nature; (B) the Federal department's need for the property, supplies, or services is of such unusual and compelling urgency that the Government would be seriously injured if the time periods provided for in paragraph 2 were complied with; (C) a foreign government reimburses the Federal department for the cost of the procurement of the property, supplies, or services for such government and only one source is available, or the terms of an international agreement or treaty between the United States and a foreign government authorize or require that all such procurement shall be from sources specified within such international agreement or treaty; (D) a statute provides that the procurement be made through another Federal department or from a specified source; (E) the procurement is for utility services and only one source is available; (F) the procurement is made against an order placed under a requirement or similar contract, including orders for perishable subsistence supplies; (G) the procurement results from acceptance of a proposal pursuant to the Small Business Innovation Development Act of 1982 or an unsolicited proposal from an educational institution that demonstrates a unique or innovative research concept and publication of such unsolicited proposal would improperly disclose the originality of thought or innovativeness of the proposed research; or (H) it is determined in writing by the head of the Federal department, with the concurrence of the Administrator, that advance notice is not appropriate or reasonable.

"(2) Whenever a Federal department is required to publish notice of procurement actions pursuant to paragraph (1) of this subsection, such department shall not—

"(A) issue a solicitation until at least fifteen days have elapsed from the date of publication of a proper notice of the action in the Commerce Business Daily, except if the solicitation is for procurement of requirements categorized as research or development effort, in which case until at least thirty days have elapsed from the date of such publication;

"(B) foreclose competition until at least thirty days have elapsed from either (i) the date of issuance of the solicitation, or (ii) in the case of orders under a basic agreement, basic ordering agreement, or similar arrangement, the date of publication of a proper notice of intent to place the order; or

"(C) commence negotiations for the award of a sole source contract until at least thirty days have elapsed from the date of publication of a proper notice of intent to contract: *Provided,* That nothing in this subparagraph shall prohibit an officer or employee of a Federal department from responding to a request for information.

"(3) Whenever notice is required by paragraph (1), such notice shall include—

"(A) a clear description of the property, supplies, or services to be contracted for, which description is not unnecessarily restrictive of competition;

"(B) the name, address and telephone number of the officer or employee of the Federal department who may be contacted for the purpose of obtaining a copy of either the solicitation or, if the notice is for an intent to contract on a sole source basis, such specification and information as practicable regarding the service or performance to be awarded; and

"(C) solely with respect to notice of intent to contract on a sole source basis, a statement that interested persons are invited to identify their interest and capability to respond to such requirement, or to submit proposals in response to such notice, within the stated period of time provided under paragraph (2).

"(4) Notwithstanding any other provision of law, unless the negotiations would be conducted pursuant to this section or section 9 of this Act, a Federal department may not commence negotiations for the award of a sole source contract for more than $1,000,000 in fiscal year 1984, for more than $500,000 in fiscal year 1985 and for more than $300,000 in fiscal year 1986 and each year thereafter unless—

"(A) the head of the procuring activity or his deputy, on a non-delegable basis, has approved the authority to enter into such contract, and

"(B) the contracting officer for such sole source contract has evaluated the responses to the notice of procurement action required in subparagraph (3)(C):

Provided, That nothing in this subparagraph shall prohibit an officer or employee of a Federal department from responding to a request for information.

"(5) In the case of all procurement actions in excess of $25,000 in which the award of a contract is likely to result in the award of subcontracts under such contract, unless the procurement for security reasons is of a classified nature, the Federal department shall promptly furnish for publication by the Secretary of Commerce a notice announcing the award in the Commerce Business Daily.

"(6) As used in this subsection—

"(A) the term 'sole source contract' means a contract for the purchase of property, supplies or services which is entered into or proposed to be entered into by a Federal department after soliciting and negotiating with only one source.

"(B) The term 'unsolicited proposal' means a proposal that is submitted to a Federal department on the initiative of the submitter for the purpose of obtaining a contract with the United States Government, and which is not in response to a formal or informal request (other than a departmental request constituting a publicized general statement of need in areas of science and technology-based research and development that are of interests to the department).".

(b)(1) Except as to the amendments made to section 8(e)(4) of the Small Business Act as added by section (a) of this Act, the amendments made by this Act shall apply to procurement actions initiated ninety days after the date of enactment of this Act.

(2) The amendments made to section 8(e)(4) of the Small Business Act as added by section (a) of this Act shall apply to procurement actions initiated on or after October 1, 1983.

(3) The provisions of this Act shall apply to the Tennessee Valley Authority only with respect to procurements to be paid from appropriated funds.

And the House agree to the same.

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 272) to improve small business access to Federal procurement information, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment struck all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment which is a substitute for the Senate bill and the House amendment. The principal differences among the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

Under section 8(e) of the Small Business Act, the Secretary of Commerce is directed to obtain and publish notice of Federal procurements above stated dollar thresholds, with ten enumerated exemptions. The existing statute does not, however, provide for any time intervals between the date of publication of the notice and the awarding of the procurement contract. Both the Senate bill and the House amendment prohibit a Federal department from issuing a solicitation for at least fifteen days after the date of publication of a notice of the procurement in the *Commerce Business Daily* and further prohibit Federal agencies from foreclosing competition for the procurement for an additional thirty days after either the issuance of the solicitation or in the case of orders under a basic agreement, basic ordering agreement, or similar arrangement, the date of publication of a notice of intent to place the order.

The conferees intend that this authority to publish notices of Federal procurements should continue to be vested in the Secretary of Commerce, or in any newly-created cabinet department that encompasses the trade functions of the Commerce Department. The conferees further expect that any other effort to transfer this authority from the department will be undertaken legislatively.

1. THRESHOLD AMOUNT

Under existing law the publication provisions apply to defense contracts of $10,000 and above and civilian contracts of $5,000 and above.

The Senate bill increases the threshold amount on civilian contracts to $10,000.

The House amendment has no similar provision.

The conference substitute increases the threshold amount on civilian contracts to $10,000.

2. EXEMPTION FOR CLASSIFIED REASONS

Under existing law there is an exemption from publication of procurements which for security reasons are of a classified nature.

The Senate bill re-worded the exemption to apply to procurements whose disclosure to more than one source would compromise national security.

The House amendment contains no similar provision.

The conference substitute retains the existing law language.

3. EXEMPTION FOR FOREIGN GOVERNMENTS

Under existing law there is an exemption from publication of procurements in which only foreign sources are to be solicited.

The Senate bill exempts from publication procurements in which a foreign government is reimbursing the United States for the cost of the procurement or if the terms of an international agreement or treaty require that the procurement be from specified sources.

The House amendment contains no comparable provision.

The conference substitute exempts from publication those procurements in which a foreign government is reimbursing the United States for the cost of the procurement and only one source is available, or if the terms of an international agreement or treaty authorize or require that the procurement be from specified sources.

4. EXEMPTION FOR CONTRACTS WITH OTHER AGENCIES

Under existing law there is an exemption from publication for those procurements which are made from another government department or agency, or a mandatory source of supply.

The Senate bill provides an exemption for procurements if a statute provides that it be made through another Federal department, establishment, or agency or from a specified source.

The House amendment contains no comparable provision.

The conference substitute exempts from publication those procurements for which a statute provides that they be made through another Federal department or from a specified source, or if the procurement results from acceptance of a proposal pursuant to the Small Business Innovation Development Act of 1982.

5. EXEMPTION FOR UTILITY SERVICES

Under existing law there is an exemption from publication of procurements which are for utility services and the procuring agency in accordance with applicable law has predetermined the utility concern to whom the award will be made.

The Senate bill eliminates this exemption.

The House amendment contains no comparable provision.

The conference substitute exempts from publication those procurements which are for utility services if only one source is available.

The conferees recognize that some utility services, such as telephone requirements, can, and should be, competed. However, in other instances, the conferees recognize that competition is impossible due to a monopoly on utility services in a given area, so that a requirement to advertise the procurement would be meaningless. Procurements in this category may include, but are not limited to, electrical services and water supply.

6. EXEMPTION FOR ORDERS UNDER EXISTING CONTRACTS

Under existing law there is an exemption from publication of procurements which are made by an order placed under an existing contract. There is also an exemption for procurements which involve perishable subsistence supplies.

The Senate bill eliminates both exemptions.

The House amendment contains no comparable provision.

The conference substitute exempts from publication those procurements which are made against an order placed under a requirements or similar contract, including orders for perishable subsistence supplies.

The conferees intend that this exemption be used in cases where an agency places an order against an existing contract or a requirements contract. Unless one of the other exemptions from publication applies to the initial, underlying contract, the conferees intend that this original contract only will be synopsized.

The conferees recognize that orders for perishable goods are often made against existing requirements contracts. Under this provision, all such orders for perishables would be exempted from the notice provisions in this law. However, the conferees do intend that whenever possible, and absent any other statutory exemptions, the contract itself, which is certainly not perishable, shall be subject to the notice provisions in this Act.

7. EXEMPTION FOR PERSONAL SERVICES

Under existing law there is an exemption from publication of procurements which are for personal or professional services.

The Senate bill eliminates this exemption.

The House amendment contains no comparable provision.

The conference substitute retains the Senate provision and eliminates the exemption from publication of procurements which are for personal or professional services.

8. EXEMPTION FOR EDUCATIONAL INSTITUTIONS

Under existing law there is an exemption from publication of procurements which are for services from educational institutions.

The Senate bill eliminates this exemption.

The House amendment contains no comparable provision.

The conference substitute exempts from publication those procurements which are for services from educational institutions if they result from an unsolicited proposal from those institutions that demonstrates a unique or innovative research concept and publication of such unsolicited proposal would improperly disclose the originality of thought or innovativeness of the proposed research. For all such other unsolicited proposals, the conferees expect that the procuring department will use its utmost discretion to protect the originality and creativeness of the proposal when the agency is required to synopsize the procurement in the *Commerce Business Daily.*

9. NEGOTIATIONS FOR SOLE SOURCE CONTRACTS

The Senate bill provides that if notice of the procurement action for a sole source contract must be published, the agency cannot commence negotiations for the award of such a contract until at least thirty days have elapsed from the date of

publication of proper notice of intent to contract.

The House amendment contains no comparable provision.

The conference substitute provides that if notice of the procurement action for a sole source contract must be published, the department cannot commence negotiations for the award of such a contract until at least thirty days have elapsed from the date of publication of proper notice of intent to contract, but that the department specifically is authorized to respond to requests for information during the thirty-day time period.

10. CONTENT OF NOTICE

The Senate bill specifies that the notice required to be published include a description of the subject matter of the contract, the name and address of the Federal employee who may be contacted to obtain a copy of the contract solicitation or other information, and a statement that any person may respond or submit a bid, proposal or quotation.

The House amendment contains no comparable provision.

The conference substitute requires that the notice contain a clear description of the subject matter of the contract; the name, address and telephone number of the Federal employee who may be contacted to obtain a copy of the solicitation or additional information, and, with respect to sole source contracts, a statement that interested persons are invited to identify their interest and capability or to submit timely proposals.

11. SOLE SOURCE CONTRACTS

The Senate bill prohibits a procuring activity from commencing negotiations for sole source contracts for more than $100,000 unless the head of the procuring activity has approved the proposal to negotiate and the procuring activity has considered all responses to the procurement action, or unless the negotiation is for an 8(a) contract or an award pursuant to the Small Business Innovation Development Act of 1982.

The House amendment contains no similar provision.

The conference substitute imposes a prohibition against Federal departments commencing negotiations for sole source contracts (except under the 8(a) and Small Business Innovation Research programs) above a threshold amount unless the head of the procuring activity or his deputy, on a non-delegable basis, has approved the authority to enter into such contract and the contracting officer has considered the responses to the notice of procurement action. Federal departments specifically are authorized, however, to respond to request for information.

The conference report provides for a three-year phase in of the dollar threshold at which these provisions will apply. Under the terms of the conference agreement, in fiscal year 1984 the requirements will be imposed on procurement actions in excess of $1 million; in fiscal year 1985 the level will be reduced to $500,000; and in fiscal year 1986 and each year thereafter the level will be $300,000. The conference will carefully monitor all agencies' compliance with the review of the authority to enter into sole source awards, and will consider a further reduction in the threshold level to $100,000.

12. NOTICE OF SUBCONTRACTING OPPORTUNITIES

The Senate bill requires that in all procurement actions in excess of $10,000 in which the award of subcontracts is likely, the Federal department entering the contract shall submit for publication in the *Commerce Business Daily* a notice announcing the award of the prime contract.

The House amendment contains no comparable provision.

The conference substitute requires that in all procurement actions in excess of $25,000 in which the award of subcontracts is likely, the Federal department entering the contract shall submit for publication in the *Commerce Business Daily* a notice announcing the award of the prime contract.

13. TVA EXEMPTION

The *Senate bill* provides that this act shall apply to the Tennessee Valley Authority only to the extent it deems practicable, consistent with the purposes and conduct of its programs and the policies of the Small Business Act.

The House amendment contains no comparable provision.

The conference substitute provides that this Act shall apply to the TVA only with respect to procurements to be paid from appropriated funds.

While the conference report will apply the provisions of this Act, as appropriate, to the Tennessee Valley Authority only for those procurements derived from appropriated funds made available to TVA, conferees expect TVA to voluntarily comply with the provisions of this Act to the greatest extent possible for procurements to be paid from power program funds, as well. In a manner consistent with the policies of the Small Business Act and the TVA's responsibility for the operation of its power programs, the conferees further expect TVA to continue awarding a substantial portion of its procurement contracts to small business, regardless of the source of the procurement funds, and to take appropriate additional action, as necessary, to increase small business awareness of, and participation in, TVA's total procurement effort.

14. EFFECTIVE DATE

The Senate bill is effective as to procurement actions initiated forty-five days after the date of enactment.

The House amendment is effective upon enactment.

The conference substitute makes the Act applicable to procurement actions initiated ninety days after the date of enactment except as to the restrictions on sole source contracts which are effective October 1, 1983.

APPOINTMENT OF CONFEREES ON H.R. 3132, ENERGY AND WATER DEVELOPMENT APPROPRIATION, 1984

Mr. BEVILL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3132) making appropriations for energy and water development for the fiscal year ending September 30, 1984, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

MOTION OFFERED BY MR. CONTE

Mr. CONTE. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. Conte moves that the Managers on the part of the House, at the conference on the disagreeing votes of the two Houses on the bill H.R. 3132, be instructed to insist on the House position on the Garrison Diversion Unit.

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. CONTE) will be recognized for 1 hour.

Mr. CONTE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, first of all I want to apologize to the House that this matter is being brought up at this hour. I had asked the chairman of the committee whether we could take this up Tuesday morning, and appoint conferees and go to conference then.

Believe me, there is nothing in this bill that is urgent. Unfortunately, the Chairman would rather bring it up tonight; and that is the prerogative of the majority.

I know how you feel about being here tonight, but how do you think I feel?

I was supposed to receive the Man of Vision Award from the Friends of Eye Research this evening, and here I am in the well.

But I do not want any of my colleagues to think that I brought this late session about.

Mr. Speaker, I rise in support of my motion to instruct conferees on the energy and water appropriations bill to insist on the House position with regard to the Garrison diversion unit in North Dakota.

Mr. Speaker, as it passed the House the energy and water bill contained no funding for this project. As I noted in my previous floor remarks, this was appropriate in light of the House's overwhelming vote last December to eliminate funding for this project. The Senate, however, has included $22.3 million for this project.

Mr. Speaker, I am offering this motion in order to place the House on record once again in opposition to the Garrison project. All of the problems with this project that existed last December, when we voted 252 to 152 to eliminate the Garrison project still exist.

The project is still economically unsound. The project's costs have escalated fivefold from its authorized $207 million—now hear this—to over $1 billion, which involves a subsidy of approximately $800,000 per irrigation project farm. The project will irrigate only six-tenths of 1 percent of the agricultural land in North Dakota, and will encourage the production of additional crops that are already in surplus.

Let us look at that issue for a moment. The biggest argument for this project is that it is necessary in order to provide irrigation water to permit current dry farmers to grow crops that require irrigation. Yet at the same time the Federal Government is going to be paying billions of dollars to store crops that are in surplus, and, under the payment in kind (PIK) program, to provide crops at Federal expense to farmers who have taken their land out of production.

Mr. Speaker, can it possibly make sense to pay over a billion dollars to complete a massive irrigation project, and then turn right around and pay more Federal money to pay these irrigated farmers not to grow additional crops?

Mr. Speaker, not only does this project not make economic sense, but it would be an environmental disaster. The Garrison project will destroy or degrade 12 congressionally authorized national wildlife refuges—Ducks Unlimited is dead against this project—and an additional 70,000 acres of prime prairie wetlands—vitally important to the survival and breeding of waterfowl that annually migrate between Canada and the United States. Indeed, continued construction of the authorized project would result in the annual destruction of between 175,000 and 350,000 ducks.

There is no adequate wildlife mitigation plan in effect. The most recently proposed plan has major deficiencies, including no provision for obtaining mitigation land except from willing sellers. As my colleagues know, it is often necessary to use the power of eminent domain in order to provide adequate resources of a project of this scope, but this would not be permitted under the proposed mitigation plan. Construction should not continue until there are assurances that mitigation will be adequate.

Finally, Mr. Speaker, there are serious international problems with this project. The completion of this project would violate the 1909 Boundary Waters Treaty between the United States and Canada. Project irrigation would pollute rivers that flow from the United States into Canada, and project waterways will allow the transfer of rough fish into the Canadian watershed, with disastrous results for commercial, sport, and native people's fisheries in the Province of Manitoba.

Mr. Speaker, in response to Canadian objections the project is being constructed in phases, with phase 1 supposedly designed to avoid the transfer of water into the Canadian watershed.

But it is important to recognize that because of Canadian objections, phase 1 may be all that is built. We need to recognize, therefore, that phase 1 is a substantial project in its own right, and not go ahead with phase 1 unless those project features can stand alone.

This is not the case. Phase 1 involves the construction of all project reservoirs and pumping plants and 67 percent of the project's canals, but will irrigate only about one-third of the original acreage.

□ 1950

In other words, phase 1 involves spending about 60 percent of the cost of the original project to irrigate about 34 percent of the land. The cost of phase 1, whether calculated at either the authorized 3.1-percent discount rate or today's higher discount rate, significantly exceeds the benefits to be derived.

Furthermore, phase 1 involves the construction of project features that are needed only if the entire project is going to be built.

The Lonetree Reservoir is one such feature. Lonetree is needed to service irrigation units in the Hudson Bay watershed, and those units are not a part of phase 1.

If the entire project cannot be built because of the international or other considerations, then the proper course of action would be to downsize or modify features of phase 1 to reflect this possibility or to proceed with alternative project features.

Mr. Speaker, this is not a partisan issue, this is a good government issue. This is a question of whether we are going to spend over a billion dollars of the taxpayers' money on a project that is going to provide excessive subsidies to a very small group of people. This is a question of whether we will spend over a billion dollars on a project that will destroy nearly as much good agricultural land as it will irrigate. This is a question of whether to spend over a billion dollars to destroy some of the best migratory bird breeding ground in this country.

Mr. Speaker, today the House was considering legislation to increase taxes, legislation drafted in response to a Federal deficit that still threatens to approach $200 billion.

Perhaps it is appropriate that the day we decide whether to raise taxes we also decide whether we proceed with additional funds for the Garrison diversion project.

Mr. Speaker, can you imagine the headlines in tomorrow's papers: "Congressman X Votes To Raise Taxes, Supports Billion Dollar Boondoggle." It is not a pretty picture, is it?

Mr. Speaker, this project is a blot on the record of the Congress and the House. Finally, Mr. Speaker, let me tell my colleagues something about this vote. I know that the gentleman from North Dakota has pleaded for this project with all of my colleagues, on an individual basis, and has said that this is only a procedural vote.

Let me explain why this is more than a procedural vote. Last December we knocked the Garrison diversion project out of the continuing resolution by a vote of 252 to 152 here in the House of Representatives. I was in that conference, and I saw how we got rolled. The other House conferees simply gave in to the Senate.

I remember the fight we had on the $20,000 farm subsidy limitation that we finally enacted. For 5 years in a row we were rolled by the Senate. And the only way that we ever got that $20,000 limitation on farm subsidies into law was by instructing the conferees. That is what we need to do here. We need to give the House conferees some backbone to stand up to the Senate on this issue.

And do not let anyone kid you; this is not a procedural vote. This will be counted as one of the most important environmental votes that will be cast in the House this year.

Mr. OTTINGER. Mr. Speaker, will the gentleman yield?

Mr. CONTE. I yield to the gentleman from New York.

Mr. OTTINGER. I thank the gentleman for yielding.

Mr. BEVILL. May I ask, is the gentleman from Massachusetts yielding for debate only?

Mr. CONTE. Yes, I yield for debate only.

Mr. OTTINGER. Mr. Speaker, I want to congratulate the gentleman for offering this motion.

The Garrison diversion project has been an environmental disaster from the start. In addition to having the international problems that it does have, it will in fact take far more good farmland out of circulation than it will protect and it will, as the gentleman has indicated, cause great damage to a very important wildlife sanctuary.

The project should never have been proceeded with. I hope everybody will support the motion, on both sides of the aisle, of the gentleman from Massachusetts.

Mr. DORGAN. Mr. Speaker, will the gentleman yield?

Mr. CONTE. Mr. Speaker, I yield 5 minutes for debate only to the gentleman from North Dakota, Mr. DORGAN.

Mr. DORGAN. Five minutes will be enough.

I appreciate the gentleman's generosity in yielding.

First, let me point out that there is only one voice for the State of North Dakota in this House Chamber. The

gentleman in the well is from the State of Massachusetts. I assume he has traveled the width and breadth of North Dakota many, many times, for he has an intimate knowledge of the Garrison diversion project; at least he says he does.

But I also have a fairly good knowledge of the project being built in North Dakota and the historical background for that project.

Let me remind the gentleman from Massachusetts and also the Members of the House of the background for this project. North Dakota did not come to Washington to say to the gentleman from Massachusetts in this Chamber: "We would like you to build us a project."

No, we did not come to Washington at all. In the 1940's Washington came to North Dakota and Washington said: "It is flooding down in Kansas City. We need downstream navigation on the lower reaches of the Missouri. We would like hydroelectric power to be generated out of North Dakota. So, we would like to build a dam up in North Dakota. We would like to permanently flood North Dakota of 500,000 acres: Once we have that permanent flood up there it will not flood Kansas City any longer."

The people from Washington said:

If you will only build this 500,000 acre permanent flood there in North Dakota, it will not flood Kansas City any more, we can navigate the reaches of the Missouri River in the lower part; we can develop hydroelectric power. If you will do that, if you will exhibit that cost as North Dakotans, we will give you a benefit. The benefit is a diversion dam.

We are a semiarid State, 15 inches rainfall. A diversion program is important to us for municipal and industrial water and irrigation.

So, we said: "Fine, we will take the half-million acre flood. You give us a diversion program."

But the fellow from Massachusetts says, "No, now wait a minute, we want to stop, we want to change that bargain with you. You have the cost, now we want to take the benefit away."

The gentleman from Massachusetts says several things that I find interesting. He says first of all this is going to affect Canada.

Look, we are trying to build phase 1 of the project. The President of the United States has told Mr. Trudeau that we are not going to build any phase of the project beyond phase 1 that would put one drop in the Canadian reservoir, not one drop of water in the Hudson Bay drainage site. That is a specious argument.

The gentleman says it is going to injure ducks and geese. Sheer nonsense.

Does the gentleman know about the habitat evaluation procedure? Federal and State game and fish and wildlife people put it together. It says it is going to enhance wild game and it is not going to hurt ducks and geese. What the gentleman is saying is sheer nonsense.

Now, I would like to say this to the gentleman. North Dakota is very patient. North Dakota is a semiarid State that desperately needs the water project. The Garrison diversion project has been promised North Dakota. We are trying to build phase 1, $4 million last year, $23 million was in the Senate bill this year. We are not talking about a lot of money.

And unfortunately, the gentleman misrepresents that project. Frankly, it tries my patience a little bit to hear this year after year after year on the floor of the House.

The question is, Shall we tie the hands of the conferees? Well, the House took out—the Senate took out 200 projects that the House had in. The Senate put in over a dozen projects of its own.

Should we tie the hands of the conferees on a $14 billion bill? No, I do not think we should do it. I do not think it makes any sense.

The gentleman started out his discussion by apologizing to the House for the hour in which he raised this issue. I think the apology ought to be for the misrepresentation and the distortion, not this gentleman, necessarily, has made, but of that made time after time after time in letter after letter to all the Members of this House.

We are trying to build a phase 1, 85,000-acre irrigation project that gives municipal and industrial water to the cities in North Dakota that desperately need it, that does not injure duck and geese and wildlife habitat, does not send one drop of water into Kansas. I would urge the people in this House to consider for a moment the promise made to North Dakota and consider the important aspect that this water project poses to our future.

□ 2000

But most of all consider whether we as Members of the House ought to tie the hands of the conferees to the energy and water bill in what will undoubtedly be a very difficult conference with the Senate Members.

Mr. CONTE. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota (Mr. STANGELAND) for purposes of debate only.

Mr. STANGELAND. Mr. Speaker, I support everything the gentleman from North Dakota says. My district borders North Dakota and perhaps behind the gentleman from North Dakota I am most familiar with the Garrison diversion of the Members of this House.

There has been said that this is a concern to Canada. On October 22, 1982, a diplomatic note was transmitted from the U.S. State Department to the Canadian Office of State advising that we would not violate the International Joint Commission Agreement.

An attorney for the IJC has said the United States has never violated an IJC agreement, never. There is no reason to think that we are going to.

I was just on a meeting with the Canadian-American Interparliamentary Union in Canora this weekend. There is a great deal of concern by those in Manitoba. And my advice to them was that they are whipping a dead horse because we have assured them in every way possible we are not going to violate those boundary water treaties.

The gentleman from Massachusetts talks about the wildlife enhancement and the potholes of North Dakota. And I would like to ask him, did he see those potholes in 1930 and in the dry thirties? And those potholes were nonexistent.

This project assures that there will be potholes, there will be duck habitat, and you will have wildlife.

There is another thing to think about. Studies have shown that agricultural production the last 30 years has increased 50 percent, but the studies also show that if we are going to meet our commitments to world hunger in the next 30 years, we need to increase it 100 percent.

The increased production from Garrison is not going to come this year in surplus times, next year in surplus times, or the year after in surplus times, it is going to come 5, 10 years down the road, but it is going to enhance the economic picture for agriculture in North Dakota.

And as the gentleman from North Dakota says, there was a commitment. North Dakota did not ask for Garrison diversion. They did not ask to lose 500,000 acres of prime farmland. Washington asked for it. And I say this is a commitment that ought to be kept.

Mr. CONTE. Mr. Speaker, I yield such time as he may consume to the gentleman from Florida (Mr. FASCELL) for purposes of debate only.

Mr. FASCELL. I thank the gentleman and I am going to support his motion this time as I did previously to now.

I just want to add one other dimension to this which has been touched upon indirectly. The project is more than a project for North Dakota or even a national project because of the international implications. And those international implications are not new. They have been running for as long as I can remember, serving on the Government Operations Committee, when we first investigated this particular project and raised serious questions way back when.

Regardless of the assurances that have been given to the Canadians at this point, they are still concerned

about this project because they see it as kind of sliced baloney every time we get up in the Congress with respect to the bill. And they know exactly what happens, which is that the House votes to cut the money out and then the Senate, the other body, as a matter of comity, to take care of their Republican Senator, decides to put the money back in.

And they see that process continuing for as long as is necessary. So, therefore, it seems to me they are rightly concerned.

How serious is their concern? Well, I can tell my colleagues it is at the top of the agenda with every one of the meetings that we have with the Canadians when we meet them. And as the gentleman just said who preceded me, we just got back from a conference with the Canadians at Canora and this was again one of the top issues on that agenda.

How serious is it? We, as the American delegation, asked the Canadian Ambassador to come brief us before we went. And it was on the top of his agenda as a matter of grave concern.

All we are saying here, I can understand why the conferees do not want to be instructed, but it seems to me in light of the House vote that it might be beneficial for them at this point not to have a vote on instructions so that when they are confronted with the Senate conferees, they can say, "Hey, fellows, comity can't work this time, our hands are tied."

And the Canadians are saying why can we not wait on this thing, why do we have to keep spending money to go ahead on a project before all of the international bilateral studies are finished. Why can we not wait until they have finished, then go ahead with whatever part of the project we agree upon, on which we have reached agreement. That is eminently fair and sensible to me.

I just wanted to put that element of consideration in this discussion.

Mr. CONTE. Mr. Speaker, I yield 2 minutes to the gentleman from West Virginia (Mr. WISE) for the purposes of debate only.

Mr. WISE. Mr. Speaker, I commend the gentleman.

I regret that I will not be able to offer my amendment on the Stonewall Jackson Dam to instruct. I understand the gentleman's reasons for choosing not to do that.

I would just like to say I commend the gentleman because the gentleman is trying to debate this on the merits and indeed, I have tried to and in the House by an overwhelming vote 2 weeks ago struck money for the Stonewall Jackson Dam on the merits. Just as the gentleman has taken to the well and made his case, so did those opposed to the Stonewall Jackson Dam in my district take to the well.

It is too bad in a way that the Garrison River project is not in West Virginia, because then the House could be treated to the many calls from distinguished West Virginians that many of my colleagues have received. And I know it has been good to bring all of West Virginia to my colleagues and the many, many phone calls my colleagues have received from significant personalities. There is one problem, and the gentleman in the well knows it well, they are not talking to you about the merits anymore, are they? They are not talking to you about the fact that as in the Garrison project the General Accounting Office has panned the Stonewall Jackson Dam and called it gross and imprecise figuring.

They are not talking to you as in the Garrison project of how the cost-benefit ratio is now less than one to one.

That is the problem. The gentleman is arguing this on the merits and a lot of people, the gentleman from Massachusetts, want to argue with political muscle.

I hope that the gentleman's motion will be adopted so that the House conferees go in with a strong message and they know that when the merits have been argued out, no matter how much pushing, no matter how much the shoving, that a House position means something.

Just as Garrison was not inserted in the House bill, just as Stonewall was struck, I do hope that the House conferees will take this message.

I commend the gentleman. And just as the gentleman argued the merits, I do hope that it is political merits, not political muscle that decides the issue.

On June 6, 1983, the House passed by a vote of 213 to 161 an amendment that I offered to strike the $26 million for Stonewall Jackson Dam. This was a vote on the merits of the project. Both sides of the issue were aired and the overwhelming majority of the House agreed that the funding for the project should not proceed.

As the House proceeds to conference on H.R. 3132 I feel it is important to once again review the reasons why the House should maintain their position on this project.

Only 30 percent of the $215 million dam is justified for flood control. Yet the dam would not even contain tributaries which would flood the city of Weston below the damsite. There are no benefits for the city of Pittsburgh, the majority of the benefits would accrue to my district, I should say supposed benefits.

In hearings before the House Government Operations Committee Subcommittee on Energy, Water and Natural Resources, the General Accounting Office provided an analysis that strongly disputed the Corps of Engineers' claims about water pollution control, flood control, recreational benefits and the total benefit cost ratio.

The project is opposed by the West Virginia State Senate, the West Virginia Commissioner of Agriculture, the American Farm Bureau Federation, the local agricultural community, the United Mine Workers of America, State and national environmental organizations, and the National Taxpayers Union.

In the 2 days of hearings, a bipartisan cross-section of the Government Operations Subcommittee stated opinions that further work on the dam would be a waste of money. In a memo of May 9, 1983, the subcommittee staff pointed out that the project is of uncertain economics because of an unrealistic discount rate and the claiming of benefits that may never be realized.

It is a shame that the merits of the project do not allow it to stand up to the economic, environmental and social light of day. Instead, political muscle is being used to move this project forward instead of allowing the issues to speak for themselves which clearly show the project should not be built.

In conclusion I ask the House conferees to stay the course of sound national water policy by not allowing the project to receive funding in the fiscal year 1984 energy and water appropriations bill.

Mr. CONTE. Mr. Speaker, I yield such time as he may consume to the gentleman from South Dakota (Mr. DASCHLE).

Mr. DASCHLE. Mr. Speaker, I rise in opposition to the motion.

Mr. Speaker, last December when the House considered House Joint Resolution 631, providing further continuing appropriations for fiscal year 1983, I reluctantly joined with the majority of my colleagues in not supporting continued funding for the Garrison diversion unit in North Dakota at that time. I cast that vote reluctantly because I knew then, as I know now, that neither North nor South Dakota had yet received the first drop of water development promised to them in return for the massive sacrifices each State made in permitting the construction of the Missouri mainstem dams many years ago. I cast that vote not because I sought to block development of the one major project now under construction which might begin to redeem the 40-year-old promise to the Dakotas, but rather because I wanted to insure the Garrison project would benefit both Dakotas. As I noted then, the State of South Dakota had expressed concerns about the possibility of the continued development of the Garrison project adversely effecting my State. In particular, the quality, quantity, and seasonal variation of return flows from the Garrison project into the James River Basin in

South Dakota were concerns expressed by the people of South Dakota, concerns which I fully share.

In response to these concerns, Public Law 97-273 authorized the Bureau of Reclamation to investigate in cooperation with the State of South Dakota future uses in South Dakota of water delivered by the Garrison project. This investigation, known as the Garrison extension study, is receiving priority attention, is expected to be completed as scheduled, and is expected to provide definitive information in response to the questions and concerns which have arisen regarding the potential effects of the continued development of the Garrison project in the State of South Dakota.

The Garrison extension study is but one aspect of the effort currently being made to address these concerns. Discussions between representatives of the States of South Dakota and North Dakota are another part of this effort. I am pleased to note Warren R. Neufeld, secretary of the South Dakota Department of Water and Natural Resources, earlier this year when testifying before the House Energy and Water Development Appropriations Subcommittee in support of continued funding for the Garrison project reported to Congress that officials of South Dakota and North Dakota have met regarding the Garrison project and accord has been reached on most major issues.

Additionally, my friend and our colleague from North Dakota has also assured me the willingness which has already been demonstrated by the people of North Dakota to recognize and be responsive to the concerns of the people of South Dakota will continue in the future.

The legitimacy of the concerns of the people of South Dakota has been recognized and progress has been made, but this progress will be nullified if the House today approves the motion offered by the gentleman from Massachusetts to instruct the House conferees on H.R. 3231, energy and water development appropriations for fiscal year 1984, to oppose further funding for the Garrison diversion unit. Recognizing the progress which has been made and expecting this progress to be the foundation for the further progress which must be made in the future, I am opposing the motion offered by the gentleman from Massachusetts, a motion which should be noted is nonbinding. I oppose the motion to instruct the conferees in the expectation the Garrison diversion unit will be constructed in a manner which offers important benefits to both South Dakota and North Dakota and therefore begins, finally, to make good on the endlessly delayed pledge of the Federal Government to support the development of the water resources of our two States.

Mr. CONTE. Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania (Mr. EDGAR) for the purposes of debate only.

Mr. EDGAR. Mr. Speaker, I rise in support of the gentleman's motion. I would remind the House that overwhelmingly back in December we faced this very same issue on Garrison diversion. And the gentleman in the well knows that his amendment at that time was voted on in the House when we looked at Garrison diversion and overwhelmingly we supported the gentleman.

I think the Members of this House have heard from the gentleman from Florida and the gentleman from Massachusetts the important arguments dealing with this issue.

The gentleman from West Virginia had attempted to seek an opportunity to instruct the conferees on Stonewall Jackson. That was not available, but I think the House overwhelmingly spoke that they want a merit water policy, a policy based on particular criteria and I think the gentleman from West Virginia (Mr. WISE) and the gentleman from Massachusetts (Mr. CONTE) is in pursuit of that kind of policy, a policy that cares about looking at these projects on their merit, not weighing the emotional arguments that are raised by individual Members, but looking at the actual facts involved.

So I commend the gentleman from Massachusetts for his very clear and concise arguments. And I call on my colleagues on both sides of the aisle, who voted overwhelmingly to exclude the funding for Garrison diversion, to also vote to instruct the conferees to do the same.

Mr. Speaker, I support Congressman CONTE's motion to instruct the House conferees to hold to the House position on the Garrison diversion unit, $1.12 billion Bureau of Reclamation project in North Dakota. While there may be a legitimate obligation of the Federal Government to provide North Dakota with reimbursable irrigation benefits in return for its contributions to the Pick-Sloan program, the Congress is not bound to approve any project desired by a State regardless of its merit. Unfortunately, the highly emotional regional aspects of the Garrison debate undermine any objective examination of the claimed multiple benefits from this project. Such regionalism can only damage the perceived credibility of water projects elsewhere in the country. Our opposition to funding for the Garrison project stems from two major concerns:

First. The economic basis for the project is unsound.

Second. Its lack of an adequate repayment policy will unduly burden the taxpayer and aggravate the annual budget deficit, an increasingly serious national problem.

At today's discount rate of 7.625 percent, the Garrison diversion's direct benefit-cost ratio reveals only 58 cents returned for every dollar invested. The benefit-cost ratio for building the first phase (phase I) of Garrison is even worse, showing only 43 cents returned for every dollar invested. This is because phase I includes virtually all of Garrison's supply works and canals but irrigates only one-third of the proposed crop area. This summer the Bureau fully intends to move ahead with phase I's costly construction even though the rest of the project and hence Garrison's benefits may never be realized due to current treaty commitments with Canada.

As poor as they are, the benefit-cost ratios will be even lower, particularly for phase I, unless all five of the following criteria are met:

ASSUMPTION 1

All Canadian objections must be overcome before releasing Garrison's muncipal water supplies into the Hudson Bay drainage.

FACT

Seventy-five percent of the population in the stated communities reside in the Hudson Bay drainage. Rather than overcome Canadian objections, the vast majority of communities have already opted for less expensive sources of municipal water other than Garrison.

ASSUMPTION 2

The 20 communities in phase I all will use Garrison water, as a major water supply source.

FACT

The Bureau has repeatedly stated that Garrison is to serve as a supplemental municipal supply source. Only 6 of the 20 communities have a stated need for Garrison as a future supply source and feasible alternatives are available.

ASSUMPTION 3

The costs of phase I modification to meet Canada's concerns would not exceed the rough estimates for these items.

FACT

Already, $63.3 million of additional costs for phase I modifications have been projected with only preliminary estimates. Judging from the 560 percent escalation in project costs and the lack of a cost estimate for the Devils Lake restoration plan, we have every reason to believe that costs will exceed initial estimates.

ASSUMPTION 4

About 1.33 million visitor days of use will take place for the nine planned recreation areas.

FACT

Such use would require the equivalent of every North Dakotan spending

at least 2 days every year in one of the nine proposed areas. Yet currently the Devils Lake facilities, which include half the acreage, are highly speculative, no fishing will be allowed in Lonetree Reservoir to meet Canadian concerns, and ample public wildlife-recreation lands already exist throughout the project area.

ASSUMPTION 5

An agriculture benefit of $182.68 per acre yearly profit is realized for phase I.

FACT

Dampened grain crop prices stemming from overproduction have devastated the Midwest's grain market in recent years. Bureau documents fail to give a clear breakdown of what crops would be grown from Garrison. They imply however that composition would be the same as before—mostly grain crops—with a gradual shift toward some speciality crops. Economic Research Service (USDA) records for 1981 show significant losses for irrigated corn throughout the Plains States. Farmers in northeastern Colorado lost $7 per acre per year, southeastern Colorado lost $103 per acre per year, and eastern Nebraska lost $41 per acre per year. Yet dryland farmers which now farm in the Garrison area lost only $12 per acre per year in eastern Nebraska for corn. They also lost $35 per acre per year in western Kansas for winter wheat while irrigated winter wheat lost $47 per acre per year. Even positive year figures from Doanes Agriculture Report for North Dakota showed only a net gain of $43 per acre per year when switching from dryland wheat to irrigated corn. The presumed gain from speciality crops must take into account the highly unstable markets for these items, the large proportion of Garrison land needed for these crops—not typical of other major Plains States irrigation projects—and a required low subsidy price for use of irrigation water.

We have been accused by Garrison proponents of falsely claiming that the Garrison diversion unit will require a heavy expenditure of Federal taxpayer dollars. They state, "The fact is nearly 90 percent of the project will be paid by hydroelectric sales and water user fees."

Mr. Speaker, this logic fails to take into account that all repayment costs allocated to irrigation, whether paid back by irrigators or power users, is completely interest free. The Bureau admits that of the $947 million in irrigation costs—an investment of $3,787 per acre—only a token $19.3 million will be repaid by irrigators—a little over $77 per irrigated acre—over some 50 years beyond Garrison's completion. Power users in the entire Pick-Sloan six-State area will then reimburse the remaining $927 million over another typical period of 50 years at an annual payment of $18.9 million. Due to the Treasury's obligation to pay interest on the bonds issued to finance Garrison's construction, the annual dollar amount necessary to amortize $947 million over 50 years will actually be $90.9 million—figured with an annual interest of 9.5 percent. Therefore, taxpayers will pay $72 million in interest per year for 50 years or a total of $3.6 billion having a net present value of $750 million. This includes only irrigation costs. Adding the nonreimbursable costs for wildlife mitigation, recreation, flood control, highway modification, and cultural resource recovery brings the Federal taxpayers' share for Garrison to roughly 78 percent of total project costs.

The faulty economic assumptions and the lack of a meaningful repayment plan for the Garrison diversion unit constitutes more than adequate reason for the Federal Government to terminate funding for this project. Garrison has met fierce resistance from a broad array of interests since it was authorized nearly two decades ago. As a result only 15 percent of the project's costs have been expended and much of that is recoverable. While there may be more feasible irrigation plans than Garrison, adequate cost reimbursement policies should be a prerequisite for embarking upon any such alternatives. In our view, if irrigation developments are sound long-term economic investments, then irrigators must be expected to pay back their full obligations over a realistic time period. The taxpayers, who certainly did not ask for Garrison, should not be expected to pay for it.

I urge strong support of the Conte motion.

□ 2010

Mr. CONTE. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania (Mr. COUGHLIN).

Mr. COUGHLIN. I thank the gentleman for yielding.

Mr. Speaker, I will not even need 1 minute. I just want to support the gentleman in the well. The gentleman from Massachusetts is exactly right. This House has diverted finish funds for this project by an overwhelming vote. I have seen what has happened in the conference committees, and it is awfully important that this House, if its will is going to be followed, the will of a vote of this House, that this motion be supported, because otherwise we are in trouble in conference.

Mr. CONTE. Mr. Speaker, I yield 2 minutes, for purposes of debate only, to my good friend from Texas (Mr. WRIGHT), the majority leader.

Mr. WRIGHT. Normally I would not get involved in a subject of this kind, but let me just say a couple of things.

First of all, I have seen the benefit-cost ratio. It is a favorable benefit-cost ratio. It has been represented as unfavorable, but it is not unfavorable. It is a favorable benefit-cost ratio.

It has been suggested by my dear friend, Mr. PURSELL, that in deference to our friends in Canada, we should wait. The people in North Dakota have been waiting for almost 40 years. This project was first promised in the 1940's. It was authorized in the mid-1960's. They have been waiting almost 20 years for their first phase to get started after this Congress acted affirmatively to authorize this project.

North Dakota has waited a long, long time. Now, it has a small delegation in the Congress, only one man, and it may be very brave for some of us to beat our breasts and say how pure we are that we cut out the project, the one project that will benefit that arid country up there, where water is more precious than oil or gold or any other mineral.

This will not adversely affect our friends in Canada, the first phase, one project alone, that will assist the farmers in North Dakota to achieve their place in the Sun. They have had their share of paying for our big projects in our cities. They have paid their share of taxes for our metroliners. They have paid their share of taxes for our mass transit systems in our big cities. Now it seems to me very little of us to take this self-righteous attitude and tie the hands of the conferees so that they are not even free to consider the merits of this project in North Dakota.

Therefore, I would urge my Members not to join in this pernicious movement and to vote no on the motion to instruct our conferees.

Mr. CONTE. Mr. Speaker, I yield 1 minute, for purposes of debate only, to my good friend, the gentleman from Indiana (Mr. MYERS).

Mr. MYERS. I thank my friend for yielding.

Mr. Speaker, I regret that I must oppose him, but 16 days ago this body, by a very large vote, rejected a project in West Virginia that Mr. WISE just spoke about, which was more than 40 percent under construction. The reason given by a great many of my colleagues when I talked to you was that this was a project entirely in his district, and he should be the one to decide this.

Now, if my colleagues want to be consistent, and I am sure all of us do tonight, then we will vote with the gentleman from North Dakota and with your committee and not accept this amendment. It is not a new amendment, but it does not tie anybody's hands, but it has no place here. These conferees' hands should not be tied.

Mr. CONTE. Mr. Speaker, I will conclude debate.

First of all, let me tell you how the gentleman from Indiana voted on the amendment of the gentleman from

West Virginia. He voted against it, so I hope that he will be consistent and vote against the gentleman from North Dakota, and be with me on this one.

I have nothing against the gentleman from North Dakota. I love him. But this is a rotten boondoggle, one of the worst I have ever seen.

I regret that the majority leader of the House, Mr. WRIGHT, has seen fit to turn this into a partisan issue with his righteous indignation. Well, let me tell my colleagues that I do not apologize to JIM WRIGHT or to anyone else for my opposition to this project. I have fought this project from the beginning. And it is ridiculous to think that we should support this project simply because the local Member of Congress wants it built—with $1.2 billion of the taxpayers' money. There was a reference earlier to misleading statements about the Canadian position on this project. I have a letter here dated June 14 from the Canadian Ambassador against the project. I have a letter here from the Premier of Manitoba against the project. I have a letter here from the National Taxpayers Union against the project. I have a letter here from the National Audubon Society against the project; one from the Sierra Club against the project; one from the Canadian Nature Federation against the project; one from the Wildlife Society against the project; and a letter from the Coalition for Water Project Review against the project.

The letters follow:

CANADIAN EMBASSY,
Washington, D.C., June 14, 1983.

DEAR SENATOR: The Premier of the Province of Manitoba, the Honourable Howard Pawley, has asked me to bring to your attention the attached which sets out the Province's concern about funds being appropriated for the Garrison water diversion project in fiscal year 1984.

The Government of Canada fully supports Manitoba's concern. We continue to have grave apprehensions about the project's potentially adverse transboundary effects as identified by the International Joint Commission. The Commission concluded that the project as now designed would have seriously damaging effects on Manitoba waters, in violation of the Boundary Waters Treaty between Canada and the United States, by transferring water from one basin in the United States to another basin altogether, largely in Canada, where aquatic conditions are altogether different, and where they would be inalterably damaged by the transfer with great loss to Canada.

We are aware that Congress last year stipulated that funds appropriated for Garrison should be spent only on portions of the project not affecting Canada. This, however, does not alleviate our concern. We see distinct danger in the rapidly increasing rate of funding for the project in the absence of a resolution of the outstanding bilateral issues. It is for this reason that I ask you to bear in mind Canadian and Manitoba concerns during your forthcoming deliberations on appropriations for Garrison.

Yours sincerely,

ALLAN GOTLIEB,
Ambassador.

WINNIPEG, MANITOBA,
June 12, 1983.

DEAR SENATOR: The Senate will be voting soon on the 1984 Energy and Water Development Bill which contains a $22.3 million appropriation for construction of the Garrison Diversion Unit in North Dakota. The Manitoba Government is opposed to the appropriation of additional funds for this project before the outstanding issues between Canada and the United States are fully resolved in accordance with the Boundary Waters Treaty.

In May of this year, a Canadian Parliamentary delegation, composed of representatives of both the Federal and Manitoba Governments and the country's three major political parties, met with a number of Senators and Senate staff aides. During those meetings, the delegation stated that the interbasin transfer of water could have a disastrous impact on Manitoba by reducing water quality and destroying the province's multi-million dollar fishing industry. These concerns have been supported by the findings of the studies conducted by the International Joint Commission.

Additional funding for the project at this time would increase momentum toward completion of a project inconsistent with both the treaty signed by our two countries and formal U.S. Government assurances that bilateral issues would be resolved before construction proceeds on project features which could affect Manitoba. Because 86% of the acres to be irrigated are in the Hudson Bay Watershed and 75% of the return flows drain directly into waters flowing into Canada, we believe it makes little sense to proceed with any further construction on the project until the bilateral issues are resolved. For these reasons, I urge you not to support additional funding for Garrison at this time so that the project may be redesigned so as both to meet the needs of North Dakotans for water and to eliminate the risk that inter-basin transfer of water creates for Manitobans.

HOWARD PAWLEY,
Premier, Province of Manitoba.

NATIONAL TAXPAYERS UNION
Washington, D.C., June 23, 1983.

DEAR REPRESENTATIVE: When the Energy and Water Development Appropriations bill for fiscal year 1984 goes to conference, Congressman Conte will offer a motion to instruct the House conferees to hold to the House position on the Garrison Diversion Unit, $1.12 billion Bureau of Reclamation project in North Dakota. While there may be a legitimate obligation of the federal government to provide North Dakota with reimbursable irrigation benefits in return for its contributions to the Pick-Sloan program, the Congress is not bound to approve any project desired by a state regardless of its merit. Unfortunately, the highly emotional regional aspects of the Garrison debate undermine any objective examination of the claimed multiple benefits from this project. Such regionalism can only damage the perceived credibility of water projects elsewhere in the country. Our opposition to funding for the Garrison project stems from two major concerns:

1. The economic basis for the project is unsound.

2. Its lack of an adequate repayment policy will unduly burden the taxpayer and aggravate the annual budget deficit, an increasingly serious national problem.

At today's discount rate of 7.625 percent, the Garrison Diversion's direct benefit-cost ratio reveals only 58¢ returned for every dollar invested. The benefit-cost ratio for building the first phase (Phase I) of Garrison is even worse, showing only 43¢ returned for every dollar invested. This is because Phase I includes virtually all of Garrison's supply works and canals but irrigates only one third of the proposed crop area. This summer the Bureau fully intends to move ahead with Phase I's costly construction even though the rest of the project and hence Garrison's benefits may never be realized due to current treaty commitments with Canada.

As poor as they are, the benefit-cost ratios will be even lower, particularly for Phase I, unless all five of the following criteria are met:

Assumption 1: All Canadian objections must be overcome before releasing Garrison's municipal water supplies into the Hudson Bay drainage.

Fact: Seventy-five percent of the population in the stated communities reside in the Hudson Bay drainage. Rather than overcome Canadian objections the vast majority of communities have already opted for less expensive sources of municipal water other than Garrison.

Assumption 2: The 20 communities in Phase I all will use Garrison water as a major water supply source.

Fact: The Bureau has repeatedly stated that Garrison is to serve as a supplemental municipal supply source. Only 6 of the 20 communities have a stated need for Garrison as a future supply source and feasible alternatives are available.

Assumption 3: The costs of Phase I modifications to meet Canada's concerns won't exceed the rough estimates for these items.

Fact: Already, $63.3 million of additional costs for Phase I modifications have been projected with only preliminary estimates. Judging from the 560 percent escalation in project costs and the lack of a cost estimate for the Devils Lake restoration plan, we have every reason to believe that costs will exceed initial estimates.

Assumption 4: 1.33 million visitor days of use will take place for the nine planned recreation areas.

Fact: Such use would require the equivalent of every North Dakotan spending at least 2 days every year in 1 of the 9 proposed areas. Yet currently the Devils Lake facilities, which include half the acreage, are highly speculative, no fishing will be allowed in Lonetree Reservoir to meet Canadian concerns, and ample public wildlife-recreation lands already exist throughout the project area.

Assumption 5: An agriculture benefit of $182.68 per acre yearly profit is realized for Phase I.

Fact: Dampened grain crop prices stemming from overproduction have devastated the midwest's grain market in recent years. Bureau documents fail to give a clear breakdown of what crops would be grown from Garrison. They imply however that composition would be the same as before (mostly grain crops) with a gradual shift towards some specialty crops. Economic Research Service (USDA) records for 1981 show significant losses for irrigated corn throughout the plains states. Farmers in northeastern Colorado lost $7/acre/year, southeastern

Colorado lost $103/acre/year, and eastern Nebraska lost $41/acre/year. Yet dryland farmers which now farm in the Garrison area lost only $12/acre/year. Even positive year figures from Doanes Agriculture Report for North Dakota showed only a net gain of $43/acre/year when switching from dryland wheat to irrigated corn. The presumed gain from specialty crops must take into account the highly unstable markets for these items, the large proportion of Garrison land needed for these crops, (not typical of other major plains states irrigation projects), and a required low subsidy price for use of irrigation water.

We have been accused by Garrison proponents of falsely claiming that the Garrison Diversion Unit will require a heavy expenditure of federal taxpayer dollars. They state, "The fact is: nearly 90 percent of the project will be paid by hydroelectric sales and water user fees."

This logic fails to take into account that all repayment costs allocated to irrigation, whether paid back by irrigators or power users, is completely interest free. The Bureau admits that of the $947 million in irrigation costs (an investment of $3,787/acre) only a token $19.3 million will be repayed by irrigators (a little over $77 per irrigated acre) over some 50 years beyond Garrison's completion. Power users in the entire Pick-Sloan six-state area will then reimburse the remaining $927 million over another typical period of 50 years at an annual payment of $18.9 million. Due to the Treasury's obligation to pay interest on the bonds issued to finance Garrison's construction, the annual dollar amount necessary to amortize $947 million over 50 years will actually be $90.9 million (figured with an annual interest of 9.5 percent). Therefore, taxpayers will pay $72 million in interest per year for 50 years or a total of $3.6 billion having a net present value of $750 million. This includes only irrigation costs. Adding the nonreimbursable costs for wildlife mitigation, recreation, flood control, highway modification, and cultural resource recovery brings the federal taxpayers' share for Garrison to roughly 78 percent of total project costs.

The faulty economic assumptions and the lack of a meaningful repayment plan for the Garrison Diversion Unit constitutes more than adequate reason for the federal government to terminate funding for this project. Garrison has met fierce resistance from a broad array of interests since it was authorized nearly two decades ago. As a result only 15 percent of the project's costs have been expended and much of that is recoverable. While there may be more feasible irrigation plans than Garrison, adequate cost reimbursement policies should be a prerequisite for embarking upon any such alternatives. In our view, if irrigation developments are sound long-term economic investments, then irrigators must be expected to pay back their full obligations over a realistic time period. The taxpayers, who certainly did not ask for Garrison, should not be expected to pay for it.

Sincerely,

JILL LANCELOT,
Congressional Affairs Director.

NATIONAL AUDUBON SOCIETY,
Washington, D.C., June 17, 1983.

DEAR REPRESENTATIVE: When the House Energy and Water Development Appropriations bill for FY 1984 goes to conference, Congressman Conte intends to offer a motion to instruct conferees to insist on the House position and oppose new construction funds for the Bureau of Reclamation's Garrison Diversion Unit in North Dakota. On behalf of the nearly one-half million members of the National Audubon Society, I urge you to support this effort to cut funding for the Garrison project.

Since Congress authorized the Garrison project in 1965, a number of major problems—international, environmental and economic—have become known and better understood. Because of these very grave unresolved problems, it seems to us that the most prudent and economically responsible course of action for Congress is to delay any further funding of the project until a comprehensive review of alternatives has been undertaken and until Congress has had an opportunity to determine what alternative, if any, should be built. Garrison is only 15 percent complete. Now is the time—before more money is spent, before we commit ourselves to an irreversible course of construction and before any more damage is done—to address the problems created by this project.

There are many reasons to oppose the Garrison project; let me cite just a few.

The environmental impacts of the Garrison project are substantial: The project will damage or destroy a dozen National Wildlife Refuges. It will destroy 60,000 acres of prairie wetlands—prime waterfowl habitat—and 43,000 acres of native prairie and rangeland; it will damage thousands of additional acres of wetlands and prairies. The alteration of the wetlands habitat alone will result in the average annual loss of 178,000 ducks. These amount to substantial losses in one of the richest, most productive areas in the country for migratory birds and waterfowl production. Conservation groups across the country oppose the project.

The project is an insult to one of this nation's threatened species—the taxpayer: The cost of the project has quintupled since its authorization in 1965 to $1.162 billion. Costs include a subsidy to irrigators of nearly $3,800 per benefitted acre. The cost-benefit ratio—calculated at the artificially low discount rate of 3.125 percent—is only 1 to 1.3. Using the somewhat more realistic rate of 7.625 percent, the cost-benefit ratio falls to 1 to 0.58—or a return of 58¢ for every dollar spent. At a time when taxpayers are being asked to help the American farmer out of his serious plight by paying to keep crops out of production, it makes little sense to spend $1 billion to shift substantial acres in North Dakota from dry-land to irrigation farming. Taxpayer groups oppose the project.

The project will cause irreparable harm to Canada and will violate an international treaty: The government of Canada strongly objects to the project. It is concerned that irrigation return flows from the project will pollute rivers flowing into Canada and that it will result in the introduction of foreign biota into the Hudson Bay watershed. The transbasin flow of water from the Missouri River to the Hudson Bay watershed has the potential of destroying much of Canada's multimillion dollar commercial fishing industry. The Garrison controversy was referred to the International Joint Commission which concluded in 1977 that the project would cause significant harm to Canada and would be a violation of the Boundary Waters Treaty.

The Bureau of Reclamation has sought—unsuccessfully—to assure Canada that it will not build portions of the project which have the potential of affecting Canada's waters. Since nearly 80 percent of the features of the authorized project affect water flowing into Canada, I am somewhat puzzled how the Bureau can make such a claim; the Bureau is proceeding with construction of project features designed and sized to serve irrigation units in the Hudson Bay drainage.

Bureau statements notwithstanding, the Canadians remain steadfastly opposed.

For the reasons listed above, I urge you to support Mr. Conte's efforts to delete FY84 funding for the Garrison project. I also urge that the appropriate committees reexamine the project while substantial changes in the project are still possible and before the further irreversible damage is done.

Thank you for considering our views. More information about Garrison can be obtained by contacting Charlene Dougherty or Fran Lipscomb in our Washington, D.C. office at 547-9009.

Sincerely,

RUSSELL PETERSON,
President.

SIERRA CLUB,
Washington, D.C., June 17, 1983.

DEAR REPRESENTATIVE: On behalf of the Sierra Club, I am writing to urge your support for a motion offered by Congressman Conte to instruct the conferees to hold to the House position for the Garrison Diversion Unit when the FY84 Energy and Water appropriations bill reaches conference; as you know, the House has recommended zero funding for Garrison, a Bureau of Reclamation project in North Dakota.

We believe that no further construction should proceed on the Garrison project until the substantial environmental, economic and international problems associated with the present project are resolved. Congress should have the opportunity to consider alternatives to the present project which address these problems prior to committing more funds for construction. As long as construction is going forward, there is little impetus for any such examination of alternatives or modifications to take place. Construction forecloses many options for later redesign and modification. It also degrades and destroys important natural resources in this country and in Canada.

Garrison is only 15 percent complete. This is the time to review the project and alternatives before costly and irreversible mistakes are made. Your vote to delete funding for Garrison will be an important signal that you want such an analysis to occur.

The Garrison project, as authorized by Congress in 1965, is designed to irrigate 250,000 acres (6/10s of 1 percent of the agricultural land) in North Dakota. The Bureau of Reclamation estimates the total cost for the project at $1.2 billion—a five-fold increase from the original estimate of $207 million. The Bureau's data show that the federal investment per irrigated acre is $3,787, while repayment by the beneficiary is set at $77 per acre.

The project's "benefits" are questionable as well. One of the cited benefits is that of wildlife enhancement. In reality, the project will have a devastating effect on wildlife. Presently North Dakota, with its many shallow lakes and prairie wetlands is one of this nation's more productive waterfowl production areas. The variety of its waterfowl—geese, ducks, shorebirds, and others—is enormous. The wildlife refuges and wetlands located there, besides providing important breeding and nesting areas, are also located on the Central Flyway for North American birds. The project will adversely

affect North Dakota's rich wildlife habitat. It will damage or destroy twelve National Wildlife Refuges and result in the loss of a substantial amount of wetlands acreage in North Dakota—all important habitat.

Virtually nothing is being done to mitigate the wildlife losses. The Interior Department has proposed a new mitigation plan which covers only the "first phase" of construction of the project. The proposed plan is woefully deficient. For example, it simply does not deal with the impacts of the project on the National Wildlife Refuges nor on one-third of the acreage involved in the first phase. The Department claims insufficient information about these areas. So its response is simply to ignore them.

Garrison will inflict substantial environmental harm on Canada as well. The International Joint Commission, which investigated the implications the project will have for Canada, determined Garrison will have substantial adverse impacts on Canada's water resources and will violate the Boundary Waters Treaty between the U.S. and Canada. For example, as the project transfers water from the Missouri River basin to the Hudson Bay watershed, foreign fish will be introduced into Canadian waters. It has been estimated that the new fish species will crowd out the commercially valuable fish in Canada's waters and virtually destroy the multimillion dollar commercial fishery in Manitoba.

In an attempt to address Canada's concerns, the Bureau now states that it is building Garrison in phases, beginning with an 85,000 acre first phase. It further states that it will not construct the remainder of the project until Canada's concerns are addressed. It seems to us that the most prudent course of action would be to determine now whether the Bureau will be able to proceed beyond the initial phase of construction. This initial phase involves the building of almost all of the "hardware" associated with the project—all of the major supply features and two-thirds of the canals. The project features are being built to a size and a capacity to service the entire 250,000 acre project. If there is a reasonable doubt that the whole project will not be built, then doesn't it make sense to admit that now so that we may take steps to "size down" the project features to reflect a smaller project and to quiet Canada's fears about their waters and fisheries? Doesn't it make sense to determine exactly what we are building now so that millions of dollars are not wasted on unneeded or oversized project features?

Congress has a special opportunity and responsibility to halt funding for Garrison and to determine if there are less damaging alternatives to the project. Keep in mind that this project has been on the books for nearly twenty years and is only fifteen percent complete. Another short delay in construction, while the Bureau develops and presents alternatives or modifications to Congress, is clearly the most prudent and positive course of action. We believe the Garrison issue can be resolved in this manner.

Thank you for taking our views into consideration.

Sincerely,

JIM ELDER,
Washington Representative.

CANADIAN NATURE FEDERATION,
Ottawa, Canada, June 11, 1983.

DEAR REPRESENTATIVE: We would like to call to your attention the upcoming vote on funding for the Garrison Diversion in North Dakota. If you are not familiar with this Bureau of Reclamation irrigation project, it is extremely important that you give it some of your time; if you are familiar with it, perhaps from past votes, please review the situation.

The Canadian Nature Federation has voiced strong opposition to the Garrison Diversion since the project's inception. The Nature Federation is a non-profit conservation organization having 18,000 individual members and 91 affiliated groups with a total membership in excess of 150,000. We publish Nature Canada, Canada's national nature magazine which has documented our concerns about the Garrison project over the past several years. Garrison has the potential for extensive adverse effects on wildlife and wildlife habitat of importance to our members and indeed all Canadians.

While the diversion project is wholly the responsibility of the United States government, continued work on the various aspects of the diversion will almost inevitably have serious repercussions on the Canadian environment. In particular, the dams and diversions involved in the construction will intentionally divert waters now flowing in the Missouri River drainage into that of the Hudson Bay watershed. Such a diversion will lead to the introduction of a whole range of exotic animals and plants into the ecosystems of Canada's prairie provinces.

The International Joint Commission has investigated Garrison and determined that it cannot be built without violating the Boundary Waters Treaty between the United States and Canada. The foreign biota and the pollution introduced by the diversion will result in an estimated loss of 50 to 75 percent of Manitoba's multimillion dollar commercial and sport fisheries. For this reason alone Canadians have legitimate grounds for objecting to the continuation of the project.

Promoters of the project are presently claiming that, by building only phase one at this time, impacts on the Canadian environment can be avoided. This argument is mistaken. Lonetree Reservoir, for which the Bureau proposes to let bids for construction, will be located in the Hudson Bay drainage; the recent proposals for construction of this reservior appear to be inconsistent with the conditions of a recent agreement by the International Joint Commission.

Furthermore, a recent study by the consulting firm of Wright Water Engineers shows that phase one—the part presently under consideration, and purportedly without impact on Canadian interests—will involve construction of all reservoirs and pumping plants of the Garrison Diversion Unit, and 67 percent of the 258 miles of canals, but will result in irrigation of only about 34 percent of the original 250,000 acres of the project. This initial investment, superficially designed to avoid impact on Canada, will if approved lead almost inevitably to the eventual completion of the project, and to the major and potentially irreversible impacts on the environment of the Canadian prairies.

Also of concern is that North Dakota is perhaps the richest state in the Union in terms of waterfowl production. Yet the project will destroy or damage over 70,000 acres of prime waterfowl marshes, several game management areas and 13 National Wildlife Refuges. In effect, Garrison will cause more damage to the National Wildlife Refuge System than any other water project in history. We are sensitive to this loss of habitat. The estimated loss of close to 200,000 ducks annually would have repercussions on a continental scale.

The Garrison Diversion project, then, is in conflict with American treaty obligations, will cause extremely serious damage to Manitoba's fishing industry and threatens to have unpredictable consequences throughout the Hudson Bay watershed in Canada's prairies. Furthermore, it will constitute the greatest single attack on the National Wildlife Refuge System in history. Present claims that its international impacts can be avoided are naive.

On behalf of our 150,000 associated members, we urge you, therefore, to vote for the deauthorization of the Garrison Diversion project and to support the important initiative of Congressman Conte in this direction.

Yours sincerely,

GREGG SHEEHY,
Conservation Director.

COALITION FOR WATER PROJECT REVIEW,
Washington D.C., June 22, 1983.

DEAR REPRESENTATIVE: Today or tomorrow the House will appoint conferees for H.R. 3132, the Energy & Water Development Appropriation Bill for Fiscal 84. At that time, Representative Silvio Conte will offer a motion to instruct the House conferees to insist on the House position on the Garrison Diversion project in North Dakota and the Stonewall Jackson Dam in West Virginia. The House-passed version of the bill carries no funding for either project, while the Senate-passed version carries $22.3 million for Garrison and $26.0 million for Stonewall Jackson. On behalf of conservationists around the country, we urge your support for the Conte Motion.

It should come as no surprise that some of the most wasteful pork barrel water projects of all are located in states represented on the Senate Appropriations Committee. What is surprising, however, is the dismal record of House conferees in upholding the position of the House on those occasions when this body has gone on record against wasteful water projects. For example, for three consecutive years—FY 79, 80, and 81—the House Appropriations conferees yielded to Senate insistance on funding the discredited—and now deauthorized—Dickey-Lincoln Dam project in Maine, after having reported a House bill containing no funding for this project.

Even more remarkably, the will of the House as expressed last December on the Garrison Diversion and the O'Neill Unit—both rejected by 100 vote margins—was quickly forgotten during the House-Senate conference on H.J. Res. 631, the Continuing Resolution for FY 83.

Against this backdrop, we believe the adoption of the Conte Motion is essential if the will of the House to curb spending on patently wasteful pork barrel projects is ever to be enacted into law.

Much has been said about the many shortcomings of the Garrison Diversion and Stonewall Jackson projects. In both cases, promising alternatives that are less costly in both economic and environmental terms are being disregarded, while local interests count on the Senate to continue Federal spending on these obsolete projects.

This week you will have the opportunity to insist on saving tax dollars; to insist on protecting natural resources; and to insist on common sense. We view the Conte Motion to insist on the House position on Garrison Diversion and Stonewall Jackson

Dam as one of the most important votes to be taken in this Congress to end the insidious pork barrel system.

Sincerely,

Dr. Brent Blackwelder, Washington Representative, Environmental Policy Center; Patrick A. Parenteau, Vice President-Resources Conservation, National Wildlife Federation; William A. Butler, Vice President and General Counsel, National Audubon Society; John A. McComb, Director, Washington Office, Sierra Club.

THE WILDLIFE SOCIETY,
Bethesda, Md., June 10, 1983.

DEAR REPRESENTATIVE: The House Appropriations Committee recommended zero funding in the Energy and Water Appropriations bill for the Garrison Diversion Unit, a Bureau of Reclamation project in North Dakota. The House concurred with that recommendation when it approved the appropriation measure on June 7, 1983. This decision is entirely consistent with the House action last December when funding for Garrison was rejected by a resounding one-hundred-vote margin. We applaud your actions with regard to this project. Congressman Conte intends to offer a motion to instruct the House conferees to insist on the House position and oppose any new construction funds for this project. We urge you to support Congressman Conte's motion.

The Garrison Diversion project is a Bureau of Reclamation irrigation project which will cost the taxpayers over $1 billion to construct. But the dollar figures alone do not express the true costs of this project. Garrison will drain or harm 73,000 acres of prairie wetlands, destroy 66,000 acres of native prairie and grasslands and 4000 acres of woodlands, and will destroy or harm twelve National Wildlife Refuges. To put these losses in perspective, it is important to keep in mind that North Dakota is one of the most productive waterfowl areas in the country; it produces more ducks than any other state in the lower 48. Migratory birds and waterfowl use these important wetland areas to produce their young and for migration habitat. The habitat losses—and the resultant wildlife losses—will be felt beyond North Dakota's borders.

Project proponents claim the environmental damage caused by the project is minimal and that what damage there is will be mitigated. The new proposed mitigation plan is inadequate in terms of total acres as pointed out in the attached resolution of our North Dakota chapter. The plan is based upon unidentified mitigation lands which may or may not be suitable for mitigation purposes. It is also based upon intensive management techniques which will requre long term commitment of personnel, money and other resources to be successful. That sort of commitment from the Department of the Interior seems unlikely. There is no guarantee it will continue.

Garrison also will have substantial harmful effects on Canada. The transfer of water from the Missouri River Basin to the Hudson Bay watershed will pollute Canada's waters and the introduction of foreign biota and rough fish could result in the loss of 50 to 75 percent of Manitoba's commerical and sport fisheries. The International Joint Commission concluded that Garrison would be in violation of the Boundary Waters Treaty between the U.S. and Canada. The Wildlife Society's Manitoba Chapter also is concerned about the effects of the project on Canada.

The Wildlife Society shares the concerns of the North Dakota Chapter as expressed in their resolution. We urge you to support the motion to bind the conferees, continue to oppose funding for the Garrison Diversion project and to work with the appropriate committees to see that an examination of environmentally acceptable alternatives takes place on a timely basis.

Sincerely,

HARRY E. HODGDON,
Executive Director.

NORTH DAKOTA CHAPTER OF THE WILDLIFE SOCIETY—RESOLUTION ON THE WILDLIFE MITIGATION PLAN FOR PHASE I OF THE GARRISON DIVERSION UNIT

Whereas the Garrison Diversion Unit will drain or adversely affect 73,000 acres of prairie wetlands, destroy 66,000 acres of native prairie and grasslands and 4,000 acres of woodlands, require channelization of 142 miles of streams, and impair management of twelve National Wildlife Refuges; and

Whereas the original wildlife mitigation plan of 146,530 acres featuring acquisition and development of existing wetlands would have resulted in net losses for wildlife; and

Whereas the updated wildlife mitigation based upon restoration of drained wetlands developed in the late 1970's to replace project losses would have required 198,000 acres featuring wetland restoration to offset the known habitat losses from the project; and

Whereas the proposed Phase I of the Garrison Diversion Unit would result in approximately one-third of the habitat losses of the full 250,000 acre project, but includes a wildlife mitigation plan of only 41,800 acres; and

Whereas the joint Federal-State-Conservancy District Mitigation Committee which developed the new mitigation plan for the Phase I project has recommended that the McClusky Canal and the Lonetree Reservoir, and Bureau of Land Management lands currently managed for multiple uses including wildlife, be credited toward project mitigation; and

Whereas many of the lands recommended for this new Phase I mitigation plan by the joint Federal-State-Conservancy District Mitigation Committee have not been identified and include lands totally different in location, mitigation suitability, and value for wildlife, especially waterfowl, from those envisioned by the Congress in the authorizing act of August 5, 1965; and

Whereas the same Federal-State-Conservancy District Mitigation Committee has postulated the benefits of the new mitigation plan on undescribed and untested concepts of intensive management of mitigation lands, and has identified for implementation only two intensive management techniques, fencing and establishment of dense nesting cover, which fail to include the normal array of management techniques employed by wildlife agencies in managing wildlife areas; and

Whereas this latest attempt to change the mitigation plan for the controversial Garrison Diversion Unit fails to recognize that the serious problems of the project are the result of its ever-escalating costs of now over $1.2 billion, its potential for severe adverse impacts to Canada, and its dwindling support among the people of North Dakota: now, therefore, be it

Resolved, That the North Dakota Chapter of The Wildlife Society finds the new mitigation plan for Phase I of the Garrison Diversion Unit to be inadequate to offset the wildlife habitat losses caused by Phase I of the project; and be it further

Resolved, That the North Dakota Chapter of The Wildlife Society petitions the Congress of the United States to investigate and to implement an alternative to the authorized Garrison Diversion Unit which will be less costly, will not adversely affect Canada, and will have less severe adverse environmental impacts in this country, thereby requiring less mitigation; and be it further

Resolved, That such an alternative consider irrigation development along the McClusky Canal and the Missouri River, and the use of pipelines to deliver municipal, rural and industrial water throughout the State, including the southwestern and eastern portions; and be it further

Resolved, That copies of this resolution shall be sent to the members of the North Dakota Congressional Delegation, to Congressman Conte of Massachusetts and Congressman Dingell of Michigan, and to other Members of the House and Senate as deemed appropriate.

I did not mislead anyone. I told the truth about this project. If you want to build a Venice without the gondolas, this is the place to do it. Mark my words, they will have more canals in North Dakota than they have in Venice.

Mr. Speaker, I urge the adoption of this motion.

Mr. CONTE. Mr. Speaker, I move the previous question on the motion to instruct.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Massachusetts (Mr. CONTE).

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. CONTE. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 150, nays 215, not voting 67, as follows:

[Roll No. 219]

□ 2030

The Clerk announced the following pairs:

On this vote:

Mr. Johnson for, with Mr. Latta against.

Mr. Porter for, with Mr. Lewis of Florida against.

Mr. Corcoran for, with Mr. Nielson of Utah against.

Mr. BORSKI and Mr. LEVITAS changed their votes from "yea" to "nay."

Mr. CRAIG changed his vote from "nay" to "yea."

So the motion to instruct was rejected.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. Without objection, the Chair appoints the following conferees: Mr. BEVILL, Mrs. BOGGS, Messrs. CHAPPELL, FAZIO, WATKINS, BONER of Tennessee, WHITTEN, MYERS, Mrs. SMITH of Nebraska, Mr. RUDD, and Mr. CONTE.

There was no objection.

GENERAL LEAVE

Mr. WATKINS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous material on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

PERMISSION TO HAVE UNTIL MIDNIGHT, JUNE 28, 1983, TO FILE CONFERENCE REPORT ON H.R. 3132, ENERGY AND WATER DEVELOPMENT APPROPRIATION, 1984

Mr. WATKINS. Mr. Speaker, I ask unanimous consent that the managers may have until midnight Tuesday, June 28, 1983, to file a conference report on the bill (H.R. 3132) making appropriations for energy and water development for the fiscal year ending September 30, 1984, and for other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

MAKING IN ORDER AT ANY TIME ON WEDNESDAY, JUNE 29, 1983, OR ANY DAY THEREAFTER, CONSIDERATION OF CONFERENCE REPORT AND ANY AMENDMENTS IN DISAGREEMENT ON H.R. 3132, ENERGY AND WATER DEVELOPMENT APPROPRIATION, 1984

Mr. WATKINS. Mr. Speaker, I ask unanimous consent that it may be in order at any time on Wednesday, June 29, of next week, or any day thereafter, any rule of the House to the contrary notwithstanding, to consider the conference report and any amendments in disagreement thereto on the bill (H.R. 3132) making appropriations for energy and water development.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

AMENDING RULE XLIX OF RULES OF HOUSE OF REPRESENTATIVES CONCERNING METHOD OF ESTABLISHING STATUTORY LIMIT ON PUBLIC DEBT

Mr. DERRICK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 241, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 241

Resolved, That clause 2 of rule XLIX of the Rules of the House of Representatives is amended to read as follows:

"2. The matter after the resolving clause in any joint resolution described in clause 1 shall be as follows: 'That subsection (b) of section 3101 of title 31, United States Code, is amended by striking out the dollar limitation contained in such subsection and inserting in lieu thereof "$ ".', with the blank being filled in with a limitation equal to the appropriate level of the public debt as set forth, pursuant to section 301(a)(5) of the Congressional Budget Act of 1974, in the concurrent resolution on the budget (whether such resolution was adopted under section 301, 304, or 310 of such Act). Only one joint resolution shall be prepared under clause 1 upon the adoption of any concurrent resolution on the budget; and, if the concurrent resolution set forth a different appropriate level of the public debt (pursuant to such section 301(a)(5)) for each of two separate periods, the blank referred to in the preceding sentence shall be filled in with both the limitation which is to apply for the later of the two periods (specifying the date on which that limitation is to take effect) and the limitation which is to apply for the earlier of such periods.".

SEC. 2. The first sentence of clause 1 of rule XLIX of the Rules of the House of Representatives is amended by striking out "by an amount equal to the difference between such limit and such appropriate level".

The SPEAKER pro tempore. The gentleman from South Carolina (Mr. DERRICK) is recognized for 1 hour.

Mr. DERRICK. Mr. Speaker, under the customs of the House, I yield 30 minutes for the purposes of debate only to the gentleman from Mississippi (Mr. LOTT), and pending that, I yield myself such time as I may consume.

Mr. DERRICK. Mr. Speaker, House Resolution 241 will amend rule XLIX of the Rules of the House of Representatives so that Rule XLIX will reflect changes recently made in the method of changing the statutory limit on the public debt.

House rule XLIX currently directs that, upon adoption of a concurrent resolution on the budget which recommends a change in the limit on the national debt, a joint resolution temporarily increasing (decreasing) the debt limit by the amount recommended in the budget resolution is engrossed by the enrolling clerk, deemed to have passed the House, and is transmitted to the Senate for further legislative action.

If such a concurrent resolution on the budget recommends different appropriate limits on the public debt for two different time periods, two joint resolutions are deemed to have passed, each one changing the debt limit temporarily for one of the two time periods concerned.

From 1969 until enactment of Public Law 98-34 (H.R. 2990) this past May, the U.S. public debt limit consisted of two parts: a permanent debt limit set forth in section 3101(b) of title 31, United States Code, and a temporary increase in that limit, with an expiration date on or before the last day of the fiscal year.

Public Law 98-34, which increased the debt limit to 1,389,000,000,000 (1 trillion, 389 billion dollars) also changed the method of increasing the debt limit. Rather than temporarily increasing the debt limit, it amended the permanent statutory limit contained in section 3101(b) of title 31 to raise that level to the full amount required to allow the Federal Government to meet its financing needs.

In keeping with this change House Resolution 241 would amend rule XLIX so that a joint resolution triggered by the passage of a concurrent resolution on the budget would change the debt limit by amending the permanent limit on the national debt, rather than temporarily increasing that limit. House Resolution 241 also provides that only one joint resolution will be triggered by the passage of a single concurrent resolution on the budget, even if such a concurrent resolution on the budget recommends two different debt limits for 2 different fiscal years.

In such a situation, the joint resolution would provide that the limit recommended for the later period shall be the permanent statutory limit, except that the limit recommended for the earlier period shall be in effect for the duration of that period.

Thus, while only one joint resolution is engrossed and deemed passed, two different debt limits are set. The amount recommended in the budget resolution as the appropriate debt limit level for the current fiscal year will be the effective limit from enactment of the joint resolution until the end of the current fiscal year; thereafter, the amount recommended in the budget resolution as the appropriate level of the public debt for the coming fiscal year will be the statutory limit on the public debt until subsection (b) of section 3101 of title 31 is further amended to increase or decrease it.

The Committee on Rules agrees with the finding of the Committee on Ways and Means that the "use of combined permanent and temporary debt limits complicated both debt management and congressional procedure . . . has outlived whatever usefulness it may have had . . ." and "has become a source of confusion to the public . . ." (House Report 98-121, to accompany H.R. 2990).

The Committee on Rules also believes that it is unnecessary and confusing to have the enactment of a single concurrent resolution on the budget trigger the engrossment and passage of two separate joint resolutions to increase or decrease the public debt.

The committee, therefore, recommends passage of House Resolution 241 so that rule XLIX will conform to the practice of amending the permanent limit on the national debt, rather than increasing the debt limit temporarily, established by the enactment of Public Law 98-34 earlier this year; and so that Congress can eliminate the duplication of effort required by passage of two joint resolutions to achieve a single result.

Mr. Speaker, I urge adoption of House Resolution 241. I yield to the gentleman from Mississippi (Mr. LOTT) for the purposes of debate only.

Mr. LOTT. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, House Resolution 241 amends House rule XLIV regarding an automatic procedure for transferring the public debt limit figure in a final budget resolution to a joint resolution to be sent to the Senate. This is the so-called Gephardt rule adopted back in 1978 to reduce the number of votes Congress would have to take every time it raised the public debt limit. Under the Gephardt rule, once a conference report on a budget resolution was finally adopted, the enrolling clerk in the House would prepare for engrossment a joint resolution containing the amount by which the debt limit was temporarily increased in the budget resolution over the permanent debt limit. That resolution was then sent to the Senate, thus avoiding the need for the Ways and Means Committee to report a separate bill and the House to vote a second time on the same matter.

Mr. Speaker, this year it was necessary for the Ways and Means Committee to report a debt limit bill to fill a gap left by the last budget resolution. In that bill the Ways and Means Committee eliminated the fiction of temporary increases and provided for a new permanent debt limit. At the same time, the chairman of the Ways and Means Committee requested that House Rule XLIV be amended to reflect this change, and also that the rule permit coupling two debt limit figures in the same joint resolution under the Gephardt procedure—one figure for the current fiscal year if there is a revised resolution, and one for the succeeding fiscal year. While the Rules Committee did not carry out the Ways and Means request at that time, the resolution before us today would accomplish that objective.

Mr. Speaker, under the proposed amendment to House rule XLIV, it would be made clear that the Gephardt procedure would be changed to reflect the new permanent public debt limit as opposed to the previous temporary public debt increases. And the rule would also provide for the inclusion of a single joint resolution both the debt levels for the current fiscal year as set forth in a revised resolution, and for the succeeding fiscal year as set forth in the first budget resolution, if two such periods are provided for in a single budget resolution. The rule would further state that the later debt level would specify a debt on which it is to take effect, which would ordinarily be the beginning of the next fiscal year.

Mr. Speaker, the Rules Committee had before it two options. The option not adopted would have required that if two debt levels were included in a budget resolution, the higher of the two would be transferred to the joint resolution. In a statement to our committee, the gentleman from New York (Mr. CONABLE) indicated he would prefer this option since it would help avoid the possibility of a gap occurring between the former ceiling and effective date of the latter ceiling. In other words, we could bump up against the ceiling for the current fiscal year before October 1 when the higher ceiling would take effect. In that instance, much as was required this year, the Ways and Means Committee would be

required to report a debt bill to cover the gap. This runs contrary to the original purpose of the Gephardt rule which was to reduce House votes on debt levels bills. Nevertheless, the rule before us is the one preferred by the chairman of the Ways and Means Committee, and the Rules Committee deferred to his choice in this matter. I do not think this is a major or partisan issue, and will not oppose this rule.

Mr. Speaker, I yield back the balance of my time.

Mr. DERRICK. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

□ 2040

PROVIDING FOR CONSIDERATION OF H.R. 1398, ENERGY CONSERVATION DAYLIGHT SAVING ACT OF 1983

Mr. WHEAT. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 201 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 201

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1398) to promote energy conservation by providing daylight saving time on an expanded basis, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce, the bill shall be considered for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Missouri (Mr. WHEAT) is recognized for 1 hour.

Mr. WHEAT. Mr. Speaker, I yield the customary 30 minutes, for purposes of debate only, to the gentleman from Missouri (Mr. TAYLOR), and pending that I yield myself such time as I may consume.

Mr. Speaker, House Resolution 201 is an open rule providing for 1 hour of debate and a motion to recommit H.R. 1398, the Energy Conservation Daylight Saving Act of 1983.

Mr. Speaker, the Energy Conservation Daylight Saving Act amends the Uniform Time Act of 1966 to give the Nation 2 additional months of daylight saving time. Specifically, the act provides that daylight saving time begin in early March rather than in late April as it now does.

Mr. Speaker, H.R. 1398 also preserves currently existing exemptions from daylight saving time for States totally within a time zone and for States lying across two time zones. Finally, Mr. Speaker, H.R. 1398 empowers the Federal Communications Commission to grant, on a case-by-case basis, before sunrise broadcasting permission to "daylight only" AM stations which would lose morning commuter hour profits because of this measure's later sunrises.

Mr. Speaker, H.R. 1398 is a bill which would conserve an enormous amount of energy for this country. It would also provide additional daylight hours for shopping and recreation. Finally, H.R. 1398 enjoys a great deal of public support.

Mr. Speaker, I know of no controversy on this rule. I urge my colleagues to approve the rule so that we may consider this important piece of legislation.

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 201 is a simple, 1-hour, open rule under which the House will consider legislation highly detrimental to rural America, and that is a bill that adds an additional 2 months to our annual observance of daylight saving time.

This rule contains no waivers of the rules of the House, and it places no limits on germane amendments. The bill, H.R. 1398, will be read for amendment under the 5-minute rule; and the rule allows for one motion to recommit.

This is a simple rule, and an open rule, but I would be remiss in my duties if I allowed the House to be lulled into thinking that the bill it makes in order is a noncontroversial measure.

The Energy and Commerce Committee is on the verge of bringing to the House floor a bill that will mean more Government intrusion into the lives of the American people.

Mr. Speaker, for once I wish this Congress would be content to leave well enough alone. This bill expands, on an absolutely mandatory basis, daylight saving time from 6 months to 8 months.

The committee wants to rush springtime even further, in the misguided and wrong notion that the American people will save energy simply because Washington has decreed that our clocks should be moved forward earlier in the year.

Make no mistake about it, my colleagues, this bill represents another confrontation between rural America and urban America, with very little regard being given to the point of view of those millions and millions beyond the banks of the Potomac River.

Rural Americans have always regarded daylight saving time with dismay. Most all of their children ride buses to school and thus are forced to wait in the cold, dark, and often rainy part of the morning for their transportation. This wait puts these little children at considerable personal risk, all for the convenience of persons who live in large cities on either the east coast or the west coast.

This bill is supported primarily by a bunch of Government bureaucrats at the Department of Transportation who have nothing better to do with their time than to dust off a series of studies carried out in 1972 and 1975, and, of course, analyzed in 1976.

Mr. Speaker, the essence of this bill is to require the Nation to observe 8 months of daylight saving time, apparently on the theory that 6 months of it is not enough. In my opinion, no daylight saving time is probably the best, 6 months is barely tolerable, and 8 months is certainly too much.

And why, Mr. Speaker, does the Nation need to observe 2 additional months of daylight saving time? We were told in the Committee on Rules that this legislation will result in increased daylight recreation and shopping prime time. We were told that convenience store operators support this legislation. We were told that people who want to be able to engage in recreation during daylight hours support this legislation. We were told that this bill will result in "substantial" energy savings.

Well, I have searched through the committee report—and I cannot find where these so-called energy savings are to be had. As a matter of fact, the National Bureau of Standards concluded the following, and I quote:

> The available data does not lead to any conclusions on the possible energy savings, except that further studies would be extremely expensive to perform.

The administration witness from the Department of Transportation said, and again I quote:

> We were unable to establish conclusive evidence that would argue strongly for a permanent change in the Uniform Time Act. The potential benefits of an extended period of daylight saving time were simply too small and difficult to isolate from the larger impacts of seasonal and secular variations and changes in energy availability and prices that were taking place during the experiment.

Mr. Speaker, the argument is going to be made once again, as it was 2 years ago, that this bill continues to allow States the option of observing daylight saving time. I urge my colleagues to read the committee report very closely in this regard, for if they do, they will find that it is an all-or-nothing-at-all proposition. Under the current law, States can opt out entire-

ly from the observance of daylight saving time. Under this bill, States must either choose to observe the entire 8 months of daylight saving time, or forego daylight saving entirely.

Our State legislatures will not have the ability to reject participation in the additional 2 months of daylight saving time this bill creates.

Mr. Speaker, this bill should be soundly defeated when it comes to the floor.

Mr. WHEAT. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. OTTINGER).

Mr. OTTINGER. Mr. Speaker, I rise in support of the rule making in order the consideration of H.R. 1398, the Energy Conservation Daylight Saving Act of 1983, a bipartisan bill jointly cosponsored by me and my ranking minority member, the gentleman from California (Mr. MOORHEAD). The bill extends the period of daylight saving time beyond the present 6-month period to 8 months, by starting daylight saving time on the first Sunday in March, instead of the last Sunday in April.

Last Congress the House passed, by a bipartisan vote of 243 to 165, H.R. 4437, which is identical to the bill before us today. Unfortuntely, the legislation was never taken to a vote in the Senate.

During last Congress we learned of many potential benefits of the legislation, the data for which was derived from experience in 1974 and 1975 when the United States had extended daylight saving time:

Energy savings of about 100,000 barrels of oil equivalent per day during the 2 extra months, according to a study conducted by the Department of Transportation;

As many as 200 fewer traffic fatalities per year, according to studies of the National Highway Traffic Safety Administration;

A reduction in violent crimes of 10 to 13 percent, based upon a study of Washington, D.C., crime statistics by the Law Enforcement Assistance Administration of Washington, D.C.;

Increased recreational time, tourism, and extension of prime shopping hours; and

An extra period of sight and mobility for the hundreds of thousands of Americans suffering from retinitis pigmentosa, a disease which causes night blindness.

The legislation will make the period of daylight saving time symmetrical around the summer solstice, the longest day of the year. As a result, the sunrises under this bill in March and April will be no later than those currently experienced in September and October.

The change in the period of daylight saving time is supported by the Reagan administration, and previous administrations. Public opinion polls also show a 2 to 1 public preference for extended daylight saving time.

At a recent subcommittee hearing, testimony was heard from representatives from the Department of Transportation, the Federal Communications Commission, the Retinitis Pigmentosa Foundation, the Southland Corp., and the National Association of Convenience Stores in support of the legislation.

Enactment of this legislation is a simple step we can take for energy conservation, crime reduction, and the economic recovery of our Nation.

Mr. WHEAT. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

COMMEMORATION OF THE BICENTENNIAL OF THE BIRTH OF SIMON BOLIVAR

Mr. BARNES. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate concurrent resolution (S. Con. Res. 14) commemorating the bicentennial of the birth of Simon Bolivar, and ask for its immediate consideration.

The Clerk read the title of the Senate concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

Mr. LAGOMARSINO. Mr. Speaker, reserving the right to object, and I have no intention of objecting, I wish to commend the gentleman from Maryland, chairman of our Subcommittee on Western Hemisphere Affairs for bringing this measure before us and also commend the gentleman from Florida, (Mr. MICA), the sponsor of this resolution.

It is entirely appropriate that we should honor Simon Bolivar, the liberator of South America, the man who is called the "George Washington" of his continent. The 200th anniversary of the birth of Simon Bolivar occurs on July 24, and it should be a time to reflect on the influence which the independence of the United States had on our neighbors to the South and in turn, how the ideals and example of Simon Bolivar served to reinforce our own commitment to the principles of freedom and democracy.

The legacy of Simon Bolivar can be seen in the six nations of the Bolivarian Republic: Venezuela, Colombia, Panama, Ecuador, Peru, and Bolivia. Their tradition of democratic governments, though interrupted over the past two centuries, still represent an undying search for the goals of freedom and justice for all peoples.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

The Clerk read the Senate concurrent resolution, as follows:

S. CON. RES. 14

Whereas July 24, 1983, marks the bicentennial of the birth of Simon Bolivar, hero of the independence of the Americas;

Whereas Simon Bolivar offered his life to democratic ideals and created a legacy of freedom and independence;

Whereas Simon Bolivar, with his actions and patriotic commitment, forged the nationhood of Bolivia, Colombia, Ecuador, Panama, Peru, and Venezuela;

Whereas, through his political initiative, Simon Bolivar developed the ideal of Pan-Americanism based on independence, sovereignty, unity, and solidarity, and developed the right of all nations to live in peace; and

Whereas Simon Bolivar was the architect of the Treaty of Union, League and Perpetual Confederation at the historical Congress of Panama in 1826, implanting the roots of the oldest international system of cooperation among nations: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the Congress—

(1) expressing the sentiments of the people of the United States, extolls this illustrious figure, Simon Bolivar;

(2) recognizes July 24, 1983, through July 23, 1984, as the bicentennial year of the birth of Simon Bolivar, hero of the independence of the Americas;

(3) calls upon the President to issue a proclamation commemorating the ideals and example of Simon Bolivar;

(4) declares its intention to send a congressional delegation to Venezuela in July 1983 to represent the United States in the official ceremonies of observance of the bicentennial of the birth of Simon Bolivar; and

(5) calls upon the Librarian of Congress, acting through the Congressional Research Service, to conduct a study on the impact of Simon Bolivar on the United States.

SEC. 2. The Secretary of the Senate shall transmit a copy of this concurrent resolution to the President.

Mr. BARNES. Mr. Speaker, Senate Concurrent Resolution 14:

First, expresses the sentiments of the people of the United States in extolling this illustrious figure, Simon Bolivar;

Second, proclaims July 24, 1983, through July 23, 1984, as the bicentennial year of the birth of Simon Bolivar, hero of the independence of the Americas;

Third, calls upon the President to issue a proclamation commemorating the ideals and example of Simon Bolivar;

Fourth, declares the intention of Congress to send a congressional delegation to Venezuela in July 1983 to represent the United States in the official ceremonies of observance of the bicentennial of the birth of Simon Bolivar;

Fifth, calls upon the Congressional Research Service to conduct a study

on the impact of Simon Bolivar in the United States;

Sixth, calls on the Secretary of State to transfer a copy of this resolution to the President.

During my many travels through Latin America I have come to understand what the figure of Simon Bolivar represents to all those who believe in democracy and in the sovereign right of countries to proclaim their independence. Simon Bolivar was a visionary who dreamed of one united Latin American community. The Latin American countries are now paying tribute to his visions, it is only appropriate that the United States should join them in this celebration.

This resolution is supported by the administration. Our Ambassador to the Organization of American States, William Middendorf, has urged us to act on this. The chairman of the Foreign Affairs Committee recently received a letter from the Ambassadors of the six Bolivarian countries in Latin America in support of the resolution.

Senate Concurrent Resolution 14 was adopted by the Senate by voice vote on May 4, and I know of no opposition to it.

A similar measure was introduced in the House by our colleague DAN MICA and was referred jointly to the Committee on Foreign Affairs and the Committee on Post Office and Civil Service. I appreciate the cooperation of the distinguished chairman of the Post Office and Civil Service Committee in agreeing that, in view of the noncontroversial nature of the measure, we should simply accept the Senate version.

● Mr. MICA. Mr. Speaker, I am pleased to rise in support of Senate Concurrent Resolution 14, the companion resolution to legislation I introduced earlier this year commemorating the bicentennial of the birth of Simon Bolivar, hero of the independence of the Americas.

This resolution recognizes July 24, 1983 through July 23, 1984, as the bicentennial year of the birth of Simon Bolivar. Senate Concurrent Resolution 14 calls upon the President to issue a proclamation commemorating the ideals and example of Simon Bolivar, and expresses the intention of the Congress to send a congressional delegation to Venezuela in July 1983 to represent the United States in the official ceremonies of observance of the bicentennial of the birth of this great hero.

Simon Bolivar symbolizes the quest for freedom and democracy in all nations of the Americas. In addition to having been the champion of the struggle for independence from Spain, Bolivar, known by all as the Great Liberator, was proclaimed President of Venezuela, Colombia, Ecuador, and Panama, and served to organize the Governments of both Peru and Bolivia.

His vision of a united America gave rise to the Pan-American ideal we share today, which has gained vitality through the formation and activities of the Organization of American States. The "George Washington of South America," Simon Bolivar had the same faith in the dignity of man, the values of independence and democracy, and the ideal of a strong and united America that has strengthened our national purpose and commitment for the past 200 years.

The United States had a profound effect on Simon Bolivar, who learned from the example of the democracy to the north; and he has, in turn, profoundly affected this Nation through his concept of hemispheric solidarity.

It is fitting that we should acknowledge his influence on this hemisphere and our Nation. It is fitting that we should help to renew the faith in ideals so basic to our way of life—for which Bolivar fought and which he symbolized throughout the Americas.

I would like to add that I truly appreciate the efforts of the gentleman from Maryland, Mr. BARNES; the gentleman from California, Mr. LAGOMARSINO; and Senator LUGAR of Indiana in their help and support for bringing my legislation before the Congress.

Finally, Mr. Speaker, I want to call attention to the assistance of the Permanent Representative to the U.S. Mission of the Organization of American States, Ambassador J. William Middendorf. I look forward to the opportunity for Members of Congress to join with Ambassador Middendorf in presenting this resolution to the peoples of the Americas.

I hope the Congress adopts this resolution so that we may celebrate with other nations of the Americas a symbol of strength, unity, and cooperation through the bicentennial observation of the birth of Simon Bolivar.●

● Mr. ZABLOCKI. Mr. Speaker, I rise in support of Senate Concurrent Resolution 14, commemorating the bicentennial of the birth of Simon Bolivar, hero of the independence of the Americas.

At the outset I wish to commend our colleague from Florida, the Honorable DAN MICA who introduced a companion measure in the House, House Concurrent Resolution 55. That measure was referred to the Committees on Foreign Affairs and Post Office and Civil Service. I also wish to mention and commend the chairman of the Post Office and Civil Service Committee the Honorable WILLIAM D. FORD, and the chairwoman of the relevant subcommittee, the Honorable KATIE HALL, for their support and their agreeing to this expedited procedure.

Mr. Speaker, I would like to quote from a letter I received yesterday from the Ambassadors of the six Bolivarian nations, Bolivia, Equador, Peru, Colombia, Panama, and Venezuela, expressing the significance of the event:

Bolivar is a symbol of the quest for independence, liberty and cooperation among nations in our hemisphere. His bicentennial is being commemorated all over the world. It would be especially significant that it be so in the United States, a country which Simon Bolivar called the "cradle of freedom."

Mr. Speaker, the legacy of Simon Bolivar represents the same ideals of freedom and independence for this hemisphere as does the legacy of George Washington. I urge the unanimous adoption of the resolution.●

The SPEAKER pro tempore. The question is on the Senate concurrent resolution.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BARNES. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate concurrent resolution just concurred in.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

MARITIME DEVELOPMENT BANK ACT OF 1983

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, I introduce today the Maritime Redevelopment Bank Act of 1983. This legislation establishes the Maritime Redevelopment Bank of the United States to promote the revitalization of the maritime industry. It provides capital formation assistance:

First. To vessel operators to purchase modern, efficient vessels, thereby increasing productivity and competitiveness in both domestic and foreign transportation markets; and

Second. To commercial shipbuilders in the form of procurement and investment incentives to undertake managerial, organizational, and technological changes to improve shipyard innovation, productivity, and competitiveness designed to achieve significant reduction in the delivered cost and time of delivery of vessels and other products constructed in domestic shipyards. These indirect incentives in the form of a self-financing program to promote investment in maritime enterprise would substitute for increasingly expensive and inefficient direct subsidy programs of the past.

NATIONAL DIABETES MONTH

(Mr. HOYER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HOYER. Mr. Speaker, I am today introducing a joint resolution to designate the month of November 1983 as "National Diabetes Month." The ongoing war against diabetes has yielded significant advances in basic and clinical research aimed at prevention, diagnosis, and treatment of persons who are afflicted with this disease. Yet, so much more remains to be done.

Eleven million Americans suffer from diabetes. A significant portion of the victims are not yet even aware that they have the disease. Tens of millions of Americans—the friends and families of those with the disease—are personally affected by the grave impact which diabetes has on their loved ones. Over $10 billion are spent each year for health care, disability payments, and premature mortality costs resulting from diabetes.

Health complications arising from diabetes affect a variety of bodily functions and organs. The lasting effects of these complications are extremely severe. For example, the National Diabetes Data Group has reported that:

Diabetes causes almost 50 percent of foot and leg amputations among adults.

Twenty percent of all cases of kidney failure and 15 percent of all blindness are due to diabetes.

Diabetes is a major cause of birth defects and infant mortality.

The United States ranks among the highest five nations in the world in mortality due to diabetes.

Diabetes is a major risk factor for cardiovascular disease.

Persons with diabetes spend twice as many days in hospitals as persons without the disease.

Diabetes, which is the fourth leading cause of visits to general and family practice physicians, places a major drain on our health resources.

Mr. Speaker, the designation of November of this year as "National Diabetes Month" will serve to bring the human and economic costs of diabetes to the wider attention of the American people. It is my sincere hope and belief that this increased understanding of the disease—both by those afflicted and by others—will lead to more intensive research, improved methods of preventing serious complication, new types of treatment, and general awareness of the challenge we face in seeking to lessen the impact of diabetes. I urge the speedy adoption of this joint resolution.

Mr. Speaker, the context of the resolution is as follows:

H.J. RES. 307

Joint resolution designating the month of November 1983 as "National Diabetes Month"

Whereas diabetes kills more than all other diseases except cancer and cardiovascular diseases; and

Whereas eleven million Americans suffer from diabetes and five million seven hundred thousand of such Americans are not aware of their illness; and Whereas $9,700,000,000 annually are used for health care costs, disability payments, and premature mortality costs due to diabetes; and

Whereas up to 85 per centum of all cases of noninsulin-dependent diabetes may be controllable through greater public understanding, awareness and education; and

Whereas diabetes is a leading cause of blindness, kidney disease, heart disease, stroke, birth defects, and lower life expectancy, which complications may be reduced through greater patient and public understanding, awareness, and education: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the month of November 1983 is designated as "National Diabetes Month," and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe that month with appropriate programs, ceremonies and activities.

□ 2050

LEGISLATIVE PROGRAM

(Mr. LOTT asked and was given permission to address the House for 1 minute.)

Mr. LOTT. Mr. Speaker, I ask unanimous consent to address the House for 1 minute for the purpose of receiving the legislative schedule for the rest of today and the week.

I yield to the gentleman from Texas, the majority leader.

Mr. WRIGHT. I thank the distinguished acting minority leader, the gentleman from Mississippi, for yielding.

This concludes the legislative business for the day and for this week. There will be no session tomorrow.

Monday, we will meet at noon. There will be no recorded votes on Monday. All such votes will be postponed until Tuesday, June 28. We will take up one bill on District Day to increase Federal payment authorizations. There is one bill on suspension concerning the Extra Long Staple Cotton Act of 1983. We then will take up the daylight saving time bill on which a rule has just been granted and complete general debate.

On Tuesday, we meet at noon. There are two suspensions. The 1984 Olympic duty suspension and the omnibus minor tariff amendments; both are out of the Ways and Means Committee.

We will postpone votes on suspensions and on that bill debated until the end of the day, Tuesday.

We will take up the Interior appropriation and the Consumer Products Safety Commission amendment and complete consideration of that bill.

On Wednesday and Thursday we meet at 10 a.m. We hope to complete the District of Columbia appropriations, the health insurance for the unemployed, subject to the granting of a rule; the daylight saving time bill and the bill commemorating the 100th birthday of Harry S Truman.

Upon adjournment Thursday, the House will adjourn until noon on Monday, July 11 for the Independence Day recess and the home district work period. Of course, conference reports might be brought up at any time. Any further program will be announced later.

Mr. LOTT. Mr. Speaker, I would just like to inquire of the majority leader, the Members can expect definitely to be out of here on Thursday night; we will complete business on Thursday night?

Mr. WRIGHT. Emphatically. There will be no session on Friday. Upon our adjournment on Thursday, we will be in recess for the Fourth of July period.

Mr. LOTT. All right, sir. In view of the eloquence of the gentleman throughout the day, I wonder if he could feel moved at this point to perhaps give the House the benefit of his description of the origin of a drop of water? Does he feel that perhaps he could give us that information tonight?

Mr. WRIGHT. Oh, it has been an awfully long day. There have been so many eloquent words uttered about water. Perhaps the most eloquent of all was uttered by Kipling when he wrote that magnificent poem:

GUNGA DIN

You may talk o' gin an' beer
When you're quartered safe out 'ere,
An' you're sent to penny-fights an' Aldershot it;
But when it comes to slaughter
You will do your work on water,
An' you'll lick the bloomin' boots of 'im that's got it.
Now in Injia's sunny clime,
Where I used to spend my time
A-servin' of 'Er Majesty the Queen,
Of all them black-faced crew
The finest man I knew
Was our regimental *bhisti,* Gunga Din.
He was "Din! Din! Din!
You limpin' Lump o' brick-dust, Gunga Din!
Hi! *slippey hitherao!*
Water! get it! *Panee lao!*
You Squidgy-nosed old idol, Gunga Din!"
The uniform 'e wore
Was nothin' much before,
An' rather less than 'arf o' that be'ind,
For a piece o' twisty rag
An' a goatskin water-bag
Was all the field-equipment 'e could find.
When the sweatin' troop-train lay
In a sidin' through the day,
Where the 'eat would make your bloomin' eye-brows crawl
We shouted *"Harry By!"*
Till our throats were bricky-dry,

Then we wopped 'im cause 'e couldn't serve us all.
It was "Din! Din! Din!
You 'eathen, where the mischief 'ave you been?
You put some *juldee* in it
Or I'll *marrow* you this minute,
If you don't fill up my helmet, Gunga Din!"
'E would dot an' carry one
Till the longest day was done;
An' 'e didn't seem to know the use o' fear.
If we charged or broke or cut,
You could bet your bloomin' nut,
'E'd be waitin' fifty paces right flank rear.
With 'is *mussick* on 'is back,
'E would skip with our attack,
An watch us till the bugles made "Retire,"
An' for all 'is dirty 'ide
'E was white, clear white, inside
When 'e went to tend the wounded under fire!
It was "Din! Din! Din!"
With the bullets kickin' dust-spots on the green
When the cartridges ran out,
You could 'ear the front-files shout,
"Hi! ammunition-mules an' Gunga Din!"
I sha'n't forgit the night
When I dropped be'ind the fight
With a bullet where my belt-plate should 'a' been.
I was chokin' mad with thirst,
An' the man that spied me first
Was our good old grinnin', gruntin' Gunga Din.
'E lifted up my 'ead,
An' 'e plugged me where I bled,
An' 'e guv me 'arf-a-pint o' water—green:
It was crawlin' an' it stunk,
But of all the drinks I've drunk,
I'm gratefullest to one from Gunga Din.
It was "Din! Din! Din!
'Ere's a beggar with a bullet through 'is spleen
'E's chawin' up the ground,
An' 'e's kickin' all around:
For Gawd's sake git the water, Gunga Din!"
'E carried me away
To where a *dooli* lay,
An' a bullet come an' drilled the beggar clean.
'E put me safe inside,
An' just before 'e died:
"I 'ope you liked your drink," sez Gunga Din.
So I'll meet 'im later on
At the place where 'e is gone—
Where it's always double drill an' no canteen;
'E'll be squattin' on the coals,
Givin' drink to pore damned souls,
An' I'll git a swig in hell from Gunga Din!
Yes, Din! Din! Din!
You Lazarushian-leather Gunga Din!
Though I've belted you an' flayed you,
By the livin' Gawd that made you,
You're a better man than I am, Gunga Din!

Mr. LOTT. I am sorry I asked.

Mr. Speaker, I yield back the balance of my time.

ADJOURNMENT TO MONDAY, JUNE 27, 1983

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at noon on Monday next.

The SPEAKER pro tempore (Mr. DONNELLY). Is there objection to the request of the gentleman from Texas?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

COMMUNICATION FROM THE SPEAKER TO THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Speaker of the House to the Clerk of the House of Representatives:

HOUSE OF REPRESENTATIVES,
Washington, D.C., June 21, 1983.

Hon. BENJAMIN J. GUTHRIE,
Clerk, House of Representatives, H-105, The Capitol, Washington, D.C.

DEAR MR. CLERK: I have reviewed your notification letter of June 21, 1983 informing me, pursuant to the provisions of House Rule L(50), of your receipt of an Order of the United States District Court for the District of Maryland in *George H. Benford* v. *American Broadcasting Companies, Inc., et al.*, regarding certain non-public records of the Select Committee on Aging.

I have consulted with the Majority and Minority Leaders and Whips of the House and I must remind you that the House of Representatives, by adopting House Resolution 176 has pursuant to Rule L(50) exercised its constitutional prerogatives pursuant to article I, section 5, clause 3 of the Constitution and has determined that these records should not be produced for inspection by the plaintiff or the court in the above-mentioned civil litigation.

You are, therefore, without authority to produce these records as the House of Representatives has formally reclaimed and exercised its custody and control over these records.

Sincerely,

THOMAS P. O'NEILL, Jr.,
Speaker.
JIM WRIGHT,
Majority Leader.
THOMAS S. FOLEY,
Majority Whip.
ROBERT H. MICHEL,
Minority Leader.
TRENT LOTT,
Minority Whip.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER pro tempore laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C., *June 21, 1983.*

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: This is to notify you, pursuant to Rule L(50) of the Rules of the House, that I have received by mail, an order of the United States District Court for the District of Maryland ordering that I, or my counsel, appear before Senior Judge Edward S. Northrop ". . . and show cause, if there be any, why an order should not be made holding said Benjamin J. Guthrie in contempt of this Court. . . ."

This order was entered by the Court in *George H. Benford* v. *American Broadcasting Companies, Inc., et al.*, Civil Action No. N-79-2386 a civil damages action pending in that court. I have previously been directed by the House of Representatives, by House Resolution 176, not to provide the Court or the plaintiff with access to certain non-public files of the Select Committee on Aging.

Sincerely,

BENJAMIN J. GUTHRIE,
Clerk, House of Representatives.

GENERAL LEAVE

Mr. McKERNAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include therein extraneous material on the subject of the special order today by the gentleman from Georgia (Mr. GINGRICH).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maine?

There was no objection.

□ 2100

ORBIT '81

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. GINGRICH) is recognized for 60 minutes.

● Mr. GINGRICH. Mr. Speaker, I am honored to join my colleagues today in paying tribute to the Camden, N.J., high school students for their achievement in designing an experiment called Orbit '81, now flying aboard the space shuttle *Challenger.*

Orbit '81 placed the first colony of living creatures into orbit. It is designed to see whether weightlessness affects the colony's social structure. The colony consists of carpenter ants, which are good subjects for a space experiment. The average carpenter ant lives about 4 months, increasing the chances that major events such as births and deaths will occur during the weeklong space flight.

Orbit '81 is sponsored by the RCA Corp. RCA managers and engineers talked for long hours with the students about the technical and managerial aspects of the project. One of the most important lessons learned by the students was problem solving. It took a number of starts, and restarts, and perseverance to get things on track. Many people from the community, NASA engineers, teachers, and the majority of the students from the participating schools helped out by con-

tributing money, manpower, and materials.

Most importantly, the students studied computers and learned how to develop flow charts and programs for the microcomputer that control the experiment's equipment. They learned about basic electronics, modeling, teamwork, and being reliable. Many students felt that they matured greatly during the project because of the responsibilities they had.

The work on this experiment stimulated student interest in science and engineering in general. Elective science course have about 50 percent more students than they did 2 years ago. Students have joined activities such as a model rocket club and a career program called aerospace interface. One of the schools installed a planetarium because of the interest in space. Several former Orbit '81 students are now pursuing science degrees in college.

Working on a real experiment for space sparked a level of interest that was totally unpredictable. It shows that a little stimulus can ignite great intellectual curiosity, innovativeness, and excellence. These high school students have gained an interest in learning that we push them for the rest of their lives. They have learned that individual effort and initiative still mean something in this country.

Orbit '81 demonstrates that a little community involvement and care can in fact produce educational opportunities for our youth—our leaders of tomorrow.

I am delighted to insert a description of this outstanding program by RCA:

The first colony in space won't consist of humans. It will be a colony of carpenter ants, scheduled to go into orbit on STS-7, the next mission of the space shuttle.

The ants—housed in a specially built "ant farm" and placed in a canister about the size of a 30-gallon trashcan—are the subjects in a high school science experiment.

Students from two urban, minority high schools in Camden, N.J. want to see if weightlessness affects the colony's social structure.

The students will get their data from movie and video cameras inside the canister. They have programmed a microcomputer to operate the cameras and lights at regular intervals during the week-long flight, scheduled to begin in June. When the flight is over, the experiment should yield a time-lapsed chronicle of a colony of social creatures living in space.

Called Orbit '81, the experiment started four years ago as a means to interest minority students in science.

"We had a championship chess team, and we've always been known for basketball," says Mrs. Riletta Cream, principal of Camden High School. "But we felt our students weren't as interested in science as we'd like them to be."

Knowing her students needed something stimulating, Mrs. Cream attended a meeting between community leaders and NASA officials who were plugging the educational benefits of the space program. An RCA vice president, also at the meeting saw NASA's "getaway special" program as the answer to Mrs. Cream's problem. Under the program, NASA leases leftover space in the shuttle's cargo bay for small, experimental payloads. RCA would pay the bill ($10,000), the executive said, if the students could conceive and design an experiment to meet NASA's safety and scientific requirements. Working on a real experiment for space, he said, might get students interested in science and engineering.

It did. Elective science courses such as physics and chemistry, have about 50 percent more students than they did two years ago. Students have also joined spinoff activities such as a model rocket club and a career program called "Aerospace Interface." "We installed a planetarium in one of our classrooms to capitalize on the interest our students have about space," says Robert Gottschall, principal of Woodrow Wilson High School. "We're making the planetarium the focal point of our efforts to keep students excited about science." Several former Orbit 1981 students, influenced by the program, have graduated high school and are now pursuing science degrees in college.

PROGRAM STARTED IN 1978

The program that produced these results got off the ground in 1978, propelled by a carefully designed plan that had several criteria.

"We wanted the experiment to be significant and challenging, something the students could be proud of, not ridiculed about," says David Shore, the vice president who has served as RCA's coordinator of the program since its inception. "We specified an enriched three-year science curriculum so the students could tackle the work, and insisted that the idea, whatever it might be, come from a team, not just one student. We also wanted as many students as possible to participate. And to keep interest high over a period of years, we planned field trips, lectures and experiments."

After the Camden Board of Education accepted RCA's offer, teachers from the city's two high schools (Camden and Woodrow Wilson) developed the first of four year-long "space science" courses. Both of the high schools also selected a group of about 15 students who would select and design the experiment. Anticipating a launch date in the three years, officials from RCA and the schools dubbed the program Orbit '81.

The first step, a very basic one, showed students the differences between Earth's environment and conditions in space.

"We felt the students needed to understand how the vaccum of space can produce extreme heat and extreme cold," said Fred Reiss, Camden High School's Orbit '81 coordinator and one of the teachers who developed the new science course. "This was basic information that they needed to pick and later to build an experiment."

BASIC LESSONS DEVELOPED

Reiss and Nick Timpanelli, coordinator of the Orbit '81 program at Woodrow Wilson High School, also developed lessons on basic electronics, the space shuttle program and NASA's "getaway special" requirements.

In line with the plan, RCA engineers came to the schools and lectured on topics such as technology and program management. They also guided the students on field trips to nearby RCA engineering facilities and volunteered their time for weekend outings to places such as NASA's Goddard Space Flight Center, near Washington, D.C.

"We wanted the students to meet and talk to engineers and to know how engineers go about solving a problem," says Tom Chavis, the assistant RCA coordinator. "It was time-consuming, but rewarding," says Chavis, who continued to serve as assistant coordinator even after retiring in 1981.

By the second year of the program, the advisors felt that students could debate what they were going to send into space.

"They discussed crystal-growing experiments, experiments with plants and a few other things," Timpanelli recalls. "But they really like the idea of sending social organisms into space. Finally they decided on ants." A colony of carpenter ants has an observable social structure. Some ants tend to the queen, others care for the eggs she lays, others keep the passages within the colony clear.

WHY ANTS WERE CHOSEN

Ants have several other qualities that make them good subjects for a space experiment. They have hard external skeletons to withstand the jostling and added gravity of liftoff. They live in confined spaces and require few life-support mechanisms. They have ciliated feet that can cling to smooth surfaces—even without gravity. And the average carpenter ant lives about four months, increasing the chances that major events such as births and deaths will occur during the week-long space voyage.

After the subject for the experiment had been chosen, teachers divided the students into teams to work as they might in industry. One team studied the ants and took film of their behavior under normal conditions for later comparison to film of the ants in space. Another team studied computers and learned how to develop flow charts and programs for the microcomputer that will control the experiment's equipment—video and movie cameras, lights and temperature regulators. A third group made an exact-scale model of the canister and tried to find the best way to arrange all the equipment.

During this time, teachers acted as advisers, leaving students to solve their own problems. Students adapted to and learned from this approach.

"It took a lot of maturing for all of us to sit down and do our assignments without someone standing over us," recalls Carolyn White, an Orbit '81 student.

"I learned that your first answer might not always be the right answer, but to keep on trying," said Orbit '81 student Brett Waters. "That helped me in a lot of different classes. It taught me not to give up."

OTHER ACTIVITIES SUPPORT SPACE PROJECT

While Orbit '81 students worked on the experiment, their classmates supported the program in various ways. Art students painted murals of space scenes on science room walls. Journalism students published an Orbit '81 newsletter. Students interested in photography served as visual historians for the project.

On several occasions the project attracted distinguished visitors to the high schools, allowing more students to become active in the program. In February, 1980, Dr. Robert Frosch, then administrator of NASA, visited the schools to learn more about the experiment. In May of 1982 Lt. Col. Guion S. Bluford, Jr., the first black astronaut scheduled for an orbital space mission (Shuttle "Challenger" July 1983), came to the schools to honor students for their work on the almost-complete project. For both of these visits, students wrote, produced and acted in

special assemblies. They painted special backdrops and sewed costumes. Even home economic students contributed by preparing a special luncheon for the visitors and the entourage of media representatives and dignitaries who accompanied them.

By October of 1981 the teams had gathered enough information to design an experiment. A technical advisory committee of RCA engineers, and Temple University biologist John Tarka, approved the students' plan.

MORE STUDENTS BECOME INVOLVED

At this point, more students became active participants in the program. Mechanical drawing students drafted a blueprint of the experiment. Metal shop students followed that blueprint to drill holes and mount braces for the experiment's equipments.

By mid-June of 1982 the completed payload was ready for a "final exam"—a vibration test at RCA's Astro-Electronics plant in nearby Princeton, N.J. A special device, normally used on scientific and communications satellites, would shake the payload about five times harder than the actual shuttle ride.

The test would answer a few big questions. Could the cameras, lights and video recorder, all designed for use in the home, withstand a severe jolting? Would the ants survive vibrations beyond anything they had experienced?

As technicians mounted the assembled payload on to the test platform, several students watched and awaited the outcome. A low, rumbling noise, which produced the vibrations, signaled the start of the test. In 30 seconds the noise grew to a din, then stopped.

RESULTS OF VIBRATION TEST

With the test over, the students hurried toward the canister, unbolted it and grabbed for the ant farm, looking for any sign of life. As the first few ants emerged from the wood dust, one student exclaimed, "They're alive." The rest of the students clapped, a few cheered. Further checks showed lights, cameras and other equipment had survived the test as well. Twice more the equipment and the ants withstood the vibration, each time on a different axis.

"I'm relieved,", said a smiling Fred Reiss. "This the the last major hurdle. The kids have done their part."●

● Mr. FORSYTHE. Mr. Speaker, I would like to join my colleagues today in honoring the Camden, N.J., high school students for their success in designing the special experiment, Orbit '81, now flying on the space shuttle *Challenger.* This indeed is something to be celebrated. Not only did the planning of Orbit '81 teach the students some basic lessons in electronics and differences between the Earth's environment and conditions in space, but almost more importantly, the students learned to experiment with their ideas and to share them with their peers. Some lessons were learned that will be invaluable to these students as they become participating and productive individuals in society.

Orbit '81—an experiment designed to place the first colony of living creatures, carpenter ants, into orbit—was made possible by the collaborative efforts of NASA, RCA, and two urban high schools in Camden, N.J. As a consequence of this experiment, many students are journeying into a world they probably would never have ventured into before. In the past 2 years, student interest in science and engineering curriculums has dramatically increased; enrollment in elective courses such as physics and chemistry has almost doubled. In addition, more than 60 percent of the students who have graduated from the Orbit '81 program are continuing their academic careers in college and are pursuing degrees in engineering, computer science, and related disciplines.

The lessons learned by this experiment should ignite a spark of hope within all of us; a minimum amount of stimulation caused the imagination and ingenuity of tomorrow's leaders to unfold. I feel proud of these high school students and offer them my admiration and congratulations.●

● Mr. McGRATH. Mr. Speaker, I would like to join my colleagues in recognition of the students at two Camden, N.J., high schools who devised Orbit '81 for the current flight of the space shuttle *Challenger.*

This particular experiment is an excellent example of the ingenuity which can be displayed by students who are given a meaningful challenge and the means to bring it to fruition.

The project was started 4 years ago as a means of interesting minority students in science. It is a collaborative effort on the part of NASA, RCA, and the two urban minority high schools in Camden. The purpose of the experiment is to see how a colony of carpenter ants is affected by the weightlessness of space.

My colleagues are familiar with the state of American education today, particularly in the fields of science and math. I think it is significant that in the past 2 years, enrollment in elective science courses, such as physics and chemistry, at Camden High School, has nearly doubled, at least partly as a result of student participation in Orbit '81. Moreover, several former Orbit '81 students, influenced by the program, have graduated high school and are now pursuing science degrees in college.

But the benefits of the program are not purely curricular; the students also learned other values, such as self-reliance and persistence.

As Carolyn White, an Orbit '81 student, put it:

It took a lot of maturing for all of us to sit down and do our assignments without someone standing over us.

And another student, Brett Waters, said:

I learned that your first answer might not always be the right answer, but to keep on trying.

We do not know exactly how the colony of ants will react under zero-gravity conditions; that is the purpose of the experiment. But no matter what we conclude from the experiment, the students who participated in Orbit '81 have already gained an appreciation for the challenge that learning represents. And that makes the entire project worthwhile.●

● Mr. FLORIO. Mr. Speaker, when the space shuttle *Challenger* lifted off from the Kennedy Space Center on June 18, it made me proud, not simply because of the great accomplishments of NASA, or because Sally Ride, our first woman astronaut was on board. I was proud of two high schools in Camden, N.J., which supplied one of the experiments carried aloft. I was proud because this experiment, designed to study the effects of space travel in a colony of carpenter ants, was the product of a 5-year effort of the students of Camden and Woodrow Wilson High Schools, two largely minority urban schools. I was proud because this project, Orbit '81, represented a real team effort both within the school and with the private sector.

The importance of Orbit '81 goes beyond the data gained from the experiment's completion. The importance lies in the drive the students have shown for education. As a former Woodrow Wilson High School student put it, "It gave me something to excel in. I could work with other students, expand my horizons and it made me want to continue my education to the extreme." Since Orbit '81 began, enrollment in science classes has increased 35 to 50 percent at the schools, while enrollment nationally has been trending downward.

Graduates of the program are now enrolled in science programs at a number of colleges and universities, including Swarthmore, the University of Pennsylvania, Rutgers University, and the U.S. Naval Academy. Many students have changed their college plans to pursue science careers. As another student stated, "I was always planning to go to college, but I was planning to major in Journalism because I was fairly good at writing. The prospect of getting involved in engineering or the sciences was the farthest thing from my mind—until I got involved in Orbit '81. Many engineers who visited us and talked with us gave us a very good overview of what it was all about."

The students exhibited their ingenuity in carrying out the project. When the cost of the canister carrying the experiment, priced at $30,000, proved prohibitive, the students constructed their own, to NASA's satisfaction, at the cost of only $75.

On this day, when the participants of Orbit '81 are being honored at a reception this afternoon, by the Congressional Black Caucus, the Congressional Space Caucus, and the New Jersey delegation, a number of people and organizations who aided in the students' completion of the project,

either through financial support or educational guidance, should be mentioned. Mention should be given to RCA Corp., which donated that $10,000 fee to get the experiment aboard the shuttle. Within RCA, special thanks should go to David Shore, RCA coordinator for the program and to Irving K. Kessler, an executive vice president of RCA.

The South Jersey Chamber of Commerce, another representative of the private sector, assisted the school district with a grant to develop an enriched 4-year science curriculum for the Orbit '81 students.

Recognition should also go to those professionals who visited and spoke to the students, engineers from local RCA plants, professors from area universities, and especially to Lt. Col. Guion S. Burford, Jr., the first black astronaut scheduled for a shuttle mission, who visited with the students in 1982.

Finally, the educators themselves deserve thanks. Dr. Charles Smerin, superintendent of Camden City Schools, Robert M. Gottshall and Riletta L. Cream, principals of the two high schools, and Nicholas Timpanelli and Frederick Reiss, coordinators of Orbit '81. Mr. Reiss deserves special recognition for being given New Jersey's Teacher of the Year Award because of his contribution to the project.

Mr. Speaker, I think Orbit '81 shows what can be accomplished with innovative teaching. I think it also shows the potential that exists in the students in our too-neglected urban schools. An Orbit '81 student put it best: "Some people seem to think that young people in Camden schools are always a problem. We have shown that we can do something positive, something that schools with more money and resources have not done. We have shown that we're trying."

Mr. Speaker, for the benefit of my colleagues, I would like to request that the following material be entered into the RECORD.

FACTSHEET: RCA GOVERNMENT SYSTEMS DIVISION—ORBIT '81

GENERAL DESCRIPTION

Orbit '81 was conceived in November 1977, at a meeting between NASA officials and community leaders in the Philadelphia region.

Mrs. Riletta Cream, principal of Camden High School, said there was a need for a program to interest minority students in science. Irving K. Kessler, an RCA executive vice president, offered to pay NASA's $10,000 fee to get a student-built experiment into one of the space shuttle's "getaway special" canisters.

In January of 1978, the Camden School Board approved the concept. Mr. Kessler appointed David Shore, RCA Division Vice President of Business Development, as coordinator of a program to provide technical material and financial assistance to Camden and Woodrow Wilson high schools.

Mr. Shore dubbed the program Orbit '81, anticipating three years of science training that would culminate in a completed experiment.

In May of 1979 a group of students from both schools selected an ant colony as the subject for their experiment because ants have an observable highly sophisticated social structure and for other reasons: (1) ants have hard external skeletons capable of withstanding the force of launch, (2) ciliated feet which cling to smooth surfaces, and (3) have a life cycle which allows for observation of births and deaths in weightlessness.

To record their data, students decided to train video and movie cameras on the ant colony during the planned one-week mission of the space shuttle.

The experiment is computer controlled and is the first shuttle payload capable of operating without crew assistance. However, redundant circuits do exist for crew override in case of emergency.

GETAWAY SPECIAL PROGRAM

The small "getaway special" payloads which NASA accepts for voyages on the space shuttle, are handled on a space-available basis, generally in a first-come, first-served sequence.

The five-cubic-foot canister (about the size of a 30-gallon trashcan) must not draw upon the shuttle's services beyond three on-off controls operated by an astronaut.

The GAS program, as it is called, was created to encourage use of space by researchers from industry and the general public, foster enthusiasm about space among the young, and generally increase knowlege of space.

Users must pay a fee and meet NASA's safety and scientific requirements.

Approximately 380 companies, schools, governments and individual have reserved GAS payloads for future shuttle missions.

Many of the experiments will test the possibility of using the low gravity of space to improve industrial processes and materials. Others, such as the Orbit '81 experiment, seek results on the effect of weightlessness on organisms.

CONDITIONS

Before implementing a program, RCA and school district officials agreed on several conditions:

(1) The experiment had to be significant. It could not be a cause for ridicule because it was too elementary.

(2) A minimum of three years of enriched science courses would be necessary.

(3) The experiment had to be a team effort, rather than the work of a single student or small elite group since the team approach is closer to the problem solving methodology used in industry.

(4) As much as possible, the student body of both schools had to be involved. Thus, journalism students published an Orbit '81 newsletter. Industrial arts students assisted graphical design, manufacturing, fabrication and assembly and art students promoted the project with posters. When Dr. Robert Frosch, NASA administrator, visited the schools, home economics students prepared a special "space meal," and the music department played a "space concert." Also, the dramatics department put on a "space skit." The choir sang an Orbit '81 song.

(5) Student interest was enhanced by lectures, field trips, assemblies and other means.

CURRICULA

Both Camden and Woodrow Wilson high schools have a core group of about 15 Orbit '81 students. In addition, students from journalism, industrial arts, and art curricula have been active participants in the program.

All Orbit '81 students have taken "space science" courses (one each year) developed by the faculty and adminstrators from both schools.

Space science covers such topics as the space environment, the space shuttle, and the shuttle's "getaway special" program.

At Camden High School, teachers and administrators selected Orbit '81 students in their freshman year, based on previous abilities in science and mathematics. Students who accepted were expected to participate in Orbit '81 for four years. They took space science each year and worked on one of the experiment's three teams—computer, ants or engineering design.

The computer team developed flow charts and the computer program for a microprocessor to control the experiment's cameras, lights, air conditioning and other equipment. Another group studied the ants to observe their behavior and discover the conditions needed to keep them alive during the experiment. A third team developed a design to place all the equipment within the NASA canister, which is about the size of a 30-gallon trashcan.

At Woodrow Wilson High School, participation in Orbit '81 was left open to volunteers, regardless of previous academic achievement. Interested students could participate for any number of years, according to Mr. Nick Timpanelli, the program's adviser. Some students, he said, chose to participate for only one year. Others have remained in the program for four years.

EXPERIMENT

The ants will be placed in a specially designed farm that has a wooden frame and non-glare plexiglass.

An RCA consumer-grade video camera and a movie camera, each powered by their own batteries will be used to record the activities of the ants. These cameras, and fluorescent lights will be controlled by an RCA microprocessor. The video camera will record lift-off and immediate weightless activities, and both the video camera and super 8mm camera will photograph the ants periodically.

The video camera will be connected to a recorder in the canister. The individual frames of the movie film will provide still pictures of the ant colony.

The ants will be kept at a temperature between 55 and 85 degrees. A fan, controlled by the microprocessor, will circulate air when necessary.

The students chose an ant colony as the subject of the experiment for a variety of reasons, most important of which is their highly sophisticated social structure, perhaps the nearest approach to human civilization in the insect world.

Other advantages include their hard external skeletons, able to withstand the rigors of lift-off and added gravity, their ability to live in confined spaces with minimal life-support mechanisms, and their ciliated feet which can cling to smooth surfaces, even in the absence of gravity.

The carpenter ants, among the hardiest and largest type ants found in North America, have the ability to withstand wide variations in temperature and for their size (as long as a half inch) which makes them easy

to observe. The four-month average lifespan of the carpenter ant makes it likely that birth, death and other major events in the ants' life cycle will occur during the Space Shuttle's one-week voyage.

RCA'S ROLE

RCA paid NASA's $10,000 fee for the Orbit '81 space aboard the space shuttle.

Engineers from RCA plants and the staff of RCA's Government and Commercial Systems Divisions have lectured students on computers, computer software, amateur radio satellite terminals, and electronic test equipment.

Students have taken several field trips to RCA plants and Laboratory in southern New Jersey (Princeton, Camden and Moorestown).

RCA engineers have served on technical advisory committee for the students' design of the experiment. In addition, the RCA divisions have donated more than $450,000 worth of surplus electronic test equipment to both high schools.

In addition, the microprocessor that will control the experiment's equipment was donated by RCA as was the consumer grade video camera and recorder that will document the ants' space voyage.

RCA Solid State Division, Consumer Products Division and RCA Service Company have donated new equipment, advice and services on a continuing basis throughout the training and development cycle of the Orbit '81 project.

CHRONOLOGY

November 1977: Project conceived at a meeting of NASA officials and community leaders. RCA offers to pay $10,000 NASA fee for small experimental payloads aboard the shuttle.

January 1978: Camden Board of Education endorses and approves a program that will put a student experiment in space.

Summer of 1978: School administrators and teachers start to develop science curricula, aided by a grant from RCA and the Camden School Board.

May 1979: Students select ant colony as the subject for experiment.

July 1979: NASA deems experiment significant and approves.

February 1980: Dr. Robert Frosch, NASA administrator, visits schools and deems Orbit '81 a role model for other high school programs designing experiments for the space shuttle.

October 1981: Students' design for experiment approved by panel of RCA enginneers and biology professor John Tarka of Temple University, Philadelphia.

May 1982: Students complete construction of experiment. Tests scheduled at RCA facility in Princeton, N.J.

September 1982: Students began improvements to the experiment based on advances in the state of the Art.

April 1983: Students complete preparation of the experiment at Kennedy Space Center for loading aboard STS-7.●

ACCORD BETWEEN CONGRESS AND THE FED NEEDED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. GRADISON) is recognized for 5 minutes.

● Mr. GRADISON. Mr. Speaker, now that the question of the leadership of the Federal Reserve has been settled, we can turn our attention to the job we want the Fed to perform, and how Congress can work in concert with the Fed to meet joint objectives. The Fed has something Congress wants: lower interest rates. And we have something they need to do their job: control over fiscal policy. Our highest priority should be given to working cooperatively with the Fed rather than acting like adversaries, with fiscal policy and monetary policy pulling in opposite directions.

There is precedent for such action. Once before the policies of the Federal Reserve were under attack, its treasured independence threatened; the Fed was at loggerheads with another branch of Government; and fear of future inflation was a pervasive concern. This was in 1951, when disagreement between the Treasury and the Fed broke into public view over the Treasury's desire to peg the price of U.S. bonds and the Fed's concern about inflationary increases in the money supply. Out of this controversy came the "Accord of March 4, 1951":

The Treasury and the Federal Reserve System have reached full accord with respect to debt management and monetary policies to be pursued in furthering their common purpose to assure the successful financing of the Government's requirements and, at the same time, to minimize monetarization of the public debt.

Now the Fed and the Congress are at odds over clashes between monetary and fiscal policies. There is fear that the recovery may be dampened or even reversed by rising interest rates caused by competition for funds between a reviving private sector and a deficit-laden Federal Government. Congress wants to know in advance, and with specificity, the Fed's "objectives" for GNP, inflation, and unemployment.

The Fed argues that establishing short-term objectives for these variables would encourage undesirable "fine tuning," place too much emphasis on short-term economic events, and mislead the public into believing that monetary policy can relieve the need for difficult choices on the budget and other areas of economic policy.

While public debate is focused on this disagreement, the basic issue of how to have compatible monetary and fiscal policies remains unresolved.

There is need for a new accord, this time between Congress and the Fed, to define their proper roles in laying the basis for a sustained, noninflationary recovery. There is no more important task for the Fed, if its hard-won gains against inflation are to be preserved, and no greater challenge for the Congress, if the nearly unanimous concern of its Members about large outyear deficits is to be translated into deficit-reducing actions.

The key elements of the 1983 accord should be:

First, a commitment by the Fed not to use its power to influence the money supply and short-term interest rates in a manner that chokes off economic recovery.

Second, credible action by the Congress to reduce the deficit to below 2 percent of GNP by fiscal year 1987; and

Third, a public statement by the Fed and congressional leaders in support of the accord.

Because so much attention has focused on who should chair the Fed, a primary task facing the agency has been given inadequate attention. I am suggesting that the Chairman's goal should not be to make the White House happy, or to satisfy foreign central banks, comfort big city bankers, or reassure the money markets. Instead, the Chairman should strive to mend the tattered Fed-Congress relationship by developing with Congress an accord that will result in lower deficits and a better mix of monetary and fiscal policy.

The accord would aid Congress by assuring that the politically painful steps necessary to reduce the deficit would not be made politically disastrous by a monetary policy that would abort the recovery. Likewise, the accord would give the Fed the assurance that fiscal policy would be such that it could safely pursue a moderate monetary policy.

Without such an agreement, Congress and the Fed risk a continued confrontation that will hinder, if not stifle, economic growth. In the absence of positive action by Congress to reduce deficits, the Fed would likely choose one of two tacks: Either pursue a tight money policy in an attempt to offset stimulative fiscal policy, or pursue a loose money policy in order to accommodate fiscal policy. In either case, the result would be high interest rates and sluggish or negative growth—and further attacks on Congress for ineptitude in reducing deficits and on the Fed's independence, as each continues to blame the other.

Can an accord be reached? Is there anything the Congress—given its track record—can do to convince the Fed and an understandably skeptical public that it will not permit outyear deficits?

I believe there is. It first requires agreement not only that there is a problem, but also that action is needed now to solve that problem; put another way, that it is more likely that economic growth will be stifled by continuing large deficits than it is that economic growth will bring the deficits down to manageable size.

Second, it requires acknowledgement of the political standoff which exists between those who would deal with deficits by cutting spending and those who would deal with deficits through

higher taxes—including deferring tax cuts not yet effective. While members of each group see political advantages in their positions, neither side in this largely ideological war can win the really important battle; both spending restraint and increased revenues are politically necessary to substantially reduce the outyear deficits. The worst possible outcome would be for both the "more domestic spending" and the "no new taxes" forces in Congress to prevail, and go home proclaiming victory.

Finally, it requires action now—in 1983, not in the election-year context of 1984—on the major elements: reduction of the growth in defense spending and phased-in restraints on domestic spending programs—especially those benefitting the nonpoor—and increases in revenue.

Admittedly, it takes a leap of faith to believe that this accord can be achieved. But the stakes make it worth the try.●

THE HIGH TECHNOLOGY RESEARCH AND DEVELOPMENT JOINT VENTURE ACT OF 1983

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. SENSENBRENNER) is recognized for 5 minutes.

● Mr. SENSENBRENNER. Mr. Speaker, I am introducing legislation jointly with the distinguished gentlewoman from Tennessee (Mrs. LLOYD) to help our Nation move forward in developing important new high technologies in such areas as semiconductor chips, microprocessors and supercomputers, sensors, chemical and material sciences, robotics, and alternative energy systems, among many others. This legislation, the High Technology Research and Development Joint Venture Act of 1983, would help our Nation maintain its world economic leadership and stimulate needed research and development activities. It would also have significant secondary benefits including the creation of new jobs, the growth of various support industries and the generation of additional tax revenues through increased economic activity.

As many of my colleagues are aware, our recent economic ills have been caused by several factors. One key factor, pointed out in various economic indicators, has been our country's notable decline in industrial productivity. While there have been impressive innovations in many of our basic industries, the overall rate of growth in America's industrial productivity slowed considerably during the 1970's. In fact, our domestic productivity actually declined a couple of points in 1981. This dangerous trend is one which our Nation cannot afford to tolerate and which must be reversed as soon as possible.

By many accounts our decline in productivity is representative of America's eroding technological leadership and lagging international competitiveness. This situation can be traced to more than a decade of low capital investment and limited R&D spending. Although the United States still leads the world in spending for basic research, a 1980 Harvard Business Review report pointed out that the private sector investment in research and development has been steadily decreasing in recent years with no changes foreseen in the future.

A recent study by the prestigious Business-Higher Education Forum has stressed the strong need to enhance our private industry's ability to compete with foreign ventures in developing and marketing new technologies. Without a firm commitment to basic research and development, our leadership in many new technological areas may be severely challenged in the future. For example, the Japanese are closing fast on the American lead in such areas as microchip technology, threatening U.S. preeminence in this important technology. These tiny electronic devices will be at the heart of our future advances in computers, communications, consumer products and many other areas.

The future challenge to America in technology development is awesome. International competitiveness has made it more difficult than ever to develop and exploit new inventions. It is certainly in our Nation's economic and national security interests to encourage new ideas and develop new technologies, allowing us to move forward and help lay the foundation for our future modern society.

The urgency of our present situation has been made clear in a recent report by a prestigious National Research Council panel. In its report entitled "International Competition in Advanced Technology: Decisions for America," this panel concluded that—

The United States must act now to preserve its basic capacity to develop and use economically advanced technology. This innovative capacity is essential for the self-renewal and well-being of the economy and the nation's military security. Trade in advanced technology products and services will contribute enormously to our economic health. Advanced technology products and processes not only permeate the economy, increasing productivity, but also from the basis of modern defense hardware.

This report also went on to recommend that careful attention be given to "maintaining the health and effectiveness of both university- and industry-based research, education and training."

The legislation we are introducing today represents a significant step in meeting this national challenge. It recognizes that the most effective Federal actions to stimulate long-term private investments in research and development are those that remove potential structural barriers to such investment. This legislation attempts to overcome these institutional barriers and allow a wide range of businesses and firms to carry our productive research on a joint basis.

Several recent reports, including the previously mentioned National Research Council and Business-Higher Education Forum studies, have called for a relaxation in antitrust restrictions that presently hinder American industry's ability to take advantage of new high technologies. The National Research Council report strongly supported a careful reexamination of our antitrust policies, stating that—

While U.S. antitrust policy has begun taking international competition into account, its implementation still fails to give sufficient weight to international trade considerations. The manner in which antitrust statutes are interpreted and applied is charged with interfering in international competitiveness. For example, firms have difficulty retaining the benefits of research that are the product of multifirm collaboration, prospective "safe—harbor" rulings are not readily available, and there is a general uncertainty regarding what corporate actions may elicit legal actions on the basis of anti-trust legislation.

Because of this uncertainty, management cites anti-trust policy as creating excessive risk for a range of activities that may benefit innovation and trade, such as pooling research efforts, pooling information on the work of international competitors, or pooling development programs whose costs are too large for any one firm in an industry to undertake. By contrast, foreign governments—for example, Japan and France—encourage cooperation among firms through mergers or cooperative programs.

In essence, the legislation we are introducing today would provide new statutory guidelines for joint research and development ventures in order to determine whether these ventures were in compliance with Federal and similar State antitrust laws. These guidelines would also extend to any participant in the venture, as well as to all employees in the venture.

In order to qualify under these new legislative guidelines, the venture participants would have to notify the Attorney General of the United States that they plan to enter into a joint research and development venture. This venture would also have to identify and define all of the specific research and development programs that it planned to undertake. The length of any venture could not exceed 15 years. Any joint venture participant would be exempt from any restrictions on outside, independent research and development activities or any obligations to provide the venture with the results of any independent work. The ultimate authority for the management of the joint venture would be vested in a management board, to be composed of one representative from each participant in the venture.

The legislation specifically contemplates that new firms could join the venture at a future date if this was agreed to by the venture participants, but they would be required to pay a proportional share of the common expenses of the venture. This legislation comtemplates, as a general rule, four or more ventures in any particular area. If the aggregate shares of the parties to the contract in the relevant market, as of the time the contract is made, for research and development projects in connection with a particular line of commerce exceeded at any time 25 percent of the relevant market for all research and development projects in the same line of commerce, the contract would not be covered under this legislation unless the Attorney General found either: One, that the results of the program were not likely to be directly applicable to the future production of a marketplace product; two, the participation of all the parties was necessary to the success of the program and was likely to produce effects that increased competition, improved the national economy or furthered national security; or three, such contract was made for the purpose of carrying out research and development essential to develop a product that was necessary to achieve compliance with any Federal law relating to the quality of the environment. The parties may require that the Attorney General determine whether their contract met this market test. The Attorney General's determination in this matter would be conclusive.

Under this legislation, all of the parties in the joint venture would retain title to all inventions, patents, or other useful information developed in the course of the venture. All participant firms would also be entitled to obtain irrevocable, nonexclusive, and equivalent licenses to all patents obtained by the parties. After 3 years, licenses would then be made available to any other U.S. firm on reasonable terms.

This legislation would also allow the Attorney General to investigate any joint venture at any time in order to insure that the requirements of the act are being met. Whenever the Attorney General commenced an investigation, he would be required to notify the venture. If the Attorney General determine that the venture violated this act, he would be required to submit a written notice to the parties in the venture, stating the facts and reasons supporting his determination and specifying the actions that would be required to bring the venture in conformance with the requirements of this act.

Finally, this legislation provides that no party shall be liable in excess of actual damages for any joint research and development venture that fails to meet the requirements of this act and the Federal antitrust laws. Under these circumstances, these parties would also be held liable for the cost of suit and interest awarded from the date of judgment.

Mr. Speaker, research and development has been one of the primary bases on which our Nation has attained its world economic standing. The legislation we are introducing today will help our Nation maintain this leadership by encouraging private investment in high technologies. It contains many essential elements that are necessary if we are ever to tap the risk potential of private research and development. I encourage my colleagues to seriously consider this proposal as an important element in achieving a successful economic recovery and planning for our future industrial society.

A section-by-section analysis follows:

Sec. 1. Short title.

Sec. 2. Findings and Purpose.

Sec. 3. Application of Antitrust Laws. Specifies that no person shall be held liable under Federal and similar State antitrust laws for entering a contract to carry out jointly one or more research and development (R&D) projects if such person notifies the Attorney General and if such contract (1) identifies and describes the scope of each R&D project, (2) specifies the obligations of each party to the contract, (3) provides that R&D activities shall be carried out through a management board consisting of one individual appointed by each party to the contract, (4) provides that the management board selects a chief executive officer who manages all of the R&D activities under the contract and recommends other operating criteria, (5) provides that no new party can enter the joint R&D venture unless such party pays a reasonable entry fee, (6) provides sepcific title, patent and license rights, (7) permits each party to provide, for a reasonable compensation, access to independent R&D results and to decline, for a period of three years, to disclose the results of R&D projects carried out under the contract, and (8) does not impose restrictions on outside R&D activities.

Imposes the following restrictions on any R&D contract eligible for exemption under this Act: (1) the aggregate share of the parties' to such contract of the relevant market, as of the time such contract is made, for research and development projects in connection with such line of commerce may not exceed at any time 25 percent of the relevant market, as of the time such contract is made, for all research and development projects in connection with such line of commerce unless (A) the results of such project are not likely to lead to development of information or of a product to be marketed, (B) the participation of all the parties is (i) necessary for the success of the project and (ii) likely to produce effects that increase competition, improve the national economy or further national security; or (C) such contract is made for the purpose of carrying out research and development essential to develop a product that is necessary for the parties to use to achieve compliance with any Federal law relating to the quality of the environment; (2) the contract must only cover R&D activities; (3) the term of any contract cannot exceed 15 years; (4) the parties to the contract must submit information to the Attorney General as specified in Section 4; and (5) the parties to the contract must submit an annual verification report to the Attorney General.

Exempts from disclosure under Section 552 of title 5, U.S.C., certain information submitted to the Attorney General under this Act.

Specifies that this Act shall apply to R&D contracts in effect on or after the date of enactment of this Act.

Sec. 4. Notification of the Attorney General. Requires the parties to any contract to submit certain information to the Attorney General regarding the contract not later than 30 days after making or amending the contract, as the case may be or 30 days after the date of enactment of this Act in the case of a contract in effect on the date of enactment of this Act.

Sec. 5. Investigation by Attorney General. Authorizes the Attorney General to investigate any person who has entered a joint venture R&D contract to determine whether the contract complies with the requirements of section 3 and the information submitted under sections 3 and 4 is accurate.

Directs the Attorney General to notify any person who is subject to an investigation whenever he commences an investigation. Directs the Attorney General to provide written notice if he finds that the contract does not comply with Section 3, including (1) a statement of fact and reasons in support of his determination, and (2) a statement specifying any actions that may be taken to bring a contract in compliance with section 3.

Exempts from disclosure under section 552 of title 5, U.S.C. any informaton obtained during the course of an investigation under this section.

Specifies that no determination made by the Attorney General under this section shall be admissible as evidence in any administrative or judicial proceeding based on a claim arising under the antitrust laws.

Sec. 6. Determination of Attorney General. Permits the parties to any contract to submit, not later than 10 days after a contract is made, a request to the Attorney General to determine whether such contract is in violation of the limitation specified in Section 3(b)(1). Requires that the Attorney General make the requested determination not later than 60 days after the receipt of such request or after the receipt of any additional information requested by the Attorney General. Specifies that the Attorney General's determination under this section is conclusive.

Sec. 7. Modification of Damages. Specifies that no person shall be liable under Federal antitrust laws for an amount in excess of actual damages, the cost of suit, and interest awarded from the date of judgment resulting from undertaking a contract relating to a jont research and development venture.

Sec. 8. Attorney's Fees. Directs the courts to award to a prevailing defendent the cost of suit, including a reasonable attorney's fee, in any action brought under the antitrust laws against a defendant who is exempt under this Act.

Sec. 9. Study. Directs the Attorney General to submit a report to Congress describing the operation of this Act and legislative recommendations not later than 18 months after the date of enactment of this Act.

Sec. 10. Definitions.

HIGH TECHNOLOGY R&D JOINT VENTURE ACT OF 1983—SUMMARY

This legislation addresses a significant institutional barrier affecting high technology research and development joint ventures. It would provide immunity (and exemption) from Federal and similar State antitrust laws for any venture if it meets certain statutory requirements. These requirements relate to the length of the venture (fifteen years), patent rights, and administrative and managerial requirements (the establishment of a management board), among others. The venture must also meet an initial capital formation test in order to ensure that the R&D market remains competitive and can accommodate at least four ventures of any one type.

The Attorney General must be notified of the formation of a venture in order to qualify under this legislation. In addition, the Attorney General is authorized to investigate any venture to ensure that the venture has complied with the requirements of this Act.

Finally, this legislation specifies that any joint research and development venture will be subject only to actual damages if it fails to meet the requirements of this Act and is held in violation of the Federal antitrust laws. It also requires any court to award attorney's fees to any defendant who successfully defends a claim that he was in violation of the antitrust laws.

H.R. 3393

A bill to modify the operation of Federal and State antitrust laws for the conducting of certain research and development activities jointly, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "High Technology Research and Development Joint Venture Act of 1983".

FINDINGS AND PURPOSE

SEC. 2. (a) The Congress finds the following:

(1) The prosperity and security, as well as the international stature and competitiveness, of the United States depend on the steady growth of its industrial productivity.

(2) Although innovations in some industries have resulted in impressive increases in productivity, the overall rate of growth in industrial productivity in the United States is decreasing.

(3) Growth in industrial productivity requires the strong support of basic research and development and the introduction of advanced concepts, processes, and industries.

(4) In order to maintain the international competitiveness of industries in the United States, it is necessary to facilitate an increase in private research and development.

(5) The most effective Federal actions to encourage long-term private investment in research and development are those actions that remove potential legal barriers to research and development rather than those actions that intervene directly in commercial markets.

(6) Commercial entities, especially small businesses, are often unable to engage individually in research and development on an efficient scale because of prohibitive costs.

(7) Many desirable research and development projects could be carried out jointly by commercial entities which are willing to share the costs and rewards of such projects.

(8) There is a need to modify the application of the antitrust laws in order to encourage commercial entities to carry out productive research and development projects.

(b) The purpose of this Act is to modify the operation of the antitrust laws and of similar State laws for certain joint research and development projects and thereby encourage commercial entities to carry out, and to secure the benefits of, such projects in order to increase industrial innovation, productivity, and the economic competitiveness of the United States.

APPLICATION OF ANTITRUST LAWS

SEC. 3. (a) No person shall be liable under the antitrust laws, or under any State law similar to the antitrust laws, for attempting to enter into, entering into, or carrying out a contract to which such person is a party if such person gives notice to the Attorney General in accordance with section 4 and if such contract—

(1) provides that the parties to such contract shall carry out jointly one or more research and development projects,

(2) identifies and describes, to the extent practicable, the nature and the scope of each such project, and the manner in which such project will be carried out,

(3) specifies with respect to each party to such contract the obligations applicable to such party,

(4) provides that such contract shall be carried out through a management board consisting of one individual appointed by each party to such contract to represent such party, which shall submit to the parties to such contract recommendations regarding initiating or terminating any research and development project, after taking into account—

(A) the importance of such project to the domestic economy or national defense,

(B) the long/run needs of the United States industries represented by the parties to such contract,

(C) the specific needs of each such party, including the risks and costs for the individual parties to undertake such project, and

(D) the educational and intellectual value of such project,

(5) provides that such management board shall select a chief executive officer who shall—

(A) manage all of the research and development projects to be carried out under such contract,

(B) submit to the parties to such contract recommended criteria to be applied to determine whether such contract should be amended to allow another person to become a party to, or to allow any party to withdraw from, such contract, and

(C) submit to such parties recommended criteria to be applied to determine whether and under which terms any license should be granted to use any information or product resulting from a research and development project carried out under such contract and, in formulating such criteria, shall encourage the widest possible dissemination of such information or product, giving due regard to the risks assumed and the resources expended by the parties to carry out such project,

(6) provides that no other person shall become a party to such contract, other than by succession in interest, unless such person pays to all such parties jointly, not less than a reasonable amount based on the cost and the value of the research and development projects then being carried out under the contract,

(7) provides that—

(A) applications for patents on patentable products discovered in the course of carrying out research and development projects under such contract shall be made by such parties, and such parties shall retain title to all inventions, patents, and information resulting from such projects,

(B) each party to such contract at the time information or a product is discovered or developed shall at such time be entitled to irrevocable, nonexclusive, and equivalent licenses to all patents obtained by such parties for such information or product,

(C) each party shall be entitled to use the results of each research and development project carried out under such contract, in a manner which bears an equitable relationship to the risks such party assumed, which use may include—

(i) exclusive access to such results for not to exceed 3 years,

(ii) royalty-free licenses or licenses at royalty rates which reflect the risks assumed and resources expended by such party, and

(iii) a share of any royalties collected from nonparties,

(D) not later than 3 years after such parties receive such licenses, licenses shall be made available to any other domestic person on such reasonable terms as such parties may establish, and

(E) each of such parties shall collect on behalf of all of such parties royalties for the use of information or products resulting from any such project and may retain such proportion of the revenues as may be agreed to by such parties,

(8) permits each of such parties—

(A) to provide, for a reasonable compensation, access to such research and development projects, other than research and development projects carried out under such contract, as is necessary for such parties to carry out research and development projects under such contract,

(B) to decline, for a period of 3 years, to disclose the results of research and development projects carried out under such contract,

(C) assign employees to carry out research and development projects under such contract, and

(D) undertake under such contract, on behalf of all of such parties, a particular aspect of research and development,

(9) does not impose on any such party—

(A) any restriction with respect to any research and development project, other than a research and development project to be carried out under such contract, which may be carried out by such party,

(B) any obligation to make available to any other person the results of any research and development project, other than a research and development project carried out under such contract, carried out by such party, or

(C) any restriction or requirement, other than a restriction or requirement permitted under this section, on the exercise of any right such party may have to exploit the inventions or use any information or product resulting from a research and development project carried out under such contract, and

(10) does not violate any limitation specified in subsection (b).

(b) For purposes of subsection (a)—

(1) with respect to all the research and development projects being or to be carried out, under a contract, in connection with a line of commerce, the aggregate share of

the parties to such contract of the relevant market, as of the time such contract is made, for research and development projects in connection with such line of commerce may not exceed at any time 25 percent of the relevant market, as of the time such contract is made, for all research and development projects in connection with such line of commerce unless—

(A) the results of such projects are not likely to lend to development of information or of a product to be marketed,

(B) the participation of all the parties is—

(i) necessary for the success of such projects, and

(ii) likely to produce effects that increase competition, improve the national economy, or further national security, or

(C) such contract is made for the purpose of carrying out research and development essential to develop a product that is necessary for the parties to use to achieve compliance with any Federal law relating to the quality of the environment,

(2) such contract, and any other agreement relating to such contract, may not provide that any of the parties shall carry out jointly or severally any activity other than—

(A) a research and development project,

(B) any activity necessary to carry out the contract terms specified in subsection (a) and the requirements of this subsection, and

(C) any activity necessary to obtain a patent or issue a license applicable to the information or product resulting from a research and development project carried out under such contract,

(3) the term of such contract may not exceed 15 years,

(4) the parties to such contract shall submit to the Attorney General information in accordance with section 4, and

(5) such parties shall submit a report annually to the Attorney General verifying that the contract as then in effect complies with this section, and containing any additional information necessary to keep current the information required to be submitted in accordance with section 4.

(c) Any information submitted to the Attorney General for purposes of making a determination under subsection (b)(1), by a party, or by a person proposed to become a party, to such contract shall be exempt from disclosure under section 552 of title 5, United States Code.

(d) This Act shall apply with respect to research and development projects carried out under contracts in effect on or after the date of the enactment of this Act.

NOTIFICATION OF ATTORNEY GENERAL

SEC. 4. (a) Not later than 30 days after making a contract or after amending a contract, as the case may be, or 30 days after the date of the enactment of this Act in the case of a contract in effect on such date of enactment, with respect to which any benefit under this Act is or may be claimed, the parties to such contract shall submit in writing to the Attorney General, in such form as the Attorney General may require—

(1) Notice of the date that such contract is made, and of the date of any amendment to such contract,

(2) the name of each of the parties to such contract,

(3) a description of each research and development project to be carried out under such contract;

(4) with respect to each such research and development project, the name of each party who will participate in carrying out such project, and

(5) any other information, required by rules issued by the Attorney General, necessary to determine if such contract complies with section 3.

(b) Information submitted to the Attorney General under subsection (a) shall be made available to the public in accordance with section 552 of title 5, United States Code.

INVESTIGATION BY ATTORNEY GENERAL

SEC. 5. (a) The Attorney General may investigate persons who are required to submit information under section 4, for the purpose of determining whether—

(1) such information is submitted, is accurate when submitted, and is kept current,

(2) the annual reports submitted under section 3(b)(5) are accurate,

(3) the contract with respect to which such reports are submitted complies with section 3, and

(4) the research and development projects carried out under such contract comply with the terms of such contract and are consistent with the descriptions of such projects provided to the Secretary under section 4.

(b) Whenever the Attorney General commences an investigation under subsection (a), the Attorney General shall notify the person who is subject of such investigation that such investigation is in progress. If the Attorney General determines with respect to the contract involved in the investigation that such contract, or the contract as amended, does not comply with section 3, then the Attorney General shall give written notice of such determination to the parties to such contract. Such notice shall include—

(1) a statement of the facts and reasons in support of such determination, and

(2) a statement specifying any actions that such parties may take to modify such contract to comply with section 3.

(c) Information obtained by the Attorney General in the course of conducting any investigation under this section is exempt from disclosure under section 552 of title 5, United States Code.

(d) No determination made by the Attorney General under subsection (a) shall be admissible as evidence in any administrative or judicial proceeding based on a claim arising under the antitrust laws.

DETERMINATION OF ATTORNEY GENERAL

SEC. 6. (a) Not later than 10 days after a contract to carry out one or more research and development projects jointly is made, the parties to such contract may submit to the Attorney General a request that the Attorney General determine whether such contract violates the limitation specified in section 3(b)(1). Such parties shall submit to the Attorney General such information as the Attorney General may request for purposes of making such determination.

(b) Not later than 60 days after the Attorney General receives a request for a determination or after the receipt of any information requested by the Attorney General, whichever occurs later, under subsection (a), the Attorney General shall make, and notify the parties of the results of, such determination. Notwithstanding the preceding sentence, the Attorney General shall make such determination not later than 120 days after receiving a request for such determination.

(c) Information obtained by the Attorney General in the course of making any determination under this section is exempt from disclosure under section 552 of title 5, United States Code.

(d) In any action under the antitrust laws or any State law similar to the antitrust laws, a determination made under this section shall be conclusive as to whether the contract involved violates the limitation specified in section 3(b)(1).

MODIFICATION OF DAMAGES

SEC. 7. No person shall be liable under the antitrust laws for an amount in excess of the actual damages sustained by the claimant by reason of the violation of any such law, the cost of suit (including a reasonable attorney's fee), and any interest awarded (from the date of judgment) with respect to such damages if such liability arises from attempting to make, making, or performing a contract to carry out a research and development program jointly with another person.

ATTORNEY'S FEES

SEC. 8. In any action under the antitrust laws brought against a defendant who is not found, by reason of the operation of this Act, liable with respect to a claim in such action, the court shall award to the prevailing defendant the cost of suit, including a reasonable attorney's fee, attributable to defending against such claim.

STUDY

SEC. 9. Not later than 18 months after the date of the enactment of this Act, the Attorney General shall submit to the Speaker of the House of Representatives and the President pro tempore of the Senate a report describing the operation of this Act and including any recommendations of the Attorney General relating to any legislation necessary or appropriate to achieve the purpose of this Act.

DEFINITIONS

SEC. 10. For purposes of this Act—

(1) the term "antitrust laws" shall have the meaning given it in subsection (a) of the first section of the Clayton Act (15 U.S.C. 12(a)), except that such term shall include section 5 of the Federal Trade Commission Act (15 U.S.C. 45) to the extent that such section 5 relates to unfair methods of competition.

(2) the term "Attorney General" means the Attorney General of the United States,

(3) the term "person" shall have the meaning given it in subsection (a) of the first section of the Clayton Act (15 U.S.C. 12(a)),

(4) the term "product" means any goods or services,

(5) the term "research and development project" means an activity primarily involving—

(A) theoretical analysis, systematic study, exploration, or experimentation,

(B) the conduct of activities designed or intended to lead to the ultimate utilization of analytical results for the development of a particular application or product,

(C) the systematic application of knowledge through the conduct of activities designed to solve a particularly defined technical problem in order to achieve proof of principle or technical feasibility, or

(D) the extension of investigative findings and theories of a scientific or technical nature into practical application for experimental and pilot-scale demonstration purposes, up to the stage of industrial application, including the production, testing and licensing of models, devices, equipment, materials, and processes, and

(6) the term "State" shall have the meaning given it in section 4G(2) of the Clayton Act (15 U.S.C. 15g(2)).●

THE CONTINUING STRUGGLE OF SOVIET JEWS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. SMITH) is recognized for 10 minutes.

Mr. SMITH of New Jersey. Mr. Speaker, I rise this evening to point out to my colleagues that we face a very grave and dark hour in the ongoing struggle to help Soviet Jews secure basic protections and fundamental human rights they so desperately desire and so richly deserve.

Not only have we witnessed an alarming decline in the number of Jews permitted to leave the Soviet Union—some 51,000 were allowed to emigrate in 1979, that figure dropped to 2,688 in 1982, and today only about 100 Jews per month leave the Soviet Union—but we have seen a not-so-new cancer rapidly festering in the U.S.S.R., the disease of anti-Semitism.

Daily, Mr. Speaker, we receive heartbreaking reports of new victims of KGB harassment and interrogation. Daily we witness new, more extreme expressions of anti-Semitism in Soviet literature and articles in the state-controlled press. There are increasing reports of letters of invitation from first-degree relatives in Israel never being delivered to the addressee, thus denying a potential emigree the opportunity to fulfill the first requirement in the emigration process.

So the Jews in the Soviet Union find themselves in the situation of being homeless, a people without a country, yet a people that the authorities refuse to let go.

Mr. Speaker, within the last couple of months, a new propaganda effort has been initiated by the Soviets to make it appear that the season of Jewish family reunification has ended. Leaders of the newly formed Anti-Zionist Committee of the Soviet Public now make the totally unsupportable assertion that family reunification has essentially been completed.

This kind of falsehood flies in the face of the truth, and the simple truth is that tens of thousands of Jews seek to exercise their right to emigrate, to be reunited with their loved ones.

The truth is that documented case histories of thousands of Jews seeking to depart can be produced for an objective accounting.

The truth is that such statements do much to undermine the very word and reliability of the Soviet Union itself. I believe that this is particularly troubling at a time when the United States and the U.S.S.R. are trying to hammer out an arms control agreement—a very sensitive time when that important process could be greatly enhanced by more, not less, basic honesty and good will.

Mr. Speaker, I have been to the Soviet Union to witness the situation firsthand. I have met with many refuseniks and have heard their stories. I can only tell my colleagues that you cannot help but be touched to the very core of your soul by such an experience.

I came away with a profound appreciation of their anguish and pain. Their longings and their courage.

Mr. Speaker, this morning the Helsinki Commission, of which I am a Commissioner, and Foreign Affairs Subcommittee on Human Rights held a joint hearing to fully explore this much-worsened situation. We heard expert testimony from Elliott Abrams, Assistant Secretary of State for Human Rights and Humanitarian Affairs, Theodore R. Mann, chairman, National Conference of Soviet Jewry, Lynn Singer, president, Union of Councils for Soviet Jews, and William Korey, director of research, B'nai B'rith International Council.

Their incisive and sobering comments, Mr. Speaker, are now part of the official permanant record and I recommend this report to my colleagues as must reading.

EL SALVADOR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 30 minutes.

Mr. GONZALEZ. Mr. Speaker, today at about noon, I was informed of the fact that the first contingent of those military that the President announced to the newspaper would be sent to Salvador as a medical team and at the time at which he announced that proposal, he gave a figure of somewhere around 50 and said his interpretation was that other than maybe advising a couple of committee chairmen, that he did not have to come to the Congress.

As I have said here the last few days, I have introduced a resolution as of last week in which the responsibility of the Congress to act pursuant to the War Power Limitation Act in 1973 is encumbent upon us. But today's news, I think—well, I do not think, I know—is one of the most unbelievable things that I have heard. It just is so disturbing to see like a Greek tragedy. Something seeming to happen almost inevitably with what is obviously going to be a tragic result.

The reason I say that it is unbelievable to me is that this is exactly the experience I had in May of 1963. At that time in the case of so-called advisers in Southeast Asia. But the difference was, as I have said on the record, that at that time we had a President who was accessible. And as I said before, on the last trip to Texas, he advised me that he had made a decision and that was to pull out every one of those men and as he said, including the helicopters, by the end of the years, 1963.

On this occasion, the information is very disturbing because the first actually notified that they have got their marching orders and they will be shipping out, consists of 1 doctor, 1 male nurse, 10 medics, which we used to call medical corpsmen, but they do not even know where they will be sheltered. There have been no quarters available as of now, even though perhaps by the time I am speaking here they are well on their way to preparing their departure.

On top of that, they will not be issued any kind of sidearm for minimal personal self-protection, but they are informed that if they want to they can take their own pistol. Now how ludicrous, how ridiculous can we get. I just do not understand. These are military. They are not civilian. And they are going into a situation in which as I have also reported before the policy has changed since we first sent the first 55 or so so-called advisers.

And as of the time of the assassination or murder of Lieutenant Commander Schaufelberger, there is no question that the policy has been changed. Since the first of these advisers military set foot in Salvador I have been in touch because of the fact that some are and have been constituents.

And from the very beginning, every one of those military conveyed the fact that they were in a hazardous zone. They pointed out that this May that the employees of our American Embassy in El Salvador were given hazardous duty extra pay. On top of that, they proceed back and forth from their jobs to their residences in armored cars, whereas they were not even permitted sidearms at that time.

□ 2110

It was only after I raised my voice 1½ years ago and, in fact, when the colonel then in charge, the CO, was shipped out, it was because the Ambassador said he was violating his status by permitting those military to carry rifles. But it was only after our outcry that they were permitted to have sidearms.

But every one of those men said, "Congressman, any time either the right wing death squads or the so-called rebels want, they can knock us off." They obviously have a policy for the moment to leave us along.

After the murder of Lieutenant Commander Schaufelberg, I announced that obviously that policy has changed and that every one of our military now are under a different kind of environment. With us sending doctors now, unarmed and unprotected, you can imagine the dangers increase tenfold.

A few months ago the administration decided to greatly increase the American presence in El Salvador. Publicly, the representatives of the ad-

ministration were saying that the corner had been turned. In the words of one of them, "El Salvador is not about to lose."

At the same time, the administration began pressing for more money to be directed to El Salvador and laid plans to establish training facilities in Honduras which now are in place with a little better than 100 Green Berets, Special Forces. The facilities there, training and logistics supposedly, are in Honduras because that enables the administration really to say that we only have the minimal number of military advisers in El Salvador. In fact, there is a numbers game. If an accounting is going to be taken on a given day or moment, you just shift our military across the border into Honduras and then that gives us the count we want in El Salvador.

Of course, our commitment of advisers is much greater than that, because the bulk of our personnel working with Salvadorans are based just across that border and, as I say, shifted back and forth. In point of fact, however, the number of American military personnel in El Salvador is growing. It is growing because we are now sending these medical teams I speak of into the country.

There is no secret about this. The administration let their plans be known several weeks ago, but now the medical teams are, as I said, as of today, on the march. There will be a number of these teams, I would say at least half a dozen. They will each consist of a physician or two, nurses, technicians, corpsmen, and administrative support people.

Once these teams are in place, the number of Americans in El Salvador, that is, military personnel, will double. The medical teams, like the military advisers who are already there, will be allowed to carry only personal sidearms, a pistol, if they provide it themselves, at least those that today were shipping out; that is, the pistols are not issued. The members of the medical team must provide for themselves. Now, this is in a country where the American Embassy personnel are driven around in armored vehicles, by armed guards. This is in a country where automatic weapons are as common as bicycles, where terror is as real and palpable as anyplace you can find, including Beirut.

Joan Didion, who just recently published her book after being down there, reported this way, and I quote:

> The fact of being in El Salvador comes to seem a sentence of indeterminate length, and the prospect of leaving doubtful.

I suspect that some of the members of these medical teams now going into El Salvador feel very much like that. They have been given a sentence, and they have no way of knowing if they will live it out.

The administration says that they are sending these medical personnel to El Salvador for humanitarian reasons, and there is absolutely no doubt that health conditions in the country are desperately bad. El Salvador is a country where medical care is simply not available to the civilian population. It is a country where the most rudimentary public health measures do not exist, at least on any consistent basis; a place where clean water is precious, oftentimes impossible to get. But this is not just because El Salvador is a poor country. It is because physicians have fled, because physicians have been hounded, killed, or disappeared.

The American medical teams, it is said, will work in Salvadoran hospitals where the wounded and the sick today get little or nothing by way of reasonable care. Evidently they will not work in refugee camps, maybe, where conditions are even more desperate.

So much for the humanitarian concerns of the administration. Somehow, though, it is impossible to overlook the melancholy irony that a civilian group last winter traveled to El Salvador to look into the question of attacks and abuses on medical personnel. Then a couple of months later an administration team goes in to report terrible shortages of trained personnel in Salvadoran hospitals. Now, today, we are sending people, Americans, in to fill that need.

I can only wonder if El Salvador is any safer for American medical personnel than it is for Salvadorans, and particularly since we should have gotten the message after the assasination of Commander Schaufelberg that the rule of withholding is out and that they are now targets.

Where these medical personnel are and will be, it is difficult to say what degree of safety they will encounter. I do know that they will encounter no more or no less than what the personnel who have been there for 2 years have confronted. The reality is that with each day the administration is quietly increasing the U.S. commitment to El Salvador. Sometimes it is a buildup of facilities either in or nearby El Salvador to provide military support. Sometimes it is in the form of more and more sophisticated arms. Sometimes it comes in the form of more financial aid. Sometimes it comes in the form of added military advisers, either in the country or outside. But all serving the same purpose: To support the Government of El Salvador, a government that not one of us would find tolerable if we had to live under it. But we do not, as a condition of aid, demand that the Government of El Salvador make any real progress toward establishing law and justice.

The Reagan administration is satisfied to accept a cosmetic gesture here and there, just enough to placate a timid Congress to keep the spigot flowing, but never enough to give Salvadorans any reason to think that they can expect an end to corruption, murder, an end to the incredible economic injustices that they have endured for generations, and against which they are revolting, or a beginning toward a government that might be responsive to the needs of the ordinary citizens instead of the whims of oligarchs and their armies, public and private.

So if we are sending more military personnel to El Salvador, I pray every minute that every one of them returns. Some have been, some continue to be, constituents. If harm befalls any one of them, it is at the doorstep of the White House were the harsh light of reality in El Salvador never seems to see through.

I ask Ambassador Kirkpatrick and President Reagan: Would you be willing to send your own sons, as I have asked the Congress, to serve in El Salvador, to defend and maintain the government there in power, about which the issue is what brings about this commotion?

□ 2120

THE NEW SOVIET JEWISH POLICY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. LANTOS) is recognized for 5 minutes.

● Mr. LANTOS. Mr. Speaker, a few days ago on the floor of the House, I denounced the Soviet Union's vicious and officially orchestrated campaign of anti-Semitism. The latest step in this effort was the creation of the Anti-Zionist Committee, which recently claimed that there are no Jews in the Soviet Union who wish to emigrate and charged Zionists with collaborating with the SS and Gestapo during World War II.

Dr. William Korey, director of international policy research at B'nai B'rith International Council, has written an analysis of the new Jewish policy of Soviet leader Yuriy Andropov. Dr. Korey highlights the features of that new policy beginning with the background of the creation of the Anti-Zionist Committee. He outlines four features of the policy: First, an end to emigration of Jews from the Soviet Union; second, cutting ties between the Soviet Jewish community and Jews abroad; third, intensifying forced cultural and linguistic assimilation; and fourth anti-Zionist propaganda. This report has been copyrighted and disseminated by the National Conference on Soviet Jewry.

I am inserting in the RECORD an abridged version of Dr. Korey's analysis:

ANDROPOV'S JEWISH POLICY

(By Dr. William Korey)

Andropov's Jewish policy has begun to take shape during the past two months and its character and direction are ominous. A special public institutional form for legitimizing the policy has been created, elements of which evoke memories of the Nazi era and of Stalin's last days. The policy itself involves four separate but interrelated features: a) an end to emigration entirely; b) the cutting off of the Soviet Jewish community from relations with its brethren abroad; c) an intensification of the program of forced cultural and linguistic assimilation; and d) a broadening of the anti-Zionist propaganda campaign, drawing into it new anti-Semitic elements that have their origin in Tsarist Black Hundred canards and in recent neo-Nazi themes.

THE ANTI-ZIONIST COMMITTEE

On April 1, Pravda and other central newspapers carried an "Appeal" calling for the creation of an "Anti-Zionist Committee of the Soviet Public" and signed by eight Jews, most of whom had served in the past as apologists for the regime on Jewish issues. On April 21, three weeks after the "Appeal" was launched, a meeting of representatives of a number of public organizations was held "to formally announce the creation of the Anti-Zionist Committee." Since then, branches have reportedly been formed in various places in the USSR giving the central mechanism a depth for penetrating into the public arena.

The chairman of the Committee, Colonel-General David Dragunsky, is a 73-year old former tank corps commander. It should be noted that today the military leadership of the USSR is almost completely Judenrein. There are only a handful of Jewish military officials, who are holdovers from the World War II era.

Dragunsky's most recent significant public appearance in the Soviet press came on September 5, 1979. He reviewed an extraordinarily vulgar and bigoted anti-Jewish novel, which he praised as "one of the first artistic works exposing that dangerous and current phenomenon, Zionism." The author of the book, Yuri Kolesnikov, is a key member of Dragunsky's Anti-Zionist Committee.

Significantly, none of the initial eight members of the Committee are associated with the remnant of Jewish cultural life in the USSR. In an effort to provide some apparent legitimacy, however, the Committee has a distinctly Jewish membership. Later, the Chief Rabbi of Moscow, Yakov Fishman, became a member, but his role, before his sudden death on June 7, was limited to lauding the formation of the Committee.

The technique is, of course, not altogether new. The favorite method of the Nazis in Occupied Europe to control the local Jewish community and legitimize their anti-Jewish policy and ultimately to facilitiate the liquidation of Jews was to use Jewish Councils, some of which proved to be collaborationist. Later, Stalin, in preparing a mass evacuation of Jews from Moscow, Leningrad and other European cities of the USSR during the "Doctor's Plot" of January-February, 1953, assigned his Jewish associate, Lazar Kaganovich, that specific task. Stalin cleverly proposed that prominent Jews themselves request the evacuation, and, indeed, such Jews in the arts and in philosophy were found to sign the suggested appeals.

THE END OF EMIGRATION

The Committee's press conference of June 6 spelled out the new Andropov policy on emigration. It had already been signalled by a special column on April 20 written by Victor Louis, who has been utilized by the Kremlin to indicate major turns in the policy line. Louis formally announced; "Whether one likes it or not, mass Jewish emigration from the Soviet Union has come to an end." In a disturbing afterthought, he added that "it is now said openly in the USSR that 'the last train has left the station.'" These words evoke another era when a similar image was used for Jews who failed to get out of Europe in time to evade the Nazi genocide program.

Pertinently, Louis chose not to say that the Jews had stopped applying for emigration. On the contrary, he made it clear, if indirectly, that the cut-off was a governmental decision arbitrarily imposed and at least, in part, the consequence of the "drop out" phenomenon in Vienna. The fact that many Jewish emigrants chose to go to the United States, Louis observed, corrupted the "holy idea" of a "return to their ancient homeland" and turned it into a "degenerate process."

But, the Anti-Zionist Committee in Moscow on June 6 chose to fabricate a total falsehood about emigration. Samuel Zivs, the deputy chairman of the Committee, declared that the reason for the decline in Jewish emigration is that "family reunification has essentially been completed." Jews, he contended, no longer wish to leave because they have ceased to "succumb to Zionist lures."

Zivs, a Moscow legal official, who frequently has been used as an apologist by the Kremlin on specifically Jewish issues, simply denied that Victor Louis knew was true—that thousands of Soviet Jews were still anxious to emigrate. Over 300,000 Jews still in the USSR asked for and received from relatives in Israel an affidavit, a process which constitutes the first stage in applying for emigration. An additional 10,000 Soviet Jews who have formally applied to emigrate to Israel have been refused at least once and some many times. Zivs called these statistics as the "juggling of figures by Zionist propaganda." Clearly, unlike Louis, he saw his task, and the task of the Committee, to justify and legitimize a new policy even if it meant total fabrication.

The obvious reason for the fabrication is that any sort of truth would place the Soviet Union in violation of international law and solemn agreements that it either signed or ratified. The Universal Declaration on Human Rights in Article 13 (b) and the International Covenant on Civil and Political Rights in Article 12 make the right to leave a country a fundamental human right. The Covenant was ratified by the USSR in October, 1973 and this international treaty is binding. More immediate and serious is the wholesale abridgement of the Helsinki Final Act which the USSR signed on August 1, 1975 and which obligates signatories to "facilitate" and "expedite" the "reunion of families." The USSR deliberately has chosen to do violence to solemn obligations.

SEVERING LINKS WITH JEWS ABROAD

The second aspect of the Andropov Jewish policy—the severance of relationship between Soviet Jews and Jews abroad—was hinted at in the Anti-Zionist Committee's "Appeal". A crucial paragraph reads: "Soviet Jews reject with contempt attempts by Zionist propagandists to interfere in their life. . . . Citizens of the USSR who are Jews are an inseparable part of the Soviet people." The obvious intent was to warn Soviet Jews against having contacts with their "Zionist" brethren in the West. Zionism is portrayed in the "Appeal" as the very embodiment of evil and subversion. Presented in this fashion, Jews are cautioned to avoid any semblance of contamination through contacts.

The Kremlin's attempts at cutting links, while continuing for some time, has now been stepped up. Mail from the United States, especially mail carrying a request affidavit from a relative designed for emigration purposes, is often confiscated, returned or tampered with.

A letter sent several weeks ago by Rabbi Fishman to U.S. Ambassador Arthur Hartman highlights a different effort at cutting relations. One form of contact has been meetings in front of the Choral Synagogue in Moscow on Saturdays between visiting Western Jews and Soviet Jewish activists. On any Sabbath morning several hundred Jews will congregate in front of the synagogue to hold private discussions, often about the emigration issue. The American Embassy has sent an observer on a regular basis to report on these meetings. Rabbi Fishman, unquestionably prompted by the authorities, complained to Hartman that "one should not use the synagogue to conceal political, subversive, or, God forbid, espionage activities." Without an official U.S. presence, it may have been reasoned in the Kremlin, the Sabbath gatherings could be effectively discouraged. Ambassador Hartman rejected Fishman's accusations as "unfounded and factually false."

The sharpest warning by the Kremlin came in the form of a lengthy two-part article in Leningradskaia Pravda on April 19–20. The article focused on how Western Jewish tourists engage in "Zionist provocations" by spreading "the propaganda of racism and nationalism in our country." The warning is driven home by hints that Zionism is to be treated as a crime which will not "be allowed to go unpunished."

FORCED ASSIMILATION

The same Leningradskaia Pravda article utilized bigotry to emphasize a third purpose of the Anti-Zionist Committee—forced assimilation. It vigorously condemns the organization of private Hebrew teaching circles, teaching and study of Hebrew and Yiddish literature, the Bible, or even Jewish history.

Hebrew is "above all" the language of the Jewish "Holy" Books, which teach "extreme religious fanaticism, chauvinism" and "racial intolerance for other 'inferior' peoples." This vicious anti-Semitic canard is based upon the malicious notion that the "chosen People" concept of the Torah and Talmud preaches "superiority over peoples" as well as "exclusivity." This was, of course, the principal theme of the notorious Tsarist "Protocols of the Elders of Zion."

Hebrew is declared to have not a "cultural" significance, but "rather an exclusively political significance." Zionism is what is meant by "political." And, to that end, "the Soviet public cannot tolerate Hebrew circles and all kinds of 'seminars.'" Harassment and intimidation of the Hebrew and Jewish history circles has been sporadically used during the past several years, but this is the first time that these circles are formally declared to be antithetical to Soviet law.

Forced assimilation has been a dominant feature of Soviet policy towards Jews since 1948. Virtually all formal Jewish institutional life, and especially Jewish schools, have been eliminated. Unlike any other ethnic group within the USSR, Jews are deprived

of almost every public means for perpetuating their cultural heritage. Now they face even a threat to private means for Jewish and Hebrew self-education. Forced assimilation is clearly to be hastened.

ANTI-ZIONIST PROPAGANDA

The most distrubing aspect of Andropov's policy is "the political unmasking of Zionism." The propaganda drive is "to be waged even more resolutely" than ever before.

What is striking about the Kremlin's perception of Zionism is the enormity of the power and evil with which it is endowed. As in the "Protocols of the Elders of Zion," the power of the Zionists is cosmic and strives for world domination. Poised to resist the Zionist threat is the great Soviet power. The forces of darkness, Zionism, are locked in final struggle with the forces of light, the Soviet Union.

The anti-Zionist propaganda drive thinly masks overt anti-Semitism. Stereotyped images of the Jew dominate the paranoid descriptions of Zionism. Judaism, especially the concepts of the "chosen People" and the Messiah, is seen as the source of the Zionist evil. The Torah and the Talmud are presented as preaching racism, hatred and violence.

Now the anti-Zionist media offensive is to be stepped up. At the press conference of the Anti-Zionist Committee on June 6, Dragunsky characterized Zionism in hysterical terms as a "manhating ideology" which is "modeled on the ideas and methods of Hitler." Kolesnikov contributed to the pornography by alleging that during World War II the Zionists "not only failed to defend their co-religionists, but betrayed them, wholly in league with the Gestapo and the SS." He then provided an additional sickening touch by charging that Israel executed Adolf Eichmann, after the public trail in Jerusalem, in order "to make sure he would not be seized by another nation and make public the sacred secrets of cooperation between Zionism and Nazism."

The paranoiac ravings of Kolesnikov are superseded by those of the most prolific anti-Semitic author in the USSR—Lev Korneyev. His newly published work, *The Class Essence of Zionism*, was favorably reviewed by the Soviet press and a special edition of 10,000 copies was prepared to instruct "ideological workers" who will indoctrinate the public. A prominent American correspondent in Moscow found that the book reads at times "like a Ku Klux Klan pamphlet from the 1920's replete with reference to Jewish bankers, Jewish monopolists and the 'Jewish faction of the world oligarchy' which he says is seeking to dominate the capitalists world."

The Class Essence of Zionism reaches unprecedented depths of gutter hate in two respects. For the first time, Korneyev acknowledges his ideological debt to a certain Shmakov whose book published in 1906 is quoted approvingly. The specific Shmakov reference which Korneyev welcomed was that Zionist agents had supposedly provoked pogroms of Russians and Ukrainians against Jews by opening fire on Tsarist policemen. The aim of inciting pogroms was to "increase emigration from the country." Presumably, Zionist agents of today conduct themselves in a similar way and for the same purpose.

But in another respect, Korneyev went beyond previous Soviet hate spewings in an article last summer in a leading Soviet military organ, Military-Historical Journal. Among the "myths of Zionists propaganda" which he criticized was the figure of six million Jewish victims of the "holocaust" (which he deliberately enclosed in quotation marks). That number, he said, is "impossible to consider as scientifically grounded;" indeed, "there is every reason to suppose that the real number of victims is lower." In his newly-published book, he refers to the six million figure as "significantly overstated." The new Korneyev thesis clearly borrows from neo-Nazi doctrine, a central of which is the argument that the Holocaust never happened and six million victims is a gross exaggeration.

Andropov's Jewish policy, as reflected in this type of propaganda, is beginning to echo the public mouthings of hate during Stalin's last months. Marx once observed that history tends to repeat itself first as tragedy and then as farce. The 1953 media saturation effort produced a near tragedy of massive proportions. It would be imprudent for the international civilized community to gamble that the new Soviet saturation propaganda drive will be mere farce.●

POPE JOHN PAUL'S VISIT TO POLAND

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. FEIGHAN) is recognized for 5 mintues.

● Mr. FEIGHAN. Mr. Speaker, when critics charge Desmond Tutu, the embattled South African bishop, of being a politician masquerading as a churchman, he replies that "God does not allow for vacuums, even in politics." In South Africa, Bishop Tutu is filling a moral void, shouldering the burden of creating a just society in a land marked by the institutional racism of apartheid. His "politics" is not a game, or a career; it's a calling.

This week, his fellow churchman—and fellow "politician"—Pope John Paul II, made a pilgrimage to his Polish homeland in order to fill another vacuum—the dark space left in December 1981 when the Polish generals silenced Solidarity with the iron fist of martial law. And he proved that vacuums cannot exist—expecially in politics. The Pope's homilies on justice and hope rekindled the freedom-loving spirit of the Polish people, bringing light to a bleak society.

Pope John Paul showed the Polish people—his people—that rigid laws and loaded rifles cannot kill the dream of liberty. It lives when people refuse to give up their nation and refuse to give up their faith. It lives when people are willing to step forward, whatever the risk, rather than submit to injustice. It lives when priests dare to be politicians, and their people have the courage to listen.●

U.S. INDUSTRIES MUST RESPOND TO CHANGED COMPETITIVE CONDITIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 5 minutes.

● Mr. LAFALCE. Mr. Speaker, I would like to bring to the attention of the Members an editorial by J. W. Anderson in today's Washington Post. It poses the question, Is the Japanese Government really being unfair to U.S. industry? Mr. Anderson argues that the Japanese Government's assistance to industry, and its targeting, import restrictions, and other trade practices, are not the only—or even the most important—reasons for the success of Japanese companies in obtaining market shares previously held by U.S. companies.

One example he gives is the semiconductor industry, where the real difference between Japanese and American firms is that American businesses are small, innovative, but undercapitalized, while Japanese semiconductor firms are large, integrated companies with easy access to capital. It is capital access, not Government policy, which make Japanese penetration of the semiconductor market so successful.

American businesses generally have been unresponsive to the competitive challenge of foreign firms that are larger, stronger financially, and more flexible. U.S. industries have not been prepared for foreign marketing tactics riskier and more imaginative than their own. It may be that relatively more restricted access to capital accounts for this inertia.

Reversing the decline in U.S. competitiveness will require companies and some whole industries to admit their inertia and inflexibility, as well as their short term profit mania. Once industry is prepared to respond to the global economy's competitive challenge, Government can work in concert with management, labor, and the academic community to formulate a successful national industrial strategy.

The text of the editorial follows.

IS THE JAPANESE GOVERNMENT REALLY BEING UNFAIR TO U.S. INDUSTRY?

(By J. W. Anderson)

As high-technology competition between Japan and the United States gets fiercer, the effects are spilling over into their broader political relations. Americans, stunned by the speed with which Japanese companies have captured important markets here, charge unfair tactics by the Japanese government.

Dealings between the two governments have become more abrasive than at any time since World War II, according to experienced diplomats. One urgent question for both countries is whether the alliance between them can survive without damage as this commercial threat sharpens in a field where Americans expected to remain the leaders for decades to come.

Semiconductors, computers and communications equipment are central to the dispute. Many Americans deplored the extent to which some of the middle-tech heavy industries—notoriously steel and autos—lost domestic sales to Japanese producers. But people in this country are inclined to regard that failure as the consequence of strategic errors and excessively rapid wage increases

in the American industries. The explanations for the loss of markets in the high technologies are less obvious, and Japanese successes there have generated a sense of panic among Americans who understand the meaning of these products to the country's economic future.

Take the case of silicon chips, the integrated circuits that remember and process data. A common American accusation holds that the Japanese companies imported them while learning how to use and make them, and then the country—operating as Japan, Inc.—closed itself to further imports, to give the Japanese producers a protected market in which to develop their own manufacturing capacity and launch a surge of exports to the United States.

Against that accusation, you might want to weigh the very substantial American presence in Japan's chip industry. Texas Instruments, a leading American producer, has four plants in Japan manufacturing chips mainly for the Japanese domestic market. Motorola has a wholly owned subsidiary in Japan producing chips almost entirely for the Japanese market. Analog Devices assembles semiconductors in Japan, and buys chips to produce finished products for the Japanese market.

As for computers, according to the Japan Economic Journal's yearbook, IBM Japan ranked second in sales in the Japanese market in 1981, the last year reported. Nippon Univac was eighth, and NCR Japan was tenth. Whatever the Japanese market may be, it doesn't seem to be closed to American investment and these American products.

There's an alternative explanation to the present friction that may be more enlightening. First, keep in mind that the financial pressures on the chip makers are rising very fast with the advance of their technology. Producing a 16K RAM—a 16,000-bit random access memory chip—is not simple, but it is far less expensive to make than a 64K RAM. That, in turn, is a modest matter compared to the resources required for the 256K RAM.

Next, look carefully at the specific companies competing in this field. Motorola, which has been a leader in the political counterattack against the Japanese, is not a small company. But its business is concentrated in chips and products related to them. Its resources are not huge, compared with the demands of the next generation of products.

In contrast the leading Japanese chip maker, NEC—Nippon Electric Co.—is part of the Sumitomo group, a diverse alliance of interlocked companies including two banks and two insurance companies. NEC is an established producer of a wide range of computers, telecommunications equipment and industrial robots. It can use the earnings of mature products to pay for the development of new ones and, in need, it can turn to its Sumitomo partners for additional support.

NEC's access to capital is no better than that of American giants like IBM or Western Electric. But you may have noticed that, although IBM and Western Electric produce chips, they do not seem to be contributing much to the outcry against the Japanese. It is coming from smaller companies whose resources are being desperately stretched by the effort to stay in the field.

In the United States, new technology is often brought to the market first by small, adventurous companies built around a single product. The chip industry in the United States is full of examples. But in Japan the carriers of new technology are typically the affiliates of large, highly integrated industrial groups. Like Sumitomo, these groups are usually organized around banks, and their members rarely suffer a lack of development funds. That, rather than government subsidies, is the key to the startling financial strength of the Japanese chip makers in comparison with all but the largest of their American counterparts.

Americans complain that the Japanese engage in "forward pricing." As a company gains experience in making a chip, and sales volume rises, the unit cost drops. A big company with financial strength can sell a new product at a forward price, profitable over its life span but less than the initial high cost of production. A smaller company that has to worry about its cash flow cannot afford that strategy. That's one major reason why the smaller American chip companies are being squeezed in the race with the bigger and richer ones, both American and Japanese.

This pattern of competition—pitting small, specialized companies with limited cash against big, integrated corporations—runs all through the international chip and computer industry. The biggest of these competitors are American. But nearly all of the small and highly specialized companies are also American, while all of the leading Japanese chip makers are very large combines producing a great range of electronic and electrical equipment, machinery and industrial goods.

This same pattern also runs through that other field of current high-tech combat, the machine tool industry. Most of the American machine tool makers are small companies in a highly cyclical business, not easily able to finance the leap into computer-driven tools. Again, their Japanese competitors have no such constraints. The largest of them, Toshiba, is also a major computer manufacturer.

Important differences in Japanese and American business practices further help explain some of the recent developments in the chip market. Japanese companies tend to introduce new products at high volumes, rather than scaling up gradually as demand develops. The highly responsive Japanese market doesn't give you the time to do otherwise. If you don't go to high volume immediately, your competitors will beat you to it. The tactics that the Japanese companies use in the United States are those that they learned in Tokyo.

That's how the Japanese chip makers got their original foothold in the American market. With the rapid growth of American sales in the late 1970s, the undercapitalized American producers couldn't keep up with their orders. But the Japanese could, and did.

The Japanese tendency to go fast to high volume also reflects the relatively minor importance of profits, especially short-term profits, in the Japanese business world.

Over the past five years, American chip makers have been taken by surprise. They did not expect the Japanese companies to exploit a very new branch of basic science, most of it American, so rapidly.

Possibly more important, American businessmen are not accustomed to competing with foreign firms bigger than theirs and with immensely greater financial strength. Further, they were not prepared for the Japanese practice of throwing new products immediately into full-scale production. American businessmen think of themselves as the ultimate risk-takers, and did not expect to run into marketing tactics even more daring than their own.

As you look carefully at the competition in chips, it looks a little less like a simple collision between a Japanese industry and American industry. And it looks much more like competition between the smaller specialized firms and much bigger diversified ones—of which some, but by no means all, are Japanese.●

UPGRADING SCIENTIFIC CAPABILITIES IN THE EPA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. BROWN) is recognized for 30 minutes.

● Mr. BROWN of California. Mr. Speaker, on Monday, June 20, I brought to the attention of my colleagues an article describing the weaknesses in the Environmental Protection Agency's toxicology laboratory audit program. Sound regulatory decisions on toxic chemicals, drugs, and environmental pollutants cannot be made without prudent and insightful estimates of their potential to harm man. At this time, data from experiments with animals are relied upon heavily in making such estimates, although the importance of epidemiological studies is rising in many cases. If animal data submitted to EPA is flawed, the public can be exposed to unreasonable and unnecessary risks.

The Agriculture Subcommittee I chair has been closely monitoring for 3 years now the quality of science underlying EPA's regulatory actions involving pesticides. I am convinced that one of the most pressing challenges facing the Agency at this time is to rapidly upgrade the scientific standards followed when Agency scientists are estimating human risks from various environmental contaminants. I am pleased to report that some hopeful signs have emerged recently suggesting that the Agency is prepared to strive for and invest in enhanced scientific capabilities. Budget-related pressures on staff scientists to crank out scientific reviews at an unreasonable pace have subsided somewhat and personnel are being allotted more time and resources for technical training and support.

We should not expect miracles though. Several years will be required to establish in EPA the level of scientific expertise and excellence necessary if that agency is to regularly and routinely carry out its vital duties on an equal scientific footing with the private sector laboratories conducting and preparing studies for submission to the agency in support of regulatory actions. I do not make this statement lightly. This conclusion is strongly supported by a lengthy record of testimony, investigative material, and communications with the agency developed by the DORFA Subcommittee.

Comparable conclusions have been reached by other congressional committees which have also been investigating the EPA over the last year or so. This intense public scrutiny of the details of agency scientific decisionmaking will be particularly valuable to the public in the long run if it results in greater appreciation for the complexity of the regulatory process and the essential role of science in perceptively evaluating the costs and benefits of alternative regulatory actions.

I am pleased to also report to my colleagues that EPA Administrator Ruckelshaus made his first major speech on this very topic yesterday before the National Academy of Sciences. He expressed concern about the quality of science in the risk assessment process, and demonstrated great sensitivity toward the importance of isolating science from essentially subjective aspects of the regulatory decisionmaking process. Mr. Ruckelshaus shares my positive response to the insightful Academy report "Risk Assessment in the Federal Government: Managing the Process" released earlier this spring. I am including at the conclusion of my remarks pertinent portions of the Administrator's June 22 speech before the Academy.

I would like to also point out to my colleagues that the Committee on Agriculture has gone on record in support of initiatives within EPA to improve the risk assessment process. I woud like to quote here the May 11, 1983, Committee on Agriculture report accompanying H.R. 2785, Federal Insecticide, Fungicide, and Rodenticide Act Extension. House Report 98-104. The purpose and need section of the report states:

The committee believes there are several substantive issues, as well, that deserve the attention of the agency. In the past few years, the pesticide program has struggled with a number of difficult contentions and scientifically complex decisions involving pesticide active ingredients found to cause cancer in laboratory animals. In estimating human cancer risks from exposure to pesticides known to cause cancer in animals, scientists within OPP must make judgments on how to extrapolate animal experimental findings to men. Testimony was received by the committee indicating that at a number of steps in the risk assessment process there is no uniformly accepted scientific basis to guide scientists in regulatory agencies and that the agency has used various scientific methods and risk assessment models concerning which there is disagreement within the scientific community. Accordingly, the levels of human risk estimated in a given risk assessment can vary substantially depending upon the combinations of assumptions used.

The committee believes that the inherent and unavoidable uncertainty in the risk assessment process heightens the importance that the EPA closely follow published, scientifically defensible guidelines throughout the risk assessment process. Toward this end, the committee recommends that EPA move expeditiously toward implementing, to the fullest extent practicable, the recommendations relating to the development of uniform inference risk assessment guidelines of the National Research Council report, "Risk Assessment in the Federal Government: Managing the Process."

The oncogenic risk-assessment guidelines and procedures needed in the pesticide program should contain an explicit statement of the risk-assessment inference options that arise in extrapolating human risk from experimental data and the scientific basis for choosing among alternative risk-assessment methods and/or assumption. The guidelines should be comprehensive and detailed enough to address the generic issues of scientific uncertainty that arise in assessing risk, yet flexible enough to permit exceptions that could be justified scientifically. The guidelines should not be so rigid as to compel the agency to continue using concepts and methods that become obsolete as new scientific developments improve the risk assessment tools available to regulatory agencies. There should be a requirement for periodic review of the guidelines. Changes in the guidelines should be adopted following the same procedure, or a substantially similar procedure as utilized in the promulgation of the original guidelines.

While the Administrator is formulating and carrying out a procedure to implement uniform oncogenic risk-assessment guidelines, the committee believe there should be a concerted effort to follow the spirit of the National Research Council recommendations concerning cancer risk-assessment guidelines. To the extent practicable the agency should consistently follow widely acceptable scientific procedures in conducting risk assessment, and should regularly consult through existing interagency committees or through new procedures where necessary, with scientific experts affiliated with the National Toxicology Program, the Food and Drug Administration, the National Center for Toxicological Research, the National Cancer Institute, and other Federal agencies, commissions, or institutions. Whenever the Office of Pesticide programs utilize a novel analytic procedure, or adopts a new assumption during the course of a risk assessment that has the effect of significantly changing the estimated level of risk; that is, from 1 in 100,000 risk to 1 in 10,000, the agency should explain in detail the scientific justification for the change, consistent with the provisions of section 10 of FIFRA.

Among the specific actions needed as soon as possible, Congress should put in place some corrective measures to resolve the long-standing problem of inadequate or incomplete data on persticides. I intend to hold a hearing in the subcommittee before the summer recess to explore these issues and to provide the Agency an opportunity to explain the status of its response to the Industrial Bio-Test Laboratories (IBT) case. Hundreds of experiments conducted at this laboratory during the late 1960's and early 1970's were subsequently found to be faulty in 1976-78. Corrective regulatory actions on dozens of major pesticides tested at IBT are still not complete. Progress made to date in replacing faulty IBT studies has largely resulted from voluntary actions by the companies holding registrations for these pesticides. Clearly we need a more rapid and decisive mechanism to identify laboratories conducting studies inappropriately. We also must assess whether changes are needed in the Federal Insecticide, Fungicide, and Rodenticide Act to authorize the Agency to take more expeditious and decisive steps when problems are found in the quality of scientific studies submitted to the Agency.

I hope to also explore in the next few months the possible role that other agencies and programs might be able to play in assisting the EPA to upgrade its scientific capabilities in these areas. The National Toxicology Program (NTP), in particular, may be able to assist EPA and other Federal regulatory agencies in this regard. The NTP has an excellent staff of experts from all disciplines involved in toxicology testing and the evaluation of the results in terms of human hazards. To familiarize my colleagues with the NTP, I would also like to include in the RECORD an excellent article on the NTP which appeared in the June 21, 1983, Wall Street Journal.

SCIENCE, RISK AND PUBLIC POLICY

(By William D. Ruckelshaus)

We are now in a troubled and emotional period for pollution control; many communities are gripped by something approaching panic and the public discussion is dominated by personalities rather than substance. It is not important to assign blame for this. I appreciate that people are worried about public health and about economic survival, and legitimately so, but we must all reject the emotionalism that surrounds the current discourse and rescue ourselves from the paralysis of honest public policy that it breeds.

It is no accident that I am raising this subject here in the house of science. I believe that part of the solution to our distress lies with the idea enshrined in this building, the idea that disciplined minds can grapple with ignorance, and sometimes win: the idea of science. We will not recover our equilibrium without a concerted effort to more effectively engage the scientific community. Frankly we are not going to be able to emerge from our current troubles without a much improved level of public confidence. The polls show us that scientists have more credibility than lawyers or businessmen or politicians and I'm all three of those. I need your help.

Those of you who are scientists may think you have heard this before, but this is not a naive plea for science to save us from ourselves. Somehow our democratic technological society must resolve the dissonnance between science and the creation of public policy. Nowhere is this more troublesome than in the formal assessment of risk—the estimation of the association between the exposure to a substance and the incidence of some disease, based on scientific data.

Here is how the problem emerges at the Environmental Protection Agency. EPA is an instrument of public policy, whose mission is to protect the public health and environment in the manner laid down by its statutes. That manner is to set standards and enforce them; and our enforcement powers are strong and pervasive. But the standards we set, whether technology or

health-related, must have a sound scientific base.

Science and the law are thus partners at EPA, but uneasy partners. It's a shotgun wedding. The main reason for the uneasiness lies, I think, in the conflict between the way science really works and the public's thirst for certitude that is written into EPA's laws. Science, as you all know, thrives on uncertainty. The best young scientists flock into fields where great questions have been asked but nothing is known. The greatest triumph of a scientist is the crucial experiment that shatters the certainties of the past and opens up rich new pastures of ignorance.

But EPA's laws often assume, indeed demand, a certainty of protection greater than science can provide at the current state of knowledge. The laws do no more than reflect what the public believes and what it often hears from people with scientific credentials on the 6 o'clock news. The public thinks we know what *all* the bad pollutants are, *precisely* what adverse health or environmental effects they cause, how to measure them *exactly* and control them *absolutely*. Of course, the public and sometimes the law are wrong, but not all wrong. We do know a lot about some pollutants and we have controlled them effectively using the tools of the Clean Air Act and the Clean Water Act. These are the pollutants for which the scientific community can set safe levels and margins of safety for sensitive populations. If this were the case for all pollutants, we could breathe more easily (in both senses of the phrase); but it is not so.

It is my strong belief that where EPA or OSHA or any of the social regulatory agencies is charged with protecting public health, safety or the environment, we should be given, to the extent possible, a common statutory formula for accomplishing our tasks. This statutory formula may well weigh public health very heavily in the equation as the American people certainly do.

The formula should be as precise as possible and should include a responsibility to assess the risk and to weigh that, not only against the benefits of the continued use of the substance under examination, but against the risks associated with substitute substances and the risks associated with the transfer of the substance from one environmental medium to another via pollution control practices. I recognize that legislative change in the current climate is difficult. It is up to those of us who seek change to make the case for its advisability.

I did not come here today to plead for statutory change. My purpose is to speak of risk assessment and risk management and science's role in both. It is important to distinguish these two essential functions, and I rely here on a recent National Academy of Sciences report on the management of risk in the Federal Government. Scientists assess a risk to find out what the problems are. The process of deciding what to do about the problems is risk management. The second procedure involves a much broader array of disciplines, and is aimed toward a decision about control.

Risk management assumes we have assessed the health risks of a suspect chemical. We must then factor in its benefits, the costs of the various methods available for its control, and the statutory framework for decision. The NAS report recommends that these two functions be separated as much as possible within a regulatory agency. This is what we now do at EPA and it makes sense.

I think we also need to strengthen our risk assessment capabilities. We need more research on the health effects of the substances we regulate. I intend to do everything in my power to make clear the importance of this scientific analysis at EPA. Given the necessity of acting in the face of enormous scientific uncertainties, it is more important than ever that our scientific analysis be rigorous and the quality of our data be high. We must take great pains not to mislead people regarding the risks to their health. We can help avoid confusion both by the quality of our science and the clarity of our language in explaining the hazards.

I am sure that in the future, this being an imperfect world, the rigor and thoroughness of our risk analyses will be affected by many factors, including the toxicity of the substance, the populations exposed, the pressure of the regulatory timetable, and the resources available.

Despite these often conflicting pressures, risk assessment at EPA must be based on scientific evidence and scientific consensus only. Nothing will erode public confidence faster than the suspicion that policy considerations have been allowed to influence the assessment of risk.

Although there is an objective way to assess risk, there is, of course, no purely objective way to manage it, nor can we ignore the subjective perception of risk in the ultimate management of a particular substance. To do so would be to place too much credence in our objective data and ignore the possibility that occasionally one's stomach is right. No amount of data is a substitute for judgment.

Further, we must search for ways of describing risk in ways the average citizen can comprehend. Telling a family living close to a manufacturing facility that no further controls are needed on the plant's emissions because, according to our linear model their risk is only 10^{-6} is not very reassuring. We need to describe the suspect substances as clearly as possible, tell people what the known or suspected health problems are and help them compare that risk to those with which they are more familiar.

To effectively manage the risk, we must seek new ways to involve the public in the decision-making process. Whether we believe in participatory democracy or not it is a part of our social regulatory fabric. Rather than praise or lament it, we should seek more imaginative ways to involve the various publics impacted by the substance at issue. They need to be involved early on and they need to be informed if their participation is to be meaningful. We will be searching for ways to make our participatory process work better.

OF MICE AND MEN—TOXIC-WASTE FIGHTS START IN LABORATORIES, BUT HOW GOOD ARE THE TESTING METHODS?

(By Arlen J. Large)

RALEIGH, N.C.—Phthalates.

That is the name of a family of chemicals. They are used to make soft plastics, like a pliable cover for a sofa. Some day, though, old sofa covers get thrown away and show up in trash dumps. Some of the trash may be toxic, or poisonous. How do you tell?

With mice. At the Research Triangle Institute near here, 60 little cages each hold a male and female mouse. The rodents eat feed laced with phthalates, and in this test scientists have the specific assignment of looking for any poisonous effect on the production of baby mice. The fertility results will go into a giant government computer, which already holds data showing that phthalates can give cancer to mice or harm their livers.

What happens in this quiet, white-coated world of chemical testing lays the scientific foundation for what happens in the noisy world of bureaucrats and lawyers, where chemicals are regulated to protect not mice but people. The regulators must judge whether animals are good stand-ins for humans, whether a chemical's benefits to society outweigh its health risks, and whether there is enough money somewhere to clean up a dangerous dump. That is the stuff of angry headlines these days, but the controversy all begins with obscure researchers like David Rall and his mice.

"IT'S A BABY"

"We're dealing with a science that's only two decades old," says Dr. Rall. "It's a baby compared to other biomedical sciences. I think we'll be in much better shape with the experience of another 10 years."

Dr. Rall is head of the National Toxicology Program, an arm of the U.S. Health and Human Services Department. His agency is headquartered in the wooded, campus-like serenity of the Research Triangle Park outside of Raleigh. Its job is to help keep track, world-wide, of health-related tests being performed on aminals by government agencies and chemical manufacturers alike. Part of its annual $71 million budget pays for tests on a selection of the nearly 60,000 chemicals in use in the U.S. today.

Requests for tests can come from anybody, but such safety enforcers as the Environmental Protection Agency, the Food and Drug Administration and the Agriculture Department often do the prompting.

The National Toxicology Program performs some testing in its own laboratories, but most of it is farmed out to the dozen or more private contract labs that do such work for hire. Just down the road, for example, is the Research Triangle Institute, a company being paid by Dr. Rall's agency to test phthalates for their effects on reproduction and fertility of mice. Toxicology Program scientists will analyze this data and write formal reports destined for the government's computerized National Library of Medicine.

It was work by the Toxicology Program that showed that phthalates could harm rats' livers. The unexpected report set off alarms at the Environmental Protection Agency, which regulates chemicals under the Toxic Substances Control Act. That law requires a company planning the sale of a new chemical to notify the EPA before marketing it.

Pending at the EPA was one company's notification of its plan to bring a new phthalate-based plastic-softener on the market. Because of the test results on rat livers, the EPA told the applicant to perform its own animal tests on its proposed product. The company refused, and withdrew its marketing application.

Computer networks give both scientists and regulators a rich international cafeteria of animal-test results for chemicals coming to market. "It's really amazing," says Gerhard Zbinden, director of the University of Zurich's Institute of Toxicology. "We have access to about 200 data banks for compounds going back 20 years. I'm happy with this kind of dissemination. The information is there. The problem is what to do about it."

This problem is perhaps best illustrated in the case of dioxin, an unwanted contami-

nant produced in the manufacture of other chemicals. Animal-test results are rather straightforward and, indeed, mostly settled by now. "For all intents and purposes the classic toxicity testing on dioxin has been completed," says John Moore, deputy head of the National Toxicology Program here. Dioxin gives cancer to rats, he says, "but there's hesitancy on the part of a lot of people on how to extrapolate the results to human risk."

VIETNAM AND MISSOURI

Dioxin is accused of sickening GIs exposed to the defoliant Agent Orange in Vietnam and of threatening Missouri homeowners whose neighborhoods were inadvertently sprayed with dioxin. The exact danger to humans cannot, of course, be proved by experimenting on them like laboratory rats, so scientists must glean clues from cases of accidental exposure.

In 1976, a chemical plant in Seveso, Italy, sprang a powerful leak, sending a dioxin-tainted cloud into the air. Pets and livestock soon died. Some people, in contrast, developed only a skin outbreak that eventually went away. "Human beings seem to be less sensitive than animals to the effects of dioxin," says Robert Rubin, a scientist at the Johns Hopkins University School of Hygiene and Public Health in Baltimore. Only time will tell, he says, whether people exposed to dioxin in Seveso will show a suspicious incidence of cancer.

There is wide agreement that controlled laboratory experiments can be better than random human accidents in measuring the danger of chemicals, if just the right match can be found between the compound, its dosage and the kind of animal. Laboratory testers variously use rats, mice, cats, dogs, rabbits, hamsters, monkeys, chickens and fish. There is even wider agreement that testing methods need improvement. "Toxicology has to change from being a sophisticated art form to a good strong basic science," says James Bridges, professor of toxicology at the University of Surrey in England.

SOME TESTS CALLED USELESS

The U.S. government's Toxicology Program has subjected more than 1,400 chemicals to animal tests since its work started in 1979. While appreciating the purpose, some outside scientists dislike the result. "It's the Western world's major effort in toxicology, and it deserves better than it has got," says Richard Hall, science vice president for McCormick & Co., the Baltimore spice and food-flavoring concern. "its testing is very pedestrian and obsolete."

Mr. Hall contends that some of the Toxicology Program's work skimps on comparisons between the way animals and people use up compounds fed to them. Most of the tests, he says, "don't push science ahead one damned bit, and are useless for humans." He hopes the agency will spend less money on compound-by-compound testing and more on ways to find faster and more accurate test methods.

That is just what is happening, says Dr. Rall. One new test method getting high priority would bypass the traditional regimen of giving a chemical to rats for two years to see exactly what happens to their organs. Instead, the same chemical is placed in a glass-dish culture of living animal cells for just three months, and then the dish's contents are chemically analyzed to measure the chemicals' effects. "We're putting a great deal of emphasis on these three-month studies," Dr. Rall says.

REFINING THE METHOD

His agency is paying Northrop Corp., among others, to help refine the method at a nearby laboratory full of equipment for innoculating the cultures in the glass dishes, plus a back room squirming with rodents to supply cells for the cultures. Successful three-month tests could save money by reducing the number of live animals that usually are exposed to traditional two-year tests. And, says Rayond Tennant, a scientist working on the project, three-month tests could serve as a useful preliminary screen to see which chemicals should be subjected to the more costly two-year test method.

Currently, panels of scientific experts sometimes reject a substance nominated for testing because it is chemically similar to an already tested compound, or it occurs naturally in the human body, or it isn't commercially available and people are unlikely to come in contact with it.

In Atlanta, the Centers for Disease Control, another arm of the Health and Human Services Department, is setting up an office to keep an inventory of people, not animals, who have been exposed to dangerous chemicals. The list will allow scientists to trace the life-and-death histories of exposed persons to see what kinds of disorders may have resulted.●

ORBIT '81

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. ROE) is recognized for 5 minutes.

● Mr. ROE. Mr. Speaker, I take great pleasure in rising today to salute the fine young people of the Camden and Woodrow Wilson High Schools in Camden, N.J. for their fine achievement in being included as part of the current *Challenger* shuttle flight.

These New Jersey high school students developed a unique science project called Orbit '81 that resulted in the first orbiting of living creatures in space. Orbit '81 is designed to determine how the weightlessness of outer space affects the social structure of a colony of carpenter ants.

The ants have been placed aboard the space shuttle in a special ant farm container that was developed by the Camden students in conjunction with NASA and the RCA Corp.

Mr. Speaker, this project was 4 years in the making. These young students from minority backgrounds have devoted many hours of their personal time to insuring that this project would be the success it has proven to be.

There has been much talk of late, detailing the serious problems being faced by our Nation's educational system. The Camden project proves that our students are equal to any of their counterparts around the world. Rather than badmouthing our teachers and educational programs, we should be looking for ways, as they did in Camden, to stimulate student interest in science, engineering, and other fields of endeavors.

As a member of the New Jersey congressional delegation I am proud to take this time to recognize the historic efforts of the Camden High School students who developed Orbit '81 and have made a place for themselves in space history.●

INTRODUCTION OF THE STATE JUSTICE INSTITUTE ACT OF 1983

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. KASTENMEIER) is recognized for 10 minutes.

● Mr. KASTENMEIER. Mr. Speaker, today in a continuing effort to improve the administration of justice in this country, in State as well as Federal courts, I rise to reintroduce the State Justice Institute Act of 1983.

It is with a certain amount of regret that I observe that a State Justice Institute has not already been enacted into law. Passed without dissent by the Senate during the 96th and 97th Congresses and also reported favorably by my subcommittee—the House Judiciary Subcommittee on Courts, Civil Liberties, and the Administration of Justice—during these two Congresses, final enactment has eluded this deserving legislative project. I optimistically look forward to legislative success in the 98th Congress.

The State Justice Institute Act would create a nonprofit national body to improve the administration and functioning of State courts in the United States. The act would provide to State and local courts a resource comparable to that provided in the correctional area by the National Institute of Corrections. It would be funded at a similar level and would provide a comparable spectrum of national clearinghouse research, technical assistance, demonstration, and training programs. Federal moneys could not be used to interfere with the independent nature of any State judicial system nor allow sums to be used for the funding of regular judicial and administrative activities.

The Institute would complement, rather than conflict with, existing Federal programs for State and local justice systems. It also would fill a gap in the President's program to fortify federalism by strengthening the judicial power of the States. Last, the Institute would provide meaningful access to justice—by improving the quality of justice—for many ordinary citizens who litigate their disputes in State and local courts.

As summarized in recent congressional testimony by two able representatives of the State court systems:

The State Justice Institute legislation is premised on the belief that improvement in the quality of justice administered by the states is not only a goal of fundamental importance in itself, but is essential to attainment of important national objectives in-

cluding a reduced rate of growth in the caseload of the federal courts and preservation of the historic role of state judiciaries in our federal system.

The proposed legislation was drafted by an able task force of the Conference of Chief Justices and the Conference of State Court Administrators. It has been endorsed by, among others, the Chief Justice of the United States, the Judicial Conference of the United States, and the American Bar Association. The chief sponsor of companion legislation (S. 384) in the Senate, Senator HOWELL HEFLIN, has been joined by a solid core of respected cosponsors from both sides of the aisle. The list of cosponsors on my bill is equally impressive.

In my opinion, the State Justice Institute will succeed as an assistance program because it will:

Place responsibility for improvement of State court systems directly on the judicial officials charged with this responsibility under their own State constitutions and laws;

Be under control, at both the State and national levels, of State officials with first-hand knowledge of the problems facing their courts;

Permit large economies of scale by concentrating on national programs that would serve the needs of all 50 States;

Eliminate the need for a large bureaucracy by operating with a small staff in conjunction with existing judicial agencies of the States and the State courts themselves. (The Institute could support but not duplicate services of existing agencies such as the National Center for State Courts and the National Judicial College);

Permit improvement of courts on a systemwide basis; that is, in a manner recognizing their interrelated civil and criminal functions;

Provide a vehicle by which State courts collectively could communicate and cooperate at the national level with other components of State and local criminal justice systems and such agencies as the Federal Judicial Center, the National Institute of Justice, and the Bureau of Justice Statistics; and

Provide a vehicle for implementation of special criminal justice projects authorized by Congress or Federal executive agencies as these might involve State courts.

The structure of the State Justice Institute would be as follows. The Institute would be operated by an executive director under the supervision of an 11-member board of directors appointed by the President and confirmed by the Senate. Six board members would be State judges and one a court administrator chosen from a panel or panels of candidates recommended by the Conference of Chief Justices following consultation with appropriate legal and judicial organizations. There would be four public members appointed directly by the President. The Institute would operate through grants and contracts with funding priority going to projects of State and local courts and their national nonprofit support and training organizations. State supreme courts would be the accountable administrative agencies for projects of State and local courts within their jurisdictions. Such projects would require a 25-percent match. The emphasis would be on programs of national scope including national clearinghouse, research, technical assistance, demonstration, education and training programs.

The legislation specifically forbids use of Federal funds to supplant State or local funds or to support basic court services.

The Institute further is restricted from interfering with "the independent nature of any State judicial system."

The proposed legislation authorizes modest funding at up to $20 million in fiscal 1984 and $25 million in fiscal 1985 and 1986.

Mr. Speaker, I would like to quote from the Chief Justice of the United States—a man who has spent a lifetime trying to improve the administration of justice in State and Federal courts:

There is . . . clearly an overriding national interest in improving access to and confidence in our state court. Important as it is, our concept of federalism is not the only objective requiring their preservation. Our state courts are close to the people and they are the primary safeguard of the rights and privileges of individuals under both state and federal law. Together with our federal courts, they preserve and vindicate those rights guaranteed under the Constitution and federal laws. In recent years, national legislative policies and programs have increased the number of such federal rights adjudicated in state courts. The role our state courts play in evaluating and arbitrating the enforcement of state policies, and the state enforcement of national legislative policies and programs, is most significant.

Chief Justice Burger's words are echoed by law professors, judicial administrators, civil libertarians, Federal and State judges, and ordinary citizens themselves. Indisputably, the Federal judicial system was created to complement our State judicial systems. That complementary relationship creates the resiliant fabric of our constitutional concepts of federalism and separation of powers. The bill I am introducing today strengthens, rather than soils, that fabric. It will lead to improvements in the delivery of justice for individuals who litigate in our State courts—where 96 percent of the cases in this country are filed.

Once again, I would like to acknowledge the strong leadership of the principal sponsor of this legislation in the Senate. Senator HOWELL HEFLIN, formerly chief justice of the Alabama Supreme Court, has been firm and steadfast in his support for the creation of a State Justice Institute.

I also would like to thank several State court judges who have devoted much time and effort to this legislative endeavor: Justice Robert F. Utter, Supreme Court of Washington; Chief Judge Lawrence Cooke of the State of New York; and Chief Justice Bruce Beilfuss, Supreme Court of Wisconsin. The latter, my own chief justice, is retiring next month and I just wanted my colleagues to know of his lifetime of commitment to improving the delivery of justice in not only my home State but nationwide.

In closing, the creation of a State Justice Institute will assist all 50 State court systems and the territories to better serve all the people in this country. I urge support and more cosponsorship—in addition to the 41 colleagues already on the bill—for this deserving legislation.

As a final postscript, I would like to announce that my subcommittee will hold 1 day of hearings on the proposed legislation. On Thursday, July 13, 1983, at 10 a.m., the subcommittee will receive testimony from representatives of the American Bar Association, the Conference of (State) Chief Justices, and the Judicial Conference of the United States.●

A JOBS BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Louisiana (Mrs. BOGGS) is recognized for 5 minutes.

● Mrs. BOGGS. Mr. Speaker, in recent weeks, I have discussed at length the minimal effect that the Competitive Shipping and Shipbuilding Act of 1983 would have on agricultural and coal export prices. I have shown how both the American farmer and the U.S. coal exporter will actually benefit from a strong, competitive U.S. merchant marine. Today, I would like to focus on the economic and the national security benefits of H.R. 1242. A more thorough examination of these benefits is to be found in a study entitled "Analysis of the Economic and National Security Benefits of the Competitive Shipping and Shipbuilding Act of 1983" done by International Maritime Inc.

One of the most pressing problems that this Congress must deal with is finding ways to generate jobs for the 11,192,000 Americans who are currently out of work. That is a staggering number of people who are beginning to lose hope in their search for meaningful jobs. Development of hi-tech industries will certainly help put some of these Americans to work. But in order to drastically cut the unemployment rolls, we must find ways to revitalize our basic industries.

H.R. 1242 is a realistic approach to the revitalization of one of our most important resources; the U.S. merchant marine. By requiring that 20 percent of our Nation's bulk foreign commerce be carried by U.S.-built, U.S.-flag vessels by 1999, H.R. 1242 would generate over 110,000 jobs in the maritime and related industries.

The Maritime Administration has estimated that 268 vessels averaging 81,650 deadweight tons would be built in U.S. shipyards if the Competitive Shipping and Shipbuilding Act were enacted. Over a 15-year period, this would result in over 12,000 jobs in American shipyards alone. This figure is probably a low estimate since repair-related employment associated with maintenance of the new vessel fleet was not included.

Additionally, over 8,500 seagoing jobs would have to be filled on the 268 new bulk vessels. Seafarers now on the beach ask nothing more than to be allowed to return to the work they are trained to do. H.R. 1242 would do just that.

Shipyards and ship operators are not the only sectors of the economy which would benefit from enactment of H.R. 1242. Maritime supplier industries, such as steel, rubber, machinery, and so forth would realize an increase in demand as shipyards begin new constructions and the vessels begin to enter the service. This would translate into more jobs in these industries which have been hard hit by the recession.

Another factor which is important to consider is that the shipbuilding and ship operating industries have impressive track records for hiring unskilled and untrained laborers. These laborers would have difficulty finding employment elsewhere. The shipyards and vessel operators provide training and experience to make these men and women productive workers.

In a study compiled for the U.S. Maritime Administration entitled "Economic Impact of Maritime Industries on the U.S. Economy, 1971-1978: An Interindustry Analysis," H. C. Chung, professor of economics at the University of Bridgeport, estimated that for every shipyard employee engaged in new vessel production, 3.326 additional employees economywide are required. Simply stated, this means that a job created in a shipyard generates three more jobs in supplier and economywide industries.

Enactment of the Competitive Shipping and Shipbuilding Act would be an important step in getting our economy into high gear once again. And it would be accomplished at no cost to the Federal Government.

Our national security would also be greatly enhanced by the revitalization of our merchant marine. A healthy U.S.-flag fleet would reduce our dependence on foreign-flag vessels for transport of critical materials and commodities. Currently, the U.S. fleet transports less than 2 percent of the 26 commodities the office of the Chief of Naval Operations has identified as essential imports for our defense needs.

The construction of over 250 vessels in U.S. shipyards would provide a desperately needed boost to our Nation's shipbuilding mobilization base as well. These yards, which would be expected to meet both Navy and commercial construction demands in time of war, will continue to cut capacity and idle skilled workers unless something is done soon.

The U.S.-flag ships built to meet the requirements of H.R. 1242 would be of tremendous value in a naval auxiliary role in time of national emergency. The British experience in the recent Falkland Islands crisis reiterated the critical role that the merchant marine plays in any force projection situation. The current U.S. fleet would be found dangerously inadequate to meet these sealift demands. We must not allow this to continue.●

CONFERENCE REPORT ON H.R. 3133

Mr. BOLAND submitted the following conference report and statement on the bill (H.R. 3133) making appropriations for the Department of Housing and Urban Development and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1984, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 98-264)

The Committee of Conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3133) "making appropriations for the Department of Housing and Urban Development and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1984, and for other purposes," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 7, 11, 14, 22, 27, 29, 42, 45, 49, 50, and 55.

That the House recede from its disagreement to the amendments of the Senate numbered 2, 3, 5, 8, 15, 16, 17, 18, 19, 20, 21, 23, 31, 41, 44, 48, 56, and 57, and agree to the same.

Amendment numbered 4:

That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment, amended to read as follows:

HOUSING COUNSELING ASSISTANCE

For contracts, grants, and other assistance, not otherwise provided for, for providing counseling and advice to tenants and homeowners—both current and prospective—with respect to property maintenance, financial management, and such other matters as may be appropriate to assist them in improving their housing conditions and meeting the responsibilities of tenancy or homeownership, including provisions for training and for support of voluntary agencies and services as authorized by section 106(a)(1)(iii) and section 106(a)(2) of the Housing and Urban Development Act of 1968, as amended, $3,500,000.

And the Senate agree to the same.

Amendment numbered 9:

That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$3,468,000,000*; and the Senate agree to the same.

Amendment numbered 12:

That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$19,000,000*; and the Senate agree to the same.

Amendment numbered 24:

That the House recede from its disagreement to the amendment of the Senate numbered 24, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$64,000,000*; and the Senate agree to the same.

Amendment numbered 28:

That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$121,110,000*; and the Senate agree to the same.

Amendment numbered 30:

That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$146,308,000*; and the Senate agree to the same.

Amendment numbered 36:

That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,238,500,000*; and the Senate agree to the same.

Amendment numbered 37:

That the House recede from its disagreement to the amendment of the Senate numbered 37, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$65,000,000*; and the Senate agree to the same.

Amendment numbered 38:

That the House recede from its disagreement to the amendment of the Senate numbered 38, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,140,300,000*; and the Senate agree to the same.

Amendment numbered 39:

That the House recede from its disagreement to the amendment of the Senate numbered 39, and agree to the same with an amendment, as follows:

Delete matter proposed by House and stricken by Senate and delete matter inserted by Senate; and the Senate agree to the same.

Amendment numbered 46:

That the House recede from its disagreement to the amendment of the Senate numbered 46, and agree to the same with an amendment as follows:

In lieu of the sum proposed by said amendment insert *$24,500,000*; and the Senate agree to the same.

Amendment numbered 51:

That the House recede from its disagreement to the amendment of the Senate numbered 51, and agree to the same with an amendment as follows:

In lieu of the sum proposed by said amendment insert *$8,070,726,000*; and the Senate agree to the same.

Amendment numbered 52:

That the House recede from its disagreement to the amendment of the Senate numbered 52, and agree to the same with an amendment as follows:

In lieu of the sum proposed by said amendment insert *$345,692,000*; and the Senate agree to the same.

Amendment numbered 54:

That the House recede from its disagreement to the amendment of the Senate numbered 54, and agree to the same with an amendment as follows:

In lieu of the sum proposed by said amendment insert *$185,378,000*; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 1, 6, 10, 13, 25, 26, 32, 33, 34, 35, 40, 43, 47, 53, 58, and 59.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference of the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3133) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1984, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

TITLE I—DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Amendment No. 1: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

The amount of contracts for annual contributions, not otherwise provided for, as authorized by section 5 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), and heretofore approved in appropriation Acts, is increased by $636,336,000: Provided, That the budget authority obligated under such contracts shall be increased above amounts heretofore provided in appropriation Acts by $9,912,928,000: Provided further, That of the budget authority provided herein, $389,550,000 shall be for assistance in financing the development or acquisition cost of public housing for Indian families, $1,550,000,000 shall be for the modernization of existing public housing projects pursuant to section 14 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437), of which $35,000,000 shall be for the modernization of 1,000 vacant uninhabitable public housing units, pursuant to section 14 of the United States Housing Act of 1937, as amended, other than section 14(f) of such act, and, $1,500,000,000 shall be deferred and shall not become available until January 1, 1984: Provided further, That the first $1,926,400,000 of budget authority recaptured and becoming available for obligation in fiscal year 1984 shall only be made available for assistance to projects developed for the elderly or handicapped under section 202 of the Housing Act of 1959, as amended (12 U.S.C. 1701q): Provided further, That any balances of authorities made available prior to the enactment of this Act which are or become available for obligation in fiscal year 1984, shall be added to and merged with the authority approved herein, and such merged amounts shall be made subject only to terms and conditions of law applicable to authorizations becoming available in fiscal year 1984: Provided further, That none of the merged amounts available for obligation in 1984 shall be subject to the provisions of section 5(c) (2) and (3) and the fourth sentence of section 5(c)(1) of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), and section 213(d) of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 1439).

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees expect the Department and the Office of Management and Budget to adhere to the program detailed in the following table. The Department is expected to utilize the regular reprogramming procedure if any changes are required to the agree upon program contained in the table.

ANNUAL CONTRIBUTIONS FOR ASSISTED HOUSING, FISCAL YEAR 1984—GROSS RESERVATIONS

	Units	Cost	Contract authority	Term	Budget authority
Public housing:					
New construction	5,000	$6,000	$30,000,000	30	$900,000,000
Indian	2,500	5,565	13,912,000	28	389,550,000
Amendments	NA	NA	6,666,000	30	200,000,000
Interest rate adjustments	NA	NA	6,666,000	30	200,000,000
Lease adjustments	NA	NA	22,300,000	1	22,300,000
Modernization	NA	NA	77,500,000	20	1,550,000,000
Total, public housing	7,500	NA	157,044,000	NA	3,261,850,000
Section 8:					
New/substantial rehab:					
Section 202	14,000	6,880	96,320,000	20	1,926,400,000
Existing:					
Regular	35,000	4,000	140,000,000	15	2,100,000,000
Loan management	5,000	3,000	15,000,000	5	75,000,000
Subtotal, existing	40,000	NA	155,000,000	NA	2,175,000,000
Property disposition	10,000	4,700	47,000,000	15	705,000,000
Moderate rehabilitation	5,000	4,381	21,905,000	15	328,575,000
Conversions	45,000	NA	143,260,000	NA	2,148,903,000
Deferred authority			100,000,000	NA	1,500,000,000
Amendments	NA	NA	42,000,000	NA	391,000,000
Total, section 8	114,000	NA	605,485,000	NA	9,174,878,000
Total, public housing and section 8	121,500	NA	762,529,000	NA	12,436,728,000
Less:					
Recaptures	NA	NA	−102,393,000	NA	−2,500,000,000
Permanent authority	NA	NA	−23,800,000	NA	−23,800,000
New authority	NA	NA	636,336,000	NA	9,912,928,000

The conferees have established a reserve fund of $1,500,000,000 in budget authority and $100,000,000 in annual contract authority. These funds will not be available until January 1, 1984. The conferees have set aside these funds pending the enactment of a housing authorization bill in this session. The conferees intend that these funds be used to provide up to an additional 38,500 incremental units, and that no more than a total of 100,000 incremental units be provided during fiscal year 1984. The make-up and

allocation of such units will be determined in subsequent appropriation legislation from within the $1,500,000,000 temporarily placed in a reserve fund. Any residual amounts will be made available for cost and interest amendments or to make up for a possible shortfall in deobligations.

Concerning the use of deobligated funds, the bill contains a provision giving section 8 contracts associated with the elderly and handicapped housing program the first priority on deobligations. The conferees agree that in the event that deobligations are insufficient to fund these section 202 units, additional resources will be made available as necessary.

Amendment No. 2: Deletes language proposed by the House and stricken by the Senate appropriating $62,500,000 in annual contract authority and $312,500,000 in budget authority for a housing payment certificates program, subject to the approval of the Committees on Appropriations. The conferees agree to delete funding for the housing payment certificates programs because it is a new program that is not presently authorized. The conferees have taken this action without prejudice and will wait until enactment of authorizing legislation before funding is considered.

Amendment No. 3: Appropriates $1,362,200,000 for payments for operation of low-income housing projects as proposed by the Senate, instead of $1,431,000,000 as proposed by the House. The amount recommended, together with an estimated $149,000,000 that will be available from fiscal year 1983, will provide a total of $1,511,200,000 for operating subsidies in fiscal year 1984. The conferees intend that the Department provide all public housing authorities with 100 percent of the performance funding system requirements in fiscal year 1984.

Amendment No. 4: Restores language proposed by the House and stricken by the Senate amended to appropriate $3,500,000 for housing counseling assistance, instead of $5,000,000 as proposed by the House.

The conferees note that a recent HUD review of housing counseling casts some doubt on the effectiveness of the program. Two of the concerns raised by the HUD review were the qualifications of housing conselors and the lack of data on the effectiveness of the various approaches used by different counseling agencies. Therefore, the conferees direct that the Department undertake a study to determine the most effective counseling procedures and training requirements for counselors. Such a study should be funded through the Secretary's discretionary fund. A report should be submitted to the Committees on Appropriations no later than April 2, 1984.

Amendment No. 5: Establishes the limitation on Federal Housing Administration mortgage insurance commitments at $50,900,000,000 as proposed by the Senate, instead of $45,900,000,000 as proposed by the House.

Amendment No. 6: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate authorizing the Department to pay debt collection contractor fees from the amounts collected by such contractors.

Amendment No. 7: Deletes language proposed by the Senate prohibiting the sale of section 202 housing for the elderly or handicapped project mortgages without prior congressional approval.

Although the conference agreement deletes Senate language prohibiting the sale of section 202 mortgages, the conferees have serious reservations concerning the Department's policy relative to the proposed sale. The conferees direct the Department to prepare a report on the anticipated short-term and long-term impact on the Treasury and the safeguards provided to the tenants under the terms of the various proposed sales agreements. The conferees expect that this report shall be submitted no later than October 1, 1983 and urge the Department not to proceed with this sale of mortgages without approval of the Committees on Appropriations.

Amendment No. 8: Establishes the limitation on commitments for guarantees of mortgage-backed securities at $68,250,000,000 as proposed by the Senate, instead of $58,650,000,000 as proposed by the House.

Amendment No. 9: Appropriates $3,468,000,000 for community development grants, instead of $3,470,000,000 as proposed by the House and $3,463,200,000 as proposed by the Senate.

The conference agreement provides funding for an estimated 2,500 Indian housing units under the assisted housing account, instead of under the Secretary's discretionary fund. The conferees agree to the following specific allocations within the $68,200,000:

+$9,000,000 for Indian water and sewer projects;

+$2,000,000 for neighborhood development demonstration; and

+$1,000,000 for technical assistance to small communities under the urban development action grant program.

Amendment No. 10: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that any unit of local government which was classified as a metropolitan city in fiscal year 1983 will be so classified in fiscal year 1984 for the community development grant program.

Amendment No. 11: Deletes language proposed by the Senate appropriating $300,000,000 for grants to States and units of general local government to carry out the rehabilitation of residential rental properties. The conferees agree to delete funding for rental rehabilitation grants because this is a new program that is not presently authorized. The conferees have taken this action without prejudice and will wait until enactment of authorizing legislation before funding is considered.

Amendment No. 12: Appropriates $19,000,000 for research and technology, instead of $15,000,000 as proposed by the House and $21,000,000 as proposed by the Senate.

Amendment No. 13: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate allocating $4,000,000 under research and technology for a study of the modernization needs of the existing public housing stock.

The committee of conference is in agreement that the remaining $15,000,000 under research and technology may be allocated at the discretion of the Secretary.

Amendment No. 14: Deletes language proposed by the Senate earmarking $950,000 for the Housing Assistance Council.

Amendment No. 15: Appropriates $572,064,000 for salaries and expenses as proposed by the Senate, instead of $571,114,000 as proposed by the House.

The conferees have agreed to the addition of $950,000 to the salaries and expenses account for the Housing Assistance Council as proposed in the Senate bill. The House also provided $950,000 for the Council, but included the funding under the research and technology account as in previous years. The conferees agree that salaries and expenses is a more appropriate account from which to fund this activity and that the contract should be administered through the Office of the Assistant Secretary for Housing.

TITLE II—INDEPENDENT AGENCIES

AMERICAN BATTLE MONUMENTS COMMISSION

Amendment No. 16: Appropriates $10,462,000 as proposed by the Senate, instead of $10,837,000 as proposed by the House.

CONSUMER PRODUCT SAFETY COMMISSION

Amendment No. 17: Appropriates $35,000,000 for salaries and expenses as proposed by the Senate, instead of $34,500,000 as proposed by the House. The conferees strongly support the targeting and evaluation of information and education activities. CPSC should limit such activities to a maximum of three campaigns without the approval of the Committees on Appropriations, and total resources devoted to information and education activities should not exceed the historical share of seven percent of the CPSC budget.

ENVIRONMENTAL PROTECTION AGENCY

Amendment No. 18: Appropriates $574,900,000 for salaries and expenses as proposed by the Senate, instead of $612,889,000 as proposed by the House.

The committee of conference agrees to the following specific allocations above the January 1983 budget request:

+$1,000,000 and eight positions for the Grosse Ile laboratory and the Great Lakes research program;

+$400,000 and 10 positions for headquarters AWT reviews;

+$3,000,000 and 40 positions for the pesticide program;

+$1,000,000 and 20 positions for toxic chemical activities;

+$1,400,000 and 35 positions for the Inspector General's office;

+$2,000,000 and 40 positions for health risk assessments;

+$1,000,000 and 30 positions for air and water quality monitoring and enforcement;

+$250,000 and five positions for accelerating limestone injection multistage burner research;

+$250,000 and five positions for implementing the Chesapeake Bay study strategies; and

+$24,211,000 and 607 positions to be allocated at the Administrator's discretion.

The conferees do not believe that management and support cost increases should be prohibited, as proposed by the House report language, but are deeply concerned over the steady cost growth in this area. In the past five years the management and support share of the agency's operating budget has increased from 15 percent to over 24 percent. The conferees urge EPA to examine this problem carefully and take strong steps to limit these costs in developing the 1984 operating plan.

The conferees believe the Administrator should place emphasis on enforcement activities in allocating funds for salaries and expenses and abatement, control and compliance above the amounts specifically allocated in the January 1983 budget request and by the conference committee. The conferees direct the Administrator to submit a

plan to Congress within 60 days for allocating increased resources for enforcement purposes.

Amendment No. 19: Appropriates $142,700,000 for research and development as proposed by the Senate, instead of $165,600,000 as proposed by the House.

The conferees agree to the following specific allocations above the January 1983 budget request:

+$4,000,000 for air, drinking water, toxics and non-ionizing radiation health effects;

+$7,000,000 for hazardous waste, air and water pollution control technology;

+$1,500,000 for Great Lakes research;

+$2,000,000 for dioxin research in human toxicity, sampling quality assurance, and disposal methods;

+$5,000,000 for limestone injection multistage burner technology;

+$1,000,000 for support of industry research in drinking water;

+$500,000 for aquifer research;

+$1,500,000 for national crop loss assessment;

+$2,000,000 for indoor air pollution;

+$1,000,000 for lake quality maintenance and improvement;

+$500,000 for air and water quality monitoring technology development; and

+$5,031,000 for other high-priority research as determined by the Administrator.

Amendment No. 20: Appropriates $393,900,000 for abatement, control and compliance as proposed by the Senate, instead of $521,511,000 as proposed by the House.

The conferees are in agreement with the following allocations above the January 1983 budget request:

+$17,780,000 for air quality State grants;

+$30,200,000 for water quality State grants;

+$6,246,000 for public water system State grants;

+$1,406,000 for underground injection control State grants;

+$4,500,000 for hazardous waste management State grants;

+$1,785,000 for pesticide enforcement State grants;

+$1,000,000 for the Great Lakes program;

+$1,900,000 for the National Rural Water Association;

+$1,000,000 for hazardous waste activities;

+$2,000,000 for nonpoint source water pollution;

+$2,625,000 for wastewater treatment operator training;

+$1,500,000 for academic training;

+$4,000,000 for dioxin monitoring activities;

+$5,000,000 for the clean lake program;

+$4,000,000 for Chesapeake Bay implementation strategies; and

+$15,025,000 for other high-priority projects as determined by the Administrator.

The conferees request that the national plan on wastewater treatment operator training be submitted by March 1, 1984.

Amendment No. 21: Deletes language proposed by the House and stricken by the Senate earmarking $5,000,000 for the clean lakes program under section 314 of the Federal Water Pollution Control Act.

Amendment No. 22: Deletes language proposed by the Senate earmarking $5,000,000 for grants to implement cleanup strategies for Chesapeake Bay. The Statement of the Managers provides $4,000,000 under abatement, control and compliance for State matching grants for implementing the Chesapeake Bay study. The conferees expect the Administrator to submit a long-term plan for the implementation of the strategies contained in the Chesapeake Bay study. This plan should identify the total expected Federal funds and the funding schedule needed to implement the strategies.

Amendment No. 23: Appropriates $410,000,000 for the hazardous substance response trust fund as proposed by the Senate, instead of $335,000,000 as proposed by the House.

Amendment No. 24: Limits hazardous substance response trust fund administrative expenses to $64,000,000, instead of $66,514,000 as proposed by the Senate and $51,984,000 as proposed by the House.

Amendment No. 25: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: *: Provided further, That for performance of specific activities in accordance with section 104(i) of Public Law 96-510, the Comprehensive Environmental Responses, Compensation, and Liability Act of 1980, $5,000,000 shall be made available to the Department of Health and Human Services on October 1, 1983, to be derived by transfer from the Hazardous Substance Response Trust Fund*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees believe that this amount, combined with the anticipated unobligated balance of $3,870,000, will be sufficient for fiscal year 1984. The Senate language was amended to make it clear that the funds were to be made available from within the $410,000,000 Superfund appropriation and to assure that the funds were provided to HHS on October 1, 1983.

Amendment No. 26: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: *$2,400,000,000, to remain available until expended, and for projects under section 201(n)(2), subject to the approval of the Committees on Appropriations, $30,000,000.*

The managers on the part of the Senate will offer a motion to concur in the amendment of the House to the amendment of the Senate.

The conferees direct EPA to submit funding recommendations for combined sewer overflow projects to the Committees on Appropriations for approval. In evaluating these recommendations, the Committees on Appropriations will consider only those project segments which can be fully funded and which will provide significant near-term water quality and public health improvments.

Amendment No. 27: Appropriates $700,000 for the Council on Environmental Quality and the Office of Environmental Quality as proposed by the House, instead of $913,000 as proposed by the Senate.

The committee of conference has serious concerns over the role and effectiveness of the Council on Environmental Quality. Specifically, these concerns relate to possible violations of general provisions in annual appropriations Acts and the Council's management of the consolidated working fund. As soon as the results of an ongoing investigation by the House surveys and investigations staff are available, the Committees on Appropriations will review the justification for additional funding and the need for strengthened management controls over the consolidated working fund.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Amendment No. 28: Appropriates $121,110,000 for salaries and expenses, instead of $119,999,000 as proposed by the House and $122,263,000 as proposed by the Senate.

The committee of conference is in agreement with the following changes from the budget request:

−$4,500,000 from the civil defense program. The $28,875,000 available for civil defense activities will support 661 staff years, the same level as in fiscal year 1983;

−$1,000,000 from the $1,828,000 increase requested for mobilization preparedness; and

−$981,000 from the $1,963,000 increase requested for management and administration.

Amendment No. 29: Appropriates $169,176,000 for state and local assistance as proposed by the House, instead of $187,566,000 as proposed by the Senate.

Amendment No. 30: Appropriates $146,308,000 for emergency planning and assistance, instead of $141,583,000 as proposed by the House and $157,258,000 as proposed by the Senate.

The committee of conference is in agreement with the following changes from the budget request:

−$44,517,000 from the civil defense program. The $5,000,000 increase above the fiscal year 1983 civil defense program level is for telecommunications and warning activities;

−$275,000 requested for security planning;

+$1,000,000 for fire prevention and control activities; and

+$5,000,000 for training and education.

GENERAL SERVICES ADMINISTRATION

Amendment No. 31: Appropriates $1,349,000 for the Consumer Information Center as proposed by the Senate, instead of $1,449,000 as proposed by the House.

Amendment No. 32: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: *, to be deposited to the Consumer Information Fund: Provided, That the revenues and collections deposited into the fund shall be available for necessary expenses, other than administrative expenses, of Consumer Information Center activities in the aggregate amount of $6,500,000. Administrative expenses of the Consumer Information Center in fiscal year 1984 shall not exceed $1,449,000. Revenues and collections accruing to this fund during fiscal year 1984 in excess of $7,949,000 shall remain in the fund and shall not be available for expenditure except as authorized in appropriation Acts.*

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Amendment Nos. 33 and 34: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

For necessary expenses, not otherwise provided for, including research, development, operations, services, minor construction, maintenance, repair, rehabilitation and modification of real and personal property; purchase, hire, maintenance, and operation of other than administrative aircraft, neces-

sary for the conduct and support of aeronautical and space research and development activities of the National Aeronautics and Space Administration; including not to exceed (1) $427,400,000 for space transportation capability development; (2) $14,000,000 for a space station; (3) $165,600,000 for space telescope development; (4) $17,000,000 for Numerical Aerodynamic Simulation; without the approval of the Committees on Appropriations; $2,011,900,000, to remain available until September 30, 1985.

SPACE FLIGHT, CONTROL AND DATA COMMUNICATIONS

For necessary expenses, not otherwise provided for; in support of space flight, spacecraft control and communications activities of the National Aeronautics and Space Administration, including operations; production, services, minor construction, maintenance, repair, rehabilitation, and modification of real and personal property; tracking and data relay satellite services as authorized by law; purchase, hire, maintenance and operation of other than administrative aircraft; and including not to exceed (1) $1,500,000,000 for space shuttle production and capability development; (2) $1,570,600,000 for space transportation operations; (3) $50,000,000 for expendable launch vehicles; and (4) not more nor less than $44,000,000 shall be obligated for space communications operations and maintenance and support associated with the tracking and data relay satellite system, excluding amounts to be obligated for award fees earned on the contract; without the approval of the Committees on Appropriations; $3,791,600,000 to remain available until September 30, 1985: Provided, That up to 5 per centum of the amount appropriated for "Research and Development" or "Space Flight, Control and Data Communications" may be transferred between such accounts with the approval of Committees on Appropriations.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The above amounts include the following changes from the budget:

+$50,000,000 for orbiter and engine spares to be held in reserve;

+$45,000,000 for the space telescope;

+$20,000,000 for research and analysis in physics and astronomy and planetary programs. The conferees expect that the funding level for the HEAO-2 (high energy astrophysical observatory) data analysis effort be maintained at the 1983 level;

+$5,000,000 for technology utilization;

−$3,000,000 from the $20,000,000 requested for the numerical aerodynamic simulator (NAS) program. The conferees agree in principle with the language in the Senate report concerning the purchase of computers for the NAS program. However, the conferees have no objection to the replacement of existing computer systems outside the NAS program at the Ames laboratory with new mainframe computers;

+$15,000,000 for advanced turboprop, composite materials and laminar flow control technology of which not less than $10,000,000 shall be derived from the aeronautics research and technology activity;

−$10,000,000 from tracking to be derived from the Tracking and Data Relay Satellite System payment to the Federal Financing Bank;

−$1,000,000 from sub-orbital research program;

−$5,000,000 from shuttle production and capability development to offset the advanced purchase of a shuttle training aircraft in fiscal year 1983 rather than fiscal year 1984;

+$1,000,000 for environmental observations;

+$2,000,000 for materials processing in space;

+$1,000,000 for solid state observations; and

−$15,000,000 as a general unspecified reduction to be applied by the agency in areas other than those augmented above.

Finally, the committee of conference agrees with the new account structure proposed by the Senate which highlights the operational nature of the space shuttle. Transfer authority of up to five percent between the new accounts is provided with approval of the Committees on Appropriations.

Amendment No. 35: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate prohibiting NASA from entering into long-term contractual arrangements with contractors for the lease or purchase of a contractor-funded facility that would substantially amortize such a facility over a period of time.

Amendment No. 36: Appropriates $1,238,500,000 for research and program management, instead of $1,237,500,000 as proposed by the House and $1,242,500,000 as proposed by the Senate.

NATIONAL SCIENCE FOUNDATION

Amendment No. 37: Earmarks $65,000,000 for program development and management instead of $64,500,000 as proposed by the House and $66,500,000 as proposed by the Senate. The conferees urge the Office of Management and Budget to retain ten of the 24 positions proposed for reduction in this account.

Amendment No. 38: Appropriates $1,140,300,000 for research and related activities instead of $1,242,400,000 as proposed by the House and $1,112,600,000 as proposed by the Senate.

The above amount includes the following changes from the budget:

−$20,800,000 from Mathematical and Physical Sciences, Engineering, and Astronomical, Atmospheric, Earth and Ocean Sciences to be applied against these activities at the agency's discretion;

−$1,500,000 from the Societal Response to Earthquake Research program;

−$1,000,000 from Program development and management;

+$15,000,000 for high technology instrumentation to be allocated for new research initiatives laboratory development and technology instruction delivery;

+$1,000,000 for Minority Research Initiation and Research Improvement in Minority Institutions from within the total for research and related activities;
